Criminalizing Dissent Sep 30 2019 While liberal-democratic states like America, Britain and Australia claim to value freedom of expression and the right to dissent, they have always actually criminalized dissent. This disposition has worsened since 9/11 and the 2008 Great Recession. This ground-breaking study shows that just as dissent involves far more than protest marches, so too liberal-democratic states have expanded the criminalization of dissent. Drawing on political and social theorists like Arendt, Bourdieu and Isin, the book offers a new way of thinking about politics, dissent and its criminalization relationally. Using case studies like the Occupy movement, selective refusal by Israeli soldiers, urban squatters, democratic education and violence by anti-Apartheid activists, the book highlights the many forms dissent takes along with the many ways liberal-democratic states criminalize it. The book highlights the mix of fear and delusion in play when states privilege security to protect an imagined 'political order' from difference and disagreement. The book makes a major contribution to political theory, legal studies and sociology. Linking legal, political and normative studies in new ways, Watts shows that ultimately liberal-democracies rely more on sovereignty and the capacity for coercion and declarations of legal 'states of exception' than on liberal-democratic principles. In a time marked by a deepening crisis of democracy, the book

Sex and the Supreme Court Oct 24 2021 'The Constitution [of India] has within it the ability to produce social catharsis...' At 12.12 p.m. on 6 September 2018, the Supreme Court of India created history by reading down Section 377 - reversing an archaic law laid down by the British in 1860 and decriminalizing homosexuality for the first time in modern India. Yet, this is not the only ruling that the Supreme Court has made in recent times championing the rights of an individual to her or his identity and dignity. From empowering the transgender community and lending teeth to the prevention of sexual harassment of women at the workplace, to protecting the privacy, rights and dignity of women and minorities on issues such as interfaith marriages, entering the Sabarimala temple, the controversial triple talaq and the striking down of the adultery law - the highest court of the land has firmly placed the individual at the centre of the constitutional firmament, and set a course for progressive societal reform. This remarkable collection of writings by legal luminaries is the only book to offer sharp insights into each of these crucial rulings. Justice M.B. Lokur writes on the issues that affect the transgender community; Justice B.D. Ahmed elucidates on Muslim law in the modern context; and Justice A.K. Sikri addresses the fundamental concept of dignity, which binds together all the essays in this book. Some of the best-known names in Indian law - Mukul Rohatgi, Madhavi Divan, Menaka Guruswamy, Arundhati Katju and Saurabh Kirpal - offer legal perspectives of judgements on sex, sexuality and gender. From petitioners like Ritu Dalmia, Keshav Suri and Zainab Patel, we hear personal narratives of being a part of the LGBTQ community in India, while journalist Namita Bhandare provides a powerful account of the struggle against sexual harassment. An unprecedented documentation of the rulings that have set a standard for the rights

Curating Under Pressure Oct 04 2022 *Curating Under Pressure* breaks the silence surrounding curatorial self-censorship and shows that it is both endemic to the practice and ubiquitous. Contributors map the diverse forms such self-censorship takes and offer creative strategies for negotiating curatorial integrity. This is the first book to look at pressures to self-censor and the curatorial responses to these pressures from a wide range of international perspectives. The book offers examples of the many creative strategies that curators deploy to negotiate pressures to self-censor and gives evidence of curators' political acumen, ethical sagacity and resilience over the long term. It also challenges the assumption that self-censorship is something to be avoided at all costs and suggests that a decision to self-censor may sometimes be politically and ethically imperative. *Curating Under Pressure* serves as a corrective to the assumption that censorship pressures render practitioners impotent. It demonstrates that curatorial practice under pressure offers inspiring models of agency, ingenuity and empowerment. *Curating Under Pressure* is a highly original and intellectually ambitious volume and as such will be of great interest to students and academics in the areas of museum studies, curatorial and gallery studies, art history, studio art and arts administration. The book will also be an essential tool for museum practitioners.

Creating and Upholding a Family in the Institution of Slavery Feb 13 2021 Seminar paper from the year 2011 in the subject History - America, grade: 1,3, Friedrich-Alexander University Erlangen-Nuremberg (Amerikanistik), course: Mixed Race in American Culture and Literature, language: English, abstract: In an encyclopedia the term family is defined as "a fundamental social group in society consisting of one or two parents and their children," and "all the members of a household under one roof." Many more definitions have evolved over time through social changes in different societies and have been focused on in cultural studies. In times of slavery in the U.S. blacks had to cope with their living conditions and in that still had the urge to create families. This often was made impossible right from the start because "[l]arge owners often refused to allow marriage[. . .]."

Rarely, if ever, the family of slaves could be described as nuclear - father, mother and child. The

cause for the lack of a family was easily found. Eugene Genovese explains: "[M]any masters did not respect their slaves' family feelings and did not hesitate to sell them as individuals." The physical separation or the fear of such made it difficult to built a loving family. Within the system of slavery, "[. . .] the mother role took on a stronger image," states Staples. The father figure never withheld great importance within the family structure for various reasons. One of them is that the status of a child always got defined by the status of his or her mother. Children are being influenced during every day of their lives by their parents or the lack thereof. Connected to Alice Randall's parody "The Wind Done Gone" my analysis will focus on what factors constituted issues in constructing a family for house slaves. I want to point out the difficulties especially women experienced when trying to build a family, and how they influenced the mother-daughter relationship. What mark did they leave on the daughter's future and how did she cope with the problems of creating

U.S. Import Trade Regulation Jun 07 2020 This book provides a thorough analysis of the laws and regulations governing imports and discusses unfair competition, anti-dumping, and countervailing duty laws. The complete texts of the GATT and MTN Agreements are included in the work.

Roberts & Zuckerman's Criminal Evidence Feb 02 2020 Roberts and Zuckerman's Criminal Evidence is the eagerly-anticipated third of edition of the market-leading text on criminal evidence, fully revised to take account of developments in legislation, case-law, policy debates, and academic commentary during the decade since the previous edition was published. With an explicit focus on the rules and principles of criminal trial procedure, Roberts and Zuckerman's Criminal Evidence develops a coherent account of evidence law which is doctrinally detailed, securely grounded in a normative theoretical framework, and sensitive to the institutional and socio-legal factors shaping criminal litigation in practice. The book is designed to be accessible to the beginner, informative to

The Transformation of Capacity in International Development Aug 29 2019 "The Transformation of Capacity in International Development" exposes the transformation of capacity within the development discourse through a discursive analysis of USAID projects in Afghanistan and Pakistan between 1977 and 2017. As development agendas increasingly call for human rights approaches to development and the foreign policies of donor states sound alarms over global

security threats, capacity development has emerged as the solution to the complex problem of development. Through this examination of USAID's attempts to build capacity in Afghanistan and Pakistan, the book exposes how Western notions of progress, constructed by institutions, government officials, scholars and private sector actors, are obscured by the transformation of capacity. As agendas are translated into projects, they perpetuate historical relationships of global inequality that have corrupted and compete with indigenous models of governance. The Transformation of Capacity in International Development has implications for those considering the future of human rights-based approaches to development, the international management of global security threats and the sustainability of donor investments.

California Law of Contracts Jan 27 2022 A definitive guide to CA contract law for practitioners. Essential for transactional attorneys in assuring that their contracts are fully enforceable and for litigators seeking to challenge contract enforceability. Provides a clear and concise, yet thorough and comprehensive, treatment of all aspects of California contract law from contract formation and interpretation, to performance and remedies for non-performance. A discussion of current CA case law with relevant Civil Code and other California code provisions, including the Uniform Commercial Code, is provided throughout. This incorporates the topics of, and replaces, California Breach of Contract Remedies.

Healing China - Upholding the Universal Declaration of Human Rights and the UN

Convention on the Rights of the Child in the People's Republic of China Dec 26 2021 More than 10,000 protesters have been arrested over Hong Kong's pro-democracy protests on charges that are in blatant violation of the Universal Declaration of Human Rights. Joshua Wong and Agnes Chow are two of the most high-profile figures of the pro-democracy movement. Having been sentenced for a year in jail, Wong has maintained a defiant approach, saying: "I am persuaded that neither prison bars, nor election ban, nor any other arbitrary powers would stop us from activism." He also urged people to focus on the plight of the "Hong Kong 12", the detained group accused of attempting to travel illegally to Taiwan by boat in August. They have been held in a mainland detention centre ever since, with their families accusing authorities of denying the group access to lawyers, visitors, or medical treatment. Agnes Chow, who gave up her British citizenship to run in Hong Kong elections, was one of the first Demosisto politicians barred from standing for office because the party advocated "self-determination". One of her most successful roles has been bringing international attention to Hong Kong's democracy movement, aided by her fluency in English, Cantonese and Japanese. Chow was arrested under the national security law, on the vague

suspicion of “colluding with foreign forces”. Therefore the Chinese national security law in Hong Kong must be revoked; so that the Universal Declaration of Human Rights can be restored in Hong Kong and the rest of China. It is also essential that the fundamental human right of Freedom of Association is made legal in China - not only to further democracy in China, but also that independent auditors and non-governmental labor unions can finally operate in China; to prevent grueling and illegal work hours in the country; especially among schoolchildren in China, so that the UN Convention on the Rights of the Child can be upheld in China. Also, President Xi has faced accusations - backed by mounting evidence - of mass human rights abuses in Xinjiang, including the internment of more than a million Muslims in detention camps. The abuse and forced labour in these camps - which include the forced sterilisation of women and restrictions on religious and cultural beliefs - have been labelled as cultural genocide and slavery. So if President Xi persists in violating the Universal Declaration of Human Rights, he must be removed from office - as well as charged and convicted for committing cultural genocide in the International Community.

Upholding Justice Nov 05 2022 This book critically examines the social, psychological and legal perspectives of justice. It brings together a wide range of contemporary and relevant issues relating to the gross violation of human rights and presents situation-based evidence from firsthand experiences of behavioral, social as well as legal professionals. It deals with themes such as civic and legal rights of children; dignity of the third gender in India; food justice in a welfare state; rights of disabled children; secret marriage of individuals with mental health challenges; and ethics and good governance. Topical and comprehensive, this book will be an excellent read for scholars and researchers of political studies, legal studies, human rights, psychology, behavioral studies, political sociology, sociology, development studies, governance and public policy, and South Asian studies. It will also interest policy makers, NGOs, activists and professionals in the field.

The Analytic Hierarchy Process (AHP) is a prominent and powerful tool for making decisions in situations involving multiple objectives. Models, Methods, Concepts and Applications of the Analytic Hierarchy Process, 2nd Edition applies the AHP in order to solve problems focused on the following three themes: economics, the social sciences, and the linking of measurement with human values. For economists, the AHP offers a substantially different approach to dealing with economic problems through ratio scales. Psychologists and political scientists can use the methodology to quantify and derive measurements for intangibles. Meanwhile researchers in the physical and engineering sciences can apply the AHP methods to help resolve the conflicts between hard measurement data and human values. Throughout the book, each of these topics is explored utilizing real life models and examples, relevant to problems in today's society. This new edition has been updated and includes five new chapters that includes discussions of the following: - The eigenvector and why it is necessary - A summary of ongoing research in the Middle East that brings together Israeli and Palestinian scholars to develop concessions from both parties - A look at the Medicare Crisis and how AHP can be used to understand the problems and help develop ideas to solve them.
