Monthly Labor Review May 07 2020 Publishes in-depth articles on labor subjects, current labor statistics, information about current labor contracts, and book reviews.

History of Labour in the United States: Introduction to volumes III and IV, by J.R. Commons. **Working conditions**, by D.D. Lescohier. **Labor legislation**, by Elizabeth Brandeis Nov 24 2021

Employment, Labor Unions and Wages Sep 10 2020 The first of three volumes opens with excerpts from two interviews in which Ashenfelter discusses highlights of his professional life, many of his essays and papers, and his reflections on the development of economics over the course of his career. This introduction is followed by 25 published and unpublished economic papers written by Ashenfelter between 1966 and 1995. The papers are arranged in sections on unions and economics; unemployment; arbitration and bargaining; and wages. No index. Annotation copyrighted by Book News, Inc., Portland, OR

The Cost of Living in America May 19 2021 Stapleford interweaves economic theory with political history to show why Americans vest so much authority in the Consumer Price Index.

The History of Labour Intermediation Jan 03 2020 Searching for a job has been an everyday affair in both modern and past societies, and employment a concern for both individuals and institutions. The case studies in this volume investigate job search and placement practices in European countries, Australia, and India in the nineteenth and twentieth centuries. The contributors explore how looking for work becomes a means by which participants (individuals, placement agents, trade unions, municipalities, administrations, state authorities, and schools) articulated specific interests, perspectives, and agendas. Taking an exploratory approach, the chapters illustrate different approaches to the history of employment and job searching, ranging from organizational and regulatory histories to the analysis of practices and autobiographical accounts. In the process, they uncover the interrelations of search practices and attempts to arrange placement services.

British Labour Statistics Nov 05 2022

General Labour History of Africa Apr 29 2022 The first comprehensive and authoritative history of work and labour in Africa; a key text for all working on African Studies and Labour History worldwide.

Labor of Innocents Feb 13 2021 On an autumn day in 1866, Wiley Ambrose and Hepsy Saunders, two former slaves who lived as husband and wife, received a knock at their door. Three men from a plantation in Brunswick County, North Carolina, presented court-ordered apprenticeship papers authorizing the immediate seizure of the couple's daughters, fifteen-year-old Harriet and thirteen-year-old Eliza. After a brief stay in jail with other children, the sisters were sent to work as plantation servants and field hands until age twenty-one. With that startling example, Karin L. Zipf begins *Labor of Innocents*, the first comprehensive exploration of forced apprenticeship in North Carolina. Zipf refuses to nostalgically view apprenticeship as a benign form of vocational training for children and instead presents irrefutable evidence that the institution existed as a means to control the composition and character of families, to provide alternate sources of cheap labor, and to ensure a white patriarchal social order. Codified by law, involuntary apprenticeship allowed courts not only to define who was an unacceptable parent but also to indenture their children. Disproportionately affected were the poor. Zipf details the continual fluidity of the institution from its colonial origins to its twentieth-century demise. Over two hundred years, the definition of an unfit head of household variously included black men, any woman, and widowed or unmarried white women, depending upon the current social and political agenda of authorities. Parents of both races and sexes challenged the laws vigorously and repeatedly to no effect until progressive reforms ended apprenticeship in 1919 with passage of the Child Welfare Act. An impressive blend of legal, social, and labor history, *Labor of Innocents* illuminates past concepts of family and the realities families endured.

Labor in State-Socialist Europe, 1945–1989 Mar 05 2020 Labor regimes under communism in East-Central Europe were complex, shifting, and ambiguous. This collection of sixteen essays offers new conceptual and empirical ways to understand their history from the end of World War II to 1989, and to think about how their experiences relate to debates about labor history, both European and global. The authors reconsider the history of state socialism by re-examining the policies and problems of communist regimes and recovering the voices of the workers who built them. The contributors look at work and workers in Albania, Bulgaria, Czechoslovakia, the German Democratic Republic, Hungary, Poland, Romania, and Yugoslavia. They explore the often contentious relationship between politics and labor policy, dealing with diverse topics including workers' safety and risks; labor rights and protests; working women's politics and professions; migrant workers and social welfare; attempts to control workers' behavior and stem unemployment; and cases of incomplete, compromised, or even abandoned processes of proletarianization. Workers are presented as active agents in resisting and supporting changes in labor policies, in choosing allegiances, and in defining the very nature of work.

The Fourth Industrial Revolution Aug 10 2020 The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In *The Fourth Industrial Revolution*, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.

Trade Unions and Migrant Workers Oct 12 2020 This timely book analyses the relationship between trade unions, immigration and migrant workers across eleven European countries in the period between the 1990s and 2015. It constitutes an extensive update of a previous comparative analysis – published by Rinus Penninx and Judith Roosblad in 2000 – that has become an important reference in the field. The book offers an overview of how trade unions manage issues of inclusion and solidarity in the current economic and political context, characterized by increasing challenges for labour organizations and rising hostility towards migrants.

International Historical Statistics Europe 1750–1988 Feb 25 2022 The European volume of this best selling series provides data from over two centuries for all principal areas of economic and social activity in both Eastern and Western Europe. Recent concern with economic growth has led not only to a vast increase in the quantity and quality of statistics collected and published, but also to an upsurge of interest in the statistics of the past. As attention has turned more and more to the study of the comparative development of different countries, so a need has been felt for a collection of historical statistics comparing different nations. This work meets the need as far as the European continent is concerned. Each section has a short introductory commentary, and extensive notes and footnotes. This unique compilation, now in its third edition and revised and updated to 1988, brings together in a single volume major statistical series which document the growth and development of modern Europe.

Communities in Action Jul 09 2020 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Overseas Trade Statistics of the United Kingdom Jun 19 2021

Global Productivity Jun 27 2019 The COVID-19 pandemic struck the global economy after a decade that featured a broad-based slowdown in productivity growth. *Global Productivity: Trends, Drivers, and Policies* presents the first comprehensive analysis of the evolution and drivers of productivity growth, examines the effects of COVID-19 on productivity, and discusses a wide range of policies needed to rekindle productivity growth. The book also provides a far-reaching data set of multiple measures of productivity for up to 164 advanced economies and emerging market and developing economies, and it introduces a new sectoral database of productivity. The World Bank has created an extraordinary book on productivity, covering a large group of countries and using a wide variety of data sources. There is an emphasis on emerging and developing economies, whereas the prior literature has concentrated on developed economies. The book seeks to understand growth patterns and quantify the role of (among other things) the reallocation of factors, technological change, and the impact of natural disasters, including the COVID-19 pandemic. This book is must-reading for specialists in emerging economies but also provides deep insights for anyone interested in economic growth and productivity. Martin Neil Baily Senior Fellow, The Brookings Institution Former Chair, U.S. President's Council of Economic Advisers This is an important book at a critical time. As the book notes, global productivity growth had already been slowing prior to the COVID-19 pandemic and collapses with the pandemic. If we want an effective recovery, we have to understand what was driving these long-run trends. The book presents a novel global approach to examining the levels, growth rates, and drivers of productivity growth. For anyone wanting to understand or influence productivity growth, this is an essential read. Nicholas Bloom William D. Eberle Professor of Economics, Stanford University The COVID-19 pandemic hit a global economy that was already struggling with an adverse pre-existing condition—slow productivity growth. This extraordinarily valuable and timely book brings considerable new evidence that shows the broad-based, long-standing nature of the slowdown. It is comprehensive, with an exceptional focus on emerging market and developing economies. Importantly, it shows how severe disasters (of which COVID-19 is just the latest) typically harm productivity. There are no silver bullets, but the book suggests sensible strategies to improve growth prospects. John Fernald Schrodgers Chaired Professor of European Competitiveness and Reform and Professor of Economics, INSEAD

International Historical Statistics Oct 31 2019 The only global, multidisciplinary source of comparative historical data available has been updated to include statistics, through the year 1993. "International Historical Statistics" (IHS) is an essential tool in exploring the forces leading to current global events. Students and researchers in diverse areas, such as anthropology, business management, economics, and finance, international studies, sociology, and urban studies, will find essential information for their studies in this one comprehensive source. "IHS" can help identify global and regional trends as well as provide insight into past events.

International Historical Statistics Oct 04 2022 *International Historical Statistics: Africa, Asia, Oceania* is the latest edition of the most authoritative collection of statistics available. Fully updated to 1993, it provides key economic and social indicators for the last 250 years. The volume includes both hard to find historical data, and the latest figures available.

Historical Research Jul 01 2022 What, exactly, was the Charity Organization Society? Was it a cluster of affluent women imposing their moral propriety on the poor in the early 20th Century? Or was it the first concerted effort to professionalize previously random, subjective allocations of benefits and entitlements? This book will help researchers explore systematically such fascinating questions and debates in social work and social welfare history. Mastering how to pose historical questions is as essential as finding the answers. This book, from its wide-ranging coverage of historiographic theory to detailed guidelines for conducting oral history and archival research, offers clear and practical research tools: how to design a study, select primary sources, understand the vocabulary of archives, determine useful secondary sources, and analyze them all. The book also features a guide to archives and special collections that details their holdings, access and locations, and research grants - essential knowledge for any researcher. The thrill of stumbling across unexplored data in the stacks of a library is notorious. Now, this clearly written pocket guide will help established scholars as well as doctoral students get the most out of historical data.

Labor in the Age of Finance Jan 15 2021 From award-winning economic historian Sanford M. Jacoby, a fascinating and important study of the labor movement and shareholder capitalism Since the 1970s, American unions have shrunk dramatically, as has their economic clout. *Labor in the Age of Finance* traces the search for new sources of power, showing how unions turned financialization to their advantage. Sanford Jacoby catalogs the array of allies and finance-based tactics labor deployed to stanch membership losses in the private sector. By leveraging pension capital, unions restructured corporate governance around issues like executive pay and accountability. In Congress, they drew on their political influence to press for corporate reforms in the wake of business scandals and the financial crisis. The effort restrained imperial CEOs but could not bridge the divide between workers and owners. Wages lagged behind investor returns, feeding the inequality identified by Occupy Wall Street. And labor's slide continued. A compelling blend of history, economics, and politics, *Labor in the Age of Finance* explores the paradox of capital bestowing power to labor in the tumultuous era of Enron, Lehman Brothers, and Dodd-Frank.

Parliamentary Papers Apr 17 2021

Labour Market Trends Apr 05 2020

The International Labour Organization Aug 22 2021 This book is the first comprehensive account of the International Labour Organization's 100-year history. At its heart is the concept of global social policy, which encompasses not only social policy in its national and international dimensions, but also development policy, world trade, international migration and human rights. The book focuses on the ILO's roles as a key player in debates on poverty, social justice, wealth distribution and social mobility subjects and as a global forum for addressing these issues. The study puts in perspective the manifold ways in which the ILO has helped structure these debates and has made – through its standard-setting, technical cooperation and myriad other activities – practical contributions to the world of work and to global social policy.

Employment, Hours and Earnings, National Nov 12 2020

Being a Historian Aug 29 2019 Considers what aspiring and mature historians need to know about the discipline of history in the United States today.

Child Labor Dec 26 2021 Despite its decline throughout the advanced industrial nations, child labor remains one of the major social, political, and economic concerns of modern history, as witnessed by the many high-profile stories on child labor and sweatshops in the media today. This work considers the issue in three parts. The first section discusses child labor as a social and economic problem in America from an historical and theoretical perspective. The second part presents child labor as National Child Labor Committee investigators found it in major American industries and occupations, including coal mines, cotton textile mills, and sweatshops in the early 1900s. Finally, the concluding section integrates these findings and attempts to apply them to child labor problems in America and the rest of the world today.

The Great Inflation Mar 17 2021 Controlling inflation is among the most important objectives of economic policy. By maintaining price stability, policy makers are able to reduce uncertainty, improve price-monitoring mechanisms, and facilitate more efficient planning and allocation of resources, thereby raising productivity. This volume focuses on understanding the causes of the Great Inflation of the 1970s and '80s, which saw rising inflation in many nations, and which propelled interest rates across the developing world into the double digits. In the decades since, the immediate cause of the period's rise in inflation has been the subject of considerable debate. Among the areas of contention are the role of monetary policy in driving inflation and the implications this had both for policy design and for evaluating the performance of those who set the policy. Here, contributors map monetary policy from the 1960s to the present, shedding light on the ways in which the lessons of the Great Inflation were absorbed and applied to today's global and increasingly complex economic environment.

Making the Empire Work Mar 29 2022 Millions of laborers, from the Philippines to the Caribbean, performed the work of the United States empire. Forging a global economy connecting the tropics to the industrial center, workers harvested sugar, cleaned hotel rooms, provided sexual favors, and filled military ranks. Placing working men and women at the center of the long history of the U.S. empire, these essays offer new stories of empire that intersect with the "grand narratives" of diplomatic affairs at the national and international levels. Missile defense, Cold War showdowns, development politics, military combat, tourism, and banana economics share something in common—they all have labor histories. This collection challenges historians to consider the labor that formed, worked, confronted, and rendered the U.S. empire visible. The U.S. empire is a project of global labor mobilization, coercive management, military presence, and forced cultural encounter. Together, the essays in this volume recognize the United States as a global imperial player whose systems of labor mobilization and migration stretched from Central America to West Africa to the United States itself. Workers are also the key actors in this volume. Their stories are multi-vocal, as workers sometimes defied the U.S. empire's rhetoric of civilization, peace, and stability and at other times navigated its networks or benefited from its profits. Their experiences reveal the gulf between the American 'denial of empire' and the lived practice of management, resource exploitation, and military exigency. When historians place labor and working people at the center, empire appears as a central dynamic of U.S. history.
