Stage and Screen May 07 2020 Classic and new essays examining the historical, cultural, and aesthetic relationships between theater and film.

Geotechnical Earthquake Engineering Nov 05 2022 Appropriate for courses in Structural Dynamics, Earthquake Engineering or Seismology. This is the first book on the market focusing specifically on the topic of geotechnical earthquake engineering. Also covers fundamental concepts in seismology, geotechnical engineering, and structural engineering.

*The Progress Principle Oct 04 2022 What really sets the best managers above the rest? It's their power to build a cadre of employees who have great inner work lives—consistently positive emotions; strong motivation; and favorable perceptions of the organization, their work, and their colleagues. The worst managers undermine inner work life, often unwittingly. As Teresa Amabile and Steven Kramer explain in *The Progress Principle*, seemingly mundane workday events can make or break employees' inner work lives. But it's forward momentum in meaningful work—progress—that creates the best inner work lives. Through rigorous analysis of nearly 12,000 diary entries provided by 238 employees in 7 companies, the authors explain how managers can foster progress and enhance inner work life every day. The book shows how to remove obstacles to progress, including meaningless tasks and toxic relationships. It also explains how to activate two forces that enable progress: (1) catalysts—events that directly facilitate project work, such as clear goals and autonomy—and (2) nourishers—interpersonal events that uplift workers, including encouragement and demonstrations of respect and collegiality. Brimming with honest examples from the companies studied, *The Progress Principle* equips aspiring and seasoned leaders alike with the insights they need to maximize their people's performance.*

The Progress Principle Jul 01 2022 Explains how to foster progress, shows how to remove obstacles, including meaningless tasks and toxic relationships that disrupt employees' work lives, and offers advice on enhancing employees' inner work life.

*Liberalism with Excellence Feb 13 2021 During the past several decades, political philosophers have frequently clashed with one another over the question whether governments are morally required to remain neutral among reasonable conceptions of excellence and human flourishing. Whereas the numerous followers of John Rawls (and kindred philosophers such as Ronald Dworkin) have maintained that a requirement of neutrality is indeed incumbent on every system of governance, other philosophers — often designated as 'perfectionists' — have argued against the existence of such a requirement. *Liberalism with Excellence* enters these debates not by plighting itself unequivocally to one side or the other, but instead by reconceiving each of the sides and thus by redirecting the debates that have occurred between them. On the one hand, the book rejects the requirement of neutrality by contending that certain subsidies for the promotion of excellence in sundry areas of human endeavour can be proper and vital uses of resources by governments. Advocating such departures from the constraint of neutrality, the book presents a version of liberalism that can rightly be classified as 'perfectionist'. On the other hand, the species of perfectionism espoused in *Liberalism with Excellence* diverges markedly from the theories that have usually been so classified. Indeed, much of the book assails various aspects of those theories. What is more, the aspirational perfectionism elaborated in the closing chapters of the volume is reconcilable in most key respects with a suitably amplified version of Rawlsianism.*

Hence, by reconceiving both the perfectionist side and the neutralist side of the prevailing disputation, *Liberalism with Excellence* combines and transforms their respective insights.

Socialism In Western Europe Nov 24 2021 This is a book about what it meant to be a socialist in Western Europe for the generation which came to maturity after World War I. It attempts to capture the subjective aspect of the socialist experience through interviews conducted with socialist leaders who held a significant place in the movement from the 1930s on.

Geotechnical Earthquake Engineering Feb 25 2022 This is the first book on the market focusing specifically on the topic of geotechnical earthquake engineering. The book draws from the fields of seismology and structural engineering to present a broad, interdisciplinary view of the fundamental concepts in seismology, geotechnical engineering, and structural engineering.

Kramer Williamson, Sprint Car Legend Oct 31 2019 Sprint Car Hall of Famer Kramer Williamson began his 45-year professional career as a grassroots racer from Pennsylvania and became one of the most successful and beloved professional drivers of all time. Drawing on interviews with those who knew him best, this first ever biography of Williamson covers his life and career as a driver and sprint car builder, from his humble beginnings racing the legendary #73 Pink Panther car in 1968 to his fatal crash during qualifying rounds at Lincoln Speedway in 2013.

Socialism in Western Europe Jan 03 2020 This is a book about what it meant to be a socialist in Western Europe for the generation which came to maturity after World War I. It attempts to capture the subjective aspect of the socialist experience through interviews conducted with socialist leaders who held a significant place in the movement from the 1930s on.

SUMMARY - The Progress Principle: Using Small Wins To Ignite Joy, Engagement, And Creativity At Work By Teresa Amabile And Steven Kramer Mar 29 2022 * Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. By reading this summary, you will discover how the way everyone lives their work impacts a company's performance. You will also discover : the main criteria for judging the quality of working life; the influence of job satisfaction on motivation and creativity; the springs of the principle of progress, according to which evolving in a meaningful job is the first factor of satisfaction and success; the importance of receiving practical and emotional support to be able to work in good conditions; the central role of the manager in creating a positive atmosphere within the team. It is increasingly recognized that the success of a company depends on its ability to provide good working conditions for its employees. Powerful and influential companies such as Google are known for their positive atmosphere. On the other hand, leaders often have a vague idea of what makes for fulfillment in the workplace. In practice, the essential springs can be neglected and harmful habits can feed a noxious atmosphere. One thing is certain: to be happy, an employee needs to be able to advance in a job that motivates him or her. Discover the secrets of the principle of progress and professional fulfillment! *Buy now the summary of this book for the modest price of a cup of coffee!

Eye of the Storm Chasing Storms With Warren Faidley Aug 10 2020 Storm chaser Warren Faidley discusses the techniques, dangers, and difficulties of photographing lightning, tornadoes, and hurricanes.

The New Wave Aug 29 2019 Analyse van de "Nouvelle Vague", een stroming in de Franse film uit de jaren 1960-1970, gezien vanuit Amerikaans standpunt

InfoWorld Sep 22 2021 InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

Making Sense Of Wine Jun 27 2019 This new edition of Matt Kramer's classic guide to wine features a new preface and an all-new chapter that covers changes and advances in winemaking since first publication in 1989. The superbly written text explains everything an oenophile needs to know, including the creation and naming of wines, wine cellars, presentation and glassware, pairing wine with food, and much more. Kramer explores connoisseurship through the practical devices of "thinking wine" and "drinking wine," making for a most enjoyable and engrossing journey through one of life's most dependable pleasures.

Does France Still Count? Mar 17 2021 Analyzes France's effort to redefine its role in the post-Cold War era and in an integrated Europe, and what that redefined role might mean to France, Europe, and the U.S.

Tailspin Sep 10 2020 In this revelatory narrative covering the years 1967 to 2017, Steven Brill gives us a stunningly cogent picture of the broken system at the heart of our society. He shows us how, over the last half century, America's core values—meritocracy, innovation, due process, free speech, and even democracy itself—have somehow managed to power its decline into dysfunction. They have isolated our best and brightest, whose positions at the top have never been more secure or more remote. The result has been an erosion of responsibility and accountability, an epidemic of shortsightedness, an increasingly hollow economic

and political center, and millions of Americans gripped by apathy and hopelessness. By examining the people and forces behind the rise of big-money lobbying, legal and financial engineering, the demise of private-sector unions, and a hamstrung bureaucracy, Brill answers the question on everyone's mind: How did we end up this way? Finally, he introduces us to those working quietly and effectively to repair the damages. At once a diagnosis of our national ills, a history of their development, and a prescription for a brighter future, *Tailspin* is a work of riveting journalism—and a welcome antidote to political despair.

Growing Up Creative Sep 30 2019 A myth-shattering how-to by the established authority in the field that proves creativity must originate from within the child and shows parents and teachers how to help foster it.

How to Think Like a Scientist Jan 15 2021 Every day you answer questions—dozens, even hundreds of them. How do you find the answers to questions? How can you be sure your answers are correct? Scientists use questions to learn about things. Scientists have developed a way of helping make sure they answer questions correctly. It is called the scientific method. The scientific method can help you find answers to many of the questions you are curious about. What kind of food does your dog like best? Is your sister more likely to help you with your homework if you say please? Can throwing a dead snake over a tree branch make it rain? The scientific method can help you answer these questions and many others. Stephen Kramer's invitation to think like a scientist, illustrated by Felicia Bond's humorous and appealing pictures, will receive enthusiastic response from young readers, scientist and nonscientist alike.

True Colors Apr 05 2020 *The Colors* covers the past three decades of the American art scene, a period during which the prevailing artistic fashion has shifted as often as the focus of the Whitney Biennial, when art and money, talent and celebrity have often been confused. During this period, figures such as Julian Schnabel, Jeff Koons, and Keith Haring have crossed over from the rarefied world of high art into popular culture, and art dealers, like Hollywood power agents, have often claimed as much attention as those they represented. Anthony Haden-Guest has moved within this world, known the players, and delivers here an authoritative and deliciously inside account. Focusing on the lives and personalities of the art world's main players, and with a sure critical component, Haden-Guest gives us vivid portraits of the period's key artists as they strive to fulfill their ambitions. He does justice as well to the machinations of those who have come to control the larger drama -- the dealers, collectors, and museum curators. Filled with incredible anecdotes, dramatically told stories, and subtle critical assessments, *True Colors* tells the story of the art world that we have never heard before.

Audiology Workbook Dec 02 2019

Caves May 31 2022 Learn about caves, what they are, different types of caves, and how they are made.

The Other Population Crisis Sep 03 2022 The programs in Italy, Japan, and Singapore, which have failed so far, have not devoted sufficient resources consistently enough to make a difference and do not support gender equality and women's work-family balance, Kramer finds.

Trouble in Paradise? May 19 2021 When political observers talk European security, they invariably refer to the challenges Western Europe faces on its peripheries, rarely imagining that the greatest dangers to the new Europe may come from within. Without necessarily suggesting a worst case ending, this study argues that there is indeed a series of crises converging on post Cold War Europe that threaten its stability and need to be addressed by European policy makers and taken into account by Americans. Areas of discussion include the welfare state in transition, crisis of the political system, the decline of the nation-state, and prospects for the future.

Audiology Oct 24 2021 *Audiology: Science to Practice, Third Edition* is a comprehensive and challenging textbook for undergraduate students in audiology and hearing science, for graduate students beginning an AuD program, especially those who may not have a background in the subject, and for other health care professionals who would benefit by a better understanding of hearing science and audiology practices. This textbook is written in a style that tries to make new or difficult concepts relatively easy to understand. The approach is to keep it readable and to punctuate the text with useful figures and tables. This textbook seeks to provide a solid foundation in hearing science and clinical audiology, and is an excellent resource for those preparing for the Audiology Praxis Exam. It also serves as a companion to the *Audiology Workbook, Third Edition*, by Dr. Steven Kramer and Dr. Larry Small. From science to practice, this textbook covers anatomy and physiology of the auditory and vestibular systems, acoustic properties and perception of sounds, audiometry and speech measures, audiogram interpretations, masking, outer and middle ear assessments, otoacoustic emissions and auditory brainstem responses, hearing screening, hearing aids, cochlear and other implantable devices, and auditory disorders supported with expected audiologic data. The reader is also introduced to the profession of audiology and what it means to work as an audiologist. Where appropriate, variations in

procedures for pediatrics are presented. **NEW TO THIS EDITION** The third edition of *Audiology: Science to Practice* has been extensively revised from the previous edition. The authors systematically reviewed each of the chapters from the previous edition to expand, update, and reorganize the material to make it even more useful to the student new to audiology, and at the same time continues to be more comprehensive than one might find in other introductory texts on audiology. The authors retain

Jonathan Swift and Philosophy Jul 21 2021 This book explores the rich philosophical content of the writings of Jonathan Swift. It discusses these philosophical topics against their ideengeschichtliche background and demonstrates that Swift's work offers starting points for philosophical reflection that are still topical today.

Winners Take All Jul 09 2020 'Entertaining and gripping . . . For those at the helm, the philanthropic plutocrats and aspiring "change agents" who believe they are helping but are actually making things worse, it's time for a reckoning with their role in this spiraling dilemma' Joseph Stiglitz, *New York Times Book Review* 'In Anand's thought-provoking book his fresh perspective on solving complex societal problems is admirable. I appreciate his commitment and dedication to spreading social justice' Bill Gates An insider's trenchant investigation of how the global elite's efforts to "change the world" preserve the status quo and obscure their culpability Former *New York Times* columnist Anand Giridharadas takes us into the inner sanctums of a new gilded age, where the rich and powerful fight for equality and justice any way they can - except ways that threaten the social order and their position atop it. We see how they rebrand themselves as saviours of the poor; how they lavishly reward "thought leaders" who redefine "change" in winner-friendly ways; and how they constantly seek to do more good, but never less harm. But why should our gravest problems be solved by the unelected upper crust instead of the public institutions it erodes by lobbying and dodging taxes? Rather than rely on scraps from the winners, Giridharadas argues that we must take on the gruelling democratic work of building more robust, egalitarian institutions. Trenchant and revelatory, *Winners Take All* is a call to action for elites and citizens alike.

Past, Present and Future Issues in Earthquake Engineering Oct 12 2020

Seismic Hazard and Risk Analysis Nov 12 2020 Seismic hazard and risk analyses underpin the loadings prescribed by engineering design codes, the decisions by asset owners to retrofit structures, the pricing of insurance policies, and many other activities. This is a comprehensive overview of the principles and procedures behind seismic hazard and risk analysis. It enables readers to understand best practises and future research directions. Early chapters cover the essential elements and concepts of seismic hazard and risk analysis, while later chapters shift focus to more advanced topics. Each chapter includes worked examples and problem sets for which full solutions are provided online. Appendices provide relevant background in probability and statistics. Computer codes are also available online to help replicate specific calculations and demonstrate the implementation of various methods. This is a valuable reference for upper level students and practitioners in civil engineering, and earth scientists interested in engineering seismology.

Positive Endings in Psychotherapy Mar 05 2020 This book examines thoughtfully and comprehensively the steps necessary to terminate open-ended therapy in a way that is appropriate, satisfying, and beneficial for both client and therapist. It shows clinicians how to determine when therapy should be terminated, who should initiate endings, how to carry out the last session, and more.

Hidden Worlds Jun 07 2020 This ALA Notable Children's Book opens the door to the hidden worlds of nature, as photos taken with powerful microscope reveal the hidden beauty of everyday objects. Full color.

Lightning Apr 29 2022 Covers a variety of facts on lightning, including how it is formed, the different types of lightning, what thunder is and its relationship to lightning, safety measures, etc.

SPIN Jul 29 2019 From the concert stage to the dressing room, from the recording studio to the digital realm, *SPIN* surveys the modern musical landscape and the culture around it with authoritative reporting, provocative interviews, and a discerning critical ear. With dynamic photography, bold graphic design, and informed irreverence, the pages of *SPIN* pulsate with the energy of today's most innovative sounds. Whether covering what's new or what's next, *SPIN* is your monthly VIP pass to all that rocks.

The Book of Norman Dec 26 2021 The story of a friendship.

Tornado Jun 19 2021 Describes the formation, different types, and study of tornadoes.

Sleep and Psychosomatic Medicine Dec 14 2020 *Sleep and Psychosomatic Medicine* presents an overview of sleep medicine and the management of common sleep disorders seen in a wide variety of practice settings. Chapters have been written by experts in the field in order to provide physicians of a wide range of interests and abilities with a highly readable exposition of the principal results, including numerous well articulated examples and a rich discussion of applications. The second edition has been revised to further broaden the scope with the inclusion of several new chapters such as *Sleep and Dermatology*, *Fatigue in Chronic Medical*

Conditions, Occupational Sleep Medicine, Restless Legs Syndrome and Neuropsychiatric Disorders and Sleep Dysfunction after Traumatic Brain Injury, to name a few. This second edition of Sleep and Psychosomatic Medicine is an interdisciplinary, scholarly, authoritative, evidence-based review of the field designed to meet the needs of a wide range of health care professionals, including psychiatrists, psychologists, nurses, medical students, and social workers in health care settings.

Caves Jan 27 2022 Learn about caves, what they are, different types of caves, and how they are made.

Theodoric's Rainbow Apr 17 2021 Theodoric of Freiberg, a Dominican friar of the early fourteenth century, discovers how sunlight and drops of water make rainbows.

Studies in Perception and Action III Aug 22 2021 This volume, a posterbook based on the seventh biennial Conference of the International Society for Ecological Psychology, is a collection of compact empirical and/or theoretical articles on the study of perception and action.

Beating Burnout at Work Feb 02 2020 A first-of-its-kind, science-backed toolkit takes a holistic approach to burnout prevention by helping individuals, teams, and leaders build resilience and thrive at work. In Beating Burnout at Work, Paula Davis, founder of the Stress & Resilience Institute, provides a new framework to help organizations prevent employee burnout.
