Designing for Kids brings together all a designer needs to know about developmental stages, play patterns, age transitions, playtesting, safety standards, materials and the daily lives of kids, providing a primer on the differences in designing for kids versus designing for adults.

Research and interviews with designers, social scientists and industry experts are included, highlighting theories and terms used in the fields of design, developmental psychology, sociology, cultural anthropology and education. This textbook includes more than 150 color images, helpful discussion questions and clearly formatted chapters, making it relevant to a wide range of readers. It is a useful tool for students in industrial design, interaction design, environmental design and graphic design with children as the main audience for their creations.
