The Work of Their Hands Mar 31 2020 Impelled by a call to share their gifts through service, Russian Mennonite women immigrating to Canada organized their own church societies (Vereine) as avenues of mission and spiritual strengthening. For women who were restricted from leadership positions within the church, these societies became the primary avenue of church involvement. Through them they contributed vast amounts of energy, time and financial resources to the mission activity of the church. The societies thus became a context in which women could speak, pray and creatively give expression to their own understanding of the biblical message. Using primary sources such as reports, letters, minutes, etc., as well as society histories, interviews and survey data, Redekop charts the development of these societies, from the establishment of the earliest ones in the 1870s to

their flowering in the fifties and sixties and their decline in the eighties and nineties. *The Work of Their Hands* elucidates the context in which Mennonite women lived their identity as Christian women, one considered appropriate by themselves and the institutional church. It also shows how changes to the societies, including declining membership and a shift in their primary focus from sewing and baking to one of spiritual fellowship, reflect the changing roles of women within the church, the home and the wider society. *The Work of Their Hands* is an important book in the history of Mennonite women's spirituality and will be a valuable resource for religious studies, women's studies and Canadian history.

Persuasive Technology Jul 04 2020 This book constitutes the refereed post-conference proceedings of the 16th International Conference on Persuasive Technology, PERSUASIVE 2021, held as a virtual event, in April 2021. The 17 full papers presented in this book together with 8 short papers were carefully reviewed and selected from 67 submissions. The papers are grouped in topical sections as follows: persuasive affective technology; digital marketing, ecommerce, etourism and smart ecosystems; and persuasion and education.

Advances in Tourism, Technology and Systems Sep 29 2022 This book features a collection of high-quality research papers presented at the International Conference on Tourism, Technology & Systems (ICOTTS 2020), held at the University of Cartagena, in Cartagena de Indias, Colombia, from 29th to 31st October 2020. The book is divided into two volumes, and it covers the areas of technology in tourism and the tourist experience, generations and technology in tourism, digital marketing applied to tourism and travel, mobile technologies applied

to sustainable tourism, information technologies in tourism, digital transformation of tourism business, e-tourism and tourism 2.0, big data and management for travel and tourism, geotagging and tourist mobility, smart destinations, robotics in tourism, and information systems and technologies.

Strange Oct 19 2021 Over fifty of the most fascinating accounts of history's greatest unsolved mysteries. Did werewolves roam the countryside of fifteenth century France? What exactly is El Chupacabra, a creature whose name translates to "The Goat Sucker" in English? What phantoms and apparitions drift the halls of Borley Rectory, earning it the nickname of "The Most Haunted House in England"? Featuring maps, callouts, and facts that locate these mysterious happenings, *Strange* is a groundbreaking book and the first of its kind. In this riveting account of history's most baffling mysteries, two of the world's leading authorities on the supernatural, writer Colin Wilson and his son, Damon, search for the elusive answers to the most puzzling questions of the all time—from the fate of Atlantis to the curses of the ancient Egyptians to the Bermuda Triangle. Dozens of mysteries, some that have puzzled scientists and thinkers for centuries, are collected, illustrated, and explained in this captivating—and chilling—book. Lavishly illustrated and expertly written, *Strange* continues the Wilsons' quest for answers to the great mysteries of the universe, taking readers on a journey beyond the imagination where fact seems stranger than fiction.

Formal Methods for Executable Software Models Jul 24 2019 This book presents 8 tutorial lectures given by leading researchers at the 14th edition of the International School on Formal Methods for the Design of Computer, Communication and Software Systems, SFM 2014, held in Bertinoro, Italy, in June 2014. SFM 2014 was devoted to executable software models and covered topics such as variability models, automated analysis techniques, deductive verification, and runtime assessment and testing. The papers collected in the two parts (first part: modeling and verification; second part: run-time assessment and testing) of this volume represent the broad range of topics of the school.

Seidman's Legislative History of Federal Income and Excess Profits Tax Laws, 1953-1939 Aug 29 2022 Seidman, J[acob] S. Seidman's *Legislative History of Federal Income and Excess Profits Tax Laws 1953-1939*. New York: Prentice-Hall, Inc., 1954. Two volumes, 1,884 pp. Reprinted 2003 by The Lawbook Exchange, Ltd. LCCN 2002041364. ISBN 1-58477-335-9. Cloth. \$350. * Covering the years 1939-1954 in inverse chronology, a collection of the texts of United States congressional committee reports, Congressional Records, reports of hearings, and laws passed or rejected, relating to all of the income tax provisions of the Revenue Acts that are of interpretive significance, this legislative history will be of interest to those arguing or ruling on tax cases. A continuation of Seidman's *Legislative History of Federal Income Tax Laws 1938-1861*, (also published by The Lawbook Exchange, Ltd.) with the addition of extensive material relating to excess profit tax laws.

Physics of Black Holes Jun 02 2020 Black Holes are still considered to be among the most mysterious and fascinating objects in our universe. Awaiting the era of gravitational astronomy, much progress in theoretical modeling and understanding of classical and quantum black holes has already been achieved. The present volume serves as a tutorial, high-level guided tour through the black-hole landscape: information paradox and blackhole thermodynamics, numerical simulations of black-hole formation and collisions, braneworld scenarios and stability of black holes with respect to perturbations are treated in great detail, as is their possible occurrence at the LHC. An outgrowth of a topical and tutorial summer school, this extensive set of carefully edited notes has been set up with the aim of constituting an advanced-level, multi-authored textbook which meets the needs of both postgraduate students and young researchers in the fields of modern cosmology, astrophysics and (quantum) field theory.

Critical Stability Constants Nov 19 2021 Over the past fifteen years the Commission on Equilibrium Data of the Analytical Division of the International Union of Pure and Applied Chemistry has been sponsoring a noncritical compilation of metal complex formation constants and related equilibrium constants. This work was extensive in scope and resulted in the publication of two large volumes of *Stability Constants* by the Chemical Society (London). The first volume, edited by L. G. Si"en (for inorganic ligands) and by A. E. Marte" (for

organic ligands), was published in 1964 and covered the literature through 1962. The second volume, subtitled Supplement No.1, edited by L. G. Si"en and E. Hogfeldt (for inorganic ligands) and by A. E. Marte" and R. M. Smith (for organic ligands), was published in 1971 and covered the literature up to 1969. These two large compilations attempted to cover a" papers in the field related to metal complex equilibria (heats, entropies, and free energies). Since it was the policy of the Commission during that period to avoid decisions concerning the quality and reliability of the published work, the compilation would frequently contain from ten to twenty values for a single equilibrium constant. In many cases the values would differ by one or even two orders of magnitude, thus frustrating readers who wanted to use the data without doing the extensive literature study necessary to determine the correct value of the constant in question.
