Research and Professional Practice in Specialised Translation Nov 05 2020 Specialised translation has received very little attention from academic researchers, but in fact accounts for the bulk of professional translation on a global scale and is taught in a growing number of university-level translation programmes. This book aims to provide three things. Firstly, it offers a description of what makes the approach to specialised translation distinctive from wider-ranging approaches to Translation Studies adopted by translation scholars and applied linguists. Secondly, unlike the traditional approach to specialised translation, this book explores a perspective on specialised translation that is much less focused on terminology and more on the function and reception of specialised (translated) texts. Finally, the author outlines a professionally-oriented hands-on approach to the teaching of specialised translation resulting from many years of teaching it to MA students. The book will be of interest to Translation Studies students and scholars, as well as professional translators who are interested in the theory on which their activity is based.

Phraseology Dec 18 2021 Over the last twenty years phraseology has become an important field of pure and applied research in Western European and North American linguistics. In this book the world's leading specialists examine the crucial role played by ready-made word-combinations in language acquisition and adult language use. After a wide-ranging introduction, the book presents full, critical accounts of the main theoretical approaches, analyses the corpus data and phrase typology, and finally considers the application of phraseology to associated disciplines including lexicography, language learning, stylistics, and computational analysis. This is the first comprehensive and up-to-date account of the subject to be published in English.

English for Research: Usage, Style, and Grammar Feb 20 2022 This guide is based on a study of referees' reports and letters from journal editors on the reasons why papers written by non-native researchers are rejected due to problems with English usage, style and grammar. It draws on English-related errors from around 5000 papers written by non-native authors, 500 abstracts by PhD students, and over 1000 hours of teaching researchers how to write and present research papers. English for Research: Usage, Style, and Grammar covers those areas of English usage that typically cause researchers difficulty: articles (a/an, the), uncountable nouns, tenses (e.g., simple present, simple past, present perfect), modal verbs, active vs. passive form, relative clauses, infinitive vs. -ing form, the genitive, noun strings, link words (e.g., moreover, in addition), quantifiers (e.g., each vs. every), word order, prepositions, acronyms, abbreviations, numbers and measurements, punctuation, and spelling. Due to its focus on the specific errors that repeatedly appear in papers written by non-native authors, this manual is an ideal study guide for use in universities and research institutes. The book is cross-referenced with the following titles: • English for Academic Research: Grammar Exercises • English for Academic Research: Vocabulary Exercises • English for Academic Research: Writing Exercises • English for Writing Research Papers Adrian Wallwork is the author of more than 30 English Language Teaching (ELT) and English for Academic Purposes (EAP) textbooks. He has trained several thousand PhD students and researchers from 40 countries to prepare and give presentations. Since 1984 he has been revising research manuscripts through his own proofreading and editing service.

Teaching Translation from Spanish to English Apr 29 2020 While many professional translators believe the ability to translate is a gift that one either has or does not have, Allison Beeby Lonsdale questions this view. In her innovative book, she demonstrates how teachers can guide their students by showing them how insights from communication theory, discourse analysis, pragmatics, and semiotics illuminate the translation process. Challenging long-held assumptions, she establishes a fascinating framework on which to base the structure of a professional prose-translation class. Her original contributions to the question of directionatliy and to the specific strategies of tranlsating are applicable to not only the teaching of translation from Spanish to English, but to other teaching situations and to other pairs of languages as well. She also reviews the latest attempts in translation theory to define and contextualize ideal translator competence, student translator competence, and general translation strategies. Beeby Lonsdale completes her book by applying her conclusions to selecting and organizing the content of teaching translation from Spanish to English. She illustrates one or more of the basic translation principles through 29 teaching units, which are prefaced by objectives, tasks, and commentaries for the teacher, and through 48 task sheets, which show how to present the material to students.

Collocations As a Language Resource Dec 06 2020 The book provides a critical review of the traditional phraseological approach to collocations with its classical categories and its roots in structural and generative linguistics as well as traditional Russian phraseology.

Evaluating R&D Impacts: Methods and Practice Jul 01 2020 A critical issue in research and development (R&D) management is the structure and use of evaluative efforts for R&D programs. The book introduces the different methods that may be used in R&D evaluation and then illustrates these methods by describing actual evaluation in practice using those methods. The book is divided into two sections. The first section provides an introduction and details on several popular methodologies used in the evaluation of research and development activities. The second half of the book focuses on evaluation in practice and is comprised of several chapters offering the perspectives of individuals in different types of organizations. The book concludes with an annotated bibliography of selected R&D evaluation literature, focusing on post-1985 literature, on research evaluation.

A Dictionary of Confusable Phrases Apr 10 2021 Covering over 10,000 idioms and collocations characterized by similarity in their wording or metaphorical idea which do not show corresponding similarity in their meanings, this dictionary presents a unique cross-section of the English language. Though it is designed specifically to assist readers in avoiding the use of inappropriate or erroneous phrases, the book can also be used as a regular phraseological dictionary providing definitions to individual idioms, clichés, and set expressions. Most phrases included in the dictionary are in active current use, making information about their meanings and usage essential to language learners at all levels of proficiency.

The Phraseology of Administrative French Jul 21 2019 The French administrative language of the European Union is an emerging discourse: it is only fifty years old, and has its origins in the French administrative register of the middle of the twentieth century, but it is also a unique contact situation in which translation has always played a pivotal role. Using the methodology of corpus linguistics, and a specially compiled corpus of texts, covering a range of genres, this book describes the current discourse of EU French from the perspective of phraseology and collocational patterning, and in particular in comparison with its French national counterpart. Corpus methodology and an inclusive notion of phraseology, embracing typical formulae, locutions, and patterning around keywords, reveal subtleties and patterns which otherwise remain hidden, and point to a discourse of EU French whose novel context of production has led it to be phraseologically conservative, compared with the administrative French of France.

Collocation - A Linguistic View and Didactic Aspects May 31 2020 Seminar paper from the year 2008 in the subject English Language and Literature Studies - Linguistics, grade: 1,0, University of Paderborn, 19 entries in the bibliography, language: English, abstract: The following paper deals with collocation. The topic is investigated with a linguistic view, but also didactic aspects should not be completely disregarded, because collocation is a very important topic especially for teachers. They have to know which word goes together with which term and how to explain these relationships to their pupils. The collocational aspect will have its meaning explained. Then a description of how collocations are used will follow. The third part of this paper presents Benson's understanding of collocation. He distinguishes between the collocations of different word classes. The first section is about lexical collocations, which contains collocations consisting of nouns, verbs, adverbs and adjectives. Then the most common lexical combinations will have their meaning explained. The first given type of collocation consists of verbs and nouns; the second one deals with the collocations of adjectives and nouns and the third section examines collocations of verbs and adverbs, while the last combination consists of adverbs and adjectives. These combinations are the most common lexical collocations, so others should be disregarded. The different kinds of collocations are examined concerning their behaviour in a sentence and the possibility they suggest to be substituted. After this examination the paper summarizes the structure of grammatical collocation. In the next part, Cowie's understanding of collocation is presented. He distinguishes between restricted and open collocations, which will be explained in this section. The next part of the paper contains some aspects one has to take account of when collocations are translated. Concerning translatability there are three different types of collocations: collocations of complete, partial and of no eq

Phraseology in English Academic Writing Jul 13 2021 This study examines the use of prefabricated language (conventional lexical collocations) in the production of native and non-native writers of English. It first develops a framework for the description of restricted collocations and then reviews experimental research into the psycholinguistic processing of prefabricated language. Computer-based corpora of native and advanced non-native academic writing are analysed to discover to what extent and how such collocations are used in formal written English. Pedagogical implications are then considered, and the final part of the study examines the selection and presentation of restricted collocations in general and phraseological dictionaries for learners. The conclusion suggests that advanced learners need specialist collocational dictionaries, and the results of this research help to establish principles for the design of such dictionaries.

A Valency Dictionary of English Apr 22 2022 This dictionary provides a valency description of English verbs, nouns and adjectives. Each entry contains a comprehensive list of the complementation patterns identified on the basis of the largest corpus of English available at the present time. All examples are taken directly from the COBUILD/Birmingham corpus. The valency description comprises statements about the quantitative valency of the lexical units established, an inventory of their obligatory, contextually optional and purely optional complements as well as systematic information on the semantic and collocational properties of the complements. An outline of the model of valency theory used in this dictionary is provided in the introduction.

Transfiction Jan 07 2021 This volume on Transfiction (understood as an aestheticized imagination of translatorial action) recognizes the power of fiction as a vital and pulsating academic resource, and in doing so helps expand the breadth and depth of TS. The book covers a selection of peer-reviewed papers from the 1st International Conference on Fictional Translators and Interpreters in Literature and Film (held at the University of Vienna, Austria in 2011) and links literary and cinematic works of translation fiction to state-of-the-art translation theory and practice. It presents not just a mixed bag of cutting-edge views and perspectives, but great care has been taken to turn it into a well-rounded transficcionario with a fluid dialogue among its 22 chapters. Its investigation of translatorial action in the mirror of fiction (i.e. beyond the cognitive barrier of 'fact') and its multiple transdisciplinary trajectories make for thought-provoking readings in TS, comparative literature, as well as foreign language and literature courses.

An Analysis of the Knowledge and Use of English Collocations by French and Japanese Learners Sep 15 2021 The present study investigated differences on the knowledge and use of collocations between French and Japanese learners with regard to: 1) L1 influence; and 2) combinability and transparency influence. The test materials included four categories of the lexical collocations: 1) verb + noun; 2) delexicalised verb + noun; 3) adjective + noun; and 4) adverb + adjective. The two types of tasks, Multiple Choice Question Tasks and Translation Tasks, are performed, and the learner corpora are also investigated in order to examine whether the learners from different L1 backgrounds demonstrate different results. Though L1 influence by both French and Japanese learners was demonstrated, the Japanese learners showed a greater L1 influence in the [adjective] noun] category than the French learners. The investigation also found that L1 influence does not necessarily result in accuracy of the collocations. With regard to the combinability and transparency influence, the results of the two types of tasks followed Kellerman's (1978) remark. However, some contrasted results were also identified in learner corpus investigation. Thus the combinability and transparency influence were not necessarily identified. The results of the present study have a potential to improve teaching/learning of collocations through recognizing the learners' tendencies of learning collocations.

Vocabulary Increase and Collocation Learning May 11 2021 This book highlights research that expands on our knowledge of second- language collocation acquisition. It presents original findings based on the largest collocation database to date, encompassing over 8,000 collocations: verb + noun, adjective + noun, and noun + noun. These collocations, collected from a one-million-learner corpus, were not confined to English as a foreign language (EFL) learners at a particular proficiency level, but also included learners at three levels. As such, the book provides a panoramic view regarding L2 collocation acquisition, not only in terms of learners' acquisition of different types of collocations, but in terms of the developmental patterns in L2 collocation learning. One major discovery is that there is a collocation lag as learners' proficiency levels rise, which is associated with vocabulary increase, in particular semantic domains—a remarkable insight for second-language acquisition researchers, English teachers and EFL learners alike. The findings reported shed new light on how collocations are acquired by EFL learners, offering guidance on how they can best be taught. In closing, the book discusses pedagogical aspects that arise from considering how learners can be helped with collocation learning.

The Frameworks of English Dec 26 2019 How does language work? What are the different elements? How do they all fit together? The Frameworks of English is a step-by-step guide through the various levels of language, describing the morphological, lexical, grammatical and phonological frameworks of contemporary English in a clear and logical way. Beginning with words as the building blocks of language, it investigates their internal structure and shows how words can be combined into larger and larger units, from phrases to sentences and beyond. The sound system of language is explored, covering the production of individual sounds as well as the features of syllable structure and connected speech. The third edition of this popular textbook: - Features a new chapter on how to approach accent and dialect variation in English throughout the world - Includes both spoken and written examples of electronically mediated language - Offers updated suggestions for further reading and research

Collocations in a Learner Corpus Aug 22 2019 Collocations are both pervasive in language and difficult for language learners, even at an advanced level. In this book, these difficulties are for the first time comprehensively investigated. On the basis of a learner corpus, idiosyncratic collocation use by learners is uncovered, the building material of learner collocations examined, and the factors that contribute to the difficulty of certain groups of collocations identified. An extensive discussion of the implications of the results for the foreign language classroom is also presented, and the contentious issue of the relation of corpus linguistic research and language teaching is thus extended to learner corpus analysis.

Lexicographic Description of English Jan 27 2020 Designed to help lexicographers compile better dictionaries of English, this book provides information about the language that is not available in any other single source. It is the first serious attempt to describe in detail the lexical and grammatical differences between American and British English and offers a trailblazing solution to the vexing problem of how to treat General American and British RP pronunciation in the same dictionary with the help of a Simplified Transcription for which any typewriter keyboard can be adapted and a pioneering description of the principles concerning the treatment of fixed grammatical and lexical collocations in future general-purpose dictionaries of English.

Grammar for Teachers Mar 21 2022 Updated and revised with more examples and expanded discussions, this second edition continues the aim of providing teachers with a solid understanding of the use and function of grammatical structures in American English. The book avoids jargon and presents essential grammatical structures clearly and concisely. Dr. DeCapua approaches grammar from a descriptive rather than a prescriptive standpoint, discussing differences between formal and informal language, and spoken and written English. The text draws examples from a wide variety of authentic materials to illustrate grammatical concepts. The many activities throughout the book engage users in exploring the different elements of grammar and in considering how these elements work together to form meaning. Users are encouraged to tap into their own, often subconscious, knowledge of grammar to consciously apply their knowledge to their own varied teaching settings. The text also emphasizes the importance of understanding grammar from the perspective of English language learners, an approach that allows teachers to better appreciate the difficulties these learners face. Specific areas of difficulties for learners of English are highlighted throughout.

Nineteen Ways of Looking at Wang Wei (with More Ways) Feb 08 2021 A new expanded edition of the classic study of translation, finally back in print The difficulty (and necessity) of translation is concisely described in Nineteen Ways of Looking at Wang Wei, a close reading of different translations of a single poem from the Tang Dynasty—from a transliteration to Kenneth Rexroth's loose interpretation. As Octavio Paz writes in the afterword, "Eliot Weinberger's commentary on the successive translations of Wang Wei's little poem illustrates, with succinct clarity, not only the evolution of the art of translation in the modern period but at the same time the changes in poetic sensibility."
