International Farm Animal, Wildlife and Food Safety Law Apr 28 2022 This volume is an inspiring and breakthrough piece of academic scholarship and the first of its kind featuring a comprehensive reader-friendly approach to teach the intricacies of the various aspects of international farm animal, wildlife conservation, food safety and environmental protection law. The selected focus areas are grouped in sections, such as agrobiodiversity, fishing and aquaculture, pollinators and pesticides, soil management, industrial animal production and transportation, and international food trade. Farm animal welfare, environmental protection, biodiversity conservation, and food safety are the core of the selected chapters. Every chapter provides real-world examples to make the complex field easy to understand. With its systematic approach, this book is devoted to anyone interested in the subject, becomes a valuable resource for professionals working in food regulation, and provides a solid foundation for courses and master's programs in animal law, environmental policy, food and agriculture law, and regulation of these subjects around the world. Through its emphasis on sustainable food production, this work offers a cutting-edge selection of evolving topics at the heart of the pertinent discourse. As one of its highlights, this books also provides "Tools for Change," a unique compilation and analysis of laws from the major farm animal product trading nations. With these tools, practitioners, advocates, policy makers and other state-holders are equipped with information to start work toward improving farm animal welfare, wildlife conservation, and food safety through the use of law and policy.

Proceedings of China SAE Congress 2021: Selected Papers Jun 18 2021 These proceedings gather outstanding papers presented at the China SAE Congress 2021, held on Oct. 19-21, Shanghai, China. Featuring contributions mainly from China, the biggest carmaker as well as most dynamic car market in the world, the book covers a wide range of automotive-related topics and the latest technical advances in the industry. Many of the approaches in the book will help technicians to solve practical problems that affect their daily work. In addition, the book offers valuable technical support to engineers, researchers and

postgraduate students in the field of automotive engineering.

Rare Metal Technology 2016 Aug 09 2020 This collection presents the papers presented in the symposium on extraction of rare metals as well as rare extraction processing techniques used in metal production. Paper topics include the extraction and processing of elements like antimony, arsenic, gold, indium, palladium, platinum, rare earth metals including yttrium and neodymium, titanium, tungsten, and vanadium. The rare processing techniques covered include direct extraction process for rare earth element recovery; biosorption of precious metals; fluorination behavior of uranium and zirconium mixture of fuel debris treatment; and recovery of valuable components of commodity metals such as zinc, nickel, and metals from slag.

E-Paper Displays May 18 2021 E-PAPER DISPLAYS An in-depth introduction to a promising technology, curated by one of its pioneering inventors Electronic paper (e-paper) has one of the most promising futures in technology. E-paper's potential is unlimited, as the displays require extremely low power and imitate the aesthetic of ink on the page. This allows e-paper devices to have a wider range of viewing angles than traditional LED products and are capable of being viewed in direct sunlight—and without any additional power. As a result, e-paper displays create less eye strain, have a greater flexibility in their use, and have the potential to be used in place of paper for billboard advertising, educational applications, and transport signage, and more. In E-Paper Displays, editor Bo-Ru Yang and his team of experts present a detailed view into the important technologies involved in e-paper displays, with a particular emphasis on how this technology's unique properties make possible a wide range of personal and professional electronic products. As climate change makes efficient energy use more important than ever, e-paper can become an essential tool for future products on a large scale. As we rely more and more on technology, having lightweight devices with long battery life will become critical. This book provides engineers and innovators with an introduction to this important technology and shows new pathways for development. E-Paper Displays readers will also find: The editor is one of the leading pioneers in this technology Contributions from an international team of experts in e-paper technology Descriptions of many advanced display types that rely on different principles than the widely used LCD and OLED types Another innovative title from Wiley-SID (Society for Information Displays) series As we enter a new stage in our industrial development, E-Paper Displays is an essential reference for computer engineers and developers, as well as innovators and scientists, and their students.

Does Science Need a Global Language? Dec 25 2021 In early 2012, the global scientific community erupted with news that the elusive Higgs boson had likely been found, providing potent validation for the Standard Model of how the universe works. Scientists from more than one hundred countries contributed to this discovery—proving, beyond any doubt, that a new era in science had arrived, an era of multinationalism and cooperative reach. Globalization, the Internet, and digital technology all play a role in making this new era possible, but something more fundamental is also at work. In all scientific endeavors lies the ancient drive for sharing ideas and knowledge, and now this can be accomplished in a single tongue— English. But is this a good thing? In *Does Science Need a Global Language?*, Scott L. Montgomery seeks to answer this question by investigating the phenomenon of global English in science, how and why it came about, the forms in which it appears, what advantages and disadvantages it brings, and what its future might be. He also examines the consequences of a global tongue, considering especially emerging and developing nations, where research is still at a relatively early stage and English is not yet firmly established. Throughout the book, he includes important insights from a broad range of perspectives in linguistics, history, education, geopolitics, and more. Each chapter includes striking and revealing anecdotes from the front-line experiences of today's scientists, some of whom have struggled with the reality of global scientific English. He explores topics such as student mobility, publication trends, world Englishes, language endangerment, and second language learning, among many others. What he uncovers will challenge readers to rethink their assumptions about the direction of contemporary science, as well as its future.

Paper-based Diagnostics Apr 04 2020 This book explores the status of paper-based diagnostic solutions, or Microfluidics 2.0. The contributors explore: how paper-based tests can be widely distributed and utilized by semi-skilled personnel; how close to commercial applications the technology has become, and what is still required to make paper-based diagnostics the game-changer it can be. The technology is examined through the lens of the World Health Organization's ASSURED criteria for low-resource countries (Affordable, Sensitive, Specific, User-friendly, Rapid and robust, Equipment-free, and Deliverable to end-users).

Its applications have to include: health technology, environmental technology, food safety, and more. This book is appropriate for researchers in these areas, as well as those interested in microfluidics, and includes chapters dedicated to principles such as theory of flow and surface treatments; components such as biomarkers and detection; and current methods of manufacturing. Discusses how paper-based diagnostics can be used in developing countries by comparing current diagnostic tests with the World Health Organization's ASSURED criteria Examines how paper-based diagnostics could be integrated with other technologies, such as printed electronics, and the Internet of Things. Outlines how semi-skilled personnel across a variety of fields can implement paper-based diagnostics

World Englishes Oct 23 2021 This book provides a collection of articles that reflect the current state of affairs in the blossoming field of World Englishes by bringing together several innovative synchronic and diachronic approaches. It contributes to the ongoing theoretical discussion concerning the criteria that make a low-frequency item represent an incipient change and examines the suitability of the sociolinguistics of globalisation theory for the study of non-traditional avenues for the spread of vernacular varieties of English (recent migrations, the entertainment industry, the web). It explores crucial aspects of language change and dialect evolution through the study of grammatical phenomena and the particular linguistic and socio-historical factors conditioning them. Together with theoretical questions, the volume shows a concern for methodological issues, such as sociolinguistic interviews, map-task experiments, metalinguistic comments, acceptability judgments and corpus-based methods. This volume represents the latest trends in the field and will undoubtedly set the agenda for the years ahead.

Trends in Oil and Gas Corrosion Research and Technologies Apr 16 2021 Trends in Oil and Gas Corrosion Research and Technologies: Production and Transmission delivers the most up-to-date and highly multidisciplinary reference available to identify emerging developments, fundamental mechanisms and the technologies necessary in one unified source. Starting with a brief explanation on corrosion management that also addresses today's most challenging issues for oil and gas production and transmission operations, the book dives into the latest advances in microbiology-influenced corrosion and other corrosion threats, such as stress corrosion cracking and hydrogen damage just to name a few. In addition, it covers testing and monitoring techniques, such as molecular microbiology and online monitoring for surface and subsurface facilities, mitigation tools, including coatings, nano-packaged biocides, modeling and prediction, cathodic protection and new steels and non-metallics. Rounding out with an extensive glossary and list of abbreviations, the book equips upstream and midstream corrosion professionals in the oil and gas industry with the most advanced collection of topics and solutions to responsibly help solve today's oil and gas corrosion challenges. Covers the latest in corrosion mitigation techniques, such as corrosion inhibitors, biocides, non-metallics, coatings, and modeling and prediction Solves knowledge gaps with the most current technology and discoveries on specific corrosion mechanisms, highlighting where future research and industry efforts should be concentrated Achieves practical and balanced understanding with a full spectrum of subjects presented from multiple academic and world-renowned contributors in the industry

Legislative Documents, ... Aug 21 2021

The Report on the World Social Situation 2016 Feb 24 2022 In adopting the 2030 Agenda for Sustainable Development, world leaders committed themselves to leaving no one behind in pursuit of the eradication of extreme poverty and protection of the planet. Through concerted efforts galvanized by the MDGs, the world has made progress in reducing poverty, but social exclusion persists in both developed and developing countries. At the same time, some countries have been able to effectively promote inclusion even at low levels of income and development. This volume of the RWSS will focus on social inclusion. In particular, it will examine patterns of social exclusion and will assess whether growth and development processes have been inclusive, paying particular attention to the

links between poverty and inequality trends, changes in the world of work and inclusion – or exclusion. The report will also highlight policy options to promote inclusive development through social and macroeconomic policies and institutional transformation for the implementation of the 2030 Agenda.

Mentoring Geography Teachers in the Secondary School Aug 28 2019 Mentoring Geography Teachers in the Secondary School supports both new and experienced mentors in developing their knowledge and skills in mentoring in geography education. Within the book, chapter authors critically consider how mentoring has been conceptualised and represented in policy and academic debate, as well as examining how mentoring in geography education has been experienced and perceived in practice. Chapters in the book explore a range of perspectives, experiences and aspects of mentoring geography teachers, including: • Critical engagement with educational policy and practice • Perspectives from beginning geography teachers • Mentoring as a professional development opportunity • The value of engaging with the geography education community in teacher education • How mentoring meetings and conversations can support beginning geography teachers in their growth and development This book is a vital source of support and inspiration for all those involved in developing the next generation of geography teachers. The themes of justice, agency and voice - raised and engaged with implicitly and explicitly throughout this edited collection - are of critical importance to mentors, beginning teachers and geography education more broadly in developing and enacting a progressive vision of mentoring.

Unlocking Constitutional and Administrative Law Nov 04 2022 Constitutional and administrative law (public law) is an essential element of all law degrees. Unlocking Constitutional and Administrative Law will ensure that you grasp the main concepts with ease, while giving you an indispensable foundation in the subject. This revised fourth edition is fully up to date with the latest key changes in the law and constitutional developments. The UNLOCKING THE LAW series is designed specifically to make the law accessible. Each chapter contains: aims and objectives; activities such as self-test questions; charts of key facts to consolidate your knowledge; diagrams to aid memory and understanding; prominently displayed cases and judgments; chapter summaries; a glossary of legal terminology; essay questions with answer plans. The series covers all the core subjects required by the Bar Council and the Law Society for entry onto professional qualifications as well as popular option units.

Geological Survey Water-supply Paper Jul 20 2021

Re-Imagining Offshore Finance Jul 08 2020 Small jurisdictions have become significant players in cross-border corporate and financial services. Their nature, legal status, and market roles, however, remain under-theorized. Lacking a sufficiently nuanced framework to describe their functions in cross-border finance - and the peculiar strengths of those achieving global dominance in the marketplace - it remains impossible to evaluate their impacts in a comprehensive manner. This book advances a new conceptual framework to refine the analysis and direct it toward more productive inquiries. Bruner canvasses extant theoretical frameworks used to describe and evaluate the roles of small jurisdictions in cross-border finance. He then proposes a new concept that better captures the characteristics, competitive strategies, and market roles of those achieving global dominance in the marketplace - the "market-dominant small jurisdiction" (MDSJ). Bruner identifies the central features giving rise to such jurisdictions' competitive strengths - some reflect historical, cultural, and geographic circumstances, while others reflect development strategies pursued in light of those circumstances. Through this lens, he evaluates a range of small jurisdictions that have achieved global dominance in specialized areas of cross-border finance, including Bermuda, Dubai, Singapore, Hong Kong, Switzerland, and Delaware. Bruner further tests the MDSJ concept's explanatory power through a broader comparative analysis, and he concludes that the MDSJs' significance will likely continue to grow - as will the need for a more effective means of theorizing their roles in cross-border finance and the global dynamics generated by their ascendance.

Nation-Building and Identity in the Post-Soviet Space May 30 2022 Nation-building as a process is never complete and issues related to identity, nation, state and regime-building are recurrent in the post-Soviet region. This comparative, inter-disciplinary volume explores how nation-building tools emerged and

evolved over the last twenty years. Featuring in-depth case studies from countries throughout the post-Soviet space it compares various aspects of nation-building and identity formation projects. Approaching the issue from a variety of disciplines, and geographical areas, contributors illustrate chapter by chapter how different state and non-state actors utilise traditional instruments of nation-construction in new ways while also developing non-traditional tools and strategies to provide a contemporary account of how nation-formation efforts evolve and diverge.

Aquatic Monocotyledons of North America Feb 01 2020 This book brings together information on the natural history, ecology and systematics of North American aquatic monocotyledons. The book is an overview of the biology of major aquatic species by compiling information from numerous sources that lie scattered among the primary literature, herbarium databases, and other reference sources. Information on more than 300 species in 87 genera of monocotyledons will be included. Recent phylogenetic analyses will be incorporated. Although focusing specifically on North America, the cosmopolitan distribution of many aquatic plants should make this an attractive text to people working virtually anywhere outside of the region as well. Key Selling Features: The primary source of natural history information on aquatic plants Comprehensive lists of ecological associates Synthetic overview of systematic relationships of aquatic species and genera Practical information for rare and invasive plant managers Essential guide to facilitate wetland delineation

Impacts of COVID-19 on people's food security: Foundations for a more resilient food system Oct 11 2020 As part of the work implemented by CGIAR on COVID-19, the COVID-19 Research Hub Working Group 4 "Address food systems' fragility and build back better" was tasked with implementing a global assessment of the impacts of COVID-19 on food systems and their actors, focusing specifically on the consequences that the pandemic had brought on the food security and nutrition of those who have been affected by the crisis. This includes formal and informal actors of the food supply chains (from producers to street vendors) as well as consumers, in both rural and urban environments. Building on this assessment, the task was then to draw on key principles of resilience in the context of humanitarian and food security crisis, to identify preliminary elements of a food system resilience research agenda.

Cross-Categorical Classification Mar 16 2021 Languages in which non-finite verbs (infinitives, gerunds etc.) are classified using the same linguistic means as nouns are rare. This typologically unusual phenomenon is found in some Atlantic (Niger-Congo) languages, including Jóola languages like Eegimaa, Fogny and Kwatay, where several different noun class/gender prefixes (NCPs) are used to classify both nouns and verbs. In this book, it is argued following Sagna (2008), that these parallel morphosyntactic classifications in the nominal domain and verbal domains also reflect parallel semantic categorisation of entities and events. The main topics investigated in this book are word class flexibility between nouns and verbs, non-finiteness, noun class/gender (where morphological classes are analysed separately from agreement classes) and the semantic principles underlying the categorisation of entities and events. One of the central findings proposed in this book is that instances of NCP alternations on non-finite verbs reflect strategies of event delimitation. This book will be of interest to scholars investigation parts-of-speech systems, finiteness, systems of nominal and verbal classification, and linguistic categorization.

Flexible Supercapacitor Nanoarchitectonics Jan 14 2021 The 21 chapters in this book presents a comprehensive overview of flexible supercapacitors using engineering nanoarchitectures mediated by functional nanomaterials and polymers as electrodes, electrolytes, and separators, etc. for advanced energy applications. The various aspects of flexible supercapacitors, including capacitor electrochemistry, evaluating parameters, operating conditions, characterization techniques, different types of electrodes, electrolytes, and flexible substrates are covered. This is probably the first book of its type which systematically describes the recent developments and progress in flexible supercapacitor technology, and will be very helpful for generating new and innovative ideas in the field of energy storage material for wearable/flexible industry applications.

The Handbook of Asian Intelligence Cultures Jun 30 2022 The Handbook of Asian Intelligence Cultures explores the historical and contemporary influences that have shaped Asian intelligence cultures as well as the impact intelligence service have had on domestic and foreign affairs.

Origin of the Copper Deposits of the Ducktown Type in the Southern Appalachian Region Jan 26 2022

Luigi L. Pasinetti: An Intellectual Biography Jun 26 2019 Luigi L. Pasinetti (born 1930) is arguably the most influential of the second generation of the Cambridge Keynesian School of Economics, both because of his achievements and his early involvement with the direct pupils of John Maynard Keynes. This comprehensive intellectual biography traces his research from his early groundbreaking contribution in the field of structural economic dynamics to the 'Pasinetti Theorem'. With scientific outputs spanning more than six decades (1955–2017), Baranzini and Mirante analyse the impact of his research work and roles at Cambridge, the Catholic University of Milan and at the new University of Lugano. Pasinetti's whole scientific life has been driven by the desire to provide new frameworks to explain the mechanisms of modern economic systems, and this book assesses how far this has been achieved.

Criminalizing Dissent Mar 28 2022 While liberal-democratic states like America, Britain and Australia claim to value freedom of expression and the right to dissent, they have always actually criminalized dissent. This disposition has worsened since 9/11 and the 2008 Great Recession. This ground-breaking study shows that just as dissent involves far more than protest marches, so too liberal-democratic states have expanded the criminalization of dissent. Drawing on political and social theorists like Arendt, Bourdieu and Isin, the book offers a new way of thinking about politics, dissent and its criminalization relationally. Using case studies like the Occupy movement, selective refusal by Israeli soldiers, urban squatters, democratic education and violence by anti-Apartheid activists, the book highlights the many forms dissent takes along with the many ways liberal-democratic states criminalize it. The book highlights the mix of fear and delusion in play when states privilege security to protect an imagined 'political order' from difference and disagreement. The book makes a major contribution to political theory, legal studies and sociology. Linking legal, political and normative studies in new ways, Watts shows that ultimately liberal-democracies rely more on sovereignty and the capacity for coercion and declarations of legal 'states of exception' than on liberal-democratic principles. In a time marked by a deepening crisis of democracy, the book argues dissent is increasingly valuable.

Global Shock, Risks, and Asian Financial Reform Aug 01 2022 The growth of financial markets has clearly outpaced the development of financial market regulations. With growing complexity in the world of finance, and the resultant higher frequency of financial crises, all eyes have shifted toward the current inad

The Routledge Research Companion to Energy Geographies Sep 09 2020 Energy has become a central concern of many strands of geographical inquiry, from global climate change to the effects of energy decisions on our lives. However, many aspects of the 'black box' of relationships at the energy-society interface remain unopened, especially in terms of the spatial underpinnings of energy production and consumption within nations, cities and regions. Debates focusing on the location and nature of energy flows frequently fail to consider the multiple geographical networks that illustrate and explain the distribution of fuels and services around the world. Providing an integrated perspective on the complex interdependencies between energy and geography, The Routledge Research Companion to Energy Geographies offers a timely conceptual framework to study the multiple facets of energy geography, including security, space and place, planning, environmental science, economics and political science. Illustrating how a geographic approach towards energy can aid decision-making pathways in the domains of social justice and environment, this book provides insights that will help move the international community toward greater cooperation, stability, and sustainability.

The Wiley Handbook of Educational Supervision Nov 11 2020 An authoritative guide to educational supervision in today's complex environment The Wiley Handbook of Educational Supervision offers a comprehensive resource that explores the evolution of supervision through contributions from a panel of noted experts. The text explores a wealth of topics including recent and dramatic changes in the complex context of today's schools. This important resource: Describes supervision in a historical context Includes a review of adult learning and professional community Reviews new teacher preparation and comprehensive induction systems Contains perspectives on administrative feedback, peer coaching and collaboration Presents information on professional development and job-embedding learning Examines policy and implementation challenges in teacher evaluation Written for researchers, policy analysts, school

administrators and supervisors, The Wiley Handbook of Educational Supervision draws on concepts, theories and research from other closely related fields of study to enhance and challenge our understanding of educational supervision.

The ASEAN Way Oct 03 2022 The first part of the book examines the evolution of monetary policy and prudential frameworks of the ASEAN5, with particular focus on changes since the Asian financial crisis and the more recent period of unconventional monetary policy in advanced economies. The second part of the book looks at policy responses to global financial spillovers. The third and last part of the book elaborates on the challenges ahead for monetary policy, financial stability frameworks, and the deepening of financial markets.

Synthesis Techniques for Polymer Nanocomposites Jun 06 2020 The book series 'Polymer Nano-, Micro- and Macrocomposites' provides complete and comprehensive information on all important aspects of polymer composite research and development, including, but not limited to synthesis, filler modification, modeling, characterization as well as application and commercialization issues. Each book focuses on a particular topic and gives a balanced in-depth overview of the respective subfield of polymer composite science and its relation to industrial applications. With the books the readers obtain dedicated resources with information relevant to their research, thereby helping to save time and money. Summarizing all the most important synthesis techniques used in the lab as well as in industry, this book is comprehensive in its coverage from chemical, physical and mechanical viewpoints. This book helps readers to choose the correct synthesis route, such as suspension and miniemulsion polymerization, living polymerization, sonication, mechanical methods or the use of radiation, and so achieve the desired composite properties.

Country Boys and Redneck Women Sep 21 2021 Country music boasts a long tradition of rich, contradictory gender dynamics, creating a world where Kitty Wells could play the demure housewife and the honky-tonk angel simultaneously, Dolly Parton could move from traditionalist "girl singer" to outspoken trans rights advocate, and current radio playlists can alternate between the reckless masculinity of bro-country and the adolescent girlishness of Taylor Swift. In this follow-up volume to A Boy Named Sue, some of the leading authors in the field of country music studies reexamine the place of gender in country music, considering the ways country artists and listeners have negotiated gender and sexuality through their music and how gender has shaped the way that music is made and heard. In addition to shedding new light on such legends as Wells, Parton, Loretta Lynn, and Charley Pride, it traces more recent shifts in gender politics through the performances of such contemporary luminaries as Swift, Gretchen Wilson, and Blake Shelton. The book also explores the intersections of gender, race, class, and nationality in a host of less expected contexts, including the prisons of WWII-era Texas, where the members of the Goree All-Girl String Band became the unlikeliest of radio stars; the studios and offices of Plantation Records, where Jeannie C. Riley and Linda Martell challenged the social hierarchies of a changing South in the 1960s; and the burgeoning cities of present-day Brazil, where "college country" has become one way of negotiating masculinity in an age of economic and social instability.

Trade Policy between Law, Diplomacy and Scholarship Jul 28 2019 This book presents 22 topical contributions on international trade law and policy, with a particular focus on EU external trade law, addressing countries ranging from Ukraine to Switzerland and the US (TTIP) and aspects from trade and IPRs to anti-dumping. The volume constitutes a state-of-the-art treatment of the many facets of trade policy in the 21st century from legal, diplomatic and academic standpoints. The book is dedicated to the memory of Horst Günter Krenzler, former Director General for External Relations for the European Commission and Chief Negotiator for the European Union in many trade negotiations, honorary professor of European Union law at the University of Munich and an of counsel with Freshfields' Brussels office after retirement from the Commission.
