**Monograph on Ionospheric Radio** Nov 17 2021

**The Treatment of Venereal Diseases** May 11 2021

**A Monograph on the Ammonites of the English Corallian Beds** Jun 19 2019

**The Ways of the Line** Oct 04 2020

*Monograph on Chromite* May 23 2022

**Monograph on Flavoring Extracts with Essences, Syrups, and Colorings** Jul 25 2022

*The Works of Charles Darwin: Vol 14: A Monograph on the Fossil Lepadidae (1851)* Apr 29 2020 The fourteenth volume in a 29-volume set which contain all Charles Darwin's published works. Darwin was one of the most influential figures of the 19th century. His work remains a central subject of study in the history of ideas, the history of science, zoology, botany, geology and evolution.

**A Monograph of Paris (Melanthiaceae)** Jul 21 2019 This book provides essential information on the morphology, biology, phytochemistry, pharmaceutical prospects, evolution, phylogeny, biogeography, and taxonomy of Paris (Melanthiaceae), a morphologically distinctive plant genus with great economic importance. Since the establishment of this genus, 70 species and 24 subspecific taxa have been described, resulting in considerable confusion in species delimitation. In this book, the taxonomy of all described taxa is carefully revised. Based on multi-disciplinary evidences, a revised classification system of Paris containing five sections is outlined. Every species is provided with a concise but diagnostic description, a color illustration, photographs that highlight distinguishing characters, examined specimens and distribution range. The interspecific relationships are clarified with an identification key. This monograph offers taxonomists, evolutionary biologists, ecologists, horticulturalists, phytochemists, and practitioners a thorough and up-to-date overview about this interesting plant group. It is equally valuable for undergraduate and graduate students,

teachers and professionals engaged in related fields.

The Peculiarities of Gratitude Expression Use in the Foreign Language Jun 24 2022 This monograph is devoted to the English gratitude expressions use by Kazakhstani EFT students based on the cross-cultural communication approach and from psycholinguistics and pragmatics' view as well. The results of the research will contribute to BA/MA and PhD Foreign Philology and Foreign Languages Theory and Practice students' knowledge about the features of appreciation expressions in the English language. The research investigates and summarizes the well-known scientists' works as M.Eisenstein, E.Ochs, J.Bodman and others. The second part of this monograph describes the developed thematic classification of gratitude expressions based on the Language Theories and above-mentioned scientists and linguists' works. Also, comprehension enhancing activities and gratitude expressions usage were developed. This classification and complex of activities could be used as the additional practical materials by English teachers and students in the Universities on English Lexicology, Stylistics, and Discourse Study courses and in ELT/EFL classes as well. The results of monograph is discussed on the 5th Conference on Creative Education(CCE 2015)held in Beijing, China on May 22-24,201

**A Monograph on Bamboo** Jan 07 2021 The importance of Bamboo to rural community can hardly be over stressed since it is a versatile, multipurpose, forest species which contributes valuably towards the human economy providing a variety of goods. Even in today's world of plastic and steel this fastest growing species has not only maintained its place as a contributor of daily needs but also attained significance as an industrial raw material. There are about 75 genera and 1250 species of bamboos, each of them having widely differing characteristics and uses, such as construction material, raw material for paper pulp and rayon, traditional cottage handicrafts and food, etc. Need has been felt for the dissemination of available technology and related

**A Monograph on Whiteflies** Oct 28 2022 In all, 1550 species of whiteflies have been identified. The rapid spread of Bemisia tabaci has occurred throughout the globe and it is regarded as the most notorious species. It is a complex species known to contain many biotypes namely, New World (Biotype -A), B-biotype MEAM1 (Biotype-B or Bemisia argentifolii, and MED (Biotype-Q) depending upon the geographical location. The complete information on the bio-ecology of important species along with the feeding mechanism has been presented in this book. The use of modern techniques of identification has added more biotypes considering the variations in host range, species of endosymbionts, virus transmission efficiency, and resistance to pesticides. The resistance and resurgence due to pesticides has been discussed in the monograph. The information on economic thresholds for judicious use of pesticides or release of natural enemies against whiteflies has been quoted in this compilation The pest control methods, namely chemical, cultural measures, biocontrol agents, resistant varieties, and mechanical devices have been elaborated on. Based on the availability of information the integrated model has been suggested to contain the whitefly menace under different situations. Considering the key factors responsible for the outbreak of whiteflies, a sound system of IPM has been formulated. The book also contains the use of semiochemicals and biotechnological tools likely to gain momentum in the future.

*A Monograph on the Fossil Balanidae and Verrucidae of Great Britain* Feb 20 2022

*A Monograph on the Sub-class Cirripedia* Aug 14 2021

**Monographs on Fragrance Raw Materials** Jul 13 2021 Monographs on Fragrance Raw Materials contains a collection of monographs originally appearing in Food and Cosmetics Toxicology from the first issues in 1973 to the last ones in 1978. The monographs are organized in alphabetical order, as a regular feature of Food and Cosmetics Toxicology. This monograph will prove valuable to many readers of Food and Cosmetics Toxicology, as well as to the wider community of scientists and interested consumers.

**The Tannins** Jul 01 2020

**The Black Woodpecker** Sep 22 2019 Esta monografía cubre todos los aspectos de la vida de uno de los más grandes y llamativos pájaros carpinteros del planeta. Características morfológicas, rasgos de identificación, manifestaciones vocales y sonidos, área de distribución y todos los aspectos de su biología, son los temas que se tratan en los trece capítulos del libro. El texto se completa con dos láminas en color, ilustraciones originales en blanco y negro, gráficos especiales para describir las voces y el característico tamborileo de estas aves, mapas detallados y magníficas fotografías en color. Asimismo, se incluye una bibliografía extensa con trabajos en diferentes idiomas. Gerard Gorman ha aprovechado sus largas horas en compañía del picamaderos negro junto con una amplia investigación bibliográfica para producir una detallada monografía sobre esta especie. The Black Woodpecker es un relato personal escrito para todos aquellos interesados en los pájaros carpinteros y las aves forestales, tanto profesionales como aficionados.

**An Introduction to Mathematical Analysis** Oct 16 2021 An Introduction to Mathematical Analysis is an introductory text to mathematical analysis, with emphasis on functions of a single real variable. Topics covered include limits and continuity, differentiability, integration, and convergence of infinite series, along with double series and infinite products. This book is comprised of seven chapters and begins with an overview of fundamental ideas and assumptions relating to the field operations and the ordering of the real numbers, together with mathematical induction and upper and lower bounds of sets of real numbers. The following chapters deal with limits of real functions; differentiability and maxima, minima, and convexity; elementary properties of infinite series; and functions defined by power series. Integration is also considered, paying particular attention to the indefinite integral; interval functions and functions of bounded variation; the Riemann-Stieltjes integral; the Riemann integral; and area and curves. The final chapter is devoted to convergence and uniformity. This monograph is intended for mathematics students.

**A Series of Monographs on Color** Aug 26 2022

Monograph on the Fossil Reptilia of the Cretaceous Formations Jan 27 2020

**Monograph on Brachystelma and Ceropegia in India** Mar 09 2021 The book provides data on all the species of the two genera Genera Brachystelma Sims and Ceropegia L. in India for their bioprospection and conservation. The other objectives are to promote the beauty and uniqueness of the species of these two genera and also to provide medicinal and edible uses for bioprospection.

**A Monograph On the Cirripedia** Mar 29 2020 Reproduction of the original: A Monograph On the Cirripedia by Charles Darwin

*A Monograph on the Fossil Balanidae and Verrucidae of Great Britain* Aug 02 2020

*A Monograph on the Fossil Lepadidae, Or, Pedunculated Cirripedes of Great Britain* Sep 03 2020

**Monograph on the History of Money in China, from the Earliest Times to the Present** Jan 19 2022

Monograph on Radio-wave Propagation in the Troposphere Sep 15 2021 Echo, Fading, Schwund (Nachrichtentechnik) ; Union radio scientifique internationale, URSI ; International.

*British Parliamentary Papers* Oct 24 2019 Explains the changes that have occurred in national security strategies since the attacks on September 11, 2001, concerning narcotics and terrorism.

**The Works of Charles Darwin: Vol 13: A Monograph on the Sub-Class Cirripedia (1854), Vol II** Nov 05 2020 The thirteenth volume in a 29-volume set which contain all Charles Darwin's published works. Darwin was one of the most influential figures of the 19th century. His work remains a central subject of study in the history of ideas, the history of science, zoology, botany, geology and evolution.

**Monograph on the Cathedral Church of Wells** Dec 06 2020

**A Monograph on Plebiscites** May 31 2020 SCOTT (copy 1): from the John Holmes Library collection.

*Open Access and the Humanities* Sep 27 2022 If you work in a university, you are almost certain to have heard the term 'open access' in the past couple of years. You may also have heard either that it is the utopian answer to all the problems of research dissemination or perhaps that it marks the beginning of an apocalyptic new era of 'pay-to-say' publishing. In this book, Martin Paul Eve sets out the histories, contexts and controversies for open access, specifically in the humanities. Broaching practical elements alongside economic histories, open licensing, monographs and funder policies, this book is a must-read for both those new to ideas about open-access scholarly communications and those with an already keen interest in the latest developments for the humanities. This title is also available as Open Access via Cambridge Books Online.

The Khasis Dec 18 2021 In 1908 Sir Bampfylde Fuller, then Chief Commissioner of Amman, proposed and the Government of India sanctioned, the preparation of a series of monographs on the more important tribes and castes of the Province, of which this volume is the first. They were to be undertaken by writers who had special and intimate experience of the races to be described, the accounts of earlier observers being at the same time studied and incorporated; a uniform scheme of treatment was laid down which was to be adhered to in each monograph, and certain limits of size were prescribed.

Carbon in Earth's Interior Feb 26 2020 Carbon in Earth's fluid envelopes - the atmosphere, biosphere, and hydrosphere, plays a fundamental role in our planet's climate system and a central role in biology, the environment, and the economy of earth system. The source and original quantity of carbon in our planet is uncertain, as are the identities and relative importance of early chemical processes associated with planetary differentiation. Numerous lines of evidence point to the early and continuing

exchange of substantial carbon between Earth's surface and its interior, including diamonds, carbon-rich mantle-derived magmas, carbonate rocks in subduction zones and springs carrying deeply sourced carbon-bearing gases. Thus, there is little doubt that a substantial amount of carbon resides in our planet's interior. Yet, while we know it must be present, carbon's forms, transformations and movements at conditions relevant to the interiors of Earth and other planets remain uncertain and untapped. Volume highlights include: - Reviews key, general topics, such as carbonate minerals, the deep carbon cycle, and carbon in magmas or fluids - Describes new results at the frontiers of the field with presenting results on carbon in minerals, melts, and fluids at extreme conditions of planetary interiors - Brings together emerging insights into carbon's forms, transformations and movements through study of the dynamics, structure, stability and reactivity of carbon-based natural materials - Reviews emerging new insights into the properties of allied substances that carry carbon, into the rates of chemical and physical transformations, and into the complex interactions between moving fluids, magmas, and rocks to the interiors of Earth and other planets - Spans the various chemical redox states of carbon, from reduced hydrocarbons to zero-valent diamond and graphite to oxidized CO<sub>2</sub> and carbonates - Captures and synthesizes the exciting results of recent, focused efforts in an emerging scientific discipline - Reports advances over the last decade that have led to a major leap forward in our understanding of carbon science - Compiles the range of methods that can be tapped tap from the deep carbon community, which includes experimentalists, first principles theorists, thermodynamic modelers and geodynamicists - Represents a reference point for future deep carbon science research Carbon in Planetary Interiors will be a valuable resource for researchers and students who study the Earth's interior. The topics of this volume are interdisciplinary, and therefore will be useful to professionals from a wide variety of fields in the Earth Sciences, such as mineral physics, petrology, geochemistry, experimentalists, first principles theorists, thermodynamics, material science, chemistry, geophysics and geodynamics.

**Transformed in Christ** Mar 21 2022 Scholarly readings of John Chrysostom's Christology seldom examine the intimate relationship that exists between his doctrinal, sacramental, and praxeological views. The vital correlation between exegesis and praxis in patristic thought must be taken into consideration in any evaluation of christological positions. Chrysostom's doctrine of Christ is intricately bound to life in the church. Within this conceptual framework, Chrysostom's commentaries on John's Gospel and Hebrews are examined. The christological portrait that emerges from this oeuvre is a depiction of the personal continuity of the divine Son in Christ; his sacramental presence in the church, the body of Christ; and his transforming work in the Christian, to the likeness of Christ. This persuasive study demonstrates that Chrysostom's view of the Christian life is the outworking of his exegetically informed and pastorally rich christological doctrine.

*Debates in the Digital Humanities 2016* Aug 22 2019 Pairing full-length scholarly essays with shorter pieces drawn from scholarly blogs and conference presentations, as well as commissioned interviews and position statements, *Debates in the Digital Humanities 2016* reveals a dynamic view of a field in negotiation with its identity, methods, and reach. Pieces in the book explore how DH can and must change in response to social justice movements and events like #Ferguson; how DH alters and is altered by community college classrooms; and how scholars applying DH approaches to feminist studies, queer studies, and black studies might reframe the commitments of DH analysts. Numerous contributors examine the movement of interdisciplinary DH work into areas such as history, art history, and archaeology, and a special forum on large-scale text mining brings together position statements on a fast-growing area of DH research. In the multivalent aspects of its arguments, progressing across a range of platforms and environments, *Debates in the Digital Humanities 2016* offers a vision of DH as an expanded field—new possibilities, differently structured. Published simultaneously in print, e-book, and interactive webtext formats, each DH annual will be a book-length publication highlighting the particular debates that have shaped the discipline in a given year. By identifying key issues as they unfold, and by providing a hybrid model of open-access publication, these volumes and the *Debates in the Digital Humanities* series will articulate the present contours of the field and help forge its future. **Monograph on Mullerian Dysgenesis** Nov 24 2019 Mullerian Dysgenesis is a maldevelopment of the Generative tract that mostly goes unnoticed retaining menstruation and childbearing function. Until there is no cavity. In this category, ( 1 % is the incidence), there are no changes after birth, and they cannot menstruate. Their life is one of despair with no hope. Till date, there has been no report of any medical corrective method for this deformation. In 2005, after getting a Patent (thus preserving the methodology) from the Government of India entitled, ‘A unique combination of Ayurvedic Compounds for correcting a rare form of mullerian dysgenesis’, he started, ‘Correction of mullerian dysgenesis’ at A. G. Hospital, Chromepet, as a prospective patent on the first of April in 2005. Till date, 20 cases (18 without cavity) have undergone corrections, 17 of which have developed a cavity, three have attained menarche (first period), and five have entered into matrimony. This is the first medical option for this condition. It is our fervent hope that this regime will help them re-join the mainstream.

Monograph on the Aftermath of 'black Thursday' Feb 08 2021

**A Monograph on the Silk Fabrics of Bengal (Classic Reprint)** Apr 10 2021 Excerpt from A Monograph on the Silk Fabrics of Bengal This Monograph has been prepared according to the directions contained in the Revenue Department Circular No. 10, dated the 29th November 1898, which requires that the Monograph "should give a complete review of all branches of the silk industry." All the other branches, however, have been treated here only as subsidiary to those of silk weaving and silk-fabrics, that the main character of the Monograph may be maintained. 2. The silk-weaving industry of Bengal is of greater magnitude than even the manufacture of raw silk, which forms the main staple of European export. From the Vedic times silk fabrics have been enjoined to Hindus for use on ceremonial occasions. One of the verses of the Rig Veda is referred to by orthodox pandits as enjoining the use of silk cloths for the marriage ceremony, and, as a matter of fact, Hindus all over India use silk cloths for every religious ceremony, and those who can afford it, regard it as incumbent on them to wear it daily at the time of worship. Foreign silks and silks containing an admixture of other fibres are prohibited for such ceremonial purposes, though as articles of luxury, foreign silks were in use even in ancient times. The use of unmixed silk is prohibited among Muhammadans, specially of the stronger sex, but they, as also the Parsis, use a good deal of cheap silk on ceremonial occasions, in imitation of the Hindus. The silk-manufacturing industry has thus a peculiar vitality of its own, which is not shared by the cotton-manufacturing industry, and the general notion that silk and cotton weaving industries of India have equally suffered and have suffered for the same reasons, is not correct. The recent decline in the silk-weaving industry is chiefly in the direction of foreign export. European countries no longer depend on Indian calicos and silks. But the manufacture of those fabrics which are required for native use continues as vigorously as ever, and the Census figures for 1901 show that the silk weaving industry of Bengal has had a remarkable development during the last decade. The costliest silks, embroidered with gold and silver threads, are not manufactured in Bengal, but chiefly in Benares. The raw material used, however, in the Benares looms, is largely imported from Bengal, and as the Benares embroidered silks are extensively used by the higher and middle classes of Bengal, the silk industry of Benares is intimately connected with that of Bengal. The same may be said of the silk-weaving industry (based on European principles) of Bombay, though the raw material in use in Bombay is largely derived from China also. Bombay silks are largely used by women of the middle classes of Bengal. But the whole rank and file of the Hindu population of Bengal and other parts of India have to use indigenous silk fabrics on certain occasions, however coarse or cheap these fabrics may be, and it is for this reason that there is a large internal trade in silk fabrics, specially of the cheaper kinds. 3. The information for this Monograph has been derived from the following sources: - (1) The district reports or monographs based mainly on the personal observations of officers, usually of the grades of Covenanted Assistant Collectors and Uncovenanted Deputy Collectors who were specially deputed by their Collectors for the purpose of preparing these district monographs. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com)

*Books in the Digital Age* Jun 12 2021 The book publishing industry is going through a period of profound and turbulent change brought about in part by the digital revolution. What is the role of the book in an age preoccupied with computers and the internet? How has the book publishing industry been transformed by the economic and technological upheavals of recent years, and how is it likely to change in the future? This is the first major study of the book publishing industry in Britain and the

United States for more than two decades. Thompson focuses on academic and higher education publishing and analyses the evolution of these sectors from 1980 to the present. He shows that each sector is characterized by its own distinctive 'logic' or dynamic of change, and that by reconstructing this logic we can understand the problems, challenges and opportunities faced by publishing firms today. He also shows that the digital revolution has had, and continues to have, a profound impact on the book publishing business, although the real impact of this revolution has little to do with the ebook scenarios imagined by many commentators. Books in the Digital Age will become a standard work on the publishing industry at the beginning of the 21st century. It will be of great interest to students taking courses in the sociology of culture, media and cultural studies, and publishing. It will also be of great value to professionals in the publishing industry, educators and policy makers, and to anyone interested in books and their future.

*Scholarly Book Reviewing in the Social Sciences and Humanities* Dec 26 2019 Unlike previous studies that have used techniques such as citation or co-citation analysis to measure scholarly communication, this book identifies scholarly monography as a primary means of communication in the humanities and social sciences. The diffusion and reception of this means of communication may be measured by examining book reviews in the scholarly journal literature, themselves significant indicators of scholarly communication.

*Academic and Professional Publishing* Apr 22 2022 Academic and professional publishing represents a diverse communications industry rooted in the scholarly ecosystem, peer review, and added value products and services. Publishers in this field play a critical and trusted role, registering, certifying, disseminating and preserving knowledge across scientific, technical and medical (STM), humanities and social science disciplines. Academic and Professional Publishing draws together expert publishing professionals, to provide comprehensive insight into the key developments in the industry and the innovative and multi-disciplinary approaches being applied to meet novel challenges. This book consists of 20 chapters covering what publishers do, how they work to add value and what the future may bring. Topics include: peer-review; the scholarly ecosystem; the digital revolution; publishing and communication strategies; business models and finances; editorial and production workflows; electronic publishing standards; citation and bibliometrics; user experience; sales, licensing and marketing; the evolving role of libraries; ethics and integrity; legal and copyright aspects; relationship management; the future of journal publishing; the impact of external forces; career development; and trust in academic and professional publishing. This book presents a comprehensive review of the integrated approach publishers take to support and improve communications within academic and professional publishing. Brings together expert publishing professionals to provide an authoritative insight into industry developments Details the challenges publishers face and the leading-edge processes and procedures used to meet them Discusses the range of new communication channels and business models that suit the wide variety of subject areas publishers work in
