The Little Red Writing Book Aug 12 2021 For Writing Aficionados from All Walks of Life This book is based on a simple but powerful observation: Students and young professionals who develop outstanding writing skills do so primarily by mastering a limited number of the most important writing principles, which they use over and over again. This statement begs the question: What are these recurring principles? The answer to this question is the basis of this material. "The Little Red Writing Book" is especially suitable for high school students wanting to master the basics of expository writing. It is also suitable for college students seeking a review of basic writing skills. A wealth of examples, charts, and engaging exercises makes this book an invaluable guide for anyone who wants to master those skills that will make a good writer even better. Brandon Royal is an award-winning writer whose educational authorship includes "The Little Gold Grammar Book, The Little Red Writing Book Deluxe Edition, The Little Green Math Book, The Little Blue Reasoning Book, " and "Reasoning with Numbers." During his tenure working in Hong Kong for US-based Kaplan Educational Centers a Washington Post subsidiary and the largest test-preparation organization in the world Brandon honed his theories of teaching and education and developed a set of key learning principles to help define the basics of writing, grammar, math, and reasoning. A Canadian by birth and graduate of the University of Chicago Booth School of Business, his interest in writing began after completing writing courses at Harvard University. Since then he has authored a dozen books and reviews of his books have appeared in "Time Asia" magazine, "Publishers Weekly, Library Journal of America, Midwest Book Review, The Asian Review of Books, Choice Reviews Online, Asia Times Online, " and About.com. Brandon is a five-time winner of the International Book Awards, a five-time gold medalist at the President's Book Awards, as well as a winner of the Global eBook Awards, the USA Book News Best Book Awards, and recipient of the 2011 Educational Book of the Year award as presented by the Book Publishers Association of Alberta. The articulate exposition of Royal's twenty principles of writing fit neatly into 128 short, accessible (paperback) pages. I recommend this wonder to all my writing students. Perhaps one day writing committees will wisely follow suit and make this a primary text for all writing courses at their schools. --Ray Turner, B.A., MA (Communications), Writing Instructor and Former Educational Administrator, Corpus Christi TX, USA

Learn Library of Congress Subject Access (International Edition) Apr 20 2022 "Learn Library of Congress subject access" covers the skills necessary for a subject cataloger in a library or information agency, whether at a professional or a paraprofessional level. It is suitable for use by librarianship students, and for those studying subject cataloging by themselves as part of their continuing professional development. Since most catalogs provide some subject access, it is important for all library students and most library staff to be familiar with at least the basics of subject cataloging. This book introduces students to the concepts of subject analysis and subject description. It provides practical guidance on identifying important topics and allocating appropriate terms to describe them. Since Library of Congress subject headings (LCSH) is the most widely used subject headings list worldwide, the main focus of the book is on effectively using this scheme. A mastery of Library of Congress subject headings will assist catalogers using any subject headings scheme. This first international edition of Learn Library of Congress subject access builds on previous Australian and North American editions, with a broader range of exercises and more information on chronological, geographic and name headings. A new chapter explains the features of Library of Congress' online product, Classification Web, and how it can be used for efficiently searching LCSH. Throughout the text there are exercises to practise and test new skills, with answers for self-checking at the back of the book. You may not always agree completely with the answers given, and it is useful to check them with a teacher or experienced cataloger. Always bear in mind that there is often room for more than one interpretation or emphasis, particularly in the area of subject analysis. LCSH is continually updated to include new concepts and incorporate revisions to existing headings. Answers to exercises reflect current practices as recorded in the 37th (2015) edition of Library of Congress subject

headings and the online version of the Subject headings manual. Your answers may vary slightly if other editions of the scheme are used. Throughout the text, references have been made to relevant sections of the Subject headings manual by way of the section numbers-e.g., Free-Floating Subdivisions (H 1095). "Note on Spelling and Capitalization" This book is used in North America, Europe and Australasia, across countries that employ different spelling conventions for English words. For consistency, American spelling has been adopted for the text. Titles included in the text are capitalized according to standard library cataloging practice-that is, apart from names, only the first word of the title has a capital letter. This is intended to accustom library students and staff to this style.
