The Inner World of Farm Animals Jul 23 2022 Chickens can count. Pigs are smarter than poodles. Cows form close friendships. Turkeys know one another by their voices, and sheep recognize faces--of other sheep, and of people. Far from lacking thoughts and feelings, barnyard creatures demonstrate sophisticated problem-solving abilities, possess rich social lives, and feel a wide range of emotions. In other words, they're much like humans in countless ways. And, like us, they suffer physical pain and mental anguish. In *The Inner World of Farm Animals*, Amy Hatkoff combines the latest research on the emotional and intellectual capacities of farm animals with touching--and often surprising--stories to bring their inner world to life. Soulful photographs of cows, goats, lambs, and other barnyard animals complement the text, and add to the belief that these creatures deserve our attention. In this heartfelt book, Hatkoff joins the growing call for treating these sentient, aware beings with compassion and respect. "THE INNER WORLD OF FARM ANIMALS

will surely change your mind about the emotional lives of these wonderful beings. Moving stories of Alice, a doting and dancing turkey, Hope and Johnny, two loving pigs, and Olivia, a goat with a wonderful personality, woven in with the latest scientific research, make it clear that we must stop abusing them and other hapless animals for our own selfish needs. The easiest way for us to increase our compassion footprint is to appreciate animals for who they are -- amazing individuals who care deeply about what happens to them." --Marc Bekoff, author of *The Emotional Lives of Animals*, *Animals Matter*, *Animals at Play*, and *Wild Justice: The Moral Lives of Animals* (with Jessica Pierce) "All animal lovers will love this book. Farm animals are sentient and they have true emotions. The photography in the book is gorgeous." --Temple Grandin, author of *Animals in Translation* "A beautiful, evocative, and pretty much perfect book--this book will leave you changed for the better." --Rory Freedman, co-author of *Skinny Bitch* "This beautiful, well-researched book should make every meat-eater think differently about the lives of the animals that turn up on his or her plate." --Peter Singer "Amy Hatkoff's insightful book addresses a question we've finally started asking: just how evolved is our place in the food chain, anyway? It's time we realized we are dealing with sentient beings rather than assembly-line widgets. Books like this one point to a more enlightened road: the future depends on us taking it." --Dan Barber, Owner and Executive Chef, Blue Hill

restaurants "The Inner World of Farm Animals brings together a fascinating mix of science and story-telling about the intelligence and emotional lives of farm animals. A treasure-trove book, which will delight, amaze, cause laughter and, possibly, a tear or two." -- Joyce d'Silva, *Compassion in World Farming*

Brain and the Inner World Apr 20 2022 The Brain and the Inner World is an eagerly-awaited account of a momentous revolution. Subjective mental states like consciousness, emotion, and dreaming were once confined to the realm of philosophy, psychoanalysis, and the human sciences. These topics now assume center stage in leading neuroscientific laboratories around the world. This shift has produced an explosion of new insights into the natural laws that govern our inner life. By two pioneers in the field, *The Brain and the Inner World* guides us through the exciting new discoveries, showing how old psychodynamic concepts are being forged into a

scientific framework for understanding subjective experience. It is not that the mind is reduced to neurobiology. Rather, thanks to neurobiology, we are free to believe in the power of the mind. The neurosciences will soon be able to argue with Plato, Descartes, James, Freud, and Lacan about the mysterious connections between emotions, experience, will, reason, and creativity.

Discover Your Subpersonalities Dec 04 2020 Have you ever felt there is more than one you? That sometimes you are one type of person, sometimes another? Do you ever find yourself saying `yes' when you meant to say `no'? Or deciding to do one thing, then actually doing another? Most of us have had this experience of another personality taking us over, causing us to behave in an unintended way. Why do we do it? What's going on? Well known psychologist and writer John Rowan shows how each of us is made up of a number of `subpersonalities'. Some may help us, some may hinder us. If we want to be in charge of our inner world we had better find out who they are and what they do. John Rowan has written this book specifically to enable you to do this. Lively and entertaining, with questionnaires and simple exercises, Discover Your Subpersonalities will enable you to get to know the people inside you!

Love & Rage Jul 31 2020 *Love & Rage* is a book about children, both the child in those of us who are chronologically adult, as well as the children we may be interacting with. It takes a reader for a journey into their inner world of intense, raging emotions which often goes unheeded by the outside adult world. With the trained ear

of a child psychotherapist, the author listens to children's stories as they emerge in her consulting room, through word and play, and translates them for adults. Supported by the author's own personal associations and a bedrock of psychodynamic theory, the book throws light on what comes into a psychotherapist's consulting room, and demonstrates that it is not unusual, bizarre or crazy. Instead, it is the ordinary stuff of everyday life, taking place in every family. That sometimes we all carry the pain of complex feelings within ourselves for all of our lives-love and rage towards the people we are closest to. This book is essential reading for anyone close to children-parents and parents-to-be, teachers, school counsellors-but also for anyone looking to attend to the child within them.

The Portal to Your Inner World Dec 24 2019 The Portal To Your Inner World is a self-awareness/self-help book. The self-awareness aspect of the book describes what is going on inside us when we have extreme emotions, feelings, and thinking that leads to disruptive and self-defeating behavior. The self-help aspect describes a process to change and eliminate disruptive emotions, thinking, and behaviors. This process is called Stored Feelings Reintegration. The self-help approach is not to talk our self into changing our thoughts. It's about, even requires, a different way of looking at what happens inside our body and mind when our emotions are causing us problems. This change of perspective offers an inward

pathway which enables our emotions, mind, and body to come together for positive change.

The Inner World Outside Jun 22 2022 First published in 1993, *The Inner World Outside* has become a classic in its field. Paul Holmes walks the reader through the 'inner world' of object relationships and the corresponding 'outside world' shared by others in which real relationships exist. Trained as a psychotherapist in both psychoanalytical and psychodramatic methods, Paul Holmes has written a well informed, clear introduction to Object Relations Theory and its relation to psychodrama. Each chapter opens with an account of part of a psychodrama session which focus on particular aspects of psychodrama or object relations theory illuminating the concepts or techniques using the clinical material from the group to illustrate basic psychoanalytic concepts in action. Published here with a

new introduction from the author that links the book's content to concepts of attachment theory, the book weaves together the very different concepts in an inspiring and comprehensive way that will ensure the book continues to be used by mental health and arts therapies professional, whether in training or practice.

Psychoanalysis, Society, and the Inner World Mar 27

2020 Psychoanalysis, Society, and the Inner World explores ideas from psychoanalysis that can be valuable in understanding social processes and institutions and in particular, how psychoanalytic ideas and methods can help us understand the nature and roots of social and political conflict in the contemporary world. Among the ideas explored in this book, of special importance are the ideas of a core self (Heinz Kohut and Donald Winnicott) and of an internal object world (Melanie Klein, Ronald Fairbairn). David Levine shows how these ideas, and others related to them, offer a framework for understanding how social processes and institutions establish themselves as part of the individual's inner world, and how imperatives of the inner world influence

the shape of those processes and institutions. In exploring the contribution psychoanalytic ideas can make to the study of society, emphasis is placed on post-Freudian trends that emphasize the role of the internalization of relationships as an essential part of the process of shaping the inner world. The book's main theme is that the roots of social conflict will be found in ambivalence about the value of the self. The individual is driven to ambivalence by factors that exist simultaneously as part of the inner world and the world outside. Social institutions may foster ambivalence about the self or they may not. Importantly, this book distinguishes between institutions on the basis of whether they do or do not foster ambivalence about the self, shedding light on the nature and sources of social conflict. Institutions that foster ambivalence also foster conflict at a societal level that mirrors and is mirrored by conflict over the standing of the self in the inner world. Levine makes extensive use of case material to illuminate and develop his core ideas. *Psychoanalysis, Society, and the Inner World* will appeal to psychoanalysts and to social scientists interested in psychoanalytic ideas and methods, as well as students studying across these fields who are keen to explore social and political issues.

Lives in Exile May 09 2021 This book recounts the life stories - stories of loss and hope, of anxieties and aspirations - of generations of exiled Tibetans living in India since the late 1950s after the Chinese takeover of Tibet. Located in the realm of psycho-historical analysis, this work has a dual focus in interpreting and analyzing these life stories. First, a consistent effort is made to unravel the psychologically devastating consequences following refugeehood and torture. A simultaneous focus searches for symbols of human resilience - the opening up of creative possibilities and a return to renewed meanings in the lives of these exiles. Two central symbols of continuity among this community which are discussed are the Dalai Lama and the philosophy of Buddhism. This is a unique book that looks at issues of contemporary interest and relevance to the Tibetan community today, providing a different view of their 'place' in the wider political sphere. Lives in Exile - Exploring the World of Tibetan Refugees will be of interest to scholars in the fields of psychology, history, and refugee studies and to the general reader.

The Inner World of Trauma Sep 25 2022 Donald Kalsched explores the interior world of dream and fantasy images encountered in therapy with people who have suffered unbearable life experiences. He shows how, in an ironical twist of psychical life, the very images which are generated to defend the self can become malevolent and destructive, resulting in further trauma for the person. Why and how this happens are the questions the book sets out to answer. Drawing on detailed clinical material, the author gives special attention to the problems of addiction and psychosomatic disorder, as well as the broad topic of dissociation and its treatment. By focusing on the archaic and primitive defenses of the self he connects Jungian theory and practice with contemporary object relations theory and dissociation theory. At the same time, he

shows how a Jungian understanding of the universal images of myth and folklore can illuminate treatment of the traumatised patient. Trauma is about the rupture of those developmental transitions that make life worth living. Donald Kalsched sees this as a spiritual problem as well as a psychological one and in *The Inner World of Trauma* he provides a compelling insight into how an inner self-care system tries to save the personal spirit.

Lives in Exile Oct 02 2020 This book explores the devastating consequences and psychological ruptures of refugeehood as it evocatively recounts the life histories of dislocated Tibetans expelled from their homes since 1959. Following the genre of a story, the book offers dynamic understandings of unconscious processes and the intergenerational transmission of trauma across generations of an exiled and internally displaced people. The book analyses the paradoxical spaces which Tibetans in exile occupy as they strive to preserve their cultural and spiritual heritage, rituals, religion, and language while also dynamically remoulding themselves to adapt to their living realities. Presenting a nuanced picture, it narrates stories of refugees, political prisoners and survivors of torture along with stories of loss and angst, cultural celebrations and political demonstrations. The author in this new edition highlights and explores the art, artists, and poetry in the exiled community. The volume also looks at the significance of Buddhism and the philosophy of the Dalai Lama for the people in exile and the personal

and collective will of the community to connect their lost past to a living present and an imagined future. Rooted in the psychoanalytical tradition, this book will be of interest to psychologists, sociologists, political scientists, scholars of literature, and arts and aesthetics. It will also appeal to those interested in Sino-Tibetan relations, Buddhist studies, South Asian Studies, cultural and peace studies, and those working with refugees, and displaced persons.

Adventures Within Jan 25 2020 Echoes in Time (90,000 words, 41 chapters, and epilogue) blends the themes of alien contact with the discovery of an asteroid in an orbit that will lead to a collision with earth. The "alien" culture, as the story develops, is not from some far-off star system, but the star-traveling descendants of an earth-born race of dinosaurs that evolved shortly before their own budding civilization was destroyed by an asteroid impact 65 million years ago. The ship bearing a member of the Kirraka, as these not-so-alien beings call themselves, lands in a remote area of Texas. When military units and aircraft move aggressively into the area surrounding the ship, they are attacked with powerful weapons from the alien ship (based on the assumption that star travelers wouldn't survive long without providing for their own protection against the spears and arrows of local savages)

and the ship leaves with a powerful display of physical capabilities and disdain for the efforts to prevent their departure. A bizarre message is left at the landing spot that specifically names a person that the aliens wish to use as their sole contact, an obscure woman paleontologist and late Cretaceous period scholar, Edith Izzard. Contact with an advanced alien culture is viewed by Washington to have enormous economic and social consequences and importance. The resources of the federal government are turned to locating Edith and converting her to the governments "side" in dealings with the aliens. Edith is not easily convinced, or converted, to any side, especially as it becomes clear that if she does not cooperate she would forfeit her individual freedom and be coerced to do the government's will. When an asteroid is discovered heading for the earth, the importance of the technology available to an advanced culture seems crucial, and Edith's cooperation ever more essential in utilizing the power of the alien science to avoid global disaster. Edith retains her freedom, establishes contact with the alien, K. Word of the impending asteroid collision leaks to the population of the world, and chaos builds. The entire civilization can't be saved, but a compromise is worked out in partnership with the former residents of the planet.
