***Elizabeth, the Queen Mother Aug 05 2020 Looking back on the remarkable twentieth century, there is one public figure who will be remembered with universal affection and respect: the Queen Mother. Born in 1900, Lady Elizabeth Bowes Lyon as a teenage debutante met Bertie, Duke of York, who pursued her ardently until she agreed to marry him. In this engaging and informal biography, the author reveals the Queen Mother as not only a wise and diplomatic member of the royal family, but also as a warmhearted and down-to-earth human being.***

***Media and Nation Building in Twentieth-Century India Sep 05 2020 This book profiles twentieth-century India through the life and times of Ramananda Chatterjee - journalist, influencer, nationalist. Through a reconstruction of his history, the book highlights the oft-forgotten role of media in the making of the idea of India. It shows how early twentieth-century colonial India was a curious melee of ideas and people - a time of rising nationalism, as well as an influx of Western ideas; of unprecedented violence and compelling non-violence; of press censorship and defiant journalism. It shows how Ramananda Chatterjee navigated this world and went beyond the traditional definition of the nation as an entity with fixed boundaries to anticipate Benedict Anderson and Ernest Gellner. The volume also examines the wide reach and scope of his journals in English,***

***Hindi and Bengali, which published the likes of Rabindranath Tagore, Subhash Bose, Abanindranath Tagore, Nandalal Bose, Ananda Coomaraswamy, the scientist J. C. Bose and Zhu Deh, the co-founder of the Chinese Red Army. He also published India in Bondage by the American Unitarian minister J. T. Sunderland, which resulted in his arrest. An intriguing behind-the-scenes look of early twentieth-century colonial India, this book will be of great interest to scholars and researchers of history, modern South Asia and media and cultural studies.***

***Life on Display May 14 2021 Rich with archival detail and compelling characters, Life on Display uses the history of biological exhibitions to analyze museums' shifting roles in twentieth-century American science and society. Karen A. Rader and Victoria E. M. Cain chronicle profound changes in these exhibitions—and the institutions that housed them—between 1910 and 1990, ultimately offering new perspectives on the history of museums, science, and science education. Rader and Cain explain why science and natural history museums began to welcome new audiences between the 1900s and the 1920s and chronicle the turmoil that resulted from the introduction of new kinds of biological displays. They describe how these displays of life changed dramatically once again in the 1930s and 1940s, as museums negotiated changing, often conflicting interests of scientists, educators, and visitors. The authors then reveal how museum staffs, facing intense public and scientific scrutiny, experimented with wildly different definitions of life science and life science education from the 1950s through the 1980s. The book concludes with a discussion of the influence that corporate sponsorship and blockbuster economics wielded over science and natural history museums in the century's last decades. A vivid, entertaining study of the ways science and natural history museums shaped and were shaped by understandings of science and public education in the twentieth-century United States, Life on Display will appeal to historians, sociologists, and ethnographers of American science and culture, as well as museum practitioners and general readers.***

***Interesting Times Oct 31 2022 Born in 1917, the year of the Russian Revolution, the eighty-five years of Eric Hobsbawm's life are backdropped by an endless litany of wars, revolutions and counter-revolutions. He has led a remarkably fulfilling and long life; historian and intellectual, fluent in five languages, a member of the Communist Party of Great Britain, until it dissolved itself, and writer of countless volumes of history. He has personally witnessed some of the critical events of our century from Hitler's rise to power in Berlin to the fall of the Berlin wall. Hobsbawm has kept his eyes and ears open for eighty-five years, and has been constantly committed to understanding the 'interesting times' (as the Chinese curse puts it) through which he has lived. His autobiography is one passionate cosmopolitan Jew's account of his travels through that past which is another country, where they do things differently, and how it became the world we now live in.***

***History of the Twentieth Century May 02 2020 A chronological compilation of twentieth-century world events in one volume—from the acclaimed historian and biographer of Winston Churchill. The twentieth century has been one of the most unique in human history. It has seen the rise of some of humanity's most important advances to date, as well as many of its most violent and terrifying wars. This is a condensed version of renowned historian Martin Gilbert's masterful examination of the century's history, offering the highlights of a three-volume work that covers more than three thousand pages. From the invention of aviation to the rise of the Internet, and from events and cataclysmic changes in Europe to those in Asia, Africa, and North America, Martin examines art, literature, war, religion, life and death, and celebration and renewal across the globe, and throughout this turbulent and astonishing century.***

***Historiography in the Twentieth Century Feb 08 2021 In this book, now published in 10 languages, a preeminent intellectual historian examines the profound changes in ideas about the nature of history and historiography. Georg G. Iggers traces the basic assumptions upon which historical research and writing have been based, and describes how the newly emerging social sciences transformed historiography following World War II. The discipline's greatest challenge may have come in the last two decades, when postmodern ideas forced a reevaluation of the relationship of historians to their subject and questioned the very possibility of objective history. Iggers sees the contemporary discipline as a hybrid, moving away from a classical, macrohistorical approach toward microhistory, cultural history, and the history of everyday life. The new epilogue, by the author, examines the movement away from postmodernism towards new social science approaches that give greater attention to cultural factors and to the problems of globalization.***

***A Torch Kept Lit Dec 29 2019 The New York Times Bestseller William F. Buckley, Jr. remembers—as only he could—the towering figures of the twentieth century in a brilliant and emotionally powerful collection, compiled by acclaimed Fox News correspondent James Rosen. In a half century on the national stage, William F. Buckley, Jr. achieved unique stature as a writer, a celebrity, and the undisputed godfather of modern American conservatism. He kept company with the best and brightest, the sultry and powerful. Ronald Reagan pronounced WFB “perhaps the most influential journalist and intellectual in our era,” and his jet-setting life was a who's who of high society, fame, and fortune. Among all his distinctions, which include founding the conservative magazine National Review and hosting the long-running talk show Firing Line, Buckley was also a master of that most elusive art form: the eulogy. He drew on his unrivaled gifts to mourn, celebrate, or seek mercy for the men and women who touched his life and the nation. Now, for the first time, WFB's sweeping judgments of the great figures of his time—presidents and prime ministers, celebrities and scoundrels, intellectuals and guitar gods—are collected in one place. A Torch Kept Lit presents more than fifty of***

***Buckley's best eulogies, drawing on his personal memories and private correspondences and using a novelist's touch to conjure his subjects as he knew them. We are reintroduced, through Buckley's eyes, to the likes of Winston Churchill and Ronald Reagan, Elvis Presley and John Lennon, Truman Capote and Martin Luther King, Jr. Curated by Fox News chief Washington correspondent James Rosen, a Buckley protégé and frequent contributor to National Review, this volumes sheds light on a tumultuous period in American history—from World War II to Watergate, the "death" of God to the Grateful Dead—as told in the inimitable voice of one of our most elegant literary stylists. William F. Buckley, Jr. is back—just when we need him most.***

***Benjamin Britten Jun 26 2022 Published to mark the beginning of the Britten centenary year in 2013, Paul Kildea's Benjamin Britten: A Life in the Twentieth Century is the definitive biography of Britain's greatest modern composer. In the eyes of many, Benjamin Britten was our finest composer since Purcell (a figure who often inspired him) three hundred years earlier. He broke decisively with the romantic, nationalist school of figures such as Parry, Elgar and Vaughan Williams and recreated English music in a fresh, modern, European form. With Peter Grimes (1945), Billy Budd (1951) and The Turn of the Screw (1954), he arguably composed the last operas - from any composer in any country - which have entered both the popular consciousness and the musical canon. He did all this while carrying two disadvantages to worldly success - his passionately held pacifism, which made him suspect to the authorities during and immediately after the Second World War - and his homosexuality, specifically his forty-year relationship with Peter Pears, for whom many of his greatest operatic roles and vocal works were created. The atmosphere and personalities of Aldeburgh in his native Suffolk also form another wonderful dimension to the book. Kildea shows clearly how Britten made this creative community, notably with the foundation of the Aldeburgh Festival and the building of Snape Maltings, but also how costly the determination that this required was. Above all, this book helps us understand the relationship of Britten's music to his life, and takes us as far into his creative process as we are ever likely to go. Kildea reads dozens of Britten's works with enormous intelligence and sensitivity, in a way which those without formal musical training can understand. It is one of the most moving and enjoyable biographies of a creative artist of any kind to have appeared for years. Paul Kildea is a writer and conductor who has performed many of the Britten works he writes about, in opera houses and concert halls from Sydney to Hamburg. His previous books include Selling Britten (2002) and (as editor) Britten on Music (2003). He was Head of Music at the Aldeburgh Festival between 1999 and 2002 and subsequently Artistic Director of the Wigmore Hall in London.***

***Thinking the Twentieth Century Sep 17 2021 "Ideas crackle" in this triumphant final book of Tony Judt, taking readers on "a wild ride through the ideological currents and shoals of 20th century thought." (Los Angeles***

**Times) One of our most brilliant historians, Tony Judt brings the past century vividly to life in this unprecedented and original history. Structured as a series of intimate conversations between Judt and his friend and fellow historian Timothy Snyder, Thinking the Twentieth Century presents the triumphs and the failures of the twentieth century's most prominent intellectuals and their ideas, guiding readers through the debates that defined our world. Spanning an era with unprecedented clarity and insight, Thinking the Twentieth Century is a tour de force: a masterful analysis of the life of the mind and an unforgettable guide to leading the mindful life.**

**Thinking the Twentieth Century Apr 24 2022 Two explorers set out on a journey from which only one of them will return. Their unknown land is that often fearsome continent we call the 20th Century. Their route is through their own minds and memories. Both travellers are professional historians still tormented by their own unanswered questions. They needed to talk to one another, and the time was short. This is a book about the past, but it is also an argument for the kind of future we should strive for. Thinking the Twentieth Century is about the life of the mind - and the mindful life.**

**Twentieth Century Mouse Genetics Apr 12 2021 Twentieth Century Mouse Genetics: A Historical and Scientific Review provides a comprehensive examination of key advances in mouse genetics throughout the 20th century. Here Dr. Robert P. Erickson, a leader in the field, identifies the contributions of historic mouse genetics studies, and how those approaches and early discoveries are still shaping human genetics research and medical genetics today. In addition to historical overviews, the author provides researcher biographies and updates connecting historic research to ongoing advances. Past studies discussed use the T/t complex as an example and include the origins of mouse genetics, the synthesis of genetics and evolution, cytogenetics and gene mapping, population genetics and mutation research, immunogenetics, reproductive genetics, molecular cloning, X-inactivation and epigenetics, sex determination, and pharmacogenetics. Here researchers, students, and clinicians will find fresh inspiration to engage in human genetics research employing mouse models and to translate those findings to clinical practice.**

- Offers a comprehensive examination of key advances in mouse genetics throughout the 20th century.
- Includes updates connecting historic research to ongoing advances.
- Authored by a thought-leader in the field.

**Frank Lloyd Wright Jun 14 2021 Frank Lloyd Wright was the most influential architect of the twentieth century?and a rogue genius whose life was a wild ride. Wright routinely ignored unpaid bills, clients' wishes, budget constraints. Only his creative vision mattered to him. That vision transformed the way we live, sweeping aside the Victorian home and creating a uniquely American architecture exemplified by his Prairie Style houses. Wright built hotels, churches, and offices, too, incorporating**

***endless innovations in techniques and materials. Ideas poured out of him throughout his long career; he called it "shaking the design out of my sleeve." Jan Adkins's fascinating biography of this compelling, infuriating, larger-than-life figure will change the way every reader looks at architecture.***

***Thurgood Marshall Feb 29 2020 Shows how a school troublemaker went on to become the first African-American to serve on the U.S. Supreme Court and how he played a vital role in the Brown v. Board of Education case of 1954 that demolished educational discrimination and segregation in the U.S.***

***Music of the Twentieth Century Aug 24 2019 Ton de Leeuw was a truly groundbreaking composer. As evidenced by his pioneering study of compositional methods that melded Eastern traditional music with Western musical theory, he had a profound understanding of the complex and often divisive history of twentieth-century music. Now his renowned chronicle Music of the Twentieth Century is offered here in a newly revised English-language edition. Music of the Twentieth Century goes beyond a historical survey with its lucid and impassioned discussion of the elements, structures, compositional principles, and terminologies of twentieth-century music. De Leeuw draws on his experience as a composer, teacher, and music scholar of non-European music traditions, including Indian, Indonesian, and Japanese music, to examine how musical innovations that developed during the twentieth century transformed musical theory, composition, and scholarly thought around the globe.***

***A Life in the Twentieth Century Sep 29 2022 The author considers events that occurred during his lifetime and that contributed to America's rise to world power status, as told through his personal experiences in childhood, in college, and during war times.***

***Musicking in Twentieth-Century Europe Nov 19 2021 Music has gained the increasing attention of historians. Research has branched out to explore music-related topics, including creative labor, economic histories of music production, the social and political uses of music, and musical globalization. This handbook both covers the history of music in Europe and probes its role for the making of Europe during a "long" twentieth century. It offers concise guidance to key historical trends as well as the most important research on central topics within the field.***

***Viktor Frankl's Search for Meaning Nov 07 2020 First published in 1946, Viktor Frankl's memoir Man's Search for Meaning remains one of the most influential books of the last century, selling over ten million copies worldwide and having been embraced by successive generations of readers captivated by its author's philosophical journey in the wake of the Holocaust. This long-overdue reappraisal examines Frankl's life and intellectual evolution anew, from his early immersion in Freudian and Adlerian theory to his development of the "third Viennese school" amid the National Socialist domination of professional psychotherapy. It teases***

**out the fascinating contradictions and ambiguities surrounding his years in Nazi Europe, including the experimental medical procedures he oversaw in occupied Austria and a stopover at the Auschwitz concentration camp far briefer than has commonly been assumed. Throughout, author Timothy Pytell gives a penetrating but fair-minded account of a man whose paradoxical embodiment of asceticism, celebrity, tradition, and self-reinvention drew together the complex strands of twentieth-century intellectual life.**

**Voyage Through the Twentieth Century Aug 17 2021 The account of the author's life, spent between Europe and America, is at the same time an account of his generation, one that came of age between the two World Wars. Recalling not only circumstances of his own situation but that of his friends, the author shows how this generation faced a reality that seemed fragmented, and in their shared thirst for knowledge and commitment to ideas they searched for cohesiveness among the glittering, holistic ideologies and movements of the twenties and thirties. The author's scholarly work on the German Resistance to Hitler revealed to him those who maintained dignity and courage in times of peril and despair, which became for him a life's pursuit. This work is unique in its thorough inclusion of the postwar decades and its perspective from a historian eager to rescue the "other" Germany—the Germany of the righteous rather than the Holocaust murderers.**

**Prague, Capital of the Twentieth Century Jul 24 2019 The story of modernity told through a cultural history of twentieth-century Prague Setting out to recover the roots of modernity in the boulevards, interiors, and arcades of the "city of light," Walter Benjamin dubbed Paris "the capital of the nineteenth century." In this eagerly anticipated sequel to his acclaimed *Coasts of Bohemia: A Czech History*, Derek Sayer argues that Prague could well be seen as the capital of the much darker twentieth century. Ranging across twentieth-century Prague's astonishingly vibrant and always surprising human landscape, this richly illustrated cultural history describes how the city has experienced (and suffered) more ways of being modern than perhaps any other metropolis. Located at the crossroads of struggles between democratic, communist, and fascist visions of the modern world, twentieth-century Prague witnessed revolutions and invasions, national liberation and ethnic cleansing, the Holocaust, show trials, and snuffed-out dreams of "socialism with a human face." Yet between the wars, when Prague was the capital of Europe's most easterly parliamentary democracy, it was also a hotbed of artistic and architectural modernism, and a center of surrealism second only to Paris. Focusing on these years, Sayer explores Prague's spectacular modern buildings, monuments, paintings, books, films, operas, exhibitions, and much more. A place where the utopian fantasies of the century repeatedly unraveled, Prague was tailor-made for surrealist André Breton's "black humor," and Sayer discusses the way the city produced unrivaled connoisseurs of grim comedy, from Franz Kafka and**

**Jaroslav Hasek to Milan Kundera and Václav Havel. A masterful and unforgettable account of a city where an idling flaneur could just as easily be a secret policeman, this book vividly shows why Prague can teach us so much about the twentieth century and what made us who we are.**

**The Right Tools for the Job Dec 09 2020 This volume examines scientific practice through studies of research tools in an array of twentieth-century life sciences. The contributors draw upon and extend the multidisciplinary perspectives in current science studies to understand the processes through which scientific researchers constructed the right--and, in some cases, the wrong--tools for the job. The articles portray the crafting or accessing of specific materials, techniques, instruments, models, funds, and work arrangements involved in doing scientific work. They demonstrate the historical and local contingencies of scientific problem construction and solving by highlighting the articulation between the tools and jobs. Indeed, the very "rightness" of the tools is contingently constructed, maintained, lost, and refashioned. The cases examined include evolutionary biology laboratory systems (James R. Griesemer), the plasmid prep procedure in molecular biology (Kathleen Jordan and Michael Lynch), models in the human ecology of African pastoralists (Peter Taylor), the micromanometer in metabolic studies (Frederic L. Holmes), genetics research and the role played by Planaria (Gregg Mitman and Anne Fausto-Sterling) and by corn (Barbara A. Kimmelman), quantitative data in field biology (Yrj Haila), taxidermy in natural history (Susan Leigh Star), technical standardization in bacteriology (Patricia Peck Gossell), and the discipline of immunology as the tool for stabilizing conceptual definitions in the field (Peter Keating, Alberto Cambrosio, and Michael Mackenzie). Originally published in 1992. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.**

**The Long Road to Sustainability Jun 22 2019 For the last few thousand years, humanity has struggled to achieve sustainable development. Gillespie sees the problem as multi-faceted: a three legged stool of economic, social, and environmental conundrums have stalled the quest for the long term viability of both our species and the ecosystems in which we reside. Gillespie moves from the low life expectancy, excessive deforestation, and wetland drainage of the medieval period, through the species loss, coal burning, free trade, and poor waste management of the seventeenth and eighteenth centuries, and to the more recent concerns of climate change, unsustainable fisheries, and chemical pollutants. By delivering a comprehensive examination of human survival over the past millennium, Gillespie illustrates that the challenges we face are not new -**

**that we now have the means to counter them, is.**

**Science and Technology in 20th-century American Life Oct 19 2021 An overview of the impact that science and technology had on the everyday life of Americans.**

**History of Everyday Life in Twentieth-Century Scotland May 26 2022 Over the twentieth century Scots' lives changed in fast, dramatic and culturally significant ways. By examining their bodies, homes, working lives, rituals, beliefs and consumption, this volume exposes how the very substance of everyday life was composed, tracing both the intimate and the mass changes that the people endured. Using novel perspectives and methods, chapters range across the experiences of work, art and death, the way Scots conceived of themselves and their homes, and the way the 'old Scotland' of oppressive community rules broke down from mid-century as the country reinvented its everyday life and culture. This volume brings together leading cultural historians of twentieth-century Scotland to study the apparently mundane activities of people's lives, traversing the key spaces where daily experience is composed to expose the controversial personal and national politics that ritual and practice can generate. Key features: \*Contains an overview of the material changes experienced by Scots in their everyday lives during the course of the century\* Focuses on some of the key areas of change in everyday experience, from the way Scots spent their Sundays to the homes in which they lived, from the work they undertook to the culture they consumed and eventually the way they died. \*Pays particular attention to identity as well as experience**

**The Long Twentieth Century Jun 02 2020 Winner of the American Sociological Association PEWS Award (1995) for Distinguished Scholarship The Long Twentieth Century traces the epochal shifts in the relationship between capital accumulation and state formation over a 700-year period. Giovanni Arrighi masterfully synthesizes social theory, comparative history and historical narrative in this account of the structures and agencies which have shaped the course of world history over the millennium. Borrowing from Braudel, Arrighi argues that the history of capitalism has unfolded as a succession of "long centuries"—ages during which a hegemonic power deploying a novel combination of economic and political networks secured control over an expanding world-economic space. The modest beginnings, rise and violent unraveling of the links forged between capital, state power, and geopolitics by hegemonic classes and states are explored with dramatic intensity. From this perspective, Arrighi explains the changing fortunes of Florentine, Venetian, Genoese, Dutch, English, and finally American capitalism. The book concludes with an examination of the forces which have shaped and are now poised to undermine America's world power.**

**Fractured Times Oct 26 2019 Born almost a hundred years ago in Vienna - the cultural heart of a bourgeois Mitteleurope - Eric Hobsbawm, who was to become one of the most brilliant and original historians of our age, was uniquely placed to observe an era of titanic social and artistic change. As**

***the century progressed, the forces of Communism and Dadaism, Ibiza and cyberspace, would do battle with the bourgeois high culture fin-de-siècle Vienna represented - the opera, the Burgtheater, the museums of art and science, City Hall. In *Fractured Times* Hobsbawm unpicks a century of cultural fragmentation and dissolution with characteristic verve and vigour. Hobsbawm examines the conditions that created the great cultural flowering of the belle époque and held the seeds of its disintegration, from paternalistic capitalism to globalisation and the arrival of a mass consumer society. Passionate but never sentimental, Hobsbawm ranges freely across his subject: he records the passing of the golden age of the 'free intellectual' and examines the lives of great, forgotten men; he analyses the relation between art and totalitarianism and dissects cultural phenomena as diverse as surrealism, women's emancipation and the American cowboy myth. Written with consummate imagination and skill, *Fractured Times* is the last book from one of our greatest modern-day thinkers.***

***Streetlife Jul 16 2021 The twentieth century in Europe was an urban century: it was shaped by life in, and the view from, the street. Women were not liberated in legislatures, but liberated themselves in factories, homes, nightclubs, and shops. Lenin, Hitler, and Mussolini made themselves powerful by making cities ungovernable with riots rampaging through streets, bars occupied one-by-one. New forms of privacy and isolation were not simply a by-product of prosperity, but because people planned new ways of living, new forms of housing in suburbs and estates across the continent. Our proudest cultural achievements lie not in our galleries or state theatres, but in our suburban TV sets, the dance halls, pop music played in garages, and hip hop sung on our estates. In *Streetlife*, Leif Jerram presents a totally new history of the twentieth century, with the city at its heart, showing how everything distinctive about the century, from revolution and dictatorship to sexual liberation, was fundamentally shaped by the great urban centres which defined it.***

***Life science in the twentieth century Mar 12 2021***

***Aging in Twentieth-Century Britain Mar 31 2020 As today's baby boomers reach retirement and old age, this timely study looks back at the first generation who aged in the British welfare state. Using innovative research methods, Charlotte Greenhalgh sheds light on the experiences of elderly people in twentieth-century Britain. She adds further insights from the interviews and photographs of celebrated social scientists such as Peter Townsend, whose work helped transform care of the aged. A comprehensive and sensitive examination of the creative pursuits, family relations, work lives, health, and living conditions of the elderly, *Aging in Twentieth-Century Britain* charts the determined efforts of aging Britons to shape public understandings of old age in the modern era.***

***Ella Fitzgerald Mar 24 2022 The name ?Ella Fitzgerald? brings to mind a silky voice crooning jazz standards. The First Lady of Song earned her nickname by touring almost nonstop for over fifty years, winning thirteen***

**Grammys, and recording album after album. But who was the woman behind the name? How did a teenage runaway become a renowned jazz singer? Long after her homeless days, Ella remained insecure?she often suffered stage fright. Yet she was a born performer, able to improvise lyrics and record songs in single takes. She even seemed more comfortable on stage than off, and close friends found her hard to truly know. Tanya Lee Stone's Up Close biography delivers several never-before-published details of this intensely private, legendary singer's life.**

**Living on the Edge Jan 28 2020 History carves its imprint on human lives for generations after. When we think of the radical changes that transformed America during the twentieth century, our minds most often snap to the fifties and sixties: the Civil Rights Movement, changing gender roles, and new economic opportunities all point to a decisive turning point. But these were not the only changes that shaped our world, and in Living on the Edge, we learn that rapid social change and uncertainty also defined the lives of Americans born at the turn of the twentieth century. The changes they cultivated and witnessed affect our world as we understand it today. Drawing from the iconic longitudinal Berkeley Guidance Study, Living on the Edge reveals the hopes, struggles, and daily lives of the 1900 generation. Most surprising is how relevant and relatable the lives and experiences of this generation are today, despite the gap of a century. From the reorganization of marriage and family roles and relationships to strategies for adapting to a dramatically changing economy, the challenges faced by this earlier generation echo our own time. Living on the Edge offers an intimate glimpse into not just the history of our country, but the feelings, dreams, and fears of a generation remarkably kindred to the present day.**

**The Columbia History of Twentieth-century French Thought Nov 27 2019 This valuable reference is an authoritative guide to 20th century French thought. It considers the intellectual figures, movements and publications that helped define fields as diverse as history, psychoanalysis, film, philosophy, and economics.**

**Ronald Reagan Jul 28 2022 Ronald Reagan was a Hollywood actor turned Republican politician known for his sunny optimism and gifted salesmanship. He entered the White House in 1981, a time when many Americans were wondering if their country's best days were behind them. But things had changed by the time he left office--the economy was thriving and the Cold War was coming to a close. The child of an alcoholic, he was an intensely private man, yet he was so charming that he routinely befriended even his enemies. Reagan was both a complex man and political figure, and his legacy strongly influences politics today.**

**Gellhorn Dec 21 2021 The first major biography of legendary war correspondent Martha Gellhorn, whose life provides a unique and thrilling perspective on world history in an extraordinary time Martha Gellhorn's heroic career as a reporter brought her to the front lines of virtually every significant international conflict between the Spanish Civil War and the**

**end of the Cold War. The preeminent-and often the only-female correspondent on the scene, she broke new ground for women in the male preserve of journalism. Her wartime dispatches, marked by a passionate desire to expose suffering in its many guises and an inimitable immediacy, rank among the best of the twentieth century. A deep-seated love of travel complemented this interest in world affairs. From her birth in St. Louis in 1908 to her death in London in 1998, Gellhorn passed through Africa, Cuba, China, and most of the great cities of Europe, recording her experiences in first-rate travel writing and fiction. A tall, glamorous blonde, she made friends easily-among the boldface names that populated her life were Eleanor Roosevelt, Leonard Bernstein, and H. G. Wells-but she was as incapable of settling into comfortable long-term relationships as she was of sitting still, and happiness often eluded her despite her professional success. Both of her marriages ended badly-the first, to Ernest Hemingway, publicly so. Drawn from extensive interviews and with exclusive access to Gellhorn's papers and correspondence, this seminal biography spans half the globe and almost an entire century to offer an exhilarating, intimate portrait of one of the defining women of our times.**

**Twentieth Century Drifter Oct 07 2020 During his three decades as a country music performer, Marty Robbins (1925-1982) placed 94 songs on Billboard's country music charts, with sixteen number-one hits. In addition to two Grammy awards, he was also honored with the Man of the Decade Award from the Academy of Country Music in 1970. His Hawaiian songs, rockabilly hits, teen-angst ballads, pop standards, and country & western classics showcased his exceptional versatility. Yet even with fame and fortune, Robbins always yearned for more. Twentieth Century Drifter: The Life of Marty Robbins is the first biography of this legendary country music artist and NASCAR driver. Drawing from personal interviews and in-depth research, biographer Diane Diekman explains how Robbins saw himself as a drifter, a man always searching for self-fulfillment and inner peace. Born Martin David Robinson to a hardworking mother and an abusive alcoholic father, he never fully escaped the insecurities burned into him by a poverty-stricken nomadic childhood in the Arizona desert. As Diekman describes, he spent his early teens in trouble with the law and worked an assortment of short-term jobs after serving in combat in World War II. In 1947 he got his first gig as a singer and guitar player. Too nervous to talk, the shy young man walked onstage singing. Soon he changed his name to Marty Robbins, cultivated his magnetic stage presence, and established himself as an entertainer, songwriter, and successful NASCAR driver. As NASCAR's Bobby Allison said, "He started out being a singer driving a race car, but he became a race car driver who could sing." For fans of Robbins, NASCAR, and classic country music, Twentieth Century Drifter: The Life of Marty Robbins is a revealing portrait of this well-loved, restless entertainer, a private man who kept those who loved him at a distance.**

**Twentieth-century Colonialism and China Jul 04 2020 Colonialism in China was a piecemeal agglomeration that achieved its greatest extent in the first half of the twentieth century, the last edifices falling at the close of the century. The diversity of these colonial arrangements across China's landscape defies systematic characterization. This book investigates the complexities and subtleties of colonialism in China during the first half of the twentieth century. In particular, the contributors examine the interaction between localities and forces of globalization that shaped the particular colonial experiences characterizing much of China's experience at this time. In the process it is clear that an emphasis on interaction, synergy and hybridity can add much to an understanding of colonialism in Twentieth Century China based on the simple binaries of colonizer and colonized, of aggressor and victim, and of a one-way transfer of knowledge and social understanding. To provide some kind of order to the analysis, the chapters in this volume deal in separate sections with colonial institutions of hybridity, colonialism in specific settings, the social biopolitics of colonialism, colonial governance, and Chinese networks in colonial environments. Bringing together an international team of experts, Twentieth Century Colonialism and China is an essential resource for students and scholars of modern Chinese history and colonialism and imperialism.**

**The Meaning of the Twentieth Century Jan 10 2021**

**Elvis Presley Feb 20 2022 Provides a biography of this rock legend and the places, people, and inspirations that made him the man he was, such as his formative years in Tupelo, his early music years, his service in the army, and his rise to stardom as "The King."**

**Beer in the Snooker Club Aug 29 2022 Waguhi Ghali was raised in Cairo but spent much of his adult life studying and working in Europe. In Beer in the Snooker Club, Ghali chronicles the lives of Cairo's upper crust who, after the fall of King Farouk, are thoroughly unprepared to change its neo-feudal ways. Beer in the Snooker Club was the only book written by Ghali before his suicide in 1968. "Ghali's novel reproduces a cultural state of shock with great accuracy and great humor."-James Marcus of The Nation**

**Life at Home in the Twenty-First Century Jan 22 2022 Winner of the 2014 John Collier Jr. Award Winner of the Jo Anne Stolaroff Cotsen Prize Life at Home in the Twenty-First Century cross-cuts the ranks of important books on social history, consumerism, contemporary culture, the meaning of material culture, domestic architecture, and household ethnoarchaeology. It is a distant cousin of Material World and Hungry Planet in content and style, but represents a blend of rigorous science and photography that these books can claim. Using archaeological approaches to human material culture, this volume offers unprecedented access to the middle-**

***class American home through the kaleidoscopic lens of no-limits photography and many kinds of never-before acquired data about how people actually live their lives at home. Based on a rigorous, nine-year project at UCLA, this book has appeal not only to scientists but also to all people who share intense curiosity about what goes on at home in their neighborhoods. Many who read the book will see their own lives mirrored in these pages and can reflect on how other people cope with their mountains of possessions and other daily challenges. Readers abroad will be equally fascinated by the contrasts between their own kinds of materialism and the typical American experience. The book will interest a range of designers, builders, and architects as well as scholars and students who research various facets of U.S. and global consumerism, cultural history, and economic history.***
