DENTAL OFFICE CONCEPTS Nov 30 2019 This book was written to inform dental students, recent dental graduates, and practicing dentists about the complex processes needed to properly plan, design and build a dental facility. It probably is the most comprehensive book ever written on the subject, because it methodically describes all of the possible steps to create an exceptional dental office. There are three parts to this book: Designing and Building an Exceptional Dental Office, Designing and Building our Exceptional Dental Office, and Developing Your Dental Office. This book was written by a dentist together with an experienced dental office designer and construction coordinator, whose goal was to provide design knowledge to dentists, and to demonstrate cost-effective measures related to the construction process. The book also describes in detail twenty examples of unexpected dental construction obstacles with imaginative solutions, emphasizing to the reader the need for an experienced team of experts. In addition, this book gives dental office management recommendations for those dentists who want or need to effectively develop their practice after dental office construction. Using the proven recommendations discussed in this book, dentists will be better able to create, build and develop their own exceptional dental facilities.

Healthy Buildings Oct 02 2022 A healthy building does more than conserve resources: it improves the health and productivity of the people inside. Joseph Allen and John Macomber look at everything from the air we breathe to the water we drink to how light, sound, and materials impact our performance and wellbeing and drive business profit.

New Environments for Working Mar 27 2022 The demands made on office buildings and environmental systems designed for typical nine to five use are changing. This book defines a number of modern working patterns, and considers how a knowledge of these might influence the development of specifications for office construction and fit-out. The publication is divided into five sections: Overview - how change in office use demands a new approach to environmental services; New research - uses models to explain work patterns, building types and HVAC systems; Affinities - between work patterns, building types, and environmental systems; Case studies - real implications of new ways of working and occupants' reactions to their workplace; Product directions and design implications - the changing nature of IT and office work.

Building a Salesforce-Powered Front Office Jan 25 2022 Harness the power of Salesforce to manage and grow your business. This book shows you how to use the Salesforce CRM tool to consolidate consumer data into a single place to gain better insight into your business and more easily manage data. Data (such as email, spreadsheets, databases) is generated through the front office or face of your business, where your company interacts with customers and revenue is generated. In a hotel, for instance, the front office is the lobby where guests are greeted, their problems are handled, and room payments are made. Another example is a coffee shop, where the front office is an employee taking a customer's order or serving a drink. Salespeople connect to customers by selling your company's goods or services. Marketing team members connect with them through advertising and promotional activities. Service and support staff assist customers with problems and provide help with products. This book introduces the many ways Salesforce-based innovations are transforming the technology landscape and the strategies that may be used for designing and launching a digital front office. The book examines how organizations can launch and grow digital solutions and strategies for the governance of the platform and provides an overview of digital transformation across industries. What You Will Learn Understand basic Salesforce concepts, including the digital front office process tower, lead to cash journey, core CRM functions, best practices, and more Review data management concepts, integrated sales, customer service, marketing operations, and proposal and business development needs in a systematic way Use frameworks to build a business architecture and multi-year technology roadmap Get familiar with Salesforce business processes and concepts such as account, contact, lead, and opportunity management; marketing campaigns; master data management (MDM); and lead scoring, grading, and activity management across the front office Define and develop digital marketing challenges and strategy (people, process, brand, messaging, and ROI), measure campaign data, and create an end-to-end campaign in Salesforce Who This Book Is For Business executives, C-suites, IT management, and Salesforce managers and professionals working in IT, business development, sales operations, program management, marketing operations, and proposal development

Energy Optimization and Prediction in Office Buildings Feb 23 2022 This book explains how energy demand and energy consumption in new buildings can be predicted and how these aspects and the resulting CO2 emissions can be reduced. It is based upon the authors' extensive research into the design and energy optimization of office buildings in Chile. The authors first introduce a calculation procedure that can be used for the optimization of energy parameters in office buildings, and to predict how a changing climate may affect energy demand. The prediction of energy demand, consumption and CO2 emissions is demonstrated by solving simple equations using the example of Chilean buildings, and the findings are subsequently applied to buildings around the globe. An optimization process based on Artificial Neural Networks is discussed in detail, which predicts heating and cooling energy demands, energy consumption and CO2 emissions. Taken together, these processes will show readers how to reduce energy demand, consumption and CO2 emissions

associated with office buildings in the future. Readers will gain an advanced understanding of energy use in buildings and how it can be reduced.

The Networked Health-Relevant Factors for Office Buildings Jul 19 2021 People who work in an office spend at least a third of their lifetime in these spaces. The planning of office and administration buildings can therefore contribute a great deal to the satisfaction and well-being of future users. The book looks at the health-relevant factors that affect people in office and administration buildings and therefore deserve special attention in the planning process. In doing so, the authors are guided by a concept of health as defined by the World Health Organization: Accordingly, health encompasses mental as well as social and physical well-being and thus goes far beyond the factors laid down in legal norms and guidelines. In this volume, architects and designers, physicians and ergonomists deal with all aspects of interior design seen from a health perspective: What role does colour design play, what significance do light, air and noise have? What does a demand-oriented building technology look like and how is the office furniture adequately designed? Which medical and hygienic aspects have to be considered? How can offices be designed in terms of work-life balance and how will the office change in the course of digitalisation? The book serves as a guideline that can be applied chapter by chapter in the planning of health-promoting office spaces - depending on the interests of the reader. Problems that arise are discussed using examples, and checklists help you with planning and implementation. The guide is aimed at building owners, architects, engineers, but also at lawyers, psychologists and doctors as well as university members in the field of economics and engineering.

From Termite Den to Office Building Jul 31 2022 Learn about how nature has inspired technological innovations with this book on the similarities between termite dens and a new office building design. Integrating both historical and scientific perspectives, this book explains how termite dens inspired a new office building design. Readers will make connections and examine the relationship between the two concepts. Sidebars, photographs, a glossary, and a concluding chapter on important people in the field add detail and depth to this informational text on biomimicry.

Suppose Design Office Sep 08 2020 A book showcasing the projects of Japanese architecture firm Suppose Design Office, founded by Makoto Tanijiri and Ai Yoshida. This is the first collection of works from the viewpoint of multiplicity and the design thinking of the creative team at Suppose Design Office, who are always seeking for something new. Based on an architectural perspective, the firm defines its work as discovering fresh ideas, new styles of buildings and new relationships between all interactive elements. They have designed workspaces, landscapes, products, art installations and more than 100 houses. Their interest in the problem-solving and creative challenges of architecture extends through all scales and budgets from 'doghouses to skyscrapers'. Both the new and the familiar inform their search for fresh solutions to the issues of everyday life, which is explained in this book. This monograph offers an exclusive peek into the working life of a world-renowned design firm. By explaining the design processes for creating interior architecture, it is a vital book for anyone in the design industry, from interior designer to manufacturer, and from architect to space designer, as well as students, agencies and professionals in the whole design sector. About the Author Makoto Tanijiri is one of the founding architects of Suppose Design Office. He is also a professor at Musashino Art University, Osaka University of Arts and Anabuki Design College. Ai Yoshida is one of the founding architects of Suppose Design Office. Features - Readers gain complete insight in the working methods of the architectural firm Suppose Design Office. - In-depth features of the different design projects realised by the firm's founders Makoto Tanijiri and Ai Yoshida their team. - This is the first ever book about the work of Suppose Design Office and gives an in-depth look at the design processes. - Tanijiri and Yoshida define their work as a chance to realise fresh ideas about buildings and the relationships of all interactive elements.

Guide to Natural Ventilation in High Rise Office Buildings Jul 27 2019 This guide sets out recommendations for every phase of the planning, construction and operation of natural ventilation systems in these buildings, including local climatic factors that need to be taken into account, how to plan for seasonal variations in weather, and the risks in adopting different implementation strategies. All of the recommendations are based on analysis of the research findings from richly-illustrated international case studies. This is the first technical guide from the Council on Tall Buildings and Urban Habitat's Tall Buildings & Sustainability Working Group looking in depth at a key element in the creation of tall buildings with a much-reduced environmental impact, while taking the industry closer to an appreciation of what constitutes a sustainable tall building, and what factors affect the sustainability threshold for tall.

Problems of Office Building Design in Bulgaria May 29 2022 This work examined the functional, architectural and planning characteristics in the design of office buildings in Bulgaria. Due to lack of current legislation in Bulgaria, for newly built office buildings are applying international quality standards, but not adapted to regional specificities. The focus is on examples of regulations in other countries and systematic exposition of knowledge known until now to design office buildings. The main thesis of the dissertation is formulated: The design of office buildings in Bulgaria can be improved by applying modern, adequate architectural and planning principles and availability of regulated evaluation criteria. The author has systematized the material concerning the subject of dissertation. An examines and establishment of the main factors that influence the design of office buildings is made. Single terminological base is introduced and justified. Outlines the local criteria for assessment of buildings in accordance with the achieved in the world practice, which could serve as a basis for updating the standards for the design of office buildings in Bulgaria. Outlines the basic principles of design - modularity, flexibility, polyfunctionality, social interaction, suitability. Account is taken of the

importance of the correlation between internal spatial structure of the office building and functional characteristics of the management process. Expected economic effect of development - increasing efficiency in the design and saving capital investments.

Dental Office Concepts: PART I - DESIGNING AND BUILDING AN EXCEPTIONAL DENTAL OFFICE Jan 01 2020 This eBook was written to inform dental students, recent dental graduates, and practicing dentists about the complex processes needed to properly plan, design and build a dental facility. It probably is the most comprehensive eBook ever written on the subject because it methodically describes all of the possible steps to create an exceptional dental office. This eBook was written by a dentist together with an experienced dental office designer and construction coordinator, whose goal was to provide design knowledge to dentists, and to demonstrate cost-effective measures related to the construction process. Building 2000 Aug 20 2021 This is the second volume of BUILDING 2000, a pilot project of the Commission's R&D programme 'Solar Energy Applications to Buildings' with the purpose of encouraging the adoption of solar architecture in large buildings. In a first volume, a similar series of studies is presented for the building categories: SCHOOLS, LABORATORIES and UNIVERSITIES, and SPORTS AND EDUCATIONAL CENTRES. In this second volume the results of the design studies illustrating passive solar architecture in buildings in the European Community are presented in particular for the building categories: OFFICE BUILDINGS, PUBLIC BUILDINGS and HOTELS AND HOLIDAY COMPLEXES. There was an enthusiastic response from project teams responsible for the design of 32 large buildings with a total construction budget of more than 140 million ECU. The willingness to improve their building concepts by collaborating with R&D-experts was encouraging to the Commission's action in this field. These two books reflect the results of the exchange of information between the actual design practitioners and the European R&D-community. Within the BUILDING 2000 programme 'Science and Technology at the Service of Architecture' became reality. This was not only realised by the various support activities initiated by BUILDING 2000, but also by the active exchange of ideas by architects and design team members with R&D-workers during the various workshops held within the BUILDING 2000 programme. I highly recommend architects and engineers interested in passive solar architecture and modern day lighting approaches to study these final products of the BUILDING 2000 programme.

The Office Building of the Future Sep 01 2022 Design competitions bridge the gap between members of architecture firms and the public. Participation in competitions provides the public with an inside view of how firms stretch the bounds of their creativity. This creative and ambitious competition submission has captured audiences around the world both on paper and through presentation by Principal Manoj Dalaya, AIA. For this competition, a team was formed that represented all of KGD Architecture, from the newest staff members to the firm partners. All ideas were brought to the table and developed through a series of design charrettes. The best concepts were merged and finessed to form our final design. Internal social networking was used to share ideas and inspiration. Our process demonstrates the collaboration, technological interaction, and hierarchy-free work processes that will be supported by our office building of the future. Our design was supported by structural engineering provided by Arup, assuring that our office building of the future would indeed be possible. James G Davis Construction Company provided cost estimating services.

Survey Results for Fire Loads and Live Loads in Office Buildings May 17 2021 Fire load and live load data obtained from a survey of 23 office buildings located in various regions throughout the United States are presented. The survey design is described including the characteristics of the building population used to select the sample. Data are presented on the magnitude and distribution of the loads. Information is also included on the characteristics of office loads such as the type of items (furniture, equipment, etc.) and their properties (material type, dimensions, exposure, etc.). Statistical summaries of the data and a determination of the building and occupancy characteristics affecting these loads are presented. The data do not indicate any significant differences between the loads in private and government buildings. Similarly, geographic location, building height, and building age were not found to have a significant influence on load magnitude. The use of the rooms surveyed, however, did affect load magnitude. A mathematical model developed from a regression analysis of the survey data is presented for calculating fire loads and live loads in offices. The data presented may be used to evaluate current requirements for design loads for buildings.

Leading Successful PMOs Feb 11 2021 Leading Successful PMOs is a guide to maximising project success through a Project Management Office (PMO). Building and leading an effective PMO is a complex process. Peter Taylor outlines the basics of setting up a PMO and clearly explains how to ensure it will do exactly what you need it to do - the right things, in the right way, in the right order, with the right team!

Workplace Environmental Design in Architecture for Public Health Aug 27 2019 This concise volume analyzes the potential for the workplace environment—where so many people spend so much of their day—to improve workers' capacity for health and wellness. It pinpoints the link between sedentary lifestyles and poor health, and explores the role of office spatial design in encouraging physical activity to promote physical activity, health and prevent disease. The featured research study tracks workers' movement in a variety of office layouts, addressing possible ways movement-friendly design can co-exist with wireless communication, paperless offices, and new corporate concepts of productivity. From these findings, the author's conclusions extend public health concepts to recognize that influencing population-wide levels of activity through office architectural design alone may be possible. This SpringerBrief is comprised of chapters on : Physical activity and disease: Theory and practice Space-use and the history of the office building Identifying factors of the office architectural design that influence movement, Interdisciplinary research methods in studying worker physical activity, decision-making and office design characteristics The KINESIS model for simulating physical activity in office environments The questions and potential for solutions in Workplace Environmental Design in Architecture for Public Health will interest and inform researchers in interdisciplinary topics of public health and architecture as well as graduate and post-graduate students, architects, economists, managers, businesses as well as health-conscious readers.

Building Type Basics for Office Buildings Apr 27 2022 From the acclaimed New York Firm of Kohn Pedersen Fox, this volume in the Building Type Basics series gives you the essential information you need to initiate designs for every type of office building, from dramatic skyscrapers to utilitarian low-rise complexes. Combines in-depth coverage of all of the structural, mechanical, acoustic, traffic, and security issues unique to today's office buildings with the nuts-and-bolts guidance you need to launch your design project and see it through. Addresses a broad scope of timely issues related to modern office design: standard and alternate workplaces, the "smart" office building, security, healthy interiors, elevators, image and identity, and more. Back to the Office Sep 20 2021 Able to work anywhere ? and in unpredictable times, often forced to ? we have a tortured relationship with the office today. Desperate to work again in physically shared spaces, we are also now questioning whether offices ? and the demanding, alienating rhythms they impose on us ? are needed at all. Offices themselves labour under intolerable forces too: twenty-first-century building regulations

suggest redesigning them every seven-to-ten years, managerial strategies typically shift every five years, and employees churn every two. As a result, offices are torn down, stripped out, rethought and renewed with alarming frequency. 0With the future of our workspaces so uncertain, Back to the Office works overtime inside the revolutionary offices of the twentieth century, and asks what endured from their architecture, their materials, and the ideologies of work they embodied.0Using before-and-after photography, archival documents, contemporary interviews and critical essays, this book engages corporations, architects, workers, building managers, regulators and others ? all in search of the lessons we need to learn from a very recent time when there was an unambivalent enthusiasm for office life.
