The European Community Nov 03 2020 This book, first published in 1973, analyses the European Community in a global perspective. It asks and answers two main questions: what does the European Community mean to the masses of the world, and what does it mean to the world community in general? Most critical studies of the EC were made from an internal point of view, and this book is rare in having an external perspective. The author discussed the EC with diverse audiences in 16 countries, and his analyses are invaluable in putting the European project in an international context.

The Oxford Handbook on the United Nations Nov 22 2019 This Handbook provides in one volume an authoritative and independent treatment of the UN's seventy-year history, written by an international cast of more than 50 distinguished scholars, analysts, and practitioners. It provides a clear and penetrating examination of the UN's development since 1945 and the challenges and opportunities now facing the organization. It assesses the implications for the UN of rapid changes in the world - from technological innovation to shifting foreign policy priorities - and the UN's future place in a changing multilateral landscape. Citations and additional readings contain a wealth of primary and secondary references to the history, politics, and law of the world organization. This key reference also contains appendices of the UN Charter, the Statute of the International Court of Justice, and the Universal Declaration of Human Rights.

Historical Dictionary of Arms Control and Disarmament Jan 05 2021 Historical Dictionary of Arms Control and Disarmament provides an overview of key themes and issues in international security and arms control, focusing on traditional and nontraditional efforts in the twentieth century to manage the spread and use of armaments and to prevent war. This book summarizes the rich and proud traditions of arms control and disarmament, their crucial role in ensuring a noncatastrophic course of history (especially during the Cold War), and their continuing relevance in the post-Cold War world. It also defines a broad perspective of key terms and captures the scope and range of application yesterday, today, and tomorrow. This dictionary chronicles personalities, events, and agreements and is a ready reference from which to launch a more extensive investigation. It includes a large dictionary of more than 1,000 key terms, a comprehensive bibliography, an extensive chronology, and a timeline. Historical Dictionary of Arms Control and Disarmament also provides information that is comprehensible to all readers. Jeffrey A. Larsen and James M. Smith present a context for the broader range of international relations at a given point in time, extending the utility of the dictionary beyond just a narrow examination of arms control.

Disarmament as a Social Process Oct 14 2021

Disarmament and Arms Limitation Obligations Feb 24 2020 This work deals with the difficulties of enforcing arms limitation obligations. It examines the changing international system; multilateral and regional treaty provisions; the prospects for developing international mechanisms; and the way that domestic law interacts with international obligations.

Armament and Disarmament Dec 16 2021

Military Technology, Armaments Dynamics and Disarmament Jul 23 2022 This book offers theoretical analysis on the context and on the dual function of military technology, as well as case studies on the third generation of nuclear weapons, on the Biological Weapons Convention Review Conference, on the driving forces of chemical armament and on the military use of nuclear energy as a possible propellant for bombers

and in outer space.

Armament and Disarmament Aug 24 2022 South Africa was the first nation in the world to renounce and destroy its top-secret nuclear weapons capability. Its government also eliminated the ability to produce and deliver these warheads. Because no one archived the official documentary evidence of the program, various writers and scholars, as well as the public at large, have been left to speculate-and forget-the activities that consumed billions of rands and years of dedication. Based on facts and first-hand perspectives, Armament and Disarmament offers intimate views from three participants in the nuclear weapons program. A larger picture emerges through their recollections, fulfilling the role of essential perspectives and documentation where official records no longer exist. Out of secrecy and a need-to-know philosophy, many involved in the program, both wittingly and unwittingly, were never briefed as to how their particular endeavors fit into the bigger scheme. Armament and Disarmament sheds light on the complexity of events surrounding the South African nuclear weapons program and brings tribute to the ingenuity and dedication of all those involved.

The Disarmament Illusion Jul 31 2020

Arms and Artificial Intelligence Dec 04 2020 The impact of information technology in the field of military decision making is superficially less visible than that of a number of other weapon developments, though its importance has grown steadily since the beginning of the 1980s. Owing to its potential role in modern weapon systems and the prospect of its inclusion as an essential ingredient in many military projects such as the Strategic Defence Initiative, it has become the focus of special interest and efforts. This book is the first attempt to present a broad overview of the prospects for information technology in general, and machine intelligence in particular, in the context of international security. The dangers and promises of weapon and arms control applications of computers and artificial intelligence to decision-making processes are analysed in a technical, strategic, and political perspective by experts from six different countries. In an introductory chapter, Allan Din presents a generic overview of artificial intelligence and its prospects. Thirteen contributors then discuss the conceptual and technical framework of artificial intelligence, analyse implications for weapon systems and strategy, and discuss possible applications to arms control verification and modelling.
