New York Magazine Feb 26 2020 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Methodologies for Intelligent Systems Feb 20 2022 This volume contains the revised versions of the papers presented at the Eighth International Symposium on Methodologies for Intelligent Systems (ISMIS '94), held in Charlotte, North Carolina, USA in October 1994. Besides four invited contributions by renowned researchers on key topics, there are 56 full papers carefully selected from more than 120 submissions. The book presents the state of the art for methodologies for intelligent systems; the papers are organized in sections on approximate reasoning, evolutionary computation, intelligent information systems, knowledge representation, methodologies, learning and adaptive systems, and logic for AI.

Geometry of Safecracking Oct 04 2020 Jeremy Reeder explains the mechanics of modern combination locks and reveals the math behind the magic of professional safecracking. He demonstrates how, with the right tools and a specialized application of geometry, safes can usually be opened with no more than one little hole.

New York Magazine Dec 06 2020 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Rollout, Policy Iteration, and Distributed Reinforcement Learning Oct 16 2021 The purpose of this book is to develop in greater depth some of the methods from the author's Reinforcement Learning and Optimal Control recently published textbook (Athena Scientific, 2019). In particular, we present new research, relating to systems involving multiple agents, partitioned architectures, and distributed asynchronous computation. We pay special attention to the contexts of dynamic programming/policy iteration and control theory/model predictive control. We also discuss in some detail the application of the methodology to challenging discrete/combinatorial optimization problems, such as routing, scheduling, assignment, and mixed integer programming, including the use of neural network approximations within these contexts. The book focuses on the fundamental idea of policy iteration, i.e., start from some policy, and successively generate one or more improved policies. If just one improved policy is generated, this is called rollout, which, based on broad and consistent computational experience, appears to be one of the most versatile and reliable of all reinforcement learning methods. In this book, rollout algorithms are developed for both discrete deterministic and stochastic DP problems, and the development of distributed implementations in both multiagent and multiprocessor settings, aiming to take advantage of parallelism. Approximate policy iteration is more ambitious than rollout, but it is a strictly off-line method, and it is generally far more computationally intensive. This motivates the use of parallel and distributed computation. One of the purposes of the monograph is to discuss distributed (possibly asynchronous) methods that relate to rollout and policy iteration, both in the context of an exact and an approximate implementation involving neural networks or other approximation architectures. Much of the new research is inspired by the remarkable AlphaZero chess program, where policy iteration, value and policy networks, approximate lookahead minimization, and parallel computation all play an important role.

Jazz Fly 2 Oct 28 2022 A fly uses a combination of Spanish and jazz scat to ask a sloth, a monkey, and a mackaw to transport his band to a tropical concert site, and then to talk sense to an anteater who interrupts their performance. Includes author's note on how language, rhythm, color, and life are depicted in the book.

New York Magazine Aug 22 2019 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Flight #2 Nov 05 2020 For the first time in his life, Edward Macleod has a purpose. He's sprouted wings and finally found confirmation that he is indeed one of the magical Guardians of the Afterlife. Now Edward must rescue his mother and all his new friends from the Jackal. But time is quickly running out and he needs to master his Guardian powers first. Without them, he doesn't stand a chance in the ultimate battle—and the souls of those closest to him will be lost forever.

Webster's New World Roget's A-Z Thesaurus Feb 08 2021 When you need the right word, right away—turn to Webster's New Roget's A-Z Thesaurus Easy . . . Organized alphabetically, just like a dictionary, with no confusing number systems Accessible . . . Only common words are used in the main entry list—never esoteric words that you would not think of looking for Comprehensive . . . Brims with synonyms, antonyms, and phrases other word-finders overlook—so you're never at a loss for words Up to the Minute . . . Packed with additional listings and synonyms to reflect today's latest scientific, medical, and other technical terms

Webster's New World Thesaurus Jul 01 2020 Organized alphabetically for easy access, a revised edition of the best-selling reference provides synonyms, general words, and antonyms, as well as slang terms, colloquial expressions, technical terms, and the most recent scientific and medical terminology. Reissue.

Constraint-Handling in Evolutionary Optimization Jan 27 2020 This book is the result of a special session on constraint-handling techniques used in evolutionary algorithms within the Congress on Evolutionary Computation (CEC) in 2007. It presents recent research in constraint-handling in evolutionary optimization.

Neuman and Baretta's Dictionary of the Spanish and English Languages Aug 14 2021

Oxford English Dictionary Additions Series May 23 2022 This is the third in a major series of volumes supplementing the Second Edition of the Oxford English Dictionary. Volume 3 contains 3,000 new words and meanings from around the English-speaking world, including the UK (Citizen's Charter), North America (affluent, Clintonomics), Australia (beardie), and the West Indies (zouk). A wide variety of subjects is covered, including the sciences (buckyball, nanotechnology, Tourette syndrome), finance (junk bond, negative equity), literary theory (metafiction), computing (freeware, core dump), and sport (basho, lowball).

Swim The Fly Sep 27 2022 Three boys, one summertime goal: to see a real-live naked girl. Fifteen-year-old Matt Gratton and his two best friends, Coop and Sean, always set themselves a summertime goal. This year's? To see a real-live naked girl for the first time - quite a challenge, given that none of the guys have the nerve to even ask a girl out on a date. But catching a girl in the buff starts to look easy compared to Matt's other summertime aspiration: to swim the 100-yard butterfly (the hardest stroke known to God or man) as a way to impress Kelly West, the sizzling new star of the swim team. In the spirit of Hollywood's blockbuster comedies, screenwriter-turned-YA-novelist Don Calame unleashes a true ode to the adolescent male: characters who are side-splittingly funny, sometimes crude, yet always full of heart.

Handbook of Ordinary Differential Equations Sep 15 2021 The Handbook of Ordinary Differential Equations: Exact Solutions, Methods, and Problems, is an exceptional and complete reference for scientists and engineers as it contains over 7,000 ordinary differential equations with solutions. This book contains more equations and methods used in the field than any other book currently available. Included in the handbook are exact, asymptotic, approximate analytical, numerical symbolic and qualitative methods that are used for solving and analyzing linear and nonlinear equations. The authors also present formulas for effective construction of solutions and many different equations arising in various applications like heat transfer, elasticity, hydrodynamics and more. This extensive handbook is the perfect resource for engineers and scientists searching for an exhaustive reservoir of information on ordinary differential equations.

Dictionary of the English/Creole of Trinidad & Tobago Mar 09 2021 Using the historical principles of the Oxford English Dictionary, Lise Winer presents the first scholarly dictionary of this unique language. The dictionary comprises over 12,200 entries, including over 4500 for flora and fauna alone, with numerous cross-references. Entries include definitions, alternative spellings, pronunciations, etymologies, grammatical information, and illustrative citations of usage. Winer draws from a wide range of sources - newspapers, literature, scientific reports, sound recordings of songs and interviews, spoken language - to provide a wealth and depth of language, clearly situated within a historical, cultural, and social context.
