Can Some Doctors Do More Harm Than Good Jul 11 2021

Doctors Are More Harmful Than Germs Oct 14 2021 Most people would consider a knife wound to the stomach a serious health risk, but a similar scalpel wound in an operating room is often shrugged off. In *Doctors Are More Harmful Than Germs*, Dr. Harvey Bigelsen explains how today's medical doctors overprescribe surgery and ignore its long-term health implications. Any invasive medical procedure, he argues—including colonoscopies and root canals—creates inflammation in the body, leading to serious and long-lasting health problems. Inflammation, according to Dr. Bigelsen, is the real cause of all chronic disease (persistent or long-lasting illness). Noting that Western medicine has yet to “cure” a single chronic disease, Bigelsen points to a new paradigm: one that treats each patient as an individual (rather than as a set of symptoms), avoids further damage to the body through surgery, and looks for the root cause of chronic disease in past damage done to the patient's body—whether caused by a bad fall or a scalpel. Provocatively written and radical in its approach, *Doctors Are More Harmful Than Germs* challenges readers to rethink everything they believe about illness and how to treat it. From the Trade Paperback edition.

Political Correctness Does More Harm Than Good: How to Identify, Debunk, and Dismantle Dangerous Ideas Jun 22 2022 Political Correctness Does More Harm Than Good! It's a surprising assertion. Isn't PC culture all about kindness? About protecting victimized groups? If you trace the history of political correctness, the answer is emphatically no. It has other goals in mind and has since its inception with thinkers like Rousseau. Author Douglas Kruger traces the unfolding ideology from its dark genesis (the French Revolution and subsequent terror) through its various incarnations—Marxism, relativism, post-modernism, and all the way to today's identity-politics. He points out the flaws, fallacies, and in many cases, the body-counts these ideologies have wracked up. Uniquely, this book then goes one step further. It is not merely descriptive history; it is not just explanatory philosophy. This is a debate guide, a how-to manual for those interested in attacking these harmful ideas head on. Do you know how to articulate what is wrong with “woke” arguments? Do you know how to defend the Western tradition against relentless onslaught from the PC-Police? Here is how,

step by step and argument by argument.

Become a master at identifying, debunking, and dismantling dangerous ideas. Add your voice to the culture wars and learn precisely how to fight for tried and tested Western values—values like science, democracy, logic, rule of law, and the Judeo-Christian tradition of human rights and values. As it turns out, you can have truth, or you can have political correctness, but you can't have both. Award-winning speaker and author Douglas Kruger also provides you with supplemental “how-to” videos on his site www.BreakingWoke.com.

Cardiovascular Disease--is the Government Doing More Harm Than Good? Dec 24 2019

First Do No Harm Jan 05 2021 This collection of essays from leading figures in the field of medical law and ethics is a lasting testimony to the work of one of the most eminent scholars in the area, Professor Ken Mason. The wide-ranging contents and the standing of the contributors mean that this collection will be an invaluable resource for anyone studying or working in medical law or medical ethics.

Business Ethics Sep 01 2020

Nutrition Feb 24 2020 Nutrition addresses the most hotly debated topics in the news today: obesity, food safety, irradiation, and vegetarianism and also describes the currently accepted principles of good nutrition for men, women, and children. Despite the abundance of advice on food and diet, more Americans are obese than ever before, diabetes rates are skyrocketing, and more foods are recalled due to contamination. It is high-time for non-biased answers to the question of what is healthy and safe to eat. Nutrition provides those answers. The book explains basic guidelines for healthy eating, along with the government's role in nutrition. It examines the issues of food safety and technology and the debates about genetically modified foods, organic foods, and vegetarian dining. Food bans, such as those on trans fats are discussed, as are vitamins and supplements. After tracing the history of the study of nutrition and identifying principal researchers, the book examines seven major controversies in nutrition today. This basic guide to healthy eating will give both students and adults the tools they need to choose a diet that is healthy and safe. 10 illustrations Primary documents provide students with resources for further study

Nutrition and Diet Therapy Jul 19 2019 With engaging coverage of core nutrition concepts and up-to-date clinical content, Cataldo, DeBruyne, and Whitney's text provides the

ideal introduction to nutrition and diet therapy. From basic facts and practical information to assessments and case studies, this Sixth Edition provides the contemporary and comprehensive approach you need to gain knowledge and achieve confidence in the course. Book jacket. **EVELINA** May 21 2022 A suspenseful romantic action-packed thriller. A gorgeous young lady turned Most Wanted. A romantic trip and a love to die for. A hidden secret. An evil brutal regime practicing a cult they believe existed even before God created the world. Until the regime is stopped life is on the line. A must read. ABOUT THE SERIES **EVELINA** A secret cult that existed even before this world was created is still at the center of murder a thousand years later. A ruthless regime is using this cult to run rampage and havoc. A corrupt and evil world where murder is the norm. A place so dark and scary where they all come out in numbers where they are slaughtered in thousands. A place where they are naked: no rights, hopes, or anything to hang on to. A place where the only hope and courage is the heart-engraved-belief that someone will solve God's Dilemma and rise to save humanity. A pledge to fight to the death because the sole existence of the regime is to restore the lost kingdom of darkness at humanity's expense. Where restoring it means slaughtering two-thirds of the world's population in 48 hours known as the 48 Hours of Darkness. It's a story of great courage in the face of death. The rise of Tomorrow's World Order citing the system as the root of all evil setting a collision course with the regime. The suspenseful questions are when and of what magnitude will the collision be and the devastating outcome? Will the regime allow a system change? Where stakes are high and the regime will defend the system at any cost will they succeed and at what cost? How can mankind survive the most feared devil's ghosts? Are you to be the lucky few to be spared in the 48 hours of darkness? Is mankind doomed or there is hope? What is God's Dilemma and can it really be solved? Unless God's Dilemma is solved mankind is doomed. A race against time where it's a matter of life or death for the strongest men let alone for Evelina caught up in all this. Will she survive the greatest manhunt since the world was created with everyone after her with the most powerful man demanding her too? Only one way to find out. Get this book right now. *Annals of Oriental Research* Feb 18 2022 **Greener Marketing** Jun 17 2019 An examination of the progress of environmental

marketing on a global scale. The first part sets out the strategic issues and rationale for green marketing, the second addresses tactical issues in more detail, and the third section provides detailed, international case studies.

Cracked Sep 25 2022 Why is psychiatry such big business? Why are so many psychiatric drugs prescribed - 47 million antidepressant prescriptions in the UK alone last year - and why, without solid scientific justification, has the number of mental disorders risen from 106 in 1952 to 374 today? The everyday sufferings and setbacks of life are now 'medicalised' into illnesses that require treatment - usually with highly profitable drugs. Psychological therapist James Davies uses his insider knowledge to illustrate for a general readership how psychiatry has put riches and medical status above patients' well-being. The charge sheet is damning: negative drug trials routinely buried; antidepressants that work no better than placebos; research regularly manipulated to produce positive results; doctors, seduced by huge pharmaceutical rewards, creating more disorders and prescribing more pills; and ethical, scientific and treatment flaws unscrupulously concealed by mass-marketing. *Cracked* reveals for the first time the true human cost of an industry that, in the name of helping others, has actually been helping itself.

[The Invention of Miracles](#) Aug 20 2019 "An astonishingly revisionist biography of Alexander Graham Bell, telling the true-and troubling-story of the inventor of the telephone. We think of Alexander Graham Bell as the inventor of the telephone, but that's not how he saw his own career. Bell was an elocution teacher by profession. As the son of a deaf woman and, later, husband to another, his goal in life from adolescence was to teach the deaf to speak. Even his tinkering sprang from his teaching work; the telephone had its origins as a speech reading machine. And yet by the end of his life, despite his best efforts-or perhaps, more accurately, because of them-Bell had become the American Deaf community's most powerful enemy. The *Invention of Miracles* recounts an extraordinary piece of forgotten history. Weaving together a moving love story with a fascinating tale of innovation, it follows the complicated tragedy of a brilliant young man who set about stamping out what he saw as a dangerous language: Sign. The book offers a heartbreaking look at how heroes can become villains and how good intentions are, unfortunately, nowhere near enough-as well as a powerful account of the dawn of a civil rights movement and the triumphant tale of how the Deaf community reclaimed their once-forbidden language. Katie Booth has been researching this story for over a decade, poring over Bell's papers, Library of Congress archives, and the records of deaf schools around America. But she's also lived with this story for her entire life. Witnessing the damaging impact of Bell's legacy on her family would set her on a path

More Harm Than Good Jul 31 2020 Don't mess with a tough guy with time on his hands.

Especially if you have secrets to keep. A head injury requires a mandatory health check. That's Naval Intelligence's standard procedure. Covert operative David Trevelyan doesn't like procedure. But he goes along to get along. He agrees to a hospital stay and an MRI. Then someone steals his boots. Mistake. Trevelyan decides to keep himself in the hospital until justice is served. His bosses don't share his priorities, so - in trademark fashion - he takes matters into his own hands. The trap he sets slams shut with ruthless efficiency. But Trevelyan finds he's caught more than a thief. He's stumbled into a complex, multi-layered conspiracy designed to cause incalculable diplomatic damage. For the first time in his career Trevelyan must operate in his home territory. He approaches the task with his customary vigor. But between criminals on one side and regulations on the other, he's more isolated than ever. And as a virtual stranger in his own land, with the body-count rising and his time running out, he's soon facing the soul-searching question: Is he doing MORE HARM THAN GOOD?

East African Journal of Rural Development Nov 22 2019

Skin Color as a Post-colonial Issue Among Asian-Americans Nov 03 2020 Without minimizing White racism or other forms of Western social ills, and without criticizing or passing judgements on Asian-American, Hall (human ecology and social work, Michigan State U.) offers some insight into the implications of skin color for Asian-Americans, demonstrating a form of interaction among those who would otherwise be considered post-colonial victims. Among the dimensions he explores are the sport of color, psychological colonization, the bleaching syndrome, a survey of Asian's color bias in the Philippines, what Asian-American women say, Eurasian identity, racism though skin color, and beyond race. The text is double spaced. Annotation b2004 Book News, Inc., Portland, OR (booknews.com).

[Dead Lines](#) Aug 12 2021 Collection of popular press op-ed articles on homicide from world-renowned experts on the subject. This book provides strong evidence that the opinions of criminologists, based on research and theory, can effectively make their way into the popular press in order to influence public opinion as well as the thinking of policymakers. Doing Harm Dec 16 2021 Editor of the award-winning site Feministing.com, Maya Dusenbery brings together scientific and sociological research, interviews with doctors and researchers, and personal stories from women across the country to provide the first comprehensive, accessible look at how sexism in medicine harms women today. In *Doing Harm*, Dusenbery explores the deep, systemic problems that underlie women's experiences of feeling dismissed by the medical system. Women have been discharged from the emergency room mid-heart attack with a prescription for anti-anxiety meds, while others with autoimmune diseases have been labeled

"chronic complainers" for years before being properly diagnosed. Women with endometriosis have been told they are just overreacting to "normal" menstrual cramps, while still others have "contested" illnesses like chronic fatigue syndrome and fibromyalgia that, dogged by psychosomatic suspicions, have yet to be fully accepted as "real" diseases by the whole of the profession. An eye-opening read for patients and health care providers alike, *Doing Harm* shows how women suffer because the medical community knows relatively less about their diseases and bodies and too often doesn't trust their reports of their symptoms. The research community has neglected conditions that disproportionately affect women and paid little attention to biological differences between the sexes in everything from drug metabolism to the disease factors—even the symptoms of a heart attack. Meanwhile, a long history of viewing women as especially prone to "hysteria" reverberates to the present day, leaving women battling against a stereotype that they're hypochondriacs whose ailments are likely to be "all in their heads." Offering a clear-eyed explanation of the root causes of this insidious and entrenched bias and laying out its sometimes catastrophic consequences, *Doing*

Harm is a rallying wake-up call that will change the way we look at health care for women. Summary of World Broadcasts Oct 22 2019 *More Harm than Good?* Oct 26 2022 This book reveals the numerous ways in which moral, ethical and legal principles are being violated by those who provide, recommend or sell 'complementary and alternative medicine' (CAM). The book analyses both academic literature and internet sources that promote CAM. Additionally the book presents a number of brief scenarios, both hypothetical and real-life, about individuals who use CAM or who fall prey to ethically dubious CAM practitioners. The events and conundrums described in these scenarios could happen to almost anyone. Professor emeritus of complementary medicine Edzard Ernst together with bioethicist Kevin Smith provide a thorough and authoritative ethical analysis of a range of CAM modalities, including acupuncture, chiropractic, herbalism, and homeopathy. This book could and should interest all medical professionals who have contact to complementary medicine and will be an invaluable reference for patients deliberating which course of treatment to adopt.
