[Making Global MBAs](#) Nov 25 2021 A generation of aspiring business managers has been taught to see a world of difference as a world of opportunity. In Making Global MBAs, Andrew Orta examines the culture of contemporary business education, and the ways MBA programs participate in the production of global capitalism through the education of the business subjects who will be managing it. Based on extensive field research in several leading US business schools, this groundbreaking ethnography exposes what the culture of MBA training says about contemporary understandings of capitalism in the context of globalization. Orta details the rituals of MBA life and the ways MBA curricula cultivate both habits of fast-paced technical competence and 'softer' qualities and talents thought to be essential to unlocking the value of international cultural difference while managing its risks. Making Global MBAs provides an essential critique of neoliberal thinking for students and professionals in a wide variety of fields.

The Joy of Accounting Oct 01 2019 Discover a new, graphical way to conquer accounting. HOW THIS BOOK IS DIFFERENT AND DELIVERS RESULTS The Joy of Accounting uses a revolutionary method of teaching that universities and businesses are raving about. "...has the advantage of showing how accounting works visually. ...I believe that it is of value to anyone who is interested in understanding how accounting works (from high school students to undergrads to MBAs to business executives)." - Paul Healy, James R. Williston Professor of Business Administration, Harvard Business School The Joy of Accounting is different. It uses a diagram that shows accounting on a single page. The game-changing Color Accounting BaSIS Framework makes learning as simple as pointing a finger. The book is easy to read and fun, yet deeply rigorous. IS IT REALLY REVOLUTIONARY? Yes, the Color Accounting BaSIS Framework(TM) does for accounting what the mouse did for computers. When Apple introduced the Macintosh computer everyone could suddenly use one. The Joy of Accounting system makes accounting literacy available to anyone. INCLUDES - An idiot-proof step-by-step sequence to follow - Over 150 full-color diagrams - Working capital, cash flow, liquidity, leverage, efficiency metrics, receivables management and depreciation. BENEFITS OF THIS APPROACH - Confidently read balance sheets and income statements - Take control of your profitability, cash flow and growth - Budget effectively - Revisit previous accounting studies for deeper understanding WHO IS THIS BOOK FOR? - Managers wanting to take control of their business - High school, home school and university students - School teachers and university lecturers looking for new ways of explaining - Sales people wanting to pitch more successfully by using financial drivers
[Financial Accounting: The Impact on Decision Makers](#) Jul 30 2019 Porter/Norton is a transitional text known for its readability, straightforwardness, decision-making focus, and the incorporation of flagship companies. The authors were careful in the new fifth edition to keep the focus on the basics. The authors have eliminated confusing and redundant elements. The result is an uncluttered, straightforward, and concise financial accounting textbook. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
Ten-day MBA, The, Rev. Aug 30 2019 Steven Silbiger has distilled the material of the ten most popular business schools in order to teach readers the language of business. At the rate of one easy-to-understand chapter a day, this book will enable readers to absorb the material, speak the language, and, most importantly, acquire the confidence and expertise needed to get ahead in the competitive business world.

[Financial Accounting](#) Aug 11 2020 Management Accounting has two broad branches Financial Accounting and Cost Accounting. This book covers the first aspect of Management Accounting. Financial Accounting A Managerial Emphasis seeks to delve deep into all the aspects of Financial Accounting from a manager's perspective. The objective is to present the concepts, applications and practices of Financial Accounting in such a manner that even those readers having no prior exposure to the subject can understand its theory and practice. A manager is more interested in understanding various elements in financial statements and thereby being able to analyze and interpret the financial health of a business entity on the basis of financial statements. This apart, readers will also become thoroughly acquainted with the financial disclosure practices followed in India. The highlights of the book are discussions on: Accounting Standards in India | Understanding Published Financial Statements | Inventory Valuation and Depreciation Accounting | Cash Flow Reporting and Interpretation | Financial Statements Analysis I Intra-firm and Inter-firm Comparisons | Consolidated Financial Statements | Valuation Techniques | Accounting for Amalgamations | Selected Solved and Unsolved Cases New to the Second Edition | Financial Statements Analysis by Banks | Investment Accounting for Banks | Accounting for Share buyback | ESOP Accounting

[Gender and Finance](#) Feb 14 2021 "This book examines the world of finance and the role of gender within it. It looks at the financial services industry, arguably the most powerful and remunerative sector that exists, and shows how it was created by men for men. The author explains how historically women were excluded, how minimal progress has been made, and outlines how the sector still needs to change in order to function effectively in a modern, equal opportunities world. Gender inequality in financial services is of utmost urgency and importance because of the extent to which it affects women in all stages of life. Women's exclusion in financial services is also mirrored by how men have been excluded from parenting through a similar set of societal expectations, government legislation and corporate policies. The author maintains that to succeed we need to address both financial services and parenting. To do so we need regulatory support. Because of its power and dominance, the financial services industry has the opportunity to lead this change and to champion gender equal practices. These practices are economically beneficial to all participants, not only female employees and consumers. We all need these benefits as we rebuild our economies following the Covid-19 pandemic. The book makes an important contribution to the critical and increasing awareness of gender concerns. It presents insights drawn from original research and data about gender biases. The book is an essential secondary text for a range of university courses, including economics, finance and accounting, business studies and gender related courses, as well as MBAs and Executive Education programmes that focus on gender in business. It is also a must read for policy makers, managers in financial services institutions and any other businesses that seek to attract the growing market of female consumers, employees and business leaders"--

What the Best MBAs Know Jul 22 2021 A professor of business and economics outlines the skills and knowledge necessary for success in an M.B.A. program, presenting companion focused review questions and boxes discussing real-world scenarios. 15,000 first printing.
7 Powers Mar 06 2020 7 Powers details a strategy toolset that enables you to build an enduringly valuable company. It was developed by Hamilton Helmer drawing on his decades of experience as a strategy advisor, equity investor and Stanford University teacher. This is must reading for any business person and applies to all businesses, new or mature, large or small.
Next Generation Excel Feb 26 2022 Take Excel to the next level in accounting and financial modeling In this new Second Edition of Next Generation Excel, Isaac Gottlieb shows financial analysts how to harness the full power of Excel to move forward into the new world of accounting and finance. Companies of all sizes use financial models to analyze their finances and plan business operations, as well as to create financial accounting reports like balance sheets, income statements, and statements of cash flows. While many businesspeople are quite familiar with the reports created with financial models, most are not as familiar with the creation of the models themselves. This book shows them how to build an accurate and effective financial model using the solid functionality and easy usability of Excel. Fully updated and revised to include support for Apple users Written by a professor of management and statistics who has taught the discipline for fifteen years Appropriate for professional financial analysts, as well as MBA students For professionals and students whose responsibilities or studies include a full understanding of financial modeling, Next Generation Excel, Second Edition offers comprehensive training.

[Python for MBAs](#) Jun 20 2021 From the ads that track us to the maps that guide us, the twenty-first century runs on code. The business world is no different. Programming has become one of the fastest-growing topics at business schools around the world. An increasing number of MBAs are choosing to pursue careers in tech. For them and other professionals, having some basic coding knowledge is a must. This book is an introduction to programming with Python for MBA students and others in business positions who need a crash course. One of the most popular programming languages, Python is used for tasks such as building and running websites, data analysis, machine learning, and natural-language processing. Drawing on years of experience providing instruction in this material at Columbia Business School, as well as extensive backgrounds in technology, entrepreneurship, and consulting, Mattan Griffel and Daniel Guetta teach the basics of programming from scratch. Beginning with fundamentals such as variables, strings, lists, and functions, they build up to data analytics and practical ways to derive value from large and complex datasets. They focus on business use cases throughout, using the real-world example of a major restaurant chain to offer a concrete look at what Python can do. Written for business students with no previous coding experience and those in business roles that include coding or working with coding teams, Python for MBAs is an indispensable introduction to a versatile and powerful programming language.

[Operations and Supply Chain Management for MBAs](#) Oct 25 2021 The seventh edition of Operations and Supply Chain Management for MBAs is the definitive introduction to the fundamental concepts of supply chain and operations management. Designed specifically to meet the needs of MBA students, this market-leading book offers clear presentation of topics such process planning and design, capacity and location planning, schedule and inventory management, and enterprise resource planning. A strategic, conceptual approach helps readers comprehend the contemporary issues they will soon be facing in industry. This concisely-formatted volume enables

instructors to customize their courses for the unique requirements of MBA programs. Each chapter integrates material directly into the text rather than sidebars, highlights, and other pedagogical devices to achieve a smooth, easy-to-read narrative flow. Carefully selected questions prompt discussions that complement the mature, more experienced nature of MBA students, while case studies and supplementary materials illustrate key concepts and practices. Topics such as outsourcing and global sourcing, the role of information technology, and global competitiveness strategies assist students to understand working and competing in the globalized economy.

Cases in Financial Reporting May 20 2021 For intermediate and financial accounting courses at the MBA and undergraduate level, or a supplement to financial statement analysis texts. This collection of financial accounting cases is designed to help students become financial statement users. Each case utilizes financial statement information (balance sheet, income statement, statement of cash flow and/or footnotes) and a number of topical questions. Students use the financial statement information to infer and interpret the economic events underlying the numbers. Related articles taken from business publications accompany some cases, and information from the articles is incorporated into the case question material. Also available the Pearson Custom Case Program.

Management Accounting Jun 08 2020 Management Accounting is part of the celebrations to mark CIMA's 90th anniversary in 2009. It looks at the development of cost and management accounting from the founding of the Institute to today. It considers a number of immediate challenges to management accountants and surveys a range of issues and challenges that will likely affect management accounting thought and practice in the future. The authors examine the possibilities for accountants to widen their focus and become more familiar with the enterprise technology determining their organisations' cost structures and with the effects of multiple production in various locations, such as economies or diseconomies of scale. Such change may require the alteration of traditional cost models used by accountants to become more nuanced. The book suggests how this may be accomplished and highlights the need for management accountants to work as part of management teams throughout the organisation as business partners rather than remain grounded in specialist information provision roles. Alnoor Bhimani is Professor of Management Accounting at the London School of Economics. He is also a Certified Management Accountant as well as an author of 15 books and over 100 articles. Michael Bromwich was CIMA's Professor of Accounting and Financial Management at the London School of Economics and Political Science (1985 to 2006), now Emeritus. He is a Past President of CIMA (1987/88) and currently serves on CIMA's Technical Committee. A unique survey of 90 years of CIMA research analyses the research to determine future challenges for management accounting and business practices. Charts the history of management accounting and business practice over nearly 100 years.

The Portable MBA in Finance and Accounting Feb 03 2020 The most comprehensive and authoritative review of B-School fundamentals—from top accounting and finance professors for years, the Portable MBA series has tracked the core curricula of leading business schools to teach you the fundamentals you need to know about business—without the extreme costs of earning an MBA degree. Financial Accounting for Management Jan 16 2021 Financial Accounting for Management: An Analytical Perspective, 5e, has been substantially revised to capture new provisions of statutory requirements. A greater emphasis has been laid on simplifying concepts and increasing the usefulness of the text for the students. This has been achieved by introducing new chapters, rewriting certain initial chapters, introducing simpler and smaller illustrations, and including new exercises in all the chapters.

Loose Leaf for Introductory Financial Accounting for Business Jun 28 2019 Learning Financial Accounting can often feel like learning a foreign language to students, in particular when terminology and procedure is piled on before core concepts are truly mastered. Introductory Financial Accounting for Business is an innovative approach that emphasizes critical thinking over the rote memorization of terms, such as "debits" and "credits". The sequential learning model employed by the authors helps students see the bottom-line consequences of financial statements as it relates to the overall business, better preparing them for careers as accountants, entrepreneurs, and decision-makers. The authors focus initially on conceptual underpinnings -- the reasons why we approach procedures the way we do -- rather than confusing students by front-loading the material with over-complicated details. Author Chris Edmonds has also created a highly popular and widely used series of video lectures, which engage students by clearly and charismatically going over each learning objective in a conversational style. These videos help reinforce important lessons and are always available for review. By developing this stronger foundation, students understand Accounting ideas more broadly and are able to ultimately learn procedural applications more quickly and accurately. With a straightforward writing style and highly engaging video lectures, this dynamic author team leads students down a streamlined learning path focused on critical thinking, clarity of concept, and applicability of material to the real world.

Microeconomics for MBAs Dec 27 2021 A sophisticated yet non-technical introduction to microeconomics for MBA students, now in its third edition.

Rethinking the MBA Apr 18 2021 The authors give the most comprehensive, authoritative and compelling account yet of the troubled state of business education today and go well beyond this to provide a blueprint for the future.

Managers Not MBAs Mar 18 2021 In this sweeping critique of how managers are educated and how, as a consequence, management is practiced, Henry Mintzberg offers thoughtful and controversial ideas for reforming both. "The MBA trains the wrong people in the wrong ways with the wrong consequences," Mintzberg writes. "Using the classroom to help develop people already practicing management is a fine idea, but pretending to create managers out of people who have never managed is a sham." Leaders cannot be created in a classroom. They arise in context. But people who already practice management can significantly improve their effectiveness given the opportunity to learn thoughtfully from their own experience. Mintzberg calls for a more engaging approach to managing and a more reflective approach to management education. He also outlines how business schools can become true schools of management.
