The Council of Florence Aug 06 2020 This 1959 book provides a detailed study of the Council of Florence (originally known as the Council of Basel).

The Loggia of Raphael Aug 18 2021 "Art historian Nicole Dacos, the foremost authority on Raphael's Loggia, has distilled decades of research into the first comprehensive study of this remarkable monument to be published in English. In the first and second parts of her text, she examines the ornaments and the scenes from the Bible, respectively, clarifying their iconography and uncovering their sources in antique and Renaissance art. In the third part, she identifies in the Loggia the hands of Raphael's various collaborators, including not only his well known pupils, like Giulio Romano, Giovanfrancesco Penni, and Giovanni da Udine, but also many other artists, Italian, French, and Spanish, who traveled to Rome to work with the master. Finally, in the fourth part, she traces the enduring legacy of the Loggia: the style of grotesque ornament elaborated by Raphael has been imitated as far afield as the corridors of the United States Capitol, and the Bible scenes were widely circulated in engravings and copied in every medium, from painting to pottery." "The newly commissioned color photographs herein give the reader unprecedented access to the manifold visual splendors of the gallery, which is closed to the public. Also illustrated with an abundance of comparative images, this landmark volume affirms the central importance of Raphael's Loggia to the history of art."--BOOK JACKET.

Funeral Oratory and the Cultural Ideals of Italian Humanism Mar 13 2021 By studying the funeral orations of Renaissance Italy, McManamon analyzes Italian humanism as a characteristic phase in Western rhetorical culture. By examining hundreds of funeral speeches, he provides a valuable overview of major civic issues and humanistic themes, adding significant new material to the history of rhetoric. When Italian humanists spoke at funerals, they took this unique opportunity to press for their reformist goals. Originally published in 1989. These editions are published unaltered from the original, and are presented in affordable paperback formats, bringing readers both historical and cultural value.

From Cave to Dolmen Aug 30 2022 Bringing together the scientific contributions of a wide panel of Sicilian and mainland Italian specialists in prehistory, this book focuses on the Sciacca region and its landscape which is extraordinarily rich in natural geological phenomena and associated archaeological activity.

The Italian Renaissance Imagery of Inspiration Nov 28 2019 Publisher Description

?????????????: *Studies in Honour of Guido Avezzi. Vol. 1.2* Sep 26 2019 ??????????????, the ancient Greek verb chosen as the title of this volume, belongs to the jargon of dramaturgy as employed by Aristotle in Poetics, where he emphasizes the function of the Chorus as an active co-protagonist in the dynamics of drama. Here it suggests the collaborative nature of this

Festschrift offered to Guido Avezzù in the year of his retirement by friends and colleagues. The volume collects a wide selection of contributions by international scholars, grouped into four sections: Greek Tragedy (Part 1), Greek Comedy (Part 2), Reception (Part 3), and Theatre and Beyond (Part 4). The Authors. A. Andrisano, P. Angeli Bernardini, A. Bagordo, A. Bierl, S. Bigliuzzi, M.G. Bonanno, S. Brunetti, D. Cairns, G. Cerri, V. Citti, A.T. Cozzoli, F. Dall'Olio, M. Di Marco, M. Duranti, S. The Forgotten Scholar: Georg Zoëga (1755-1809) Oct 08 2020 The Forgotten Scholar: Georg Zoëga (1755-1819): At the Dawn of Egyptology and Coptic Studies offers an account on the largely unknown legacy of this Danish scholar, renowned for his work within the fields of Numismatics, Archaeology, Egyptology and Coptic Studies.

The Copernican Question Jan 29 2020 In 1543, Nicolaus Copernicus publicly defended his hypothesis that the earth is a planet and the sun a body resting near the center of a finite universe. But why did Copernicus make this bold proposal? And why did it matter? The Copernican Question reframes this pivotal moment in the history of science, centering the story on a conflict over the credibility of astrology that erupted in Italy just as Copernicus arrived in 1496. Copernicus engendered enormous resistance when he sought to protect astrology by reconstituting its astronomical foundations. Robert S. Westman shows that efforts to answer the astrological skeptics became a crucial unifying theme of the early modern scientific movement. His interpretation of this long sixteenth century, from the 1490s to the 1610s, offers a new framework for understanding the great transformations in natural philosophy in the century that followed.

The First Proofs of the Universal Catalogue of Books on Art May 15 2021 Reprint of the original, first published in 1870. *Saint Athanasius of Alexandria* Oct 20 2021 St. Cyril of Alexandria, St. Athanasius' great successor, tells us: "Our Father Athanasius, of hallowed memory, who adorned the throne of the Church of Alexandria for the whole of forty-six years and arrayed an unconquerable and apostolic knowledge in battle against the sophistries of the unholy heretics and greatly gladdened the world with his writings as by a most fragrant perfume, and all bear witness to the accuracy and piety of his teaching. was a man worthy of trust and deserving a confidence, since he did not say anything not in agreement with Holy Scripture." The present volume consists of a collection of essays which represent original research into the writings of St. Athanasius, Patriarch of Alexandria (295 - 373). These essays respond to challenges arising out of the contemporary

scholarly studies of St. Athanasius' theology and writings. The new perspectives in Athanasian studies, which these essays offer, are closer to the original theological legacy of this great Alexandrian Father of the Church who has come down in the history of the Church as the "canon of orthodoxy." Modern "critical research and discussions" have too often tended to obscure the Athanasian legacy and bar contemporary theology from the amazing blessings that this great ecumenical teacher and Father of the Church has bequeathed to all Christian generations.

Giuseppe Verdi May 03 2020 First Published in 1998. Giuseppe Verdi already stood out as a distinctive and unusually significant composer by the time his career was barely underway. Today, Verdi scholars build their work on a vast foundation of earlier research. For researchers who have not spent years with the Verdi literature or who may just be starting to explore some aspect of this giant's life and works, this foundation may seem daunting indeed. It is primarily for these researchers that this guide is intended. Its purpose is to index and describe some of the most significant studies about the composer, presenting enough material in annotations that researchers may survey the many myriad directions Verdi research has gone, ascertain the relevance of individual items to their individual interests, and pursue significant patterns and threads in which they are interested.

Letters, 1-30 Dec 10 2020 Peter Damian (1007-1072), an eleventh-century monk and man of letters, left a large and significant body of correspondence. Over one hundred and eighty letters have been preserved, principally from Damian's own monastery of Fonte Avellana. Ranging in length from short memoranda to longer monographs, the letters provide a contemporary account of many of the controversies of the eleventh century: purgatory, the Eucharist, clerical marriage and celibacy, immorality, and others. Peter Damian, or "Peter the Sinner" as he often referred to himself, was one of the most learned men of his day, and his letters are filled with both erudition and zeal for reform.

Cultural Heritage and Aerobiology Dec 30 2019 Aerobiology is the science that studies the biological component of the atmosphere and its effects on living systems and on the environment. This term was used for the first time in 1935, but the attention of scientists to the biological component of the atmosphere goes back to 1769, when the Italian biologist Spallanzani carried out a series of experiments that disproved the concept of spontaneous generation of life and proved the presence of viable microorganisms in the air. Aerobiology has marked characteristics of interdisciplinarity: its application fields range from respiratory diseases to the airborne outbreak of animal and vegetal diseases and to the biodegradation of substances and materials. The latter is the subject of this book. The purpose of aerobiological research applied to the conservation of cultural heritage is to evaluate the risk of alteration by airborne microorganisms of materials forming

artefacts of historical, artistic and archaeological interest. Airborne spores and vegetative structures may develop on different substrates and may be a cause of degradation, in relation to the types of materials, the microclimatic situation and the pollution of the conservation environments. The qualitative and quantitative evaluation of the biological component of air, performed by means of targeted analysis campaigns, and of the characteristics of materials and environments, supplies indispensable information for the evaluation of the actual risk and the planning of interventions. This book is divided into four main parts.

Professors, Physicians and Practices in the History of Medicine Mar 01 2020 This book presents essays by eminent scholars from across the history of medicine, early science and European history, including those expert on the history of the book. The volume honors Professor Nancy Siraisi and reflects the impact that Siraisi's scholarship has had on a range of fields. Contributions address several topics ranging from the medical provenance of biblical commentary to the early modern emergence of pathological medicine. Along the way, readers may learn of the purchasing habits of physician-book collectors, the writing of history and the development of natural history. Modeling the interdisciplinary approaches championed by Siraisi, this volume attests to the enduring value of her scholarship while also highlighting critical areas of future research. Those with an interest in the history of science, the history of medicine and all related fields will find this work a stimulating and rewarding read.

ENCICLOPEDIA ECONOMICA ACCOMODATA ALL' INTELLIGENZA Jan 23 2022

Letters Sep 18 2021 This second volume of the Mediaeval Continuation contains Letters 31-60 of Peter Damian, the 11th-century monk and man of letters. While his epistolary style is varied - exhortatory, occasional, pastoral, reforming - his message is singular and simple in urging strict adherence to the canons of the Church. In Letter 31, also known as the Book

of Gomorrah, Damian deplores the degradation of the priesthood through the vice of sodomy and appeals to Pope Leo IX to educate and purge the clergy. In Letter 40, called the *Liber gratissimus* he opposes the reordination of those ordained by simonists.

The Routledge History of the Renaissance Jun 23 2019 Drawing together the latest research in the field, The Routledge History of the Renaissance treats the Renaissance not as a static concept, but as one of ongoing change within an international framework. It takes as its unifying theme the idea of exchange and interchange through the movement of goods, ideas, disease and people, across social, religious, political and physical boundaries. Covering a broad range of temporal periods and geographic regions, the chapters discuss topics such as the material cultures of Renaissance societies; the increased popularity of shopping as a pastime in fourteenth-century Italy; military entrepreneurs and their networks across Europe; the emergence and development of the Ottoman empire from the early fourteenth to the late sixteenth century; and women and humanism in Renaissance Europe. The volume is interdisciplinary in nature, combining historical methodology with techniques from the fields of anthropology, sociology, psychology and literary criticism. It allows for juxtapositions of approaches that are usually segregated into traditional subfields, such as intellectual, political, gender, military and economic history. Capturing dynamic new approaches to the study of this fascinating period and illustrated throughout with images, figures and tables, this comprehensive volume is a valuable resource for all students and scholars of the Renaissance.

Biodeterioration of Stone Surfaces Nov 08 2020 This is a timely volume in view of the considerable interest currently shown in the preservation of our cultural heritage, and the extensive and growing literature on the subject. Unfortunately, the latter is to be found in a wide variety of published sources, some aimed at a very specific readership and therefore not all that accessible to those who need this resource. The present volume draws together a spectrum of biodeterioration work from across the world to provide an overview of the materials examined and the methodologies employed to elucidate the nature of the problems, as well as an extensive and current bibliographical resource on lichen biodeterioration. Biodeterioration of historical and culturally important stone substrata is a complex problem to be addressed. Easy, risk-free solutions are simply not available to be dealt with by other than a wide range of expertise. Successful resolution of this issue will inevitably require a multidisciplinary effort, where biologists work in close cooperation with ecologists, geologists, geochemists, crystallographers, cultural property conservators, archaeologists, anthropologists, and historians in order to recommend the most effective management scheme. The advantage of this approach is obvious: multidisciplinary management teams with good leadership can ask more appropriate questions while developing much more thoughtful and informed decisions.

Niccolò di Lorenzo della Magna and the Social World of Florentine Printing, ca. 1470–1493 Jun 03 2020 A new history of one of the foremost printers of the Renaissance explores how the Age of Print came to Italy. Lorenz Böniger offers a fresh history of the birth of print in Italy through the story of one of its most important figures, Niccolò di Lorenzo della Magna. After having worked for several years for a judicial court in Florence, Niccolò established his business there and published a number of influential books. Among these were Marsilio Ficino's *De christiana religione*, Leon Battista Alberti's *De re aedificatoria*, Cristoforo Landino's commentaries on Dante's *Commedia*, and Francesco Berlinghieri's *Septe giornate della geographia*. Many of these books were printed in vernacular Italian. Despite his prominence, Niccolò has remained an enigma. A meticulous historical detective, Böniger pieces together the thorough portrait that scholars have been missing. In doing so, he illuminates not only Niccolò's life but also the Italian printing revolution generally. Combining Renaissance studies' traditional attention to bibliographic and textual concerns with a broader social and economic history of printing in Renaissance Italy, Böniger provides an unparalleled view of the business of printing in its earliest years. The story of Niccolò di Lorenzo furnishes a host of new insights into the legal issues that printers confronted, the working conditions in printshops, and the political forces that both encouraged and constrained the publication and dissemination of texts.

The Cambridge Companion to Machiavelli Jun 15 2021 Niccolò Machiavelli (1469–1527) is the most famous and controversial figure in the history of political thought and one of the iconic names of the Renaissance. The Cambridge Companion to Machiavelli brings together sixteen original essays by leading experts, covering his life, his career in Florentine government, his reaction to the dramatic changes that affected Florence and Italy in his lifetime, and the most

prominent themes of his thought, including the founding, evolution, and corruption of republics and principalities, class conflict, liberty, arms, religion, ethics, rhetoric, gender, and the Renaissance dialogue with antiquity. In his own time Machiavelli was recognized as an original thinker who provocatively challenged conventional wisdom. With penetrating analyses of *The Prince*, *Discourses on Livy*, *Art of War*, *Florentine Histories*, and his plays and poetry, this book offers a vivid portrait of this extraordinary thinker as well as assessments of his place in Western thought since the Renaissance.

Boccaccio's Naked Muse Jul 29 2022 Venturing outside the Decameron to the Latin works, and outside the usual textual and intertextual readings of Boccaccio to more broadly cultural and anthropological material, *Boccaccio's Naked Muse* offers fresh insights on this hugely significant literary figure.

Naples and Napoleon Nov 20 2021 In *Naples and Napoleon* John Davis takes the southern Italian Kingdom of the Two Sicilies as the vantage point for a sweeping reconsideration of Italy's history in the age of Napoleon and the European revolutions. The book's central themes are posed by the period of French rule from 1806 to 1815, when southern Italy was the Mediterranean frontier of Napoleon's continental empire. The tensions between Naples and Paris made this an important chapter in the history of that empire and revealed the deeper contradictions on which it was founded. But the brief interlude of Napoleonic rule later came to be seen as the critical moment when a modernizing North finally parted company from a backward South. Although these arguments still shape the ways in which Italian history is written, in most parts of the North political and economic change before Unification was slow and gradual; whereas in the South it came sooner and in more disruptive forms. Davis develops a wide-ranging critical reassessment of the dynamics of political change in the century before Unification. His starting point is the crisis that overwhelmed the Italian states at the end of the 18th century, when Italian rulers saw the political and economic fabric of the Ancien Régime undermined throughout Europe. In the South the crisis was especially far reaching and this, Davis argues, was the reason why in the following decade the South became the theatre for one of the most ambitious reform projects in Napoleonic Europe. The transition was precarious and insecure, but also mobilized political projects and forms of collective action that had no counterparts elsewhere in Italy before 1848, illustrating the similar nature of the political challenges facing all the pre-Unification states. Although Unification finally brought Italy's insecure dynastic principalities to an end, it offered no remedies to the insecurities that from much earlier had made the South especially vulnerable to the challenges of the new age: which was why the South would become a problem - Italy's 'Southern Problem'.

Jews in Byzantium Jan 11 2021 Byzantine Jews: Dialectics of Minority and Majority Cultures is the collective product of a three year research group convened under the auspices of Scholion: Interdisciplinary Research Center in Jewish Studies at the Hebrew University of Jerusalem. The volume provides both a survey and an analysis of the social and cultural history of Byzantine Jewry from its inception until the fifteenth century, within the wider context of the Byzantine world.

Venetian Humanism in an Age of Patrician Dominance May 27 2022 In comprehensive detail Margaret King analyzes the activities of the patricians who were predominant in the ranks of the humanists and who made humanist thought a powerful tool in the service of their class and of the city itself. Originally published in 1986. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press.
