The Changing Administrative Law of an EU Member State Mar 21 2022 This book presents the evolution of Italian administrative law in the context of the EU, describing its distinctive features and comparing it with other experiences across Europe. It provides a comprehensive overview of administrative law in Italy, focusing on the main changes occurred over the last few decades. Although the respective chapters generally pursue a legal approach, they also consider the influence of economic, social, cultural and technological factors on the evolution of public administration and administrative law. The book is divided into three parts. The first part addresses general issues (e.g. procedures and organization of public administrations, administrative justice). The second part focuses on more specific topics (e.g. public intervention in the economy, healthcare management, local government). In the third part, the evolution of Italian administrative law is discussed in a comparative perspective.

Portraying Cicero in Literature, Culture, and Politics Jan 19 2022 Cicero has played a pivotal role in shaping Western culture. His public persona, his self-portrait as model of Roman prose, philosopher, and statesman, has exerted a durable and profound impact on the educational system and the formation of the ruling class over the centuries. Joining up with recent studies on the reception of Cicero, this volume approaches the figure of Cicero from a 'biographical', more than 'philological', perspective and considers the multiple ways by which different ages reacted to Cicero and created their 'Ciceros'. From Cicero's lifetime to our times, it focuses on how the image of Cicero was revisited and reworked by intellectuals and men of culture, who eulogized his outstanding oratorical and political virtues but, not rarely, questioned the role he had in Roman politics and society. An international group of scholars elaborates on the figure of Cicero, shedding fresh light on his reception in late antiquity, Humanism and Renaissance, Enlightenment and modern centuries. Historians, literary scholars and philosophers, as well as graduate students, will certainly profit from this volume, which contributes enormously to our understanding of the influence of Cicero on Western culture over the times.

Italian Mathematics Between the Two World Wars Apr 29 2020 This book describes Italian mathematics in the period between the two World Wars. It analyzes the development by focusing on both the interior and the external influences. Italian mathematics in that period was shaped by a colorful array of strong personalities who concentrated their efforts on a select number of fields and won international recognition and respect in an incredibly short time. Consequently, Italy was considered a third mathematical power after France and Germany.

Europäische Musiker in Venedig, Rom und Neapel 1650-1750 Jun 19 2019 Der Abschlussband des deutsch-französischen ANR-DFG-Projekts MUSICI widmet sich der Musikermigration im Europa der Frühen Neuzeit mit einem kultur- und musikgeschichtlichen Blick auf Venedig, Rom und Neapel als Reiseziele und Wirkungsorte von Instrumentalisten, Sängern, Komponisten und Instrumentenbauern, die nicht von der italienischen Halbinsel stammten. Im Sinne einer "histoire croisée" werden Netzwerke, Integrations- und Austauschprozesse aufgedeckt, mit denen fremde Musiker zwischen musikalischem Alltag und herausragenden Festlichkeiten konfrontiert waren. Auf dieser Grundlage wird eine systematische Betrachtung der frühneuzeitlichen Musikermigration sowie eine Untersuchung musikalischer Stile jenseits nationaler Forschungstraditionen möglich.

Liver Growth and Repair Dec 26 2019 Nelson Fausto The Greek myth of Prometheus with its picture of a vulture feasting on its chained victim has traditionally provided a visual image of liver regeneration. It is a powerful and frightening representation but it was never to substitute the vulture by a surgeon and Prometheus by a patient laying on a properly prepared operating table, the outcome of the procedure would not differ significantly from that described by Greek poets. Yet few of us who work in the field have stopped long enough to ask where this myth originated. Did the poet observe a case of liver regeneration in a human being? Was it brilliant intuition or perhaps, literally, just a 'gut feeling' of a poet looking for good rhymes that led to the prediction that livers grow when part of the tissue is removed? This book does not attempt to solve these historical issues. It does, instead, cover in detail some of the major modern themes of research on liver regeneration, injury and repair. As indicated in Dr. N. Bucher's chapter, the modern phase of experimental studies on liver regeneration started in 1931 with the publication by Higgins and Anderson of a method to perform a two-thirds resection of the liver of a rat. The technique described has 3 remarkable features: 1) it is highly reproducible, resulting in the removal of 68% of the liver, 2) it has minimal if any mortality, and 3) it consists only of blood vessel ligation and does not involve cutting through or wounding hepatic tissue.

Ardeth #01 (I - 2017) Feb 26 2020 Unlike the many magazines that revolve around the architectural world, Ardeth concerns neither with outcomes (architecture) nor with the authors (architects). Ardeth concerns instead with their operational work, i.e. projects. The shift from subjects (their good intentions, as taught in Universities and reclaimed in the profession) to objects (the products of design, at work within the social system that contains them) engenders an analytical and falsifiable elaboration of the complex mechanisms that an open practice such as design involves. Through a process of disciplinary redefinition, Ardeth explores the falsifiability of design hypotheses as the object that allows the project to scientifically confront errors and approximations.

Investigating Gender, Translation and Culture in Italian Studies Oct 16 2021 The past few years have witnessed a growing academic interest in Italian Studies and an increasing number of symposia and scholarly activities. This volume originates from the Society for Italian Studies Postgraduate Colloquia that took place at the University of Leicester and Cambridge in June 2004 and April 2005 respectively. It gathers together articles by young researchers working on various aspects of Italian Studies. It well illustrates current trends in both typical areas of research, like literature and 'high culture', and in those which have gained momentum in recent years, like translation and language studies. The volume offers a taste of the dynamic outlook of current research in Italian Studies: the interdisciplinary approach of the essays in translation and gender studies, and the innovative methodological perspectives and findings offered by the new fields of Italian L2 and ethnography. The book is divided into three sections, each grouping contributions by broad subject areas: literature and culture, translation and gender studies, language and linguistics. Cross-fertilizations and interdisciplinary research emerge from several essays and the coherent ensemble constitutes an example of the far-reaching results achieved by current research.

Programming Environments for Massively Parallel Distributed Systems Sep 27 2022 Massively Parallel Systems (MPSs) with their scalable computation and storage space promises are becoming increasingly important for high-performance computing. The growing acceptance of MPSs in academia is clearly apparent. However, in industrial companies, their usage remains low. The programming of MPSs is still the big obstacle, and solving this software problem is sometimes referred to as one of the most challenging tasks of the 1990's. The 1994 working conference on "Programming Environments for Massively Parallel Systems" was the latest event of the working group WG 10.3 of the International Federation for Information Processing (IFIP) in this field. It succeeded the 1992 conference in Edinburgh on "Programming Environments for Parallel Computing." The research and development work discussed at the conference addresses the entire spectrum of software problems including virtual machines which are less cumbersome to program; more convenient programming models; advanced programming languages, and especially more sophisticated programming tools; but also algorithms and applications.

Reconsidering Constitutional Formation II Decisive Constitutional Normativity Nov 05 2020 This second volume of ReConFort, published open access, addresses the decisive role of constitutional normativity, and focuses on discourses concerning the legal role of constitutional norms. Taken together with ReConFort I (National Sovereignty), it calls for an innovative reassessment of constitutional history drawing on key categories to convey the legal nature of the constitution itself (national sovereignty, precedence, justiciability of power, judiciary as constituted power). In the late 18th and early 19th centuries, constitutional normativity began to complete the legal fixation of the entire political order. This juridification in one constitutional text resulted in a conceptual differentiation from ordinary law, which extends to alterability and justiciability. The early expressions of this 'new order of the ages' suggest an unprecedented and irremediable break with European legal tradition, be it with British colonial governance or the French ancien régime. In fact, while the shift to constitutions as a hierarchically 'higher' form of positive law was a revolutionary change, it also drew upon old liberties. The American constitutional discourse, which was itself heavily influenced by British common law, in turn served as an inspiration for a variety of constitutional experiments – from the French Revolution to Napoleon's downfall, in the halls of the Frankfurt Assembly, on the road to a unified Italy, and in the later theoretical discourse of twentieth-century Austria. If the constitution states the legal rules for the law-making process, then its Kelsenian primacy is mandatory. Also included in this volume are the French originals and English translations of two vital documents. The first – Emmanuel Joseph Sieyès' Du Jury Constitutionnaire (1795) – highlights an early attempt to reconcile the democratic values of the French Revolution with the pragmatic need to legally protect the Revolution. The second – the 1812 draft of the Constitution of the Kingdom of Poland – presents the 'constitutional propaganda' of the Russian Tsar Alexander I to bargain for the support of the Lithuanian and Polish nobility. These documents open new avenues of research into Europe's constitutional history: one replete with diverse contexts and national experiences, but above all an overarching motif of constitutional decisiveness that served to complete the juridification of sovereignty.
