[The Origin and Development of the Moral Ideas](#) Sep 28 2019 *The Origin and Development of the Moral Ideas* is a book by a philosopher Edvard Westermarck. It is one of his main works and a monumental classics study in its field. At the beginning of this book, Westermarck asks why different cultures have different moral views. To answer this question, he decided to acquire first-hand knowledge of the folklore of a non-European people. Thus, he spent four years in Morocco collecting anthropological data, familiarizing himself with the native way of thinking, and understanding local customs. In the result he concluded, he concluded that there is a close connection between moral opinions and religious beliefs.

[Sourcebook for the History of the Philosophy of Mind](#) Jan 25 2022 Fresh translations of key texts, exhaustive coverage from Plato to Kant, and detailed commentary by expert scholars of philosophy add up to make this sourcebook the first and most comprehensive account of the history of the philosophy of mind. Published at a time when the philosophy of mind and philosophical psychology are high-profile domains in current research, the volume will inform our understanding of philosophical questions by shedding light on the origins of core conceptual assumptions often arrived at before the instauration of psychology as a recognized subject in its own right. The chapters closely follow historical developments in our understanding of the mind, with sections dedicated to ancient, medieval Latin and Arabic, and early modern periods of development. The volume's structural clarity enables readers to trace the entire progression of philosophical understanding on specific topics related to the mind, such as the nature of perception. Doing so reveals the fascinating contrasts between current and historical approaches. In addition to its all-inclusive source material, the volume provides subtle expert commentary that includes critical introductions to each thematic section as well as detailed engagement with the central texts. A voluminous bibliography includes hundreds of primary and secondary sources. The sheer scale of this new publication sheds light on the progression, and discontinuities, in our study of the philosophy of mind, and represents a major new sourcebook in a field of extreme importance to our understanding of humanity as a whole.

[Magic in the Cloister](#) Jul 27 2019 During the late thirteenth and early fourteenth centuries a group of monks with occult interests donated what became a remarkable collection of more than thirty magic texts to the library of the Benedictine abbey of St. Augustine's in Canterbury. The monks collected texts that provided positive justifications for the practice of magic and books in which works of magic were copied side by side with works of more licit genres. In *Magic in the Cloister*, Sophie Page uses this collection to explore the gradual shift toward more positive attitudes to magical texts and ideas in medieval Europe. She examines what attracted monks to magic texts, in spite of the dangers involved in studying condemned works, and how the monks combined magic with their intellectual interests and monastic life. By showing how it was possible for religious insiders to integrate magical studies with their orthodox worldview, *Magic in the Cloister* contributes to a broader understanding of the role of magical texts and ideas and their acceptance in the late Middle Ages.

[The Life of the Vows](#) Mar 27 2022 As novice master of the Cistercian Abbey of Our Lady of Gethsemani in Kentucky, Thomas Merton presented weekly conferences to familiarize his charges with the meaning and purpose of the vows they aspired to undertake. In this setting, he offered a thorough exposition of the theological, canonical, and above all spiritual dimensions of the vows. Merton set the vows firmly in the context of the anthropological, moral, soteriological, and ecclesial dimensions of human, Christian, and monastic life. He addressed such classical themes of Christian morality as the nature of the human person and his acts; the importance of justice in relation to the Passion of Christ, to friendship and to love; and self-surrender as the key to grace, prayer and the vowed life. Merton's words on these topics clearly spring from a committed heart and often flow with the soaring intensity of style that we have come to expect in his more enthusiastic prose. The texts of these conferences represent the longest and most systematically organized of any of numerous series of conferences that Merton presented during the decade of his mastership. They may be the most directly pastoral work Merton ever wrote.

Fate, Providence and Moral Responsibility in Ancient, Medieval and Early Modern Thought Oct 22 2021 Essays on key moments in the intellectual history of the West This book forms a major contribution to the discussion on fate, providence and moral responsibility in Antiquity, the Middle Ages and Early Modern times. Through 37 original papers, renowned scholars from many different countries, as well as a number of young and promising researchers, write the history of the philosophical problems of freedom and determinism since its origins in pre-socratic philosophy up to the seventeenth century. The main focus points are classic

Antiquity (Plato and Aristotle), the Neoplatonic synthesis of late Antiquity (Plotinus, Proclus, Simplicius), and thirteenth-century scholasticism (Thomas Aquinas, Henry of Ghent). They do not only represent key moments in the intellectual history of the West, but are also the central figures and periods to which Carlos Steel, the dedicatory of this volume, has devoted his philosophical career.

Between Theory and Observations Apr 27 2022 In the 18th century, purely scientific interests as well as the practical necessities of navigation motivated the development of new theories and techniques to accurately describe celestial and lunar motion. "Between Theory and Observations" presents a detailed and accurate account, not to be found elsewhere in the literature, of Tobias Mayer's important contributions to the study of lunar motion—including the creation of his famous set of lunar tables, which were the most accurate of their time.

The Development of Greek and the New Testament Apr 03 2020 "The introduction of the Erasmian pronunciation in 1528 had two dire consequences: Greek was divided into ancient and modern - a division that led to the neglect of the later periods of the language, and the pronunciation applied made impossible the detection of many communicatory aspects and obscured many text-critical problems. The author argues for the unity of the Greek language from Mycenaean times to the present. The New Testament appears during the time of transition (335 B.C. - A.D. 565) from ancient to Modern Greek. Morphological and syntactical analysis shows that at many important points the New Testament can be elucidated by later Greek, up to Neohellenic. Contents include: Introduction, The unity and evolution of the Greek language, The relevance of later Greek for the Exegesis of the New Testament, The transition from Attic to Neohellenic in Morphology and the New Testament, Syntactical Developments, The significance of the developments for the exegesis of the New Testament, The historical Greek pronunciation and the dichotomy of the language, The acoustic dimension in communication, The impact of the historical Greek pronunciation on the transmission of the New Testament text, Summary and Conclusions."

The Ages of Man Jan 31 2020 Elizabeth Sears here combines rich visual material and textual evidence to reveal the sophistication, warmth, and humor of medieval speculations about the ages of man. Medieval artists illustrated this theme, establishing the convention that each of life's phases in turn was to be represented by the figure of a man (or, rarely, a woman) who revealed his age through size, posture, gesture, and attribute. But in selecting the number of ages to be depicted--three, four, five, six, seven, ten, or twelve--and in determining the contexts in which the cycles should appear, painters and sculptors were heirs to longstanding intellectual traditions. Ideas promulgated by ancient and medieval natural historians, physicians, and astrologers, and by biblical exegetes and popular moralists, receive detailed treatment in this wide-ranging study. Professor Sears traces the diffusion of well-established schemes of age division from the seclusion of the early medieval schools into wider circles in the later Middle Ages and examines the increasing use of the theme as a structure of edifying discourse, both in art and literature. Elizabeth Sears is Assistant Professor of Art History at Princeton University. Originally published in 1986. The Judgment of Sense Jun 17 2021 With the rise of naturalism in the art of the late Middle Ages and the Renaissance there developed an extensive and diverse literature about art which helped to explain, justify and shape its new aims. In this book, David Summers provides an investigation of the philosophical and psychological notions invoked in this new theory and criticism. From a thorough examination of the sources, he shows how the medieval language of mental discourse derived from an understanding of classical thought.

Supernatural Encounters Jul 19 2021 The belief in the reality of demons and the restless dead formed a central facet of the medieval worldview. Whether a pestilent-spreading corpse mobilised by the devil, a purgatorial spirit returning to earth to ask for suffrage, or a shape-shifting demon intent on crushing its victims as they slept, encounters with supernatural entities were often met with consternation and fear. Chroniclers, hagiographers, sermon writers, satirists, poets, and even medical practitioners utilised the cultural 'text' of the supernatural encounter in many different ways, showcasing the multiplicity of contemporary attitudes to death, disease, and the afterlife. In this volume, Stephen Gordon explores the ways in which conflicting ideas about the intention and agency of supernatural entities were understood and articulated in different social and literary contexts. Focusing primarily on material from medieval England, c.1050-1450, Gordon discusses how writers such as William of Malmesbury, William of Newburgh, Walter Map, John Mirk, and Geoffrey Chaucer utilised the belief in demons, nightmares, and walking corpses for pointed critical effect. Ultimately, this monograph provides new insights into the ways in which the broad ontological category of the 'revenant' was conceptualised in the medieval world.

Sorrow and Consolation in Italian Humanism Jul 31 2022 George McClure offers here a far-reaching analysis of the role of consolation in Italian Renaissance culture, showing how the humanists' interest in despair, and their effort to open up this realm in both social and personal terms, signaled a shift toward a heightened secularization in European thought. Analyzing works by fourteenth-and fifteenth-century writers, from Petrarch to Marsilio Ficino, McClure examines the treatment of such problems as bereavement, fear of death, illness, despair, and misfortune. These writers, who evinced a belief in the legitimacy of secular sadness, tried to forge a wisdom that in their view dealt more realistically with the art of living and dying than did the disputations of scholastic philosophy and theology. Arguing that consolatory concerns helped spur the revival of classical schools of psychological thought, McClure reveals that the humanists sought comfort from once-neglected troves of Stoic, Peripatetic, Epicurean, Platonic, and Christian thought. He contends that the humanists' pursuit of solace and their duty as consolers provided not only a forum but perhaps also an incentive for the articulation of prominent Renaissance themes concerning immortality, the dignity of man, and the sanctity of worldly endeavor.
