[The Age of Surveillance Capitalism](#) Mar 17 2021 THE TOP 10 SUNDAY TIMES BESTSELLER Shortlisted for the FT Business Book of the Year Award 2019 'Easily the most important book to be published this century. I find it hard to take any young activist seriously who hasn't at least familiarised themselves with Zuboff's central ideas.' - Zadie Smith, The Guardian The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control us. The heady optimism of the Internet's early days is gone. Technologies that were meant to liberate us have deepened inequality and stoked divisions. Tech companies gather our information online and sell it to the highest bidder, whether government or retailer. Profits now depend not only on predicting our behaviour but modifying it too. How will this fusion of capitalism and the digital shape our values and define our future? Shoshana Zuboff shows that we are at a crossroads. We still have the power to decide what kind of world we want to live in, and what we decide now will shape the rest of the century. Our choices: allow technology to enrich the few and impoverish the many, or harness it and distribute its benefits.

The Age of Surveillance Capitalism is a deeply-reasoned examination of the threat of unprecedented power free from democratic oversight. As it explores this new capitalism's impact on society, politics, business, and technology, it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization. Most critically, it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves.

[The Making of a Sage](#) Sep 22 2021 Jonathan Schofer offers the first theoretically framed examination of rabbinic ethics in several decades. Centering on one large and influential anthology, The Fathers According to Rabbi Nathan, Jonathan Schofer situates that text within a broader spectrum of rabbinic thought, while at the same time bringing rabbinic thought into dialogue with current scholarship on the self, ethics, theology, and the history of religions. Notable Selection, Jordan Schnitzer Book Award for Philosophy and Jewish Thought, Association for Jewish Studies

Manual of Retinal Diseases Nov 05 2022 This book is a comprehensive source of authoritative information on the clinical features, diagnosis, differential diagnosis, and management of medical and surgical retinal diseases. The Manual has 122 chapters, organized in 18 sections covering medical and surgical aspects of retinal diseases such as trauma, AMD, Uveitis, infections, endophthalmitis, pediatric diseases, dystrophies, and tumors. Easy-to-read chapters convey the fundamental concepts with the aid of clinical photographs, imaging studies (including fluorescein and indocyanine angiograms, ultrasonograms, CT scans, and MRI scans) and tables. The manual is of value to a wide range of practitioners and trainees, including students, residents, fellows and ophthalmologists who treat retinal diseases.

Green Energy to Sustainability: Strategies for Global Industries Oct 04 2022 Reviews the latest advances in biofuel manufacturing technologies and discusses the deployment of other renewable energy for transportation Aimed at providing an interface useful to business and scientific managers, this book focuses on the key challenges that still impede the realization of the billion-ton renewable fuels vision. It places great emphasis on a global view of the topic, reviewing deployment and green energy technology in different countries across Africa, Asia, South America, the EU, and the USA. It also integrates scientific, technological, and business development perspectives to highlight the key developments that are necessary for the global replacement of fossil fuels with green energy solutions. Green Energy to Sustainability: Strategies for Global Industries examines the most recent developments in biofuel manufacturing technologies in light of business, financial, value chain, and supply chain concerns. It also covers the use of other renewable energy sources like solar energy for transportation and proposes a view of the challenges over the next two to five decades, and how these will deeply modify the industrial world in the third millennium. The coming of age of electric vehicles is also looked at, as is the impact of their deployment on the biomass to biofuels value chain. Offers extensive updates on the field of green energy for global industries Covers the structure of the energy business; chemicals and diesel from biomass; ethanol and butanol; hydrogen and methane; and more Provides an expanded focus on the next generation of energy technologies Reviews the latest advances in biofuel manufacturing technologies Integrates scientific, technological and business perspectives Highlights important developments needed for replacing fossil fuels with green energy Green Energy to Sustainability: Strategies for Global Industries will appeal to academic researchers working on the production of fuels from renewable feedstocks and those working in green and sustainable chemistry, and chemical/process engineering. It is also an excellent textbook for courses in bioprocessing technology, renewable resources, green energy, and sustainable chemistry.
