*Stakeholders, Governance and Responsibility* Oct 02 2020 This book re-examines the relationships between stakeholders, governance and corporate social responsibility. It address different aspects of these relationships from a wide international and interdisciplinary perspective.

**The Routledge Companion to Accounting Information Systems** Jan 05 2021 Information technology has permeated all walks of life in the past two decades. Accounting is no exception. Be it financial accounting, management accounting, or audit, information technology and systems have simplified daily tasks and routine work, simplified reporting, and changed how accounting is done. The Routledge Companion to Accounting Information Systems provides a prestige reference work which offers students and researchers an introduction to current and emerging scholarship in the discipline. Contributions from an international cast of authors provides a balanced view of both the technical underpinnings and organisational consequences of accounting information systems. With a focus on the business consequences of technology, this unique reference book will be a vital resource for students and researchers involved in accounting and information management.

**Purine and Pyrimidine Metabolism in Man** **IX** Oct 22 2019 This volume comprises articles presented at the joint IX International and 6 Euro pean Symposium on Purine and Pyrimidine Metabolism in Man held in Gmunden, Austria, June 1 through 7, 1997. Since the first of this series of meetings was held in Israel in 1973, conventions were organized every three years in different parts of the world including the USA, Japan, and Europe. The different aspects of purine and pyrimidine metabolism bring together re searchers working in molecular genetics, biochemical pharmacology, biochemistry, devel opmental biology, immunology, epidemiology and the clinics. Oriented research in the field has been seminal for the development of potent anticancer and antiviral drugs. As the number of genes which are cloned, grows, the understanding of metabolism is increas ingly enlarged and might provide leads to further improve therapeutic concepts and to bet ter understand mechanisms responsible for the development of resistance against these drugs.

In certain diseases purine and pyrimidine analogs represent not only the drugs of choice but in fact are the sole therapeutic alternative at present. The field has also taken an early lead in attempting to correct inborn errors of purine and pyrimidine metabolism by gene therapy. The organization of this meeting involved a large number of people who dedicated their time in an effort to make this symposium a success. We thank the Abstract Review Committee, the International Advisory Board and in particular the Symposium Secretariat for doing a wonderful job. [Competency-Based Accounting Education, Training, and Certification](#) Jun 22 2022 This guide is designed to assist all those who are responsible for providing or overseeing formal education or practical experience that forms part of the initial professional development of aspiring professional accountants, or the continuing professional development of professional accountants. It is particularly relevant to professional accountancy organizations. It is also intended for policy makers and regulators who determine which organizations are licensed to certify professional accountants and related specializations, for example, audit professionals. The purpose of the guide is to • increase understanding of the gap between the current skills of many accountants in some regions and the skills that are relevant in increasingly digitized and globalized economies; • convey the essential features of [Competency-Based Accounting Education, Training, and Certification \(CBAETC\)](#); • provide a common reference framework for organizations pursuing CBAETC and the consultants working with them; • assist countries in developing in-country plans and implementing in-country processes that produce accountants with higher-order skills relevant to their economy's rapidly evolving needs; and • improve financial reporting, auditing, and regulation. This guide complements and builds on International Education Standards (IES™) of the International Accounting Education Standards Board™ (IAESB™).

**The Interface of Accounting Education and Professional Training** Feb 18 2022 Over many decades the global development of professional accounting education programmes has been undertaken by higher education institutions, professional accounting bodies,

and employers. These institutions have sometimes co-operated and sometimes been in conflict over the education and/or training of future accounting professionals. These ongoing problems of linkage and closure between academic accounting education and professional training have new currency because of pressures from students and employers to move accounting preparation onto a more efficient, economic and practical basis. *The Interface of Accounting Education and Professional Training* explores current elements of the interface between the academic education and professional training of accountants in Australia, New Zealand, South Africa and the UK. It argues for a reassessment of the considerations and requirements for developing professional accounting programs which can make a student: capable of being an accountant (the academy); ready to be an accountant (the workplace); and professional in being an accountant (the professional bodies). This book was originally published as a special issue of *Accounting Education: An International Journal*.

**Inborn Metabolic Diseases** May 29 2020 This classical textbook has become indispensable for those in the front line dealing with metabolic disorders. The book is aimed at all those involved with this specialty including pediatricians, biochemists, dieticians, neurologists, internists, geneticists, psychologists, nurses, and social workers. This 4th edition has been thoroughly updated and revised. One new chapter on Neonatal screening by tandem MS/MS has been added and several new groups of disorders have been included. The book's main feature is the strong emphasis on clinical presentation and treatment in acute and chronic situation.

**The Decolonization of Knowledge** Apr 08 2021 In 2015, students at the University of Cape Town used the slogan #RhodesMustFall to demand that a monument of Cecil John Rhodes, the empire builder of British South Africa, be removed from the university campus. Soon students at Oxford University called for the removal of a statue of Rhodes from Oriel College. The radical idea of decolonization at the forefront of these student protests continues to be a key element in South African educational institutions as well as those in Europe and North America. This book explores the uptake of decolonization in the institutional curriculum, given the political demands for

decolonization on South African campuses, and the generally positive reception of the idea by university leaders. Based on interviews with more than two hundred academic teachers at ten universities, this is an innovative account of how institutions have engaged with, subverted, and transformed the decolonization movement since #RhodesMustFall.

**An A-Z of Genetic Factors in Autism** Dec 16 2021 Our understanding of the biological bases to the autistic spectrum disorders (ASDs) is advancing rapidly. Over 80 genetic conditions have now been reported in people who have also been diagnosed with ASDs. Many of these conditions have specific implications for the presenting phenotype and for treatment, management, and intervention. If the basis to the presenting behavioural phenotype is not identified, this can result in a sub-optimal level of care, complications, or even permanent damage. Kenneth J. Aitken shows that the notion of a single condition known as 'autism' is no longer tenable, and challenges current trends in the diagnosis and management of these behaviours as a homogenous group by drawing on recent research into brain function, genetics, epidemiology and neurology. This volume explains the biology and genetics of ASD, and provides clinicians and researchers with a comprehensive summary of each genetic factor including the research that links it to ASD, diagnosis and treatment issues, and related animal models, as well as detailing relevant professional organisations and avenues for further research. *An A-Z of Genetic Factors in Autism* is an essential resource for a wide range of researchers, clinical professionals and students interested in autism spectrum disorders, including clinical and educational psychologists, dieticians, psychiatrists, and neurologists.

**Integrated Reporting** Jul 11 2021 This book critically examines the implementation and adoption of integrated reporting (IR) in organizations and corporations. A relatively new area of policy and practice, IR has rapidly gained considerable prominence since the formation of the International Integrated Reporting Committee in 2010. The book analyzes the outcomes and benefits as well as the shortfalls of integrated reporting. It offers an introduction to the foundations of IR and a comprehensive overview of its use through a number of detailed case studies. Lastly, it discusses the outlook for further developments in sustainability accounting and reporting.

**The Routledge Companion to Accounting Education** Mar 07 2021 Many enquiries into the state of accounting education/training, undertaken in several countries over the past 40 years, have warned that it must change if it is to be made more relevant to students, to the accounting profession, and to stakeholders in the wider community. This book's over-riding aim is to provide a comprehensive and authoritative source of reference which defines the domain of accounting education/training, and which provides a critical overview of the state of this domain (including emerging and cutting edge issues) as a foundation for facilitating improved accounting education/training scholarship and research in order to enhance the educational base of accounting practice. *The Routledge Companion to Accounting Education* highlights the key

drivers of change - whether in the field of practice on the one hand (e.g. increased regulation, globalisation, risk, and complexity), or from developments in the academy on the other (e.g. pressures to embed technology within the classroom, or to meet accreditation criteria) on the other. Thirty chapters, written by leading scholars from around the world, are grouped into seven themed sections which focus on different facets of their respective themes - including student, curriculum, pedagogic, and assessment considerations. *The Mobile Learning Voyage - From Small Ripples to Massive Open Waters* Aug 20 2019 This book constitutes the proceedings of the 14th International Conference on Mobile and Contextual Learning, mLearn 2015, held in a cruise ship leaving from and arriving to Venice, Italy, in October 2015. The 22 revised full papers and 6 short papers presented were carefully reviewed and selected from 81 submissions. The papers deal with the topics related to the theme of the conference: "The mobile learning voyage: from small ripples to massive open waters". The conference theme paid tribute to the developments that brought mobile learning from its infancy steps in the early 2000s to maturity in 2015, while simultaneously paving the way for the broad and open waters ahead with new developments and progress in mobile learning, and emerging ambient technologies.

**Tax simplification - An African Perspective Edited by Chris Evans, Riël Franzsen, Elizabeth (Lilla) Stack** 2019 Jan 17 2022 Tax simplification - An African Perspective Edited by Chris Evans, Riël Franzsen, Elizabeth (Lilla) Stack 2019 ISBN: 978-1-920538-96-5 Pages: 347 Print version: Available Electronic version: Free PDF available About the publication Why are tax systems so complex and what are the causes and consequences of such complexity? The simplification of tax systems is one of the most important issues faced today in worldwide efforts to modernise and strengthen government finance and revenue raising capacities. Nowhere is it more important than throughout the rapidly emerging economies of the dynamic African region. This volume brings together contributions in this field from a conference held in South Africa in October 2018 and provides a unique synthesis of knowledge and understanding gained from the specialist expertise and diverse backgrounds brought to the tax simplification debate by those authors. Featured topics include: Taxpayers' rights to simplicity The African experience of tax simplification Simplification trends among small and medium sized entities Pension tax simplification Sources of complexity in value added taxation Simplification of recurrent property taxes Complexity and approaches to international taxation Complexity and taxation of multinational enterprises Lessons from overseas. The analysis of these topics includes timely and relevant perspectives from the experience in other jurisdictions including Australia, Canada, New Zealand, the United Kingdom and the United States. The volume will be an essential reference for researchers and others interested in the field from academia, government, legal and accounting practice and public policy organisations in African and other countries worldwide. Table of

Contents Preface Foreword - Tax Simplification in the United Kingdom: Some Personal Reflections John Whiting Contributors Introduction Elizabeth (Lilla) Stack, Chris Evans and Riël Franzsen Tax Complexity and Tax Simplification: A Critical Review of Concepts and Issues Binh Tran-Nam, Annet Wanyana Oguttu and Kyle Mandy The Taxpayers' Right to Tax Simplicity in South Africa and the United States Carika Fritz and Nina E Olson The Role of the Office of Tax Simplification in the United Kingdom and Lessons for Other Countries Yige Zu and Lynne Oats An Analysis of the Tax Simplification Initiatives for Pension Provision in the United Kingdom and South Africa Bernadene de Clercq, Andy Lymer and Chris Axelson Simplification Lessons from New Zealand Adrian Sawyer, Marina Bornman and Greg Smith Legal Uncertainty in the South African VAT Marius van Oordt and Richard Krever Simplifying Recurrent Property Taxes in Africa Riël Franzsen, Abdallah Ali-Nakyea and Adams Tommy Statutory and Effective Complexity for Individual Taxpayers in South Africa Sharon Smulders, Karen Stark and Deborah Tickle Small and Micro Businesses: Case Studies on the Complexity of 'Simplified' Schemes Heinrich Dixon, Judith Freedman and Wollela Abehodie Yesegat Tax Complexity for Multinational Corporations in South Africa - Evidence from a Global Survey Thomas Hoppe, Reyhaneh Safaei, Amanda Singleton and Caren Sureth-Sloane International Tax Simplification in South Africa through Managing Substantive Complexity and Improving Drafting Efficiency Jinyan Li and Teresa Pidduck Bibliography Index

**ADEX Optimized Adaptive Controllers and Systems** Dec 24 2019 This book is a simple and didactic account of the developments and practical applications of predictive, adaptive predictive, and optimized adaptive control from a perspective of stability, including the latest methodology of adaptive predictive expert (ADEX) control. *ADEX Optimized Adaptive Control Systems* is divided into six parts, with exercises and real-time simulations provided for the reader as appropriate. The text begins with the conceptual and intuitive knowledge of the technology and derives the stability conditions to be verified by the driver block and the adaptive mechanism of the optimized adaptive controller to guaranty the desired control performance. The second and third parts present strategic considerations of predictive control and related adaptive systems necessary for the proper design of driver block and adaptive mechanism and thence their technical realization. The authors then proceed to detail the stability theory that supports predictive, adaptive predictive and optimized adaptive control methodologies. Benchmark applications of these methodologies (distillation column and pulp-factory bleaching plant) are treated next with a focus on practical implementation issues. The final part of the book describes ADEX platforms and illustrates their use in the design and implementation of optimized adaptive control systems to three different challenging-to-control industrial processes: waste-water treatment; sulfur recovery; and temperature control of superheated steam in coal-fired power generation. The presentation is completed by a number of appendices

containing technical background associated with the main text including a manual for the ADEX COP platform developed by the first author to exploit the capabilities of adaptive predictive control in real plants. ADEX Optimized Adaptive Control Systems provides practicing process control engineers with a multivariable optimal control solution which is adaptive and resistant to perturbation and the effects of noise. Its pedagogical features also facilitate its use as a teaching tool for formal university and Internet-based open-education-type graduate courses in practical optimal adaptive control and for self-study.

**Journal for studies in economics and econometrics** Sep 20 2019

**Sustainability Reporting, Ethics, and Strategic Management Strategies for Modern Organizations** Sep 13 2021 Current modern companies, which are also the key factors of a global economy, are subject to increasing pressures to conduct their business in an environmentally responsible manner, due to social and environmental problems. Improving long-term environmental performance can bring economic benefits to those companies that are innovative and environmentally sensitive, especially by integrating environmental information into their business strategies. Considering all the changes, sustainability reporting, management, and financial accounting becomes a powerful information tool for executives, managers, and employee teams to gain insights and make better decisions. Along with concepts such as ethical, controlling, auditing, management, and financial accounting, reporting provides value with the decision-making process. All these debates underline the major responsibility of users when configuring accounting and finance models and thereby in modelling business information. Sustainability Reporting, Ethics, and Strategic Management Strategies for Modern Organizations proposes an interdisciplinary perspective and explores various theoretical and practical approaches of ethical standards, management accounting, and their impact in the 21st century on different areas of activity. It contrasts external financial accounting for government regulators and the investment community with internal management accounting for managers to leverage for decision making. In addition, the book examines the role of management accounting and sustainability reporting from other points of view such as ethical standards, corporate social responsibility, creative accounting, green accounting, environmental indicators, e-accounting, KPI, lean accounting, controlling, auditing, reporting, etc., offering a number of new insights into management accounting. It is intended for chief financial officers, financial controllers, business analysts, financial planners, financial analysts, budgeting managers, executives, managers, academicians, researchers, and students.

**Tax Treaty Case Law around the Globe 2016** Apr 27 2020 A Global Overview of International Tax Disputes on DTC This book provides a unique and comprehensive global overview of international tax disputes on double tax conventions, thereby filling a gap in the area of tax treaty case law. It covers the 37 most important tax treaty cases which were decided in 2015 around the world. The systematic

structure of each case allows easy and efficient comparison of the varying application and interpretation of tax treaties in different regimes. With the continuously increasing importance of tax treaties, Tax Treaty Case Law around the Globe 2016 is a valuable reference tool for anyone interested in tax treaty case law. This book is of interest to tax practitioners, multinational enterprises, policymakers, tax administrators, judges and academics.

**Acidic Deposition and Forest Soils** Sep 01 2020 Knowledge in the field of acidic deposition is expanding rapidly, and both experts and non-experts are challenged to keep up with the latest information. We designed our assessment to include both the basic foundation needed by non experts and the detailed information needed by experts. Our assessment includes background information on acidic deposition (Chapter 1), an in-depth discussion of the nature of soil acidity and ecosystem H+ budgets (Chapter 2), and a summary of rates of deposition in the Southeastern U.S. (Chapter 3). A discussion of the nature of forest soils in the region (Chapter 4) is followed by an overview of previous assessments of soil sensitivity to acidification (Chapter 5). The potential impacts of acidic deposition on forest nutrition are described in the context of the degree of current nutrient limitation on forest productivity (Chapter 6). The results of simulations with the MAGIC model provided evaluations of the likely sensitivity of a variety of soils representative of forest soils in the South (Chapter 7), as well as a test of soil sensitivity criteria. Our synthesis and recommendations for research (Chapter 8) also serve as an executive summary. A complementary volume in the Springer-Verlag Ecological Studies series should be consulted for information on European forests. This volume, Acidic Deposition and Forest Decline in the Fictelgebirge, edited by E.-D. Schultze and O.L. Lange, also provides greater detail on the physiologic responses of trees than we present in our regional assessment.

**Water Footprint** Jul 31 2020 This book highlights the concept of water footprint in different industrial sectors such as leather tanning, steel, agriculture, textile and wine. One of the very basic necessities of life which is soon going to be scarce is water, hence the environmental footprint assessments on any scale essentially includes water footprint which is being measured in various supply chains and across different product categories. According to ISO 14046, the water footprint assessment refers to the total freshwater volume consumed and polluted directly or indirectly across a product's end-to-end supply chain. This book presents, for industry purposes, the focus on identification and quantification of water trade, the scarcity, and pollution involved in the production of goods and services.

**South African Accounting Education Stocktake** Oct 26 2022 This book is intended to take stock of the current state of accounting education with a specific emphasis on the South African situation. It provides a critical overview of the current published research and identified gaps. Through this, it aims to equip accounting academics with information and tools to motivate them to research the field of accounting education to improve teaching and learning. It also aids in the identification of

suitable research topics in this regard and highlights potential pitfalls in researching accounting education. The book, therefore, focuses on accounting educators as specialists in their respective disciplines. Different authors with a keen interest in a specific area relating to accounting education research wrote each chapter in this book. It forms a planned collective work, assembled by appropriately qualified and experienced scholars in the accounting education field which generates a new conceptual synthesis that advances scholarship of accounting education research, since no such synthesis currently exists for accounting education research in South Africa.

**Advanced Case Studies in External Auditing & Corporate Governance** Sep 25 2022

**The A to Z of Careers in South Africa** Jan 25 2020

**The Role of Business in Global Governance** May 09 2021 The Role of Business in Global Governance offers an empirically rich analysis of the new political role of corporations in the co-performance of governance functions beyond the state. Within comparative case studies, potential explanations of the political role of transnational corporations are systematically tested.

**Tax Management International Journal** Jun 10 2021

**Financial Management: Turning Theory Into Practice** Feb 06 2021 This is a principles-based financial management textbook for undergraduate and Honours accounting students. The book takes cognizance of changes in the economic environment and their implications for the role of financial management and the teaching of the subject. **A Guide to Assessments That Work** Aug 12 2021 The need for evidence-based practice in mental health services is becoming clearer by the day and, until recently, the trend of emphasizing services with supporting empirical evidence has been almost exclusively limited to a focus on treatment options. A Guide to Assessments That Work fills a void in the professional literature by addressing the critical role that assessment plays in providing evidence-based mental health services. To optimize its usefulness to readers, this volume addresses the assessment of the most commonly encountered disorders or conditions among children, adolescents, adults, older adults, and couples. Strategies and instruments for assessing mood disorders, anxiety disorders, couple distress and sexual problems, health-related problems, and many other conditions are also covered in depth. With a focus throughout on assessment instruments that are feasible, psychometrically sound, and useful for typical clinical requirements, a rating system has been designed to provide evaluations of a measure's norms, reliability, validity, and clinical utility. Standardized tables summarize this information in each chapter, providing essential information on the most scientifically sound tools available for a range of assessment needs. Using the tools provided in A Guide to Assessments That Work, readers can at a glance determine the possible suitability and value of each instrument for their own clinical purposes. This much needed resource equips readers with the knowledge necessary for conducting the best evidence-

based mental health assessments currently possible.

Sustainable and Green Supply Chains and Logistics Case Study Collection Mar 19 2022 Sustainability is an increasingly urgent and important factor in logistics and supply chain management, impacting the whole supply chain lifecycle from product design and development, to supplier management, packaging, transportation, warehousing and distribution. The third volume of the Supply Chain Case Study Collection, the Sustainable and Green Supply Chains and Logistics Case Study Collection contains real-life scenarios from leading companies who are pursuing a sustainability agenda. Cases cover sustainability and 'green' practices in a range of different industries, from food through to manufacturing and construction, and in a variety of organization sizes. They are written by leading international academics and feature cutting-edge research from countries including India, Vietnam, Brazil, China and the UK. By exploring examples of waste reduction, supplier management, the circular economy and cross-industry collaboration, the Case Study Collection focuses on how organizations are currently trying to meet sustainability goals and achieve success in greening supply chains. Dictionary Catalog of the National Agricultural Library Oct 14 2021

**Cognitive Behaviour Therapy for Children and Families** Nov 15 2021 Entirely revised, rewritten and augmented with 11 completely new chapters, this new edition builds strongly on the aims of the previous edition to provide the latest scientific validation of cognitive behaviour therapy with practical treatment guidance for clinical child psychologists and psychiatrists working with disturbed children. Coverage ranges broadly from school refusal and adjustment to parental divorce through eating and sleeping disorders to substance abuse. It will be invaluable to clinicians wanting to provide ever more effective psychological treatment for children and families. From a review of the first edition: '... clearly written by a number of international authorities in the field. ... This book will be useful to child psychiatrists and other child mental health professionals, as well as social workers, educationalists and school nurses. It is highly recommended for bench and departmental libraries.' European Child and Adolescent Psychiatry

Science for the People Jul 19 2019

**Elder Crimes, Elder Justice** Feb 24 2020 Law Enforcement, Policing, & Security

*The Principles and Practice of Auditing* Apr 20 2022 A valuable resource for students preparing for certification, registered accountants and auditors, and financial personnel in various businesses, this is the 9th updated edition of a classic auditing text. Integrating theory with practice and application, it is up-to-date with the field's recent and gradual transition from self-regulation to external auditing and supervision.

**Financial Mail** May 21 2022

*Financial Enterprise Risk Management* Dec 04 2020 An accessible guide to enterprise risk management for financial institutions. This second edition has been updated to reflect new legislation.

ICEL 2017 - Proceedings of the 12th

International Conference on e-Learning Aug 24 2022

*The Inherited Metabolic Diseases* Jun 17 2019 *Focus on First Year Success* Jul 23 2022 The importance of the first-year experience is now well recognised. This collection of papers makes a fascinating and important contribution to our understanding of students' transition to higher education. This is a scholarly, engaging and illuminating text, that is relevant not only in the context of South Africa, but for anyone interested in student learning in the first year of university education. David Gosling, Plymouth University

Proceedings of the Industrial Waste Conference Mar 27 2020

**Whiteness and Stigma in the Workplace** Jun 29 2020 Drawing on theories of whiteness, stigma, identity formation and identity work, this monograph aims to explore the ways in which racial categories continue to structure the lives of professionals of colour in South Africa. Using a Bourdieusian lens, it draws on personal narratives of professionals in the fields of accounting, engineering and industrial psychology, examining how stigma and whiteness continue to constrain their identity development in the public, professional and personal spaces they inhabit. Examining the unique post-Apartheid situation of South Africa, this book will be valuable reading to scholars interested in the intersection of race, professions and organisation.

**Social and Sustainability Marketing** Nov 03 2020 "... an important intervention in the conversation around social and ecological sustainability that draws on both micromarketing and macromarketing scholarship to help the reader understand the challenges with illustrations from insightful cases both from emerging and developed economies. This compilation should be essential reading for the discerning student of sustainable consumption and production." -- Professor Pierre McDonagh, Associate Editor, *Journal of Macromarketing* (USA); Professor of Critical Marketing & Society, University of Bath, UK Experts in the field of economics, management science, and particularly in the marketing domain have always been interested in and acknowledged the importance of sustaining profitable businesses while incorporating societal and environmental concerns; however, the level of existing literature and availability of teaching cases reflect a dearth of real case studies, especially those focused on marketing for social good. This book of actual case studies will address that need. In addition, this book is important and timely in providing a case book for instructors (those in both industry and academia) to help them in teaching and training the next generation of leaders through corporate training and universities. Currently, marketing for social good is increasingly becoming a part of most curriculums under the umbrella of different titles, such as social marketing, green marketing, and sustainability marketing. The relevance of these studies is increasing across the globe. This book is composed of long and short real cases with varying complexity in different sectors. This case book will also cover some review articles for an overview of the recent developments in the study area. With these case studies,

collections of questions, teaching materials, and real-life marketing scenarios, this book offers a unique source of knowledge to marketing professionals, students, and educators across the world. The main objective of this case book is to understand the applicability of marketing science (marketing for social good context, such as social marketing and sustainability marketing) in internet marketing related to e-buying behavior and e-WOM. In addition, it illustrates the various types of existing marketing practices that are relevant from both theoretical and practical points of view in this electronic era, as well as discussing other non-electronic marketing practices and focusing on consumer buying behavior. As a result, marketing managers can treat their customers according to their desired value. This book particularly explores the possibilities and advantages created by social marketing and sustainability marketing through the presentation of thorough review articles and case studies. This case book helps corporate training centers and universities with compact teaching reference materials in their relevant courses.

**Sustainable Measures** Nov 22 2019 Environmental and social performance measurement and reporting by business has become a high-profile issue during the 1990s. It is increasingly being requested by stakeholders and required by governments. Companies too are finding that they need better environmental and social performance data for effective internal management. And there are a growing number of standardisation initiatives - such as the ISO 14031 guidelines on environmental performance evaluation or the CERES Global Reporting Initiative (GRI) template for sustainability reporting - that are aimed at making it easier for more companies to take action, and for stakeholders to compare their progress. Sustainable Measures collects together most of the key work and individuals concerned with the topic from around the world. Contributions include: environmental and social reporting by John Elkington and colleagues at SustainAbility; the GRI discussion draft; Roger Adams and Martin Houldin on the FEE study of environmental reporting; Janet Ranganathan of the World Resources Institute on sustainability measures; and Martin Bennett and Peter James on ISO 14031 and the future of environmental performance evaluation. There are also chapters examining current practice in Austria, Denmark, India, Indonesia, Japan, the Netherlands and South Africa, developments in electronic reporting, as well as case studies of Baxter, Kunert, Niagara Mohawk, Unox, The Body Shop and the UK water industry, and an analysis of leading social reports. The book is essential reading for all academics, campaigners, policy-makers and practitioners with an interest in issues such as: The standardization and comparability of environmental and social performance measures Measuring and reporting on sustainable business Eco-points and other means of evaluating product impacts The implementation of measurement and reporting Best practice in corporate environmental and social reporting New means of communicating environmental data Environmental performance evaluation in developing countries
