Mathematical Analysis for Transmission of COVID-19 Apr 29 2020 This book describes various mathematical models that can be used to better understand the spread of novel Coronavirus Disease 2019 (COVID-19) and help to fight against various challenges that have been developed due to COVID-19. The book presents a statistical analysis of the data related to the COVID-19 outbreak, especially the infection speed, death and fatality rates in major countries and some states of India like Gujarat, Maharashtra, Madhya Pradesh and Delhi. Each chapter with distinctive mathematical model also has numerical results to support the efficacy of these models. Each model described in this book provides its unique prediction policy to reduce the spread of COVID-19. This book is beneficial for practitioners, educators, researchers and policymakers handling the crisis of COVID-19 pandemic.

[Law and Policy of Export Controls](#) Nov 05 2020 A guide to the law and policy of export controls, featuring a collection of essays on key export issues .

The Financial Foundations of the British Raj Oct 04 2020 This revised edition of the book, first published in 1971, comprises an expanded introduction, that reviews recent research in this area, and a new imprint of the original text which has been edited afresh to slightly abbreviate some parts. The theme of this work may be summed up as the economic aspects of the theory and practice of the colonial state. The focus is upon the ideas and interests and contestations which went into the making of the policies of the Raj in the formative period following 1857, the years which saw the appointment of the first finance minister of India (then called the Finance Member), the introduction of the budget system and other innovations like the paper currency and income tax.

Perpetrators, Accomplices and Victims in Twentieth-Century Politics Dec 06 2020 These studies examine the ways in which succeeding democratic regimes have dealt with, or have ignored (and in several cases sugar-coated) an authoritarian or totalitarian past from 1943 to the present. They

treat the relationship with democratization and the different ways in which collective memory is formed and dealt with, or ignored and suppressed. Previous books have examined only restricted sets of countries, such as western or eastern Europe, or Latin America. The present volume treats a broader range of cases than any preceding account, and also a much broader time-span, investigating diverse historical and cultural contexts, and the role of national identity and nationalism, studying the aftermath of both fascist and communist regimes in both Europe and Asia in an interdisciplinary framework, while the conclusion provides a more complete comparative perspective than will be found in any other work. The book will be of interest to historians and political scientists, and to those interested in fascism, communism, legacies of war, democratization, collective memory and transitional justice. This book was previously published as a special issue of *Totalitarian Movements and Political Religions*.

The UK's approach to terrorism Jan 07 2021 "Constitutes the Terrorism Series' first expansion into non-U.S. legal regimes, and this initial volume deals solely with the UK's approach to security law. Ever since the London bombings of July 7th, 2005, the UK has been faced with the challenge of improving the nation's security while maintaining its proud tradition of civil liberties."--Publisher's website.

Terrorism and the Foreigner Sep 15 2021 This volume traces the developments in the laws and practices of the European Union and five of its Member States (the United Kingdom, Germany, France, the Netherlands, and Italy) at two points in time: first at the time of the Gulf War following Iraq's invasion of Kuwait in August 2000; secondly, following the terrorist attacks in the United States on 11 September 2001. The focus is on the legal status of immigrants and asylum seekers and how that legal status is being modified on grounds of security-related measures adopted over a period of about ten years. Particularly, the question is whether and how far situations have come into existence, which could be considered to be in conflict with fundamental principles of human rights.

Prevention of Terrorism Act 2005 Oct 16 2021 The purpose of this Act is to enable 'control orders' to be imposed on individuals suspected of being involved with terrorist activities. These orders could be used to restrict a person's freedom movement, association or communication and are designed as a preventative measure. There are two types of orders: non-derogating (that do not

involve derogating from the European Convention on Human Rights), and derogating. Non-derogating orders will be made by the Secretary of State, after seeking permission from the court (although in cases of emergency the Secretary of State can make an order first and then refer it to the court for confirmation). Derogating orders will be the subject to full hearings by the High Court or Court of Sessions, with a right to appeal.

Particularly, the question is whether and how far situations have come into existence, which could be considered to be in conflict with fundamental principles of human rights.

The British Press and Nazi Germany Jan 19 2022 What was known and understood about the nature of the Nazi dictatorship in Britain prior to war in 1939? How was Nazism viewed by those outside of Germany? The British Press and Nazi Germany considers these questions through the lens of the British press. Until now, studies that centre on British press attitudes to Nazi Germany have concentrated on issues of foreign policy. The focus of this book is quite different. In using material that has largely been neglected, Kylie Galbraith examines what the British press reported about life inside the Nazi dictatorship. In doing so, the book imparts important insights into what was known and understood about the Nazi revolution. And, because the overwhelming proportion of the British public's only means of news was the press, this volume shows what people in Britain could have known about the Nazi dictatorship. It reveals what the British people were being told about the regime, specifically the destruction of Weimar democracy, the ruthless persecution of minorities, the suppression of the churches and the violent factional infighting within Nazism itself. This pathbreaking examination of the British press' coverage of Nazism in the 1930s greatly enhances our knowledge of the fascist regime with which the British Government was attempting to reach agreement at the time.

Australian Superannuation Legislation, 2012, 16th ed Nov 17 2021 "Consolidated to 1 January 2013, this title contains a summary of 2012 amending Acts and Regulations to superannuation, tax and related laws, and is the essential legislation book for practitioners. The publication includes the complete superannuation industry supervision (SIS) legislation, superannuation guarantee Act, unclaimed superannuation money Act, and government co-contributions Act. It also includes relevant extracts from the income tax and taxation administration Acts, and other laws impacting on superannuation operation."--Publisher's website.

Defence Against Weapons of Mass Destruction Terrorism Apr 22 2022 In Defence Against Weapons of Mass Destruction Terrorism the editors examined the class of Weapons of Mass Destruction (WMD) for terrorist use, and have found that their effects range from serious nuisance value up to catastrophic destruction of a large urban area. There are some differences in the effects depending on whether they are used against military or civilian targets, whether they are used from inside the target area or outside, and between those weapons for which MOPP (Mission Oriented Protective Posture) gear can provide useful protection (Biological Weapons, Chemical Weapons) and those for which it often cannot (radiation, nuclear explosions). These are useful ways to begin thinking about establishing protocols for protecting our armed forces and the civilian population they are sworn to defend.

The Cauldron Nov 24 2019 In March 2011, NATO launched a mission hitherto entirely unthinkable: to protect civilians against Libya's ferocious regime, solely from the air. NATO had never operated in North Africa, or without troops on the ground; it also had never had to move as quickly as it did that spring. It took seven months, 25,000 air sorties, 7,000 combat strike missions, 3,100 maritime hailings and nearly 400 boardings for Tripoli to fall. This book tells for the first time the whole story of this international drama, spanning the hallways of the United Nations in New York, NATO Headquarters in Brussels and, crucially, the two operational epicentres: the Libyan battlefield, and Joint Force Command Naples, which was in charge of the mission. Weighill and Gaub offer a comprehensive exploration of both the war's progression and the many challenges NATO faced, from its extremely rapid planning and limited understanding of Libya and its forces, to training shortfalls and the absence of post-conflict planning. There is a long-awaited account of the Libyan war: one that truly considers all the actors involved.

Contributions from the Biological Laboratories in Princeton University Jan 27 2020 Consists of reprints of articles from various journals.

Design and Control of Power Converters 2019 Mar 29 2020 In this book, 20 papers focused on different fields of power electronics are gathered. Approximately half of the papers are focused on different control issues and techniques, ranging from the computer-aided design of digital compensators to more specific approaches such as fuzzy or sliding control techniques. The rest of the papers are focused on the design of novel topologies. The fields in which these controls and topologies are applied are varied: MMCs, photovoltaic systems, supercapacitors and traction systems, LEDs, wireless power transfer, etc.

Health Promotion in the 21st Century Sep 27 2022 How should we invest precious health resources? At a time when chronic illness is increasing, inequality persists and climate change is starting to impact our health, how can health promotion improve health outcomes across the whole population? Health Promotion in the 21st Century offers a systematic introduction to the principles of health promotion today, and effective planning, implementation and evaluation. The authors review the global, regional and local issues that affect health in Australia, and show how social, economic, political and educational elements in society contribute to population health and wellbeing. Throughout, the authors emphasise that health promotion needs multiple solutions, and that health professionals should seek out strategic opportunities and partnerships. They consider the issues facing vulnerable groups - such as Aboriginal and Torres Strait Islander people, those with mental health issues, and the aged - and suggest a variety of innovative tools for working with particular populations. They also focus on strategies to ensure programs remain vibrant and sustainable in the longer term. With case studies and activities in each chapter, Health Promotion in the 21st Century is an essential resource for anyone seeking to build a career in health promotion.
