Regional Integration in West Africa *Water Bears: The Biology of Tardigrades* The Twiller

The Twiller Jun 23 2019 An extraterrestrial being helps a hapless bungler who is lost in space.

Sexual Orientation, Gender Identity, and Schooling Jul 17 2021 'Sexual Orientation, Gender Identity, and Schooling' brings together contributions from a diverse group of researchers, policy analysts, and education advocates from around the world to synthesize the practice and policy implications of research on sexual orientation, gender identity, and schooling.

Water Bears: The Biology of Tardigrades Jul 25 2019 Offering extensive information on tardigrades, this volume begins with a chapter on the history of tardigrades, from the first description by Goeze in 1773, until 1929, when the most comprehensive monographic approach by E. Marcus was published. Tardigrades' organ systems, including their integument, body cavity, digestive, muscular, nervous and reproductive systems, as well as their overall external morphology, are summarized in the second chapter. Subsequent chapters present the current state of knowledge on tardigrade phylogeny, biogeography, paleontology, cytology and cytogenetics. In addition, the book provides insights into the ecology of tardigrades in marine, freshwater and terrestrial habitats. The reproduction, development and life cycles are summarized and the extraordinary environmental adaptations of encystment and cyclomorphosis, desiccation tolerance, freezing tolerance and radiation tolerance are discussed in detail. Further chapters provide an overview of key approaches in molecular tardigrade studies and describe techniques for sampling and sample processing. The book closes with a list of tardigrade taxa up to a sub-generic level, including the type species of each genus, the numbers of lower taxa in each taxon, and the main environments in which the taxa were found. Given its depth of coverage, the volume offers an invaluable resource for scientists from various disciplines who plan to research tardigrades, and for all others

who are interested in these fascinating animals.

Ethics at the End of Life Dec 22 2021 The 14 chapters in *Ethics at the End of Life: New Issues and Arguments*, all published here for the first time, focus on recent thinking in this important area, helping initiate issues and lines of argument that have not been explored previously. At the same time, a reader can use this volume to become oriented to the established questions and positions in end of life ethics, both because new questions are set in their context, and because most of the chapters—written by a team of experts—survey the field as well as add to it. Each chapter includes initial summaries, final conclusions, and a Related Topics section. TABLE OF CONTENTS John K. Davis, "Introduction" Geoffrey Scarre, "Is it possible to be better off dead?" Taylor W. Cyr, "How Does Death Harm the Deceased?" Benjamin Mitchell-Yellin, "The Significance of an Afterlife" Jens Johansson, "The Severity of Death" John K. Davis, "Defining Death" James Stacey Taylor, "Autonomy, Competence, and End of Life" Eric Vogelstein, "Deciding for the Incompetent" Paul T. Menzel, "Change of Mind: An Issue for Advance Directives" Nancy S. Jecker, "Medical Futility and Respect for Patient Autonomy" Paul T. Menzel, "Refusing Lifesaving Medical Treatment and Food and Water by Mouth" Thomas S. Huddle, "Suicide, Physician-Assisted Suicide, the Doing-Allowing Distinction and Double Effect" Michael Cholbi, "Grief and End of Life Surrogate Decision-making" Bruce Jennings, "Solidarity near the End of Life: The Promise of Relational Decision-making in the Care of the Dying" Colin Farrelly, "Justice and the Aging of the Human Species"

Animal Alphabet Feb 09 2021 This early learning book is geared to kids toddlers and preschool aged from 2 to 5 years old (designed for toddlers, preschoolers, pre-k and kindergarten kids) but it is suitable for any child who loves animals.

ACCA Paper P6 Advanced Taxation FA2012 Practice and revision kit Sep 30 2022 The examiner-reviewed P6 Practice and Revision Kit provides invaluable guidance on how to approach the exam and contains past ACCA exam questions for you to try to develop your application skills. Questions are grouped by topic so that you can easily identify what they cover. Detailed solutions provide tips, advise you how to approach questions and tell you how to gain easy marks. Examiner's

comments tell you what the examiner is looking for in answers.

The Affordable Care Act Mar 25 2012 The Patient Protection and Affordable Care Act (ACA) was designed to increase health insurance quality and affordability, lower the uninsured rate by expanding insurance coverage, and reduce the costs of healthcare overall. Along with sweeping change came sweeping criticisms and issues. This book explores the pros and cons of the Affordable Care Act, and explains who benefits from the ACA. Readers will learn how the economy is affected by the ACA, and the impact of the ACA rollout.

Dependent Data in Social Sciences Research Oct 20 2021 This volume presents contributions on handling data in which the postulate of independence in the data matrix is violated. When this postulate is violated and when the methods assuming independence are still applied, the estimated parameters are likely to be biased, and statistical decisions are very likely to be incorrect. Problems associated with dependence in data have been known for a long time, and led to the development of tailored methods for the analysis of dependent data in various areas of statistical analysis. These methods include, for example, methods for the analysis of longitudinal data, corrections for dependency, and corrections for degrees of freedom. This volume contains the following five sections: growth curve modeling, directional dependence, dyadic data modeling, item response modeling (IRT), and other methods for the analysis of dependent data (e.g., approaches for modeling cross-section dependence, multidimensional scaling techniques, and mixed models). Researchers and graduate students in the social and behavioral sciences, education, econometrics, and medicine will find this up-to-date overview of modern statistical approaches for dealing with problems related to dependent data particularly useful.

The Bloomsbury Companion to the Philosophy of Consciousness May 15 2021 From Descartes and Cartesian mind-body dualism in the 17th century though to 21st-century concerns about artificial intelligence programming, *The Bloomsbury Companion to the Philosophy of Consciousness* presents a compelling history and up-to-date overview of

this burgeoning subject area. Acknowledging that many of the original concepts of consciousness studies are found in writings of past thinkers, it begins with introductory overviews to the thought of Descartes through to Kant, covering Brentano's restoration of empiricism to philosophical psychology and the major figures of the late 19th and early 20th centuries: Russell, Wittgenstein, Ryle and James. These opening chapters on the forces in the history of consciousness lay the groundwork needed to understand how influential contemporary thinkers in the philosophy of mind interpret the concept of consciousness. Featuring leading figures in the field, Part II discusses current issues in a range of topics progressing from the so-called hard problem of understanding the nature of consciousness, to the methodology of invoking the possibility of philosophical zombies and the prospects of reductivism in philosophy of mind. Part III is dedicated to new research directions in the philosophy of consciousness, including chapters on experiment objections to functionalism and the scope and limits of artificial intelligence. Equipped with practical research resources including an annotated bibliography, a research guide and a glossary, *The Bloomsbury Companion to the Philosophy of Consciousness* is an authoritative guide for studying the past, present and future of consciousness.

Interior, Environment, and Related Agencies Appropriations for 2016, Part 2, 2015, 114-1 Aug 06 2020

Cybernetics, Cognition and Machine Learning Applications Nov 28 2019 This book provides a collection of selected papers presented at the International Conference on Cybernetics, Cognition and Machine Learning Applications (ICCCMLA 2019), which was held in Goa, India, on 16–17 August 2019. It covers the latest research trends and advances in the areas of data science, artificial intelligence, neural networks, cognitive science and machine learning applications, cyber-physical systems, and cybernetics.

Benefits and Costs of Corporate Debt Restructuring Jun 15 2021 The paper offers a method to quantify benefits and costs of corporate debt restructuring, with an application to Korea. We suggest a “persistent ICR

Advances in Computing and Data Sciences Nov 08 2020 This two-volume book constitutes the post-conference proceedings of the 5th

International Conference on Advances in Computing and Data Sciences, ICACDS 2021, held in Nashik, India, in April 2021.* The 103 full papers were carefully reviewed and selected from 781 submissions. Part II is devoted to data sciences, organizing principles, medical technologies, computational linguistics etc. *The conference was held virtually due to the COVID-19 pandemic.

Health Financing in Indonesia Apr 25 2022 In 2004 the Indonesian government made a commitment to provide its entire population with health insurance coverage through a mandatory public health insurance scheme. It has moved boldly already provides coverage to an estimated 76.4 million poor and near poor, funded through the public budget. Nevertheless, over half the population still lacks health insurance coverage, and the full fiscal impacts of the government's program for the poor have not been fully assessed or felt. In addition, significant deficiencies in the efficiency and equity of the current health system, unless addressed will exacerbate cost pressures and could preclude the effective implementation of universal coverage (UC) and the desired result of improvements in population health outcomes and financial protection. For Indonesia to achieve UC, systems' performance must be improved and key policy choices with respect to the configuration of the health financing system must be made. Indonesia's health system performs well with respect to some health outcomes and financial protection, but there is potential for significant improvement. High-level political decisions are necessary on key elements of the health financing reform package. The key transitional questions to get there include: [the benefits that can be afforded and their impacts on health outcomes and financial protection; [how the more than 50 percent of those currently without coverage will be insured; [how to pay medical care providers to assure access, efficiency, and quality; [developing a streamlined and efficient administrative structure; [how to address the current supply constraints to assure availability of promised services; [how to raise revenues to finance the system, including the program for the poor as well as currently uninsured groups that may require government subsidization such as the more than 60 million informal sector workers, the 85 percent of workers in firms of less than five employees, and the 70 percent of the population living in rural areas.

Tests and Assessments in Counseling Jan 23 2022 *Tests and Assessments in Counseling* provides students with current information on assessment tools and techniques through detailed case scenarios and vignettes. Going beyond basic information about a multitude of assessments, the authors focus on the use of instruments in individual cases to allow readers to more fully grasp the integral relationship between tests and assessment data and the counseling process. Chapters guide students through choosing the most effective assessment tool, successfully administering the assessment, and making meaningful and useful results of the data with the client. Test questions are also included at the end of each chapter.

Budget and Economic Outlook 2019 to 2029 Nov 20 2021 The Congressional Budget Office (CBO) routinely presents the latest possible forecast of economic activity projected a decade in advance. These forecasts are continually updated to reflect social, political, and economic changes that could impact financial reporting results.

Road Vehicle Automation 3 Feb 21 2022 This edited book comprises papers about the impacts, benefits and challenges of connected and automated cars. It is the third volume of the LNMOB series dealing with Road Vehicle Automation. The book comprises contributions from researchers, industry practitioners and policy makers, covering perspectives from the U.S., Europe and Japan. It is based on the Automated Vehicles Symposium 2015 which was jointly organized by the Association of Unmanned Vehicle Systems International (AUVSI) and the Transportation Research Board (TRB) in Ann Arbor, Michigan, in July 2015. The topical spectrum includes, but is not limited to, public sector activities, human factors, ethical and business aspects, energy and technological perspectives, vehicle systems and transportation infrastructure. This book is an indispensable source of information for academic researchers, industrial engineers and policy makers interested in the topic of road vehicle automation.

Regional Integration in West Africa Aug 25 2019 Assessing the potential benefits and risks of a currency union Leaders of the fifteen-member Economic Community of West African States (ECOWAS) have set a goal of achieving a monetary and currency union by late 2020. Although some progress has been made toward achieving this ambitious

goal, major challenges remain if the region is to realize the necessary macroeconomic convergence and establish the required institutional framework in a relatively short period of time. The proposed union offers many potential benefits, especially for countries with historically high inflation rates and weak central banks. But, as implementation of the euro over the past two decades has shown, folding multiple currencies, representing disparate economies, into a common union comes with significant costs, along with operational challenges and transitional risks. All these potential negatives must be considered carefully by ECOWAS leaders seeking to meet a self-imposed deadline. This book, by two leading experts on economics and Africa, makes a significant analytical contribution to the debates now under way about how ECOWAS could achieve and manage its currency union, and the ramifications for the African continent.

The Psychology of Friendship Dec 10 2020 In the late 20th and 21st centuries, the meteoric rise of countless social media platforms and mobile applications have illuminated the profound need friendship and connection have in all of our lives; and yet, very few scholarly volumes have focused on this unique and important bond during this new era of relating to one another. Exploring such topics as friendship and social media, friendship with current and past romantic partners, co-workers, mentors, and even pets, editors Mahzad Hojjat and Anne Moyer lead an expert group of global contributors as they each explore how friendship factors within our lives today. What does it mean to be a friend? What roles do friendships play in our own development? How do we befriend those across the race, ethnicity, gender, and orientation spectrums? What happens when a friendship turns sour? What is the effect of friendship - good and bad - on our mental health? Providing a much needed update to the field of interpersonal relations, *The Psychology of Friendship* serves as a field guide for readers as they shed traditional definitions of friendship in favor of contemporary contexts and connections.

Recent Advances in Agrometeorological Analysis Techniques for Crop Monitoring in Support of Food Security Early Warning Oct 27 2019

Malaysia Aug 18 2021 This 2017 Article IV Consultation highlights the Malaysian economy's good performance over the past few years in a challenging global economic environment. Despite the impact of global

commodity price and financial market volatility, the economy remained resilient, thanks to a diversified production and export base, strong balance sheet positions, a flexible exchange rate, responsive macroeconomic policies, and deep financial markets. Although real GDP growth slowed, Malaysia is still among the fastest-growing economies among its peers. Real GDP growth is expected to increase moderately to 4.5 percent year over year in 2017 from 4.2 percent in 2016. Domestic demand, led by private consumption, continues to be the main driver of growth.

Electrical and Control Engineering & Materials Science and Manufacturing May 27 2022 This proceedings brings together eighty seven selected articles presented at the joint conferences of the 6th International Conference on Electrical and Control Engineering (ICECE2015) and the 4th International conference on Materials Science and Manufacturing (ICMSM2015), which was held in Shanghai, China, during August 14–15 2015. ICECE2015 and ICMSM2015 provide an excellent international platform for researchers to share the state-of-art research results and fork collaborations amongst themselves from different part of the world. The proceedings collected the latest research results and applications funded by Chinese government agencies in Electrical Engineering, Control Engineering, Wireless Communication, Computer Networks, Computer Science, Materials Engineering and other related topics. It is a kaleidoscope reflecting the Chinese research and development efforts in the above 6 areas. All submitted papers were subjected to strict peer-reviewing by 2–4 expert referees. The papers have been selected for this volume because of quality and the relevance to the conference. Contents:Control EngineeringElectronics EngineeringWireless Communication and Computing NetworksComputer Science and ApplicationMaterials Science and EngineeringConstruction Materials and Civil Engineering Readership: Researchers and professionals in electrical and electronics engineering, material engineering and computer networks.

Cat Solved Paper Aug 30 2022

The Economics of Political Transitions Sep 18 2021 Over the past two years, ongoing political transitions in many Arab countries have led to social unrest and an economic downturn. This paper examines

comparable historical episodes of political instability to derive implications for the near- and medium-term economic outlook in the Arab countries in transition. In general, past episodes of political instability were characterized by a sharp deterioration in macroeconomic outcomes and a sluggish recovery over the medium term. Recent economic developments in the Arab countries in transition seem to be unfolding along similar lines, although the weak external environment and large fiscal vulnerabilities could result in a prolonged slump.

Applied Engineering Sciences Jun 27 2022 This proceedings volume contains selected papers presented at the 2014 AASRI International Conference on Applied Engineering Sciences, held in Hollywood, LA, USA. Contributions cover the latest developments and advances in the field of Applied Engineering Sciences.

Security Solutions and Applied Cryptography in Smart Grid Communications Sep 06 2020 Electrical energy usage is increasing every year due to population growth and new forms of consumption. As such, it is increasingly imperative to research methods of energy control and safe use. *Security Solutions and Applied Cryptography in Smart Grid Communications* is a pivotal reference source for the latest research on the development of smart grid technology and best practices of utilization. Featuring extensive coverage across a range of relevant perspectives and topics, such as threat detection, authentication, and intrusion detection, this book is ideally designed for academicians, researchers, engineers and students seeking current research on ways in which to implement smart grid platforms all over the globe.

COST AND MANAGEMENT ACCOUNTING. Jan 29 2020

Saving Oil in a Hurry Mar 01 2020 During 2004, oil prices reached levels unprecedented in recent years. Although world oil markets remain adequately supplied, high oil prices reflect increasingly uncertain conditions, and many countries are considering ways to improve capacity to handle market volatility and possible supply disruptions in the future. In light of these concerns, this publication sets out a new quantitative assessment of the potential oil savings and costs of rapid oil demand restraint measures for transport, useful for both large-scale disruptions, and for smaller, localised supply disruptions in individual countries. It examines potential approaches for rapid uptake of measures

such as telecommuting, ecodriving, and car-pooling; as well as discussing methodologies for adapting policy measures to national circumstances.

The Organizational Aspects of Corporate and Organizational Crime Jun 03 2020 Ca. 200 words; this text will present the book in all promotional forms (e.g. flyers). Please describe the book in straightforward and consumer-friendly terms.

Figurative Meaning Construction in Thought and Language Mar 13 2021 This volume brings together twelve usage-based studies conducted by leading researchers in language and cognition that explore core issues of figurativeness from the Cognitive Linguistics perspective. The individual chapters reveal the central function of figurativeness in thought and its impact on language. Cognition relies on knowledge-structuring tools in the construction of meaning both mentally and linguistically. Collectively, the chapters delve into an array of topics that are crucial to future research in figurative meaning construction, especially on questions of identification and structure of figures, the figurative motivation of constructions, the impact of figurativeness on pragmatic and multimodal communication, and the correlation between figures and cognitive models.

A Framework for Educating Health Professionals to Address the Social Determinants of Health Jul 29 2022 The World Health Organization defines the social determinants of health as "the conditions in which people are born, grow, work, live, and age, and the wider set of forces and systems shaping the conditions of daily life." These forces and systems include economic policies, development agendas, cultural and social norms, social policies, and political systems. In an era of pronounced human migration, changing demographics, and growing financial gaps between rich and poor, a fundamental understanding of how the conditions and circumstances in which individuals and populations exist affect mental and physical health is imperative. Educating health professionals about the social determinants of health generates awareness among those professionals about the potential root causes of ill health and the importance of addressing them in and with communities, contributing to more effective strategies for improving health and health care for underserved individuals, communities, and

populations. Recently, the National Academies of Sciences, Engineering, and Medicine convened a workshop to develop a high-level framework for such health professional education. A Framework for Educating Health Professionals to Address the Social Determinants of Health also puts forth a conceptual model for the framework's use with the goal of helping stakeholder groups envision ways in which organizations, education, and communities can come together to address health inequalities.

For Your Own Good Sep 26 2019 In *For Your Own Good*, experts Adam Hoffer and Todd Nesbit bring together the work of 25 scholars in the field of public choice economics to raise awareness of the consequences of selective taxation and encourage a better-informed debate over such policies.

The Palgrave Handbook of Family Policy Apr 13 2021 "This engaging collection gathers theoretical and empirical insights from leading family policy experts. The authors - representing diverse countries, disciplines, and methods - bring to life the volume's innovative conceptual framework, which is organized around policy institutions, both public and private. The volume closes with a call for new lines of research that should inform family policy scholars for years to come."--Janet Gornick, Professor of Political Science and Sociology, and Director of the Stone Center on Socio-Economic Inequality, The Graduate Center, City University of New York, USA "Featuring exciting contributors from a range of often-siloed scholarly disciplines, countries and cultures, this Handbook offers nuanced insights into how interacting societal inequality factors influence family policy enactment to reinforce or improve inequality outcomes across gender, class, and nations. It is ambitious, broad-reaching, and succeeds in providing a strategic view within and across nations to inspire thoughtful evidence-based policy implications to improve societies in the future."--Ellen Ernst Kossek, Basil S. Turner Professor of Management, Purdue University, USA This open access handbook provides a multilevel view on family policies, combining insights on family policy outcomes at different levels of policymaking: supra-national organizations, national states, sub-national or regional levels, and finally smaller organizations and employers. At each of these levels, a multidisciplinary group of expert scholars assess

policies and their implementation, such as child income support, childcare services, parental leave, and leave to provide care to frail and elderly family members. The chapters evaluate their impact in improving children's development and equal opportunities, promoting gender equality, regulating fertility, productivity and economic inequality, and take an intersectional perspective related to gender, class, and family diversity. The editors conclude by presenting a new research agenda based on five major challenges pertaining to the levels of policy implementation (in particular globalization and decentralization), austerity and marketization, inequality, changing family relations, and welfare states adapting to women's empowered roles

Legislative Branch Appropriations for 2016 Jul 05 2020

Financial Management and Corporate Governance from the Feminist Ethics of Care Perspective Oct 08 2020

This book investigates how businesses can adapt their executive and fiscal practices to adopt an ethical, equal-opportunity approach. The authors demonstrate how corporations can create sustainable work environments that embrace feminist care ethics and ground their research in a strong theoretical discussion of this relatively new framework. The discussion has a multidisciplinary outlook and explores how the concept of care ethics might be successfully applied to various professional contexts. Later chapters present findings from an empirical case study conducted in Australia and use both qualitative and quantitative methods to analyse the potential power of a feminist care of ethics approach within commercial and corporate management.

ELSI in Human Enhancement: What Distinguishes it from

Therapy? Apr 01 2020 This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

Climate Risk in Africa Jan 11 2021 This open access book highlights the complexities around making adaptation decisions and building resilience in the face of climate risk. It is based on experiences in sub-Saharan Africa through the Future Climate For Africa (FCFA) applied research programme. It begins by dealing with underlying principles and structures designed to facilitate effective engagement about climate risk, including the robustness of information and the construction of knowledge through co-production. Chapters then move on to explore examples of using climate information to inform adaptation and resilience through early warning, river basin development, urban planning and rural livelihoods based in a variety of contexts. These insights inform new ways to promote action in policy and praxis through the blending of knowledge from multiple disciplines, including climate science that provides understanding of future climate risk and the social science of response through adaptation. The book will be of interest to advanced undergraduate students and postgraduate students, researchers, policy makers and practitioners in geography, environment, international development and related disciplines.

Design of Technology-Enhanced Learning May 03 2020 This book explains how educational research can inform the design of technology-enhanced learning environments. After laying pedagogical, technological and content foundations, it analyses learning in Web 2.0, Social Networking, Mobile Learning and Virtual Worlds to derive nuanced principles for technology-enhanced learning design.

The 1.5 Billion People Question Nov 01 2022 Most of the people in low and middle-income countries covered by social protection receive assistance in the form of in-kind food. The origin of such support is rooted in countries' historical pursuit of three interconnected objectives, namely attaining self-sufficiency in food, managing domestic food prices, and providing income support to the poor. This volume sheds light on the complex, bumpy and non-linear process of how some flagship food-based social protection programs have evolved over time, and how they currently work. In particular, it lays out the broad trends in reforms, including a growing move from in-kind modalities to cash transfers, from universality to targeting, and from agriculture to social protection. Case studies from Egypt, India, Indonesia, Mexico, Sri

Lanka, and United States document the specific experiences of managing the process of reform and implementation, including enhancing our understanding of the opportunities and challenges with different social protection transfer modalities.
