A Rose for the Anzac Boys Jun 25 2019 The 'War to end all Wars', as seen through the eyes of three young women War is being fought on a horrific scale in the trenches of France, but it might as well be a world away from sixteen-year-old New Zealander Midge Macpherson, at school in England learning to be a young lady. But the war is coming closer: Midge's brothers are in the army, and her twin, Tim, is listed as 'missing' in the devastating defeat of the Anzac forces at Gallipoli . Desperate to do their bit - and avoid the boredom of school and the restrictions of Society - Midge and her friends Ethel and Anne start a canteen in France, caring for the endless flow of wounded soldiers returning from the front. Midge, recruited by the over-stretched ambulance service, is thrust into carnage and scenes of courage she could never have imagined. And when the war is over, all three girls - and their Anzac boys - discover that even going 'home' can be both strange and wonderful. Exhaustively researched but written with the lightest of touches, this is Jackie French at her very best. The Built Idea Nov 10 2020 Hardcover in clamshell box: Architects reveal the keys to Architecture in their drawings, their floor plans, sections and also in their writings. It is important to appreciate the concise texts of Mies Van der Rohe or the more passionate expressions of Le Corbusier. And that is how I would like these texts, published here today, to be understood. Alberto Campo Baeza (born Valladolid, Spain, 1946) is one of the most important architects of the modern period. The Built Idea presents a series of seminal texts in which he conveys his most deeply-held architectural ideas and convictions, exploring and explaining his foundational influences and subjects such as the importance of light, the work of his contemporaries, and the future of architecture, as well as accounts of his own work and personal anecdotes from a rich and successful life in architecture. To use words that express one's intentions clearly is not just a convenience for architects. One wants to let people know the meaning behind the things that are being made. My aim in publishing these texts is precisely that. This book also includes a photographic documentation of Campo Baeza's greatest works along with architectural sketches, plans and models to provide a privileged insight into one of the greatest architectural minds working today. And the reasoning on which one bases one's work in their attempt at Architecture is what is going to be reflected here in these texts, some of it consciously, some unconsciously. Realizing the ideas expressed in these words in built works is of course the best proof that the ideas are valid and the words true. "

In a few dramatic moments, Siren was shattered by the indifferent juggernaut. Struggling for

his life, Peter Hardin felt the hand of his wife being torn from his grip as the huge white letters on the supertanker's stern - Leviathan - steamed away. Thus begins an odyssey of revenge that embraces the distant waters of the world, from the titanic storms of the South Atlantic to the oil-slicked reaches of the Persian Gulf. Now back in print for the first time in twenty-five years, *The Shipkiller* is the story of one man determined to win at sea the justice he has been denied on land.

Political Change in the Middle East and North Africa Oct 29 2019 Taking a comparative approach, this book considers the ways in which political regimes have changed since the Arab Spring. It addresses a series of questions about political change in the context of the revolutions, upheavals and protests that have taken place in North Africa and the Arab Middle East since December 2010, and looks at the various processes that have been underway in the region: democratisation (Tunisia), failed democratic transitions (Egypt, Libya and Yemen), political liberalisation (Morocco) and increased authoritarianism (Bahrain, Kuwait, Syria). In other countries, in contrast to these changes, the authoritarian regimes remain intact (Saudi Arabia, Qatar, Arab United Emirates).

Bubble Gum Badge May 17 2021 Contents Chapter 1 The Journey begins Chapter 2 Food work Chapter 3 BIMO Training Chapter 4 BIMO Inspections Chapter 5 International BIMO Inspections Chapter 6 Official-Action-Indicated (OAI) Work Chapter 7 Electronic-Records Review Chapter 8 Regional/District Management Issues Preface A few years ago, I put together a collection of my thoughts regarding the US FDA and my personal experiences over 13 years as a field investigator in Texas. Since then I have had the opportunity to experience a world of new opportunities as a consultant, so I thought it was time to revisit the Bubblegum Badge world. Along with a few colleagues, I have added several new sections and have tightened up some of the language and phrasing. It is, as with everything in life, still a work in progress.... As I said in the first edition of this book, I don't intend this book to be either a roasting or a toasting. I hope what it will do is provide a glimpse of what the FDA does well, and what it needs to improve on (as evidenced by audit reports from the Health and Human Services [HHS] Office of Inspector General [OIG]). The name "Bubble Gum Badge," by no means suggests a weak or ineffective organization, rather, it is something my friend from the Imports Division stated during a happy hour we were at in 1999. He put it this way: "If you think that gold FDA badge is going to get you out of trouble, son, you are wrong! It's a Bubble Gum Badge and is more trouble than you have ever known." Thankfully, I did not get into any real trouble as a young man with a great responsibility to protect and serve. There are many ways to keep harmful products from the US market, and some of which take longer than the proverbial slow boat to China. I was a frontline grunt out in the field, conducting the FDA business of the day. Those twelve years and eight months were some of the most challenging and rewarding moments any one person could ask for. When you sit down to eat today or see your family member take their medications or go into surgery, you can rest assured that at least one of the FDA's finest had at some point in the product's life cycle taken a look to see if it passed inspection. FDA does the work that is most taken for granted and expected as a given by the US public. Your tax dollars were always hard at work when I was on the job, even though it may not have always appeared that way. I would like to thank the FDA for taking me around the world and giving me the best training anyone can ask for in this quality assurance (QA) business (on-the-job training). FDA needs your help and more regulatory authority for biologics, drugs, and devices. Only Congress can grant more FDA authority, and budget battles seem to be the mainstay. Most of the information I reference comes from the public domain site www.fda.gov. The FDA's mission is too important not to be modernized, supported, and innovated. FDA falling behind in modernization would mean lives at risk globally. The oversight of our global health market is waiting. If you want it and qualify, your official gold FDA badge is waiting for you. FDA has mine in a vault next to my government international passport (I have my old decommissioned one). Anyone reading this book can be an FDA Consumer-safety officer (CSO)/investigator. Trust me when I say sixty semester hours of accredited college science and some luck on the computer lottery

(usaJobs.opm.gov) and you're in. I would suggest higher than a Bachelor of Science education for entry into bioresearch monitoring. As an ex-FDA recruiter and mentor to many new hire FDA field investigators, I would say a graduate degree or higher also assures your entry to drug and device program field work. So, take a look behind the kitchen, Pharmacy, and hospital operation-room doors with me. Thank you, global health providers and professionals (all of you)! Thank you, health-care receivers, all of you; without you, there would be no need for health-care products. I think that includes everyone in the world! Thank you for your time and for coming along to take a microscopic view into one of the most unsung agencies. FDA has very little glitz or glamour and I hope you find something you find interesting in this book.

Gunning for God Jul 27 2019 New ideas about the nature of God and Christianity that will give Dawkins' best friends and worst enemies alike some stimulating food for thought Tackling Hawking, Dawkins, Dennett, Hitchens, and a newcomer in the field?the French philosopher Michel Onfray?John Lennox points out some of the most glaring fallacies in the New Atheist approach in this insightful book. Since the twin towers crashed to the ground on September 11, there has been no end to attacks on religion. Claims abound that religion is dangerous, that it kills, and that it poisons everything. And if religion is the problem with the world, say the New Atheists, the answer is simple?get rid of it. Of course, things aren't quite so straightforward. Arguing that the New Athiests' irrational and unscientific methodology leaves them guilty of the very obstinate foolishness they criticize in dogmatic religious folks, this erudite and wide-ranging guide to religion in the modern age packs some debilitating punches and scores big for religious rationalism.
