[Psychology and Work Today, 10th Edition](#) Jun 01 2022 For undergraduate-level courses in Industrial and Organizational Psychology, Business Psychology, Personnel Psychology and Applied Psychology. Psychology and Work Today provides an invaluable foundation for anyone entering today's global business and industrial world. This informative, sophisticated, and entertaining text teaches students about the nature of work in modern society. By focusing on the practical and applied rather than the scientific ideal, the authors demonstrate how industrial-organizational psychology directly impacts our lives as job applicants, trainees, employees, managers, and consumers.

Pediatric Fitness Dec 27 2021 Over the years, there has been much controversy regarding whether today's children and adolescents are fitter than their peers of the past and whether they are fitter if they live in the more affluent than the less affluent countries. This publication starts by examining data cumulated since the late 1950s on secular trends and geographic variability in pediatric fitness test performances of children and adolescents from 23 countries in North America, Europe, Asia, Australasia, Africa and the Middle East. There is evidence that there has been a global decline in pediatric aerobic performance in recent decades, relative stability in anaerobic performance, and that the best performing children come from northern and central Europe. It finishes by considering possible causes, including whether declines in aerobic performance are the result of distributional or across-the-board declines, and whether increases in obesity alone can explain the declines in aerobic performance. Physical educators, exercise/sport scientists, exercise physiologists, personal trainers, pediatricians, medical practitioners and public health providers will find useful information in this book on secular trends and geographic variability in pediatric fitness.

Power of 10 Oct 13 2020 Fitness expert Adam Zickerman presents a revolutionary exercise program - slow strength training - that will forever change the way people work out. The Power of 10 seems to contradict nearly everything we're accustomed to hearing about exercise. Forget hours on the treadmill, and forget daily visits to the gym. This new program offers 20 minute workout sessions, once or twice per week, with an alluring emphasis on rest and recovery on your days off. The principle behind The Power of 10 is simple: by lifting weights in slow motion, making each rep last 20 seconds (10 seconds lifting and 10 seconds lowering) instead of the typical 7 seconds, you can maximize muscle transformation. The short workouts are so effective that your body will need days to recover and repair properly. Studies have shown that such routines can increase lean body mass, help burn calories more efficiently, and prevent cardio-vascular disease more effectively than aerobic exercise alone.

Designing and Teaching Fitness Education Courses Jun 08 2020 Fitness education is often overlooked for various reasons: no equipment, no weight room, large class size, or lack of professional development. *Designing and Teaching Fitness Education Courses* provides real solutions for all these issues. This book offers secondary-level physical educators innovative ideas, practical answers, and guidance in implementing fitness education programming that will meet the needs of all students. *Designing and Teaching Fitness Education Courses* is packed with highly useful tools and resources: 211 instructional photos showing exercises and stretches that require no equipment and are easily adapted for varying abilities 18 pacing guides that form a week-by-week blueprint for implementing a semester-long fitness education course A robust online resource with all 18 pacing guides, as well as a blank template for developing your own; 139 video demonstrations of all the book's exercises and stretches; PowerPoint presentations to show in PE classes, including video demonstrations of the book's exercises and stretches; and teacher aids and student handouts, including assignments, assessments, posters, and a 12-week personal fitness plan Teachers can use the pacing guides to develop a semester-long fitness education course that can be implemented in either a traditional or block schedule. These guides offer objectives, class discussion topics, activities, assessments, and teaching strategies for each week of an 18-week semester. All topics in the guides are aligned with SHAPE America's National Standards and Grade-Level Outcomes for K-12 Physical Education. The authors guide teachers in addressing the following priorities within a fitness education course: social and emotional learning; behavior modification principles and adherence to fitness activities; social cognitive theory; classroom management; student safety; equity, diversity, and inclusion; and social justice. *Designing and Teaching Fitness Education Courses* also includes a detailed chapter on nutrition education written by internationally recognized sport nutritionist Lisa Dorfman, who provides teachers a wealth of information to integrate into fitness courses. Teachers will learn how to integrate a quality fitness education curriculum into any setting (rural, urban, or suburban) and any learning model (remote, hybrid, or in-person learning). *Designing and Teaching Fitness Education Courses* is organized into three sections: Part I presents both theoretical and practical knowledge of fitness education; its importance in a standards-based curriculum; pedagogical and content knowledge considerations; nutrition, wellness, and consumer issues; and the general components of fitness education. Part II focuses on various components of fitness education: flexibility, strength, and cardiorespiratory fitness. This part includes stretching and muscular strength and endurance workouts, illustrated with photos in the book and videos in the online resource. Part III guides readers in enabling students to participate in community fitness and activity events to support the development of lifelong fitness habits. Through *Designing and Teaching Fitness Education Courses*, teachers will be able to provide appropriate fitness activities that will lead to the elevated health and wellness of students and a greater appreciation for participating in lifelong activities.
