Understanding American Politics, Second Edition Nov 22 2021 Understanding American Politics provides a unique introduction to the contemporary political landscape of the United States by using as its core organizing feature the idea of "American exceptionalism," a concept that is at least as old as Tocqueville's study of American democracy. The second edition of Understanding American Politics maintains the unique strengths of the first edition while offering improved coverage of political institutions. A single omnibus chapter on institutions has been reorganized and split into three separate chapters on Congress, the presidency, and the courts. A new chapter on public opinion has also been included, and the chapter on religion and politics has been completely rewritten with a deeper appreciation of religion's influential role. The book has been revised throughout, taking into account the dramatic changes that have emerged since the 2010 congressional elections and the 2012 presidential election. The text also pays close attention to what is seen as the irreversible decline in America's global influence. Visit www.utpamericanpolitics.com for additional resources.

Reinforcement Learning, second edition Sep 08 2020 The significantly expanded and updated new edition of a widely used text on reinforcement learning, one of the most active research areas in artificial intelligence. Reinforcement learning, one of the most active research areas in artificial

intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. This second edition has been significantly expanded and updated, presenting new topics and updating coverage of other topics. Like the first edition, this second edition focuses on core online learning algorithms, with the more mathematical material set off in shaded boxes. Part I covers as much of reinforcement learning as possible without going beyond the tabular case for which exact solutions can be found. Many algorithms presented in this part are new to the second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis, and offers expanded treatment of off-policy learning and policy-gradient methods. Part III has new chapters on reinforcement learning's relationships to psychology and neuroscience, as well as an updated case-studies chapter including AlphaGo and AlphaGo Zero, Atari game playing, and IBM Watson's wagering strategy. The final chapter discusses the future societal impacts of reinforcement learning.

Systems of Violence, Second Edition Mar 27 2022 Expanded new edition of an important study of the protracted violence in Colombia. This book examines the political, economic, and military factors that have contributed to decades of violent conflict in Colombia during one of the longest protracted civil wars in the world. Using four years of field research, and more than two hundred interviews, Nazih Richani examines Colombia's war system—the systemic interlacing relationship among actors in conflict, their respective political economy, and also the overall political economy of the system they help in creating. Several key questions are raised, including when and why do some conflicts protract, and what types of socioeconomic and political configurations make peaceful resolutions difficult to obtain? Also addressed are the lessons of other protracted conflicts, such as those found in Lebanon, Angola, and Italy. In this expanded second edition Richani contributes new chapters looking at developments in Colombia since the book's initial publication a decade ago and a look at the challenges for peace that lie ahead.

Beyond Leveled Books Jan 13 2021 In the first edition of *Beyond Leveled Books*, Franki Sibberson and Karen Szymusiak, offered a much-needed perspective on moving transitional readers from the basic supports of leveling to independent book selection. Seven years later, drawing on their continued research and expanding roles as authors and literacy consultants, Franki and Karen, along with colleague Lisa Koch, present a new updated and expanded edition of this "useful and eye-opening book." *Education Reviews*, 2001] In *Beyond Leveled Books, Second Edition* the authors provide even more resources to help teachers understand and meet the needs of transitional readers. The key topic of series books has been revised and enlarged, with charts outlining new series with the challenges they pose and supports readers need. New lessons have been added, and most chapters now include a related article from a literacy expert. Some of the contributors include Kathy Collins, Larry Swartz, and Mary Lee Hahn. The book also features an entirely new section covering grades K-1, that explores the uses and limitations of leveled texts in primary reading instruction. Lies, Damned Lies, and Drug War Statistics, Second Edition Sep 20 2021 Revised and updated edition that analyses how the Office of National Drug Control Policy employs statistics to misleadingly claim the War on Drugs is a success. First published in 2007, *Lies, Damned Lies, and Drug War Statistics* critically analyzed claims made by the Office of National Drug Control Policy (ONDCP), the White House agency of accountability in the nation's drug war since 1989, as found in the six editions of the annual National Drug Control Strategy between 2000 and 2005. In this revised and updated second edition of their critically acclaimed work, Matthew B. Robinson and Renee G. Scherlen examine seven more recent editions (2006-2012) to once again determine if ONDCP accurately and honestly presents information or intentionally distorts evidence to justify continuing the drug war. They uncover the many ways in which ONDCP manipulates statistics and visually presents that information to the public. Their analysis demonstrates a drug war that consistently fails to reduce drug use, drug fatalities, or illnesses associated with drug use; fails to provide treatment for drug-dependent users; and drives up the prices of drugs. They conclude with policy recommendations for reforming ONDCP's use of statistics, as well as how the nation fights the war on drugs. At Appalachian State University, Matthew B. Robinson is Professor of Criminal Justice and Criminology. Robinson is the author of several books, including *Media Coverage of Crime and Criminal Justice*. Renee G. Scherlen, is Professor of Political Science at Appalachian State University.

Black Haze, Second Edition Feb 23 2022 Expanded and revised edition of the first book devoted solely to black fraternity hazing. Are black men

naturally violent? Do they define manhood in the same way as their counterparts across lines of race? Are black Greek-letter fraternities among the most dangerous student organizations on American college and university campuses? Can their often-dangerous initiation processes be stopped or even modified and, if not, what should be done about them? In this second edition of *Black Haze*, Ricky L. Jones takes on these questions and more. The first edition was an enlightening and sometimes disturbing examination of American men's quest for acceptance, comfort, reaffirmation, and manhood in a world where their footing is often unstable. In this new edition Jones not only provides masterful philosophical and ethical analyses but he also forces the engagement of a terrifying real world process that damages and kills students with all too frequent regularity. With a revealing new preface and stunning afterword, Jones immerses the reader in an intriguing and dark world marked by hypermasculinity, unapologetic brutality, and sometimes death. He offers a compelling book that ranges well beyond the subject of hazing—one that yields perplexing questions and demands difficult choices as we move forward in addressing issues surrounding fraternities, violent hazing, black men, and American society. Ricky L. Jones is Professor and Chair of the Department of Pan-African Studies at the University of Louisville and the author of *What's Wrong with Obamamania? Black America, Black Leadership, and the Death of Political Imagination*, also published by SUNY Press.

From Dissertation to Book, Second Edition Nov 03 2022 When a dissertation crosses my desk, I usually want to grab it by its metaphorical lapels and give it a good shake. "You know something!" I would say if it could hear me. "Now tell it to us in language we can understand!" Since its publication in 2005, *From Dissertation to Book* has helped thousands of young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers. Now revised and updated to reflect the evolution of scholarly publishing, this edition includes a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that meets the broader expectations of readers rather than the narrow requirements of academic committees. At the heart of *From Dissertation to Book* is the idea that revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience—a committee or advisors—to those of a broader scholarly audience that wants writing to be both informative and engaging. William Germano offers clear guidance on how to do this, with advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a book that an audience will actually enjoy, whether reading on a page or a screen. Germano also acknowledges that not all dissertations can or even should become books and explores other, often overlooked, options, such as turning them into journal articles or chapters in an edited work. With clear directions, engaging examples, and an eye for the idiosyncrasies of academic writing, *From Dissertation to Book* reveals to recent PhDs the secrets of careful and thoughtful revision—a skill that will be truly invaluable as they add "author" to their curriculum vitae.

Human Development and Faith (Second Edition) Apr 15 2021 This book, now in its second edition, brings together the best available understandings of human development from a multidisciplinary perspective. Uniquely inclusive of the moral and faith dimensions of context and life-cycle development, Human Development and Faith examines the interplay of mind, body, family, community, and soul at every stage of development. It addresses two central questions: What are the "good-enough" conditions of parenting, family, and community in each phase of life, from birth to death, that support growth and development? What gives life adequate meaning as development proceeds? If human development describes the normative and hoped-for passages of life, then faith provides the necessary component of meaning. Throughout the various perspectives offered in this volume is the premise that faith is that quality of living that makes it possible to fully live. The Journal of Pastoral Theology called the first edition of Human Development and Faith "an excellent text for pastoral theology courses, because it fulfills its ambitious goal of bringing a holistic faith perspective to the usual topics of development." This second edition includes a new chapter on infancy, updates reflecting our growing awareness of cultural diversity, and a new preface.
