Giuseppe Verdi Apr 17 2021 This comprehensive research guide surveys the most significant published materials relating to Giuseppe Verdi. This new edition includes research since the publication of the first edition in 1998.

The Ice Cold Art Show Jul 21 2021 The mission is to prevent the leader of a major drug cartel from abandoning his illegal operation thereby upsetting the status quo in the war on drugs. Major economies are financially dependent of the controlled flow of narcotics and the super secret international organization know as "The Process" has fielded a team of contractors to thwart the cartel leader's plans to replace his income through other means. As they pursue their goal the team encounters stolen Nazi art, super fast boats, cold temperatures and they learn of the danger in trusting their lives to vehicles totally controlled by computer.

BNAIC 2016: Artificial Intelligence Sep 10 2020 This book contains a selection of the best papers that were presented at the 28th edition of the annual Benelux Conference on Artificial Intelligence, BNAIC 2016. The conference took place on November 10-11, 2016, in Hotel Casa 400 in Amsterdam. The conference was jointly organized by the University of Amsterdam and the Vrije Universiteit Amsterdam, under the auspices of the Benelux Association for Artificial Intelligence (BNVKI) and the Dutch Research School for Information and Knowledge Systems (SIKS). The objective of BNAIC is to promote and disseminate recent research developments in Artificial Intelligence, particularly within Belgium, Luxembourg and the Netherlands, although it does not exclude contributions from countries outside the Benelux. The 13 contributions presented in this volume (8 regular papers, 4 student papers, and 1 demonstration paper) were carefully reviewed and selected from 93 submissions. They address various aspects of artificial intelligence such as natural language processing, agent technology, game theory, problem solving, machine learning, human-agent interaction, AI & education, and data analysis.

Mathematics Across Cultures Jun 19 2021 Mathematics Across Cultures: A History of Non-Western Mathematics consists of essays dealing with the mathematical knowledge and beliefs of cultures outside the United States and Europe. In addition to articles surveying Islamic, Chinese, Native American, Aboriginal Australian, Inca, Egyptian, and African mathematics, among others, the book includes essays on Rationality, Logic and Mathematics, and the transfer of knowledge from East to West. The essays address the connections between science and culture and relate the mathematical practices to the cultures which produced them. Each essay is well illustrated and contains an extensive bibliography. Because the geographic range is global, the book fills a gap in both the history of science and in cultural studies. It should find a place on the bookshelves of advanced undergraduate students, graduate students, and scholars, as well as in libraries serving those groups.

Opera Acts Jul 01 2022 Karen Henson explores a wealth of new historical material about singers and opera performance in the late nineteenth century.

Music, Structure, Thought: Selected Essays Apr 29 2022 Among the most original and provocative musicological writers of his generation, James Hepokoski has elaborated new paradigms of inquiry for both music history and music theory. Advocating fundamental shifts of methodological reorientation within the quest for potential musical meanings, his work spans both disciplines and offers substantial challenges for each. At its core is the conviction that a close study of musical genres, procedures, and structures those qualities of a composition that are specifically musical is essential to any responsible hermeneutic enterprise. Selected from writings from 1984 to 2008, this collection of essays provides a generous introduction to the author's most innovative and influential work on a wide variety of topics: musicological methodology, issues of staging and performance, Italian opera, program music, and exemplary studies of individual pieces.

The Infinite Emotions of Coffee Feb 02 2020 The Infinite Emotions of Coffee provides a contemporary prism of the drink that so much of the world takes for granted every morning. Technopreneur Halevy's travels to more than 30 countries on six continents shed light on how coffee has shaped and is influenced by different cultures through the bean's centuries-spanning journey of serendipity, intrigue, upheavals, revival, romance and passion. With more than three years of field research, over 180 color photographs, and richly illustrated infographics, this book is an immersive experience that brings alive the enduring allure of coffee and the nuanced emotions of both tradition-bound and avant-garde café cultures. Written in an engaging narrative, this travelogue entertains through numerous coffee-related tales from around the world. It celebrates all parts of the inextricably linked global coffee ecosystem, from growers, importers, and roasters to baristas and consumers. Readers will learn about the rich, mysterious and often amusing history of coffee; discover the latest hotbeds of coffee and the complex issues facing the coffee industry today; and meet the worldwide network of inspiringly spirited and passionately committed professionals whose relentless pursuit of excellence are pushing coffee to unprecedented levels of quality. The histories of communication and coffee's impact on socialization are interconnected. From the combined perspectives of a computer scientist and a coffee culturalist, this book elucidates how coffee conversations have evolved from the age of exploration that characterized the 15th century through the Information Age where the Internet's spheres of influence in the world of coffee continue to expand. --Vint Cerf, Father of the Internet and Chief Internet Evangelist of Google This book is the ultimate celebration of coffee from seed to cup. ¡Bravo! --Alejandro Mendez, 2011 World Barista Champion, El Salvador The scope of this collection of vignettes from around the world is unprecedented in coffee literature. Its greatest strength is its unifying power that brings together all the players in the global coffee community. --Sarah Allen, Editor-in-Chief, Barista Magazine

Advances in Information Retrieval Aug 22 2021 This book constitutes the proceedings of the 37th European Conference on IR Research, ECIR 2015, held in Vienna, Austria, in March/April 2015. The 44 full papers, 41 poster papers and 7 demonstrations presented together with 3 keynotes in this volume were carefully reviewed and selected from 305 submissions. The focus of the papers were on following topics: aggregated search and diversity, classification, cross-lingual and discourse, efficiency, evaluation, event mining and summarisation, information extraction, recommender systems, semantic and graph-based models, sentiment and opinion, social media, specific search tasks, temporal models and features, topic and document models, user behavior and reproducible IR.

The 15th International Conference on Biomedical Engineering May 19 2021 This volume presents the processing of the 15th ICMBE held from 4th to 7th December 2013, Singapore. Biomedical engineering is applied in most aspects of our healthcare ecosystem. From electronic health records to diagnostic tools to therapeutic, rehabilitative and regenerative treatments, the work of biomedical engineers is evident. Biomedical engineers work at the intersection of engineering, life sciences and healthcare. The engineers would use principles from applied science including mechanical, electrical, chemical and computer engineering together with physical sciences including physics, chemistry and mathematics to apply them to biology and medicine. Applying such concepts to the human body is very much the same concepts that go into building and programming a machine. The goal is to better understand, replace or fix a target system to ultimately improve the quality of healthcare. With this understanding, the conference proceedings offer a single platform for individuals and organizations working in the biomedical engineering related field to gather and network with each other in so doing create the catalyst for future development of biomedical engineering in Asia.

Radiochemistry and Nuclear Chemistry - Volume II Sep 22 2021 Radiochemistry and Nuclear Chemistry theme is a component of Encyclopedia of Chemical Sciences, Engineering and Technology Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. The content of the Theme on Radiochemistry and Nuclear Chemistry provides the essential aspects and a myriad of issues of great relevance to our world such as: Isotope Effects, Isotope Separation and Isotope Fractionation; Radiometric Dating and Tracing; Radiochemical Techniques; Radionuclides in Chemical Research; Nuclear Methods in Material Research; Radiation Chemistry;

Radiation Biology and Radiation Protection; Radiochemistry and Radiopharmaceutical Chemistry for Medicine; Chemistry of the Actinide Elements; Production and Chemistry of Transactinide Elements; Nuclear Waste Management and the Nuclear Fuel Cycle; High-intensity Lasers in Nuclear Science; Nuclear Forensics; Nuclear Processes in Nature; Subatomic Particles, Nuclear Structure and Stability. These two volumes are aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs.

Siren Songs Mar 29 2022 It has long been argued that opera is all about sex. Siren Songs is the first collection of articles devoted to exploring the impact of this sexual obsession, and of the power relations that come with it, on the music, words, and staging of opera. Here a distinguished and diverse group of musicologists, literary critics, and feminist scholars address a wide range of fascinating topics--from Salome's striptease to hysteria to jazz and gender--in Italian, English, German, and French operas from the eighteenth to the twentieth centuries. The authors combine readings of specific scenes with efforts to situate these musical moments within richly and precisely observed historical contexts. Challenging both formalist categories of musical analysis and the rhetoric that traditionally pits a male composer against the female characters he creates, many of the articles work toward inventing a language for the study of gender and opera. The collection opens with Mary Ann Smart's introduction, which provides an engaging reflection on the state of gender topics in operatic criticism and musicology. It then moves on to a foundational essay on the complex relationships between opera and history by the renowned philosopher and novelist Catherine Clément, a pioneer of feminist opera criticism. Other articles examine the evolution of the "trouser role" as it evolved in the lesbian subculture of fin-de-siècle Paris, the phenomenon of opera seria's "absent mother" as a manifestation of attitudes to the family under absolutism, the invention of a "hystericized voice" in Verdi's Don Carlos, and a collaborative discussion of the staging problems posed by the gender politics of Mozart's operas. The contributors are Wye Jamison Allanboork, Joseph Auner, Katherine Bergeron, Philip Brett, Peter Brooks, Catherine Clément, Martha Feldman, Heather Hadlock, Mary Hunter, Linda Hutcheon and Michael Hutcheon, M.D., Lawrence Kramer, Roger Parker, Mary Ann Smart, and Gretchen Wheelock.

Verdi in Performance May 31 2022 "Much of the material is clearly applicable to modern performance of a wide range of music... Verdi in Performance provides state-of-the-art discussion not only of Verdi scholarship as related to performance, but stimulating presentation of universal music performance concerns by some of the leading scholars, directors, and conductors currently active. The discussions present a myriad of viewpoints and considerations, and both the format of the volume (statement and responses) and the contents encourage further open-ended discussion."--The Opera Quarterly.

The Semantic Web: Semantics and Big Data Sep 30 2019 This book constitutes the refereed proceedings of the 10th Extended Semantic Web Conference, ESWC 2013, held in Montpellier, France, in May 2013. The 42 revised full papers presented together with three invited talks were carefully reviewed and selected from 162 submissions. They are organized in tracks on ontologies; linked open data; semantic data management; mobile Web, sensors and semantic streams; reasoning; natural language processing and information retrieval; machine learning; social Web and Web science; cognition and semantic Web; and in-use and industrial tracks. The book also includes 17 PhD papers presented at the PhD Symposium.

Controlled Natural Language Sep 03 2022 Controlled natural languages (CNLs) are based on natural language and apply restrictions on vocabulary, grammar, and/or semantics. They fall broadly into 3 groups. Some are designed to improve communication for non-native speakers of the respective natural language; in others, the restrictions are to facilitate the use of computers to analyze texts, for example, to improve computer-aided translation; and a third group of CNLs are designed to enable reliable automated reasoning and formal knowledge representation from seemingly natural texts. This book presents the 11 papers, selected from 14 submitted, and delivered at the sixth in the series of workshops on Controlled Natural Language, (CNL 2018), held in Maynooth, Ireland, in August 2018. The papers cover a full spectrum of controlled natural languages, ranging from human oriented to machine-processable controlled languages and from more theoretical results to interfaces, reasoning engines, and the real-life application of CNLs. The book will be of interest to all those working with controlled natural language, whatever their approach.

Cruise Ship Tourism, 2nd Edition Jun 27 2019 Completely updated and revised, Cruise Ship Tourism, 2nd Edition covers the economic, social and environmental impacts of cruising, combining the latest knowledge and research to provide a comprehensive account of the subject. Despite the industry growing rapidly, there is a substantial gap in the related literature, and this book addresses the key issues for researchers, students and industry professionals. A valuable 'one-stop-shop' for those interested in cruise ships and maritime tourism, this new edition from major names in the field is also an invaluable resource for anyone concerned more widely with tourism and business development.

Odissea n° 2: Revista de estudios ingleses Dec 26 2021 Revista de Estudios Ingleses es un anuario dirigido y gestionado por miembros del Departamento de Filología Inglesa y Alemana de la Universidad de Almería con el propósito de ofrecer un foro de intercambio de producción científica en campos del conocimiento tan diversos como la lengua inglesa, literatura en lengua inglesa, didáctica del inglés, traducción, inglés para fines específicos y otros igualmente vinculados a los estudios ingleses.

An Embroidered Christmas Oct 12 2020 Gorgeous embroidery brightens up any Christmas scene! Decorate your home with original needlework designs--colorful stockings, embroidered tree centerpieces, and playful ornaments are sure to please. Wine presented in a hand-stitched bag makes a thoughtful gift, and felt peppermint candies draw the eye with holiday flair. • 24 unique Christmas embroidery patterns with step-by-step instructions • Complete stitch guide for all of the stitches used in the book, making the projects accessible even for beginners • Projects include stockings, nativity figures, tree centerpieces, napkin ring, candle mat, ornaments, "Noel" banner, Christmas star, "We Wish You a Merry Christmas" sampler, and more • All of the basic information you need to get started with embroidery, including fabric choices, needles, threads, and finishing • A NeedleKnowledge® Book

Opera Jan 15 2021 Opera is often dismissed as outdated and excessive, and perceived to be characterised by excessive passions, sumptuous costumes, and ill-mannered divas. In reality, however, operas address the most fundamental and universal of human concerns - love, death, jealousy, greed, and power. Revealing the diverse reasons behind opera's lasting appeal, opera champion and expert Alexandra Wilson provides a lucid and engaging introduction to the agendas that have governed its composition, production and reception over the last four centuries, and explains the reasons behind its enduring appeal.

Life's A Beach Aug 10 2020 It's always beach weather, especially when you've got five glorious Judith Arnold romances with beach settings! Enjoy all five of these romantic stories by a bestselling, award-winning author. Save money when you buy them all together in this delightful collection. BEST FRIENDS Lonny and Samantha became best friends in college. They've supported each other through broken hearts, family spats and career challenges. When Samantha's longtime boyfriend dumps her, Lonny invites her to recuperate at his house in a seaside town--where he discovers, to his shock, that he wants a lot more than friendship from his buddy Sammy. ONE GOOD TURN When Luke met Jenny, he was lost and struggling. Her optimism, trust and love gave him the courage to face his demons and slay them. Then she vanished from his life. Seven years later, she reappears--only she's not the same cheerful idealist he'd fallen in love with. Can he rescue her the way she'd rescued him? Can he give her the strength to slay her own demons? Can a weekend at a friend's beach house help them to rediscover the love they once shared? CHANGE OF LIFE Lila Chapin's husband and sons take her for granted, and when they forget her fortieth birthday, she decides to withdraw a chunk of money from the bank--her birthday present to herself--and spend a month in an inn by the beach, where she thinks no one can find her. Ken Chapin loves his wife--but he has been neglecting her as he claws his way up the corporate ladder. Finally arriving on the top rung, he realizes his success is meaningless without Lila by his side. He and his sons are going to have to find her and woo her

back. *CRY UNCLE* Pamela Hayes needs a place to hide. She flees to steamy, sandy Key West, where bartender Jonas Brenner offers her a new identity if she'll pretend to be a prim, proper mother-figure for his wild-child niece. But the deal will work only if Pam and Joe can keep their emotions out of it—and that's easier said than done. *HOLDING HANDS* Meredith Fischer's widowed mother is starting a new romance. Her daughter is enjoying an exuberant social life. But Meredith's marriage is comatose and barely breathing. She still loves her sexy husband, but he doesn't see her, doesn't hear her, and may be involved with one of the cute young students at the college where he teaches. Meredith can either pull the plug on her marriage or try to revive it with a romantic weekend at the beach. But how romantic can that getaway be when Mother Nature and a stray dog stand in her way?

*Bitter Spirits* Nov 12 2020 It's the roaring twenties, and San Francisco is a hotbed of illegal boozing, raw lust, and black magic. The fog-covered Bay Area can be an intoxicating scene, particularly when you specialize in spirits... Aida Palmer performs a spirit medium show onstage at Chinatown's illustrious Gris-Gris speakeasy. However, her ability to summon (and expel) the dead is more than just an act. Winter Magnusson is a notorious bootlegger who's more comfortable with guns than ghosts—unfortunately for him, he's the recent target of a malevolent hex that renders him a magnet for hauntings. After Aida's supernatural assistance is enlisted to banish the ghosts, her spirit-chilled aura heats up as the charming bootlegger casts a different sort of spell on her... On the hunt for the curseworker responsible for the hex, Aida and Winter become drunk on passion. And the closer they become, the more they realize they have ghosts of their own to exorcise...

Automatic Analog IC Sizing and Optimization Constrained with PVT Corners and Layout Effects Jan 27 2022 This book introduces readers to a variety of tools for automatic analog integrated circuit (IC) sizing and optimization. The authors provide a historical perspective on the early methods proposed to tackle automatic analog circuit sizing, with emphasis on the methodologies to size and optimize the circuit, and on the methodologies to estimate the circuit's performance. The discussion also includes robust circuit design and optimization and the most recent advances in layout-aware analog sizing approaches. The authors describe a methodology for an automatic flow for analog IC design, including details of the inputs and interfaces, multi-objective optimization techniques, and the enhancements made in the base implementation by using machine learning techniques. The Gradient model is discussed in detail, along with the methods to include layout effects in the circuit sizing. The concepts and algorithms of all the modules are thoroughly described, enabling readers to reproduce the methodologies, improve the quality of their designs, or use them as starting point for a new tool. An extensive set of application examples is included to demonstrate the capabilities and features of the methodologies described.
