[The Language of Flowers](#) Jan 03 2020 With gorgeous full-color illustrations, ornate decorative elements, lettering in metallic ink, and engaging text, [The Language of Flowers: A Fully Illustrated Compendium of Meaning, Literature, and Lore for the Modern Romantic](#) is a treasure for flower lovers. A sumptuous, contemporary anthology of 50 of the world's most storied and popular flowers, each of its entries offers insight to the meaning associated with the flower, and is a fascinating mix of folklore, classic mythology, literature, botanical information and popular culture. Following an introduction that provides a short history of the language of flowers, a fad which reached its peak during the reign of Queen Victoria, each uniquely illustrated and designed entry is an enjoyable read full of history and little-known facts. Here is the story of Tulipmania; how the pansy got its "face," and why the most particular pollination process of a certain orchid has made the vanilla bean a very dear commodity. You'll also discover how Christian Dior's passion for lily of the valley inspired his classic perfume Diorissimo and its extraordinary bottle; why Oscar Wilde had a penchant for wearing green carnations in his lapel; and how Greeks and Romans believed snapdragons could ward off witchcraft, so they planted them at entryways to their homes. With more than a dozen two-page paintings evoking the romance of noteworthy Victorian gardens and symbolic bouquets, a cross-referenced index of flowers and meanings, and suggestions for further reading, this book is a must for lovers of floriology and Victoriana.

[Hokusai's 36 Views of Mount Fuji](#) Jul 21 2021 Hokusai's 36 Views of Mount Fuji Fugaku Sanjurokkei I've long been a fan of Hokusai, and love the 36 Views of Mount Fuji series, so I put this little book together for myself with images of the prints in the series that I have collected over the years from various public sources. It turned out so well, I thought others might find it useful, so I decided to make it available to others using the amazing technology available today. This book simply contains a small (about 4" x 6") full-color copy of each of the 46 prints (sic: 36 Views has 46 views in it) in the series 36 Views of Mount Fuji. I use the book as a reference and reminder. There is no commentary or discussion, just the pictures, with the name in English & Japanese (romaji & kanji). I've indexed each picture with keywords, so if I want to find one with a ferry boat, the ones with snow, the one with the little turtle, or the salt gatherers, I can find them in the index. If you are interested in Hokusai's work, you might find this book as useful as I have.

[The Cinematic Mirror for Psychology and Life Coaching](#) Mar 29 2022 Cinema both reflects life and contours life—that is its psychological power. And for decades, clinicians and educators have recognized the value of this power, using it to respectively heal in therapy and educate in the classroom. [The Cinematic Mirror for Psychology and Life Coaching](#) mines the illustrative value of cinema, offering therapists and life coaches access to ideas that can motivate and enlighten clients. Although many movie guides exist, this volume complements the available literature by adding positive psychology, mental health, and wellness perspectives to the clinical/educational/coaching mix. The serious intent to cull from cinema its underlying psychological value has motivated noted clinicians, life coaches, and cultural critics to offer science-based analysis and intervention strategies. Readers may add their own movie insights and professional expertise to this rich foundation. The volume covers international as well as domestic cinema in a variety of genres, providing a range of film choices relevant to clients' lives. Beyond this, it expands on universal concepts of strengths, capabilities, and coping methods. Chapters in [The Cinematic Mirror](#): analyze how movies can create and relieve trauma, challenge Hollywood's portrayal of the American family, overview the use of movies to examine relationships in therapy, explore the acclaimed UP television cinema verite series as studies in personal growth and social change, reinterprets images of disability in terms of positive psychology, examines models, or the lack thereof, for the American adolescent rite of passage, traces the history of mental illness stereotypes in film. The collective wisdom found in [The Cinematic Mirror for Psychology and Life Coaching](#) will bring professionals involved in healing, coaching, counseling, education, and mentoring not only new applications but new appreciation for the transformative power of film. That power already exists. Readers just have to "SEE" it.

Analysis of Images, Social Networks and Texts Nov 05 2022 This book constitutes the proceedings of the 6th International Conference on Analysis of Images, Social Networks and Texts, AIST 2017, held in Moscow, Russia, in July 2017. The 29 full papers and 8 short papers were carefully reviewed and selected from 127 submissions. The papers are organized in topical sections on natural language processing; general topics of data analysis; analysis of images and video; optimization problems on graphs and network structures; analysis of dynamic behavior through event data; social network analysis.

[Primer of Musical Forms](#) Jun 27 2019

[Lake Like a Mirror](#) Jan 15 2021 By an author described by critics as 'the most accomplished Malaysian writer, full stop'. [Lake Like a Mirror](#) is a scintillating exploration of the lives of women buffeted by powers beyond their control. Squeezing themselves between the gaps of rabid urbanisation, patriarchal structures and a theocratic government, these women find their lives twisted in disturbing ways. In precise and disquieting prose, Ho Sok Fong draws her readers into a richly atmospheric world of naked sleepwalkers in a rehabilitation centre for wayward Muslims, mysterious wooden boxes, gossip in unlicensed hairdressers, hotels with amnesiac guests, and poetry classes with accidentally charged politics - a world that is peopled with the ghosts of unsaid words, unmanaged desires and uncertain statuses, surreal

and utterly true.

Technical Procedures Bulletin Dec 02 2019

The Complete Houseplant Survival Manual Aug 29 2019 It's a whole new world of houseplants, so make yourself at home in it! If you love the idea of keeping houseplants, but struggle to care for them, you'll find solace and invaluable advice in this comprehensive guide from expert gardener Barbara Pleasant. Even experienced houseplant enthusiasts will benefit from Pleasant's expansive knowledge of indoor gardening, which includes personality profiles, growing needs, and troubleshooting tips for 160 blooming and foliage varieties. Create a greener world, one houseplant at a time.

Grammar and Interaction Mar 05 2020 This monograph provides a micro-analytic description of the structure and communicative use of syntactic pivot constructions in German. Using the methodology of Conversation Analysis, this work shows that pivots emerge in interaction in response to local communicative needs. Exclusively found in spoken German, pivots allow a speaker to extend an utterance beyond a possible completion point in a syntactically and prosodically unobtrusive way. Speakers utilize this basic property to promote context-specific actions: managing boundaries of speakership, bridging sequential and topical junctures, and dealing with different types of interactional trouble. Through a close examination of syntactic pivots as an interactional resource, this work shows that spoken linguistic structures can only be fully understood if we acknowledge the temporality of language and view grammar as usage-based and negotiable. This book thus contributes to a growing body of research at the intersection of grammar and interaction.

SBA's for the Part 1 MRCOG Oct 24 2021 This book provides advice and sample questions for the Part 1 MRCOG examination.

A Witch's Guide to Wildcraft Jul 09 2020 You don't need a lush garden to begin wildcrafting, you can find plenty of magickal herbs growing just outside your door. A Witch's Guide to Wildcraft explores more than thirty common plants, providing tips for identification, gathering, and cultivation as well as specific rituals and magical uses. You will also discover step-by-step instructions for dozens of hearth-and-home herb projects, including cleansers, powders, incense, talismans, sprays, jam, and much more. Whether you find your herbs among the landscape plants in your yard, growing wild in a vacant lot, or in the ditch alongside a country road, collecting your own plant materials lends a sense of sacred energy to spells and magical workings. This book shares fascinating bits of history and lore about each plant, as well as astrological correspondences and common Latin names. With plentiful tips and hands-on projects, you will find yourself developing a closer relationship with the enchanted world around you and with your own spiritual self.

Parallel Oct 31 2019 Edited by Stefan Wimmer. Text by Joachim Jager, Stephan Berg, Barbara Auer, Wolfgang Ullrich, Rick Vercauteren.

Mathematical Elements for Computer Graphics Feb 13 2021 This text is ideal for junior-, senior-, and graduate-level courses in computer graphics and computer-aided design taught in departments of mechanical and aeronautical engineering and computer science. It presents in a unified manner an introduction to the mathematical theory underlying computer graphic applications. It covers topics of keen interest to students in engineering and computer science: transformations, projections, 2-D and 3-D curve definition schemes, and surface definitions. It also includes techniques, such as B-splines, which are incorporated as part of the software in advanced engineering workstations. A basic knowledge of vector and matrix algebra and calculus is required.

Facility Location Nov 24 2021 The book covers both theory and applications of locational analysis (LocAn). The reader will see the power of LocAn models in various real-world contexts, varying from communication design to robotics and mail delivery. It is divided into two parts. The first part contains an overview of some of the LocAn methodologies. The second part describes in thorough detail some selected applications. The text provides researchers with an excellent and well thought-out review of available location models.

Wireless Communication Jun 19 2021 Beginning with an overview of current scenario in the study of wireless communication systems and the presentation of fundamental concepts, the book gradually discusses each block of wireless link in detail including coding, modulation and the advanced topics such as multiplexing, mobile communication, software radio, OFDM and MIMO. All the chapters start with the simpler topics and gradually build up the advanced concepts through detailed explanations and illustrations. The chapters are extremely student friendly with rich pedagogy including case studies, solved examples, review questions, numerical problems and multiple choice questions to help students revise the concepts learnt through visualization and practice.

Analysis of Images, Social Networks and Texts Apr 29 2022 This book constitutes the proceedings of the 8th International Conference on Analysis of Images, Social Networks and Texts, AIST 2019, held in Kazan, Russia, in July 2019. The 24 full papers and 10 short papers were carefully reviewed and selected from 134 submissions (of which 21 papers were rejected without being reviewed). The papers are organized in topical sections on general topics of data analysis; natural language processing; social network analysis; analysis of images and video; optimization problems on graphs and network structures; analysis of dynamic behaviour through event data.

Drug Dosages in Children Sep 22 2021 Serves as a ready-reckoner of drug dosages for young residents and practising pediatricians which will instil confidence in their prescribing abilities and reduce the incidence of avoidable side effects of drugs. It provides brief information on the pharmacokinetics of drugs with an emphasis on the advantages and disadvantages of various routes of administration, drug absorption, distribution, bioavailability, tissue binding, half-life and metabolism and excretion. The drugs have been listed alphabetically with daily dosages per unit body weight, frequency, and route of administration. Important cautions, contraindications and adverse effects of selected drugs have been provided. Trade names of formulations from standard pharmaceutical companies along with their products and strengths are also given.

Biocomputing Feb 02 2020 In the quest to understand and model the healthy or sick human body, researchers and medical doctors are utilizing more and more quantitative tools and techniques. This trend is pushing the envelope of a new field we call Biomedical Computing, as an exciting frontier among signal processing, pattern recognition, optimization, nonlinear dynamics, computer science and biology, chemistry and medicine. A conference on Biocomputing was held during February 25-27, 2001 at the University of Florida. The conference was sponsored by the Center for Applied Optimization, the Computational Neuroengineering Center, the Biomedical Engineering Program (through a Whitaker Foundation grant), the Brain Institute, the School of Engineering, and the University of Florida Research & Graduate Programs. The conference provided a forum for researchers to discuss and present new directions in Biocomputing. The well-attended

three days event was highlighted by the presence of top researchers in the field who presented their work in Biocomputing. This volume contains a selective collection of refereed papers based on talks presented at this conference. You will find seminal contributions in genomics, global optimization, computational neuroscience, fMRI, brain dynamics, epileptic seizure prediction and cancer diagnostics. We would like to take the opportunity to thank the sponsors, the authors of the papers, the anonymous referees, and Kluwer Academic Publishers for making the conference successful and the publication of this volume possible. Panos M. Pardalos and Jose C.

China's Space Program - From Conception to Manned Spaceflight Mar 17 2021 This book is designed for publication straight after the launch of China's first manned spacecraft. The precursor mission, Shenzhou, flew unmanned in November 1999, in line with the predictions of *The Chinese Space Programme: From Conception to Future Capabilities* (1998) the first edition of this retitled book. *China's Space Program: From Conception to Manned Spaceflight* builds on the 1998 title to take account of the first manned flight in October 2003. It also brings the reader up to date with other developments in the Chinese space programme over from 1998 to the manned flight and looks forward to China's future plans and ambitions.

Advances in Data Science, Cyber Security and IT Applications Sep 03 2022 This book constitutes the refereed proceedings of the First International Conference on Intelligent Cloud Computing, ICC 2019, held in Riyadh, Saudi Arabia, in December 2019. The two-volume set presents 53 full papers, which were carefully reviewed and selected from 174 submissions. The papers are organized in topical sections on Cyber Security; Data Science; Information Technology and Applications; Network and IoT.

Books in Print Jul 01 2022

Tidings Dec 14 2020 One of Germany's literary giants, Ernst Emil Wiechert (1887-1950) was thrown into Buchenwald concentration camp for publicly backing anti-Nazi pastor Martin Niemöller. His final novel, published posthumously, deals with the aftermath of the Holocaust how the survivors, both victims and perpetrators, seek healing and redemption as they pick up the shattered pieces of their world. Evoking comparisons to the Russian greats Dostoyevsky and Tolstoy, Wiechert displays an uncommon depth of insight into the human condition at its most degenerate and its ennobling best an understanding born of his own suffering and quest for rebirth. His novel is peopled with rich and complex characters and charged with both violent feelings and spiritual hunger. First published in 1950 as "Missa Sine Nomine" ("Mass Without a Name"), "Tidings" deserves its place among the masterpieces of European literature."

Coal in Your Bin Sep 30 2019

General Henri Guisan Apr 17 2021 During its darkest hour Switzerland was surrounded by aggressive fascist armies, with no allies within reach, its politicians quivering, and its people beginning to lose hope of retaining their freedom. General Henri Guisan stepped into this miasma of growing despair. In July 1940, he assembled the entire Swiss officer corps at the Rutli Meadow, the spot where pike-wielding herdsmen had formed the Swiss Confederation in 1291. Invoking the spirit of their medieval forebears, he informed his officers that Switzerland would fight back against any invader, and if they ran out of ammunition they would use the bayonet. Switzerland, he declared, would never surrender. Guisan lit a torch that would guide the Continent's only remaining democracy until the end of the war. The key to his military strategy was shifting the main strength of the Swiss Army to the Alps. This controversial policy conceded population centers but it also negated German superiority in armor and aircraft. If the Nazis invaded they would only open a bleeding sore that they would not be able to close. Though the Wehrmacht drew up numerous invasion plans, it never took the gamble. As a military man who became the spiritual leader of his country, Guisan was a rarity in the history of democratic nations. His guidance, along with the Swiss system of universal male conscription, meant that the Germans, had they invaded, would have been fighting not just an army but a people. This definitive biography of General Guisan not only describes a man of great complexity and courage, but a fascinating aspect of World War II. WILLI GAUTSCHI is the author of numerous works, including "The National Strike of 1918" and "Lenin as an Emigrant in Switzerland." Having retired from teaching history at the University of Zurich, he currently lives in Baden.

Cambridge English Proficiency 2 Student's Book without Answers Aug 22 2021 Cambridge English Proficiency 2 contains four complete and authentic examination papers for Cambridge English: Proficiency, also known as Cambridge Certificate of Proficiency in English (CPE). This collection of examination papers provides the most authentic exam preparation available. These examination papers allow candidates to familiarise themselves with the content and format of the exam and to practise useful examination techniques. Audio CDs containing the exam Listening material, a Student's Book with answers, and a Student's Book with answers with downloadable Audio are available separately.

Foundations of Location Analysis Oct 04 2022 Location analysis has matured from an area of theoretical inquiry that was designed to explain observed phenomena to a vibrant field which can be and has been used to locate items as diverse as landfills, fast food outlets, gas stations, as well as politicians and products in issue and feature spaces. Modern location science is dealt with by a diverse group of researchers and practitioners in geography, economics, operations research, industrial engineering, and computer science. Given the tremendous advances location science has seen from its humble beginnings, it is time to look back. The contributions in this volume were written by eminent experts in the field, each surveying the original contributions that created the field, and then providing an up-to-date review of the latest contributions. Specific areas that are covered in this volume include: • The three main fields of inquiry: minimax and minimax problems and covering models • Nonstandard location models, including those with competitive components, models that locate undesirable facilities, models with probabilistic features, and problems that allow interactions between facilities • Descriptions and detailed examinations of exact techniques including the famed Weiszfeld method, and heuristic methods ranging from Lagrangean techniques to Greedy algorithms • A look at the spheres of influence that the facilities generate and that attract customers to them, a topic crucial in planning retail facilities • The theory of central places, which, other than in mathematical games, where location science was born

Bonfire Opera Jul 29 2019 Poems In Praise of the Impossible, Wild World and Its Beauty Sometimes the most compelling landscapes are the ones where worlds collide: where a desert meets the sea, a civilization, no-man's land. Here in Bonfire Opera, grief and Eros grapple in the same domain. A bullet-hole through the heart, a house full of ripe persimmons, a ghost in a garden. Coyotes cry out on the hill, and lovers find themselves kissing, "bee-stung, drunk" in the middle of road. Here, the dust is holy, as is the dark, unknown. These are poems that praise the impossible, wild world, finding beauty in its wake. Excerpt from "Bonfire Opera" In those days, there was a woman in our circle who was known, not only for her beauty, but also for taking off all her clothes and singing opera. And sure enough, as the night wore on and the stars emerged to stare at their reflections on the sea, and everyone had drunk a little wine, she began to disrobe, loose her great bosom and the tender belly, pale in the moonlight, the Viking hips, and to let her torn raiment fall to the sand as we looked up from the flames.
