The Color of Race in America, 1900-1940 Jun 24 2022 With the social change brought on by the Great Migration of African Americans into the urban northeast after the Great War came the surge of a biracial sensibility that made America different from other Western nations. How white and black people thought about race and how both groups understood and attempted to define and control the demographic transformation are the subjects of this new book by a rising star in American history. An elegant account of the roiling environment that witnessed the shift from the multiplicity of white races to the arrival of biracialism, this book focuses on four representative spokesmen for the transforming age: Daniel Cohalan, the Irish-American nationalist, Tammany Hall man, and ruthless politician; Madison Grant, the patrician eugenicist and noisy white supremacist; W. E. B. Du Bois, the African-American social scientist and advocate of social justice; and Jean Toomer, the American pluralist and novelist of the interior life. Race, politics, and classification were their intense and troubling preoccupations in a world they did not create, would not accept, and tried to change.

The Republic of Color Mar 21 2022 The Republic of Color delves deep into the history of color science in the United States to unearth its origins and examine the scope of its influence on the industrial transformation of turn-of-the-century America. For a nation in the grip of profound economic, cultural, and demographic crises, the standardization of color became a means of social reform—a way of sculpting the American population into one more amenable to the needs of the emerging industrial order. Delineating color was also a way to characterize the vagaries of human nature, and to create ideal structures through which those humans would act in a newly modern American republic. Michael Rossi's compelling history goes far beyond the culture of the visual to show readers how the control and regulation of color shaped the social contours of modern America—and redefined the way we see the world.

Racism without Racists Aug 14 2021 In this book, Bonilla-Silva explores with systematic interview data the nature and components of post-civil rights racial ideology. Specifically, he documents the existence of a new suave and apparently non-racial racial ideology he labels color-blind racism. He suggests this ideology, anchored on the decontextualized, ahistorical, and abstract extension of liberalism to racial matters, has become the organizational matrix whites use to explain and account for racial matters in America.

The Color of Christ Nov 05 2020 Explores the dynamic nature of Christ worship in the U.S., addressing how his image has been visually remade to champion the causes of white supremacists and civil rights leaders alike, and why the idea of a white Christ has endured.

Color Matters Nov 24 2019 In the United States, as in many parts of the world, people are discriminated against based on the color of their skin. This type of skin tone bias, or colorism, is both related to and distinct from discrimination on the basis of race, with which it is often conflated. Preferential treatment of lighter skin tones over darker occurs within racial and ethnic groups as well as between them. While America has made progress in issues of race over the past decades, discrimination on the basis of color continues to be a constant and often unremarked part of life. In *Color Matters*, Kimberly Jade Norwood has collected the most up-to-date research on this insidious form of discrimination, including perspectives from the disciplines of history, law, sociology, and psychology. Anchored with historical chapters that show how the influence and legacy of slavery have shaped the treatment of skin color in American society, the contributors to this volume bring to light the ways in which colorism affects us all--influencing what we wear, who we see on television, and even which child we might pick to adopt. Sure to be an eye-opening collection for anyone curious about how race and color continue to affect society, *Color Matters* provides students of race in America with wide-ranging overview of a crucial topic.

Pigmentocracies Dec 06 2020 Pigmentocracies--the fruit of the multiyear Project on Ethnicity and Race in Latin America (PERLA)--is a richly revealing analysis of contemporary attitudes toward ethnicity and race in Brazil, Colombia, Mexico, and Peru, four of Latin America's most populous nations. Based on extensive, original sociological and anthropological data generated by PERLA, this landmark study analyzes ethnoracial classification, inequality, and discrimination, as well as public opinion about Afro-descended and indigenous social movements and policies that foster greater social inclusiveness, all set within an ethnoracial history of each country. A once-in-a-generation examination of contemporary ethnicity, this book promises to contribute in significant ways to policymaking and public opinion in Latin America. Edward Telles, PERLA's principal investigator, explains that profound historical and political forces, including multiculturalism, have helped to shape the formation of ethnic identities and the nature of social relations within and across nations. One of Pigmentocracies's many important conclusions is that unequal social and economic status is at least as much a function of skin color as of ethnoracial identification. Investigators also found high rates of discrimination by color and ethnicity widely reported by both targets and witnesses. Still, substantial support across countries was found for multicultural-affirmative policies--a notable result given that in much of modern Latin America race and ethnicity have been downplayed or ignored as key factors despite their importance for earlier nation-building.

The Color of America Has Changed Aug 26 2022 From the moment that the attack on the "problem of the color line," as W.E.B. DuBois famously characterized the problem of the twentieth century, began to gather

momentum nationally during World War II, California demonstrated that the problem was one of color lines. In *The Color of America Has Changed*, Mark Brilliant examines California's history to illustrate how the civil rights era was a truly nationwide and multiracial phenomenon—one that was shaped and complicated by the presence of not only blacks and whites, but also Mexican Americans, Japanese Americans, and Chinese Americans, among others. Focusing on a wide range of legal and legislative initiatives pursued by a diverse group of reformers, Brilliant analyzes the cases that dismantled the state's multiracial system of legalized segregation in the 1940s and subsequent battles over fair employment practices, old-age pensions for long-term resident non-citizens, fair housing, agricultural labor, school desegregation, and bilingual education. He concludes with the conundrum created by the multiracial affirmative action program at issue in the United States Supreme Court's 1978 *Regents of the University of California v. Bakke* decision. The Golden State's status as a civil rights vanguard for the nation owes in part to the numerous civil rights precedents set there and to the disparate challenges of civil rights reform in multiracial places. While civil rights historians have long set their sights on the South and recently have turned their attention to the North, advancing a "long civil rights movement" interpretation, Mark Brilliant calls for a new understanding of civil rights history that more fully reflects the racial diversity of America.

The Coloring Book May 23 2022 From former SNL "Weekend Update" host and legendary stand-up Colin Quinn comes a controversial and laugh-out-loud investigation into cultural and ethnic stereotypes. Colin Quinn has noticed a trend during his decades on the road—that Americans' increasing political correctness and sensitivity have forced us to tiptoe around the subjects of race and ethnicity altogether. Colin wants to know: What are we all so afraid of? Every ethnic group has differences, everyone brings something different to the table, and this diversity should be celebrated, not denied. So why has acknowledging these cultural differences become so taboo? In *The Coloring Book*, Colin, a native New Yorker, tackles this issue head-on while taking us on a trip through the insane melting pot of 1970s Brooklyn, the many, many dive bars of 1980s Manhattan, the comedy scene of the 1990s, and post-9/11 America. He mixes his incredibly candid and hilarious personal experiences with no-holds-barred observations to definitively decide, at least in his own mind, which stereotypes are funny, which stereotypes are based on truths, which have become totally distorted over time, and which are actually offensive to each group, and why. As it pokes holes in the tapestry of fear that has overtaken discussions about race, *The Coloring Book* serves as an antidote to our paralysis when it comes to laughing at ourselves . . . and others.

Whispers on the Color Line May 11 2021 A Northwestern University professor of Sociology cruises the nation's color line in search of the myths, rumors, urban legends, and half truths that cloud relations between the races.

The Color of Culture Sep 22 2019 Utilizing written sources as well as nationally representative survey data, Daniel H. Krymkowski analyzes the extent and causes of African American underrepresentation in the cultural realms of golf, hiking, hunting and fishing, water sports, winter sports, classical music, painting and sculpture, ballet, and the theater. African American participation significantly lags behind that of non-Hispanic whites in all of these areas, and it is not due to an aversion to these types of activities. Rather, as Krymkowski shows, its primary sources are racial-ethnic socioeconomic differences, as well as historic and contemporary discrimination, both overt and subtle. These causes are rooted in the systemic racism that continues to plague the United States. The lack of opportunity to participate in such cultural forms deprives African Americans of aesthetic experiences that are central to the human condition, and it has implications for both health and the accumulation of cultural and social capital. Krymkowski also explores current efforts to increase African American representation in these areas of culture and discusses the benefits of doing so.

White Fragility Apr 29 2020 The International Bestseller 'With clarity and compassion, DiAngelo allows us to understand racism as a practice not restricted to "bad people." In doing so, she moves our national discussions forward. This is a necessary book for all people invested in societal change' Claudia Rankine Anger. Fear. Guilt. Denial. Silence. These are the ways in which ordinary white people react when it is pointed out to them that they have done or said something that has - unintentionally - caused racial offence or hurt. After, all, a racist is the worst thing a person can be, right? But these reactions only serve to silence people of colour, who cannot give honest feedback to 'liberal' white people lest they provoke a dangerous emotional reaction. Robin DiAngelo coined the term 'White Fragility' in 2011 to describe this process and is here to show us how it serves to uphold the system of white supremacy. Using knowledge and insight gained over decades of running racial awareness workshops and working on this idea as a Professor of Whiteness Studies, she shows us how we can start having more honest conversations, listen to each other better and react to feedback with grace and humility. It is not enough to simply hold abstract progressive views and condemn the obvious racists on social media - change starts with us all at a practical, granular level, and it is time for all white people to take responsibility for relinquishing their own racial supremacy. 'By turns mordant and then inspirational, an argument that powerful forces and tragic histories stack the deck fully against racial justice alongside one that we need only to be clearer, try harder, and do better' David Roediger, Los Angeles Review of Books 'The value in *White Fragility* lies in its methodical, irrefutable exposure of racism in thought and action, and its call for humility and vigilance' Katy Waldman, New Yorker 'A vital, necessary, and beautiful book' Michael Eric Dyson

The Accident of Color: A Story of Race in Reconstruction Jun 12 2021 A technicolor history of the first civil rights movement and its collapse into black and white. In *The Accident of Color*, Daniel Brook journeys to nineteenth-century New Orleans and Charleston and introduces us to cosmopolitan residents who elude the racial categories the rest of America takes for granted. Before the Civil War, these free, openly mixed-race urbanites enjoyed some rights of citizenship and the privileges of wealth and social status. But after Emancipation, as former slaves move to assert their rights, the black-white binary that rules the rest of the nation begins to intrude. During Reconstruction, a movement arises as mixed-race elites make common cause with the formerly enslaved and allies at the fringes of whiteness in a bid to achieve political and social equality for all. In some areas, this coalition proved remarkably successful. Activists peacefully integrated the streetcars of Charleston and New Orleans for decades and, for a time, even the New Orleans public schools and the

University of South Carolina were educating students of all backgrounds side by side. Tragically, the achievements of this movement were ultimately swept away by a violent political backlash and expunged from the history books, culminating in the Jim Crow laws that would legalize segregation for a half century and usher in the binary racial regime that rules us to this day. The Accident of Color revisits a crucial inflection point in American history. By returning to the birth of our nation's singularly narrow racial system, which was forged in the crucible of opposition to civil rights, Brook illuminates the origins of the racial lies we live by.

The Color of Success Nov 17 2021 The Color of Success tells of the astonishing transformation of Asians in the United States from the "yellow peril" to "model minorities"--peoples distinct from the white majority but lauded as well-assimilated, upwardly mobile, and exemplars of traditional family values--in the middle decades of the twentieth century. As Ellen Wu shows, liberals argued for the acceptance of these immigrant communities into the national fold, charging that the failure of America to live in accordance with its democratic ideals endangered the country's aspirations to world leadership. Weaving together myriad perspectives, Wu provides an unprecedented view of racial reform and the contradictions of national belonging in the civil rights era. She highlights the contests for power and authority within Japanese and Chinese America alongside the designs of those external to these populations, including government officials, social scientists, journalists, and others. And she demonstrates that the invention of the model minority took place in multiple arenas, such as battles over zoot suiters leaving wartime internment camps, the juvenile delinquency panic of the 1950s, Hawaii statehood, and the African American freedom movement. Together, these illuminate the impact of foreign relations on the domestic racial order and how the nation accepted Asians as legitimate citizens while continuing to perceive them as indelible outsiders. By charting the emergence of the model minority stereotype, The Color of Success reveals that this far-reaching, politically charged process continues to have profound implications for how Americans understand race, opportunity, and nationhood.

The Color of Law: A Forgotten History of How Our Government Segregated America Jul 25 2022 New York Times Bestseller • Notable Book of the Year • Editors' Choice Selection One of Bill Gates' "Amazing Books" of the Year One of Publishers Weekly's 10 Best Books of the Year Longlisted for the National Book Award for Nonfiction An NPR Best Book of the Year Winner of the Hillman Prize for Nonfiction Gold Winner • California Book Award (Nonfiction) Finalist • Los Angeles Times Book Prize (History) Finalist • Brooklyn Public Library Literary Prize This "powerful and disturbing history" exposes how American governments deliberately imposed racial segregation on metropolitan areas nationwide (New York Times Book Review). Widely heralded as a "masterful" (Washington Post) and "essential" (Slate) history of the modern American metropolis, Richard Rothstein's The Color of Law offers "the most forceful argument ever published on how federal, state, and local governments gave rise to and reinforced neighborhood segregation" (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, "virtually indispensable" study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), The Color of Law forces us to face the obligation to remedy our unconstitutional past.

We Gon' Be Alright Feb 20 2022 "THE SMARTEST BOOK OF THE YEAR" (THE WASHINGTON POST) In these provocative, powerful essays acclaimed writer/journalist Jeff Chang (Can't Stop Won't Stop, Who We Be) takes an incisive and wide-ranging look at the recent tragedies and widespread protests that have shaken the country. Through deep reporting with key activists and thinkers, passionately personal writing, and distinguished cultural criticism, We Gon' Be Alright links #BlackLivesMatter to #OscarsSoWhite, Ferguson to Washington D.C., the Great Migration to resurgent nativism. Chang explores the rise and fall of the idea of "diversity," the roots of student protest, changing ideas about Asian Americanness, and the impact of a century of racial separation in housing. He argues that resegregation is the unexamined condition of our time, the undoing of which is key to moving the nation forward to racial justice and cultural equity.
