All original material not found anywhere else. This book is designed for candidates looking to demonstrate foundational-level knowledge of cloud services and how those services are provided with Microsoft Azure. The AZ-900 exam is intended for candidates with non-technical backgrounds, such as those involved in selling or purchasing cloud based solutions and services, or who have some involvement with cloud based solutions and services, as well as those with a technical background who have a need to validate their foundational-level knowledge around cloud services. Technical IT experience is not required, however, some general IT knowledge or experience would be beneficial. If you're not sure if you are ready to take the AZ-900 exam, book can test your knowledge. If you find something that you don't know, you can study a bit more on that area. Microsoft Azure is still the fastest growing large cloud platform. The opportunities for jobs in cloud computing are still out there, and finding good qualified people is the #1 problem that businesses have. If you're looking to change your career, this would be a good entry point into cloud computing.

Water Transmission and Distribution Sep 03 2020 Water distribution systems are made up of pipe, valves and pumps through which treated water is moved from the treatment plant to homes, offices, industries, and other consumers. The types of materials and equipment used by each water system are usually governed by local conditions, past practices, and economics. Consequently, drinking water professionals must be knowledgeable about common types of equipment and operating methods that are available. Completely revised and updated, Water transmission and distribution includes information on the following: distribution system design and operation and maintenance ; piping materials ; valves, pumps, and water meters ; water main installation ; backfilling, main testing, and installation safety ; fire hydrants ; water storage ; water services ; cross-connection control ; motors and engines ; instrumentation and control ; information management and public relations.--Cover page [4].

Bad Blood Dec 06 2020 NATIONAL BESTSELLER • The gripping story of Elizabeth Holmes and Theranos—one of the biggest corporate frauds in history—a tale of ambition and hubris set amid the bold promises of Silicon Valley, rigorously reported by the prize-winning journalist. With a new Afterword. “Chilling ... Reads like a thriller ... Carreyrou tells [the Theranos story] virtually to perfection.” —The New York Times Book Review In 2014, Theranos founder and CEO Elizabeth Holmes was widely seen as the next Steve Jobs: a brilliant Stanford dropout whose startup “unicorn” promised to revolutionize the medical industry with its breakthrough device, which performed the whole range of laboratory tests from a single drop of blood. Backed by investors such as Larry Ellison and Tim Draper, Theranos sold shares in a fundraising round that valued the company at more than \$9 billion, putting Holmes’s worth at an estimated \$4.5 billion. There was just one problem: The technology didn’t work. Erroneous results put patients in danger, leading to misdiagnoses and unnecessary treatments. All the while, Holmes and her partner, Sunny Balwani, worked to silence anyone who voiced misgivings—from journalists to their own employees.
