Faces of Geometry Mar 12 2021 The volume reports on interdisciplinary discussions and interactions between theoretical research and practical studies on geometric structures and their applications in architecture, the arts, design, education, engineering, and mathematics. These related fields of research can enrich each other and renew their mutual interest in these topics through networks of shared inspiration, and can ultimately enhance the quality of geometry and graphics education. Particular attention is dedicated to the contributions that women have made to the scientific community and especially mathematics. The book introduces engineers, architects and designers interested in computer applications, graphics and geometry to the latest advances in the field, with a particular focus on science, the arts and mathematics education.

Analysis and Modeling of Faces and Gestures Jul 04 2020 This book constitutes the refereed proceedings of the Third International Workshop on Analysis and Modelling of Faces and Gestures, AMFG 2007, held within the scope of ICCV 2007, the International Conference on Computer Vision. The papers review the status of recognition, analysis and modeling of face, gesture, activity, and behavior. Topics addressed include feature representation, 3D face, video-based face recognition, facial motion analysis, and sign recognition.

The Faces May 26 2022 From Tove Ditlevsen, the acclaimed author of the Copenhagen Trilogy, comes *The Faces*, a searing, haunting novel of a woman on the edge, portrayed with all the vividness of lived experience. Copenhagen, 1968. Lise, a children's book writer and married mother of three, is increasingly haunted by disembodied faces and voices. She is convinced that her husband, already extravagantly unfaithful, will leave her. Most of all, she is scared that she will never write again. Yet as she descends into a world of pills and hospitals, she begins to wonder—is insanity really something to be feared, or does it bring a kind of freedom?

Development of Visual Memory for Faces and Scenes Feb 08 2021

Emotions Revealed Jun 22 2019 An expert on nonverbal communication traces the evolutionary roots of most basic human emotions--anger, sadness, fear, disgust, and happiness--revealing how they evolved and became embedded in the human brain while showing how they are triggered in the body. Original. 15,000 first printing.

Reading Faces Apr 24 2022 Do we read character in faces? What information do faces actually provide? Why do we associate certain facial qualities with particular character traits? What are the social and psychological consequences of reading character in faces? Zebrowitz unmask the face and provides the first systematic, scientific account of our tendency to judge people by their appearance. Offering an in-depth analysis of two appearance qualities that influence our impressions of others, "babyfacedness" and "attractiveness", and an account of these impressions, Zebrowitz has written an accessible and valuable book for professionals and general readers alike. The assumption that people's faces provide a window to their inner nature has a long and distinguished history, eloquently expressed in the works of ancient philosophers, like Aristotle, and great writers, like Shakespeare. Zebrowitz examines this assumption, focusing on four central points. She shows that facial appearance, particularly babyfacedness and attractiveness, has a strong impact on how we perceive an individual's character traits and on social outcomes in the workplace, in the criminal justice system, and in other settings. She proposes that facial stereotypes derive from evolutionarily adaptive reactions to useful information that faces can provide. She assesses the accuracy of facial stereotypes in light of plausible links between appearance and character. Finally, Zebrowitz suggests ways to counteract the consequences of reading faces.

The Book of Faces Sep 29 2022 A debut collection of poems by a poet whose works has appeared in *Poetry*, *Colorado Review*, and *New England Review* evokes Catullus, Petrarch, Spenser, Chaucer, Foucault, and others. Original.

Perception of Faces, Objects, and Scenes Jun 02 2020 From a barrage of photons, we readily and effortlessly recognize the faces of our friends, and the familiar objects and scenes around us. However, these tasks cannot be simple for our visual systems--faces are all extremely similar as visual patterns, and objects look quite different when viewed from different viewpoints. How do our visual systems solve these problems? The contributors to this volume seek to answer this question by exploring how analytic and holistic processes contribute to our perception of faces, objects, and scenes. The role of parts and wholes in perception has been studied for a century, beginning with the debate between Structuralists, who championed the role of elements, and Gestalt psychologists, who argued that the whole was different from the sum of its parts. This is the first volume to focus on the current state of the debate on parts versus wholes as it exists in the field of visual perception by bringing together the views of the leading researchers. Too frequently, researchers work in only one domain, so they are unaware of the ways in which holistic and analytic processing are defined in different areas. The contributors to this volume ask what analytic and holistic processes are like; whether they contribute differently to the perception of faces, objects, and scenes; whether different cognitive and neural mechanisms code holistic and analytic information; whether a single, universal system can be sufficient for visual-information processing, and whether our subjective experience of holistic perception might be nothing more than a compelling illusion. The result is a snapshot of the current thinking on how the processing of wholes and parts contributes to our remarkable ability to recognize faces, objects, and scenes, and an illustration of the diverse conceptions of analytic and holistic processing that currently coexist, and the variety of approaches that have been brought to bear on the issues.

Carving Realistic Faces with Power Nov 27 2019 Finally, a book for power carvers by a power carver! Learn to carve realistic facial features with confidence and ease. Concisely illustrated, step-by-step directions for carving the human head. Disciplines and guidelines pertaining to facial layout and proportion are coupled power carving techniques. Ten projects and plans.

Make Faces Sep 17 2021 Make faces—make art! Fifty-two images of everyday and unexpected objects provide the perfect canvases for creating funny, quirky, and completely original faces. Just add eyes, noses, mouths, ears, hair, and more from 6 vinyl sticker sheets packed with expressive features and other amusing accessories. Give a sunny-side up egg zipped lips, add a moustache, and mix and match eyes and brows. Make the moon (and a dumpling and a baseball) happy, or sad, or mad. And don't stop there—doodle and add speech bubbles to complete the characters. It's the ultimate face book!

Making Faces Oct 31 2022 This baby is happy. Can you make a happy face? Find the happy baby! This bold, beautiful board book features six essential facial expressions: happy, sad, angry, surprised, silly, and sleepy. The idea is simple: Show a large, establishing image of a baby's face, then children making the same face, then ask the reader to find that baby among several other faces. The very last spread includes all of the baby faces and a mirror so babies can watch themselves make every face imaginable.

Faces around the World: A Cultural Encyclopedia of the Human Face Jun 26 2022 This book provides a comprehensive examination of the human face, providing fascinating information from biological, cultural, and social perspectives. • A complete bibliography of sources and index of subjects • Includes 100 images, numerous sidebars, and interesting "pop-out" quotes related to the face

Animals Feb 20 2022 A chunky board book for babies in the Hello Baby brand- With simply illustrated images of very first animals- Pictures are set against alternating black-and-white backgrounds and are designed with bold colours to stimulate baby's vision- Clear text labels introduce key first words

[You Can Read a Face Like a Book](#) Jan 22 2022

A Big Book of Face Painting Nov 19 2021 Offers tips and techniques for face painting, with instructions for eighteen different projects, including flower fairy, frog king, madame butterfly, and zombie kid.

Faces and Facets Aug 17 2021

Faces Oct 26 2019 Scientists have emphasized the innate, genetically based nature of our fascination with the human face and its almost limitless expressive capacity, all of which is represented in the art of the last six centuries. But little attention has been paid to the anomaly of the vacuous expressions of earlier facial representations. Brener attributes this change to a change in the functioning of the human brain, as well as the role of cultural factors. It is the evolution of both genes and culture that has resulted in a marked increase in the human ability to create and interpret facial expressions. The result of this has impacted human behavior.

The Book of Mac Jul 16 2021 An album-by-album celebration of the life and music of Mac Miller through oral histories, intimate reflections, and critical examinations of his enduring work. "One of my most vivid memories of him is the way he would look at you while he was playing you a song. He tried to look you right in the eyes to see how you were feeling about it." —Will Kalson, friend and first manager Following Mac Miller's tragic passing in 2018, Donna-Claire Chesman dedicated a year to chronicling his work through the unique lens of her relationship to the music and Mac's singular relationship to his fans. Like many who'd been following him since he'd started releasing mixtapes at eighteen years old, she felt as if she'd come of age alongside the rapidly evolving artist, with his music being crucial to her personal development. "I want people to remember his humanity as they're listening to the music, to realize how much bravery and courage it takes to be that honest, be that self-aware, and be that real about things going on internally. He let us witness that entire journey. He never hid that." —Kehlani, friend and musician. The project evolved to include intimate interviews with many of Mac's closest friends and collaborators, from his Most Dope Family in Pittsburgh to the producers and musicians who assisted him in making his everlasting music, including Big Jerm, Rex Arrow, Wiz Khalifa, Benjy Grinberg, Just Blaze, Josh Berg, Syd, Thundercat, and more. These voices, along with the author's commentary, provide a vivid and poignant portrait of this astonishing artist—one who had just released a series of increasingly complex albums, demonstrating what a musical force he was and how heartbreaking it was to lose him. "As I'm reading the lyrics, it's crazy. It's him telling us that he hopes we can always respect him. I feel like this is a message from him, spiritually. A lot of the time, his music was like little letters and messages to his friends, family, and people he loved, to remind them of who he really was." —Quentin Cuff, best friend and tour manager

Faces and Places Oct 07 2020

Foodie Faces Sep 25 2019 Food, funny faces, and feelings combine in this cute and clever board book about emotions and healthy eating. No matter how you're feeling--silly, grumpy, happy, or shy--now you can see your face mirrored back on your dinner plate! Find twenty-two different emotions inside the pages of this book, made out of everything from strawberries to pita bread to carrots (and more). You'll be amazed by how real these foodie faces look, and might even be inspired to try a new food or two!

The Golden Ratio Within the Human Face and Breast Aug 05 2020 Why are only certain people considered physically beautiful? What is it - specifically - within their anatomy that these lucky few individuals possess that most of us simply do not? Can we somehow objectively test our own anatomy for beauty and then use our test results as a guide to change our physical appearance? Can we join this highly elite group of physically beautiful people? Dr. Andrew Hayduke's groundbreaking book is the first of its kind to explore a potential scientific explanation for why only certain faces and breasts appear physically beautiful. After decades of experience as a plastic surgeon in Beverly Hills and Palm Springs, California, Dr. Hayduke shares his unique perspective on this fascinating subject. The Golden Ratio Within the Human Face and Breast unveils the mysterious underlying secret blueprint for human physical beauty that exists hidden deep within the anatomic layout of attractive (i.e., beautiful) faces and breasts. The Golden Ratio Within the Human Face and Breast will: 1) Convince you to look beyond the expression "Beauty is in the eye of the beholder" and consider something far more intriguing as the true explanation for physical beauty. 2) Provide evidence that beauty is an objective quality rather than a mere subjective opinion. 3) Provide an all-access backstage pass to the secret clinical analysis methodologies used by a Beverly Hills plastic surgeon. 4) Illustrate how the faces and breasts of average-looking people can be transformed to a more beautiful appearance with the help of Dr. Hayduke's state-of-the-art facial and breast beauty tests. 5) Disclose a detailed description of the once-secret inner mechanism of both the Hayduke Facial Analysis test and the Hayduke Breast Analysis test-including the exact specifications of each anatomic test grid used within Dr. Hayduke's patented beauty analysis methodologies. 6) Explain the basics of the golden ratio (also known as the divine proportion, golden section, golden mean, golden proportion, divine section and golden number). 7) Illustrate how the golden ratio relationship of 1.618 to 1.0 is secretly hidden within many beautiful world-famous works of art, architecture, logos, and even nature.

The Three Faces of Chinese Power May 14 2021 "By learning more not only about China, but from China, America is more likely to sustain a constructive relationship with the rising China. Lampton insightfully provides us with the much-needed guidance."—Zbigniew Brzezinski, Center for Strategic and International Studies "Professor Lampton's stimulating and well-researched book provides a comprehensive framework for intelligent thinking about the implications for the United States and the world of the rapid expansion of China's economic and military power. Serious students of world affairs and non-specialists concerned about the outlook for U.S.-China relations will all benefit from the historically-based insights and judgments that fill the pages of this thought-provoking volume."—J. Stapleton Roy, former United States ambassador to China

All about Faces Oct 19 2021 Bold illustrations enhance this fun-filled introduction to the different features of the face, the way it is used to communicate with others, and the transformations it can undergo from one moment to the next, based on the actions and feelings of its owner.

[Schumann](#) Dec 09 2020 SCHUMANN: THE FACES & THE MASKS is a groundbreaking account of a major composer whose life and works have been the subject of intense controversy ever since his attempted suicide and early death in an insane asylum. Schumann was a key figure in the Romantic movement which enraptured poets, musicians, painters and their audiences in the early 19th century and beyond, right up to the present time. He embodied all the contrasting themes of Romanticism - he was intensely original and imaginative, but also worshipped the past; he believed in political, personal and artistic freedom but insisted on the need for artistic form. He turned his tumultuous life into music that speaks directly to the heart. Drawing on hitherto unpublished archive material, Chernaik provides new insight into Schumann's life and his music, his sexual escapades, his fathering of an illegitimate child, the true facts behind his courtship of Clara and the opposition of her monstrous father, and the ways in which the crises of his life fed into the dreams and fantasies of his greatest music.

FACES: Photography and the Art of Portraiture Feb 29 2020 There is so much detail to be captured in a face. Cicero (106-43 BC) said: "The face is a picture of the mind as the eyes are its interpreter." To capture a person's personality, there are many things to keep in mind, and the authors of FACES show us how to match up a personality with lighting, posing, and composition. Portraiture is truly an art, and this book dives deep into the details so that you end up with a gorgeous portrait that both you and your subject love. Not only is this book the most comprehensive title available on portraiture, but it contains stunning images. Each image is paired with a lighting diagram, a description of why the type of image was chosen, and then takes you through postproduction to put the finishing touches on. The authors also showcase a gallery of portraits by renowned photographers.

Baby Faces Dec 29 2019 Hey, baby! Look at these faces!

[Faces We Love Shanghai](#) Mar 31 2020 Go beyond the glitz, glamour, and bustle of one of the most populated cities on the planet and discover the real heartbeat and soul of Shanghai—its people. Through this collection of 100 mostly full-color photographs captured by a team of passionate artists and photographers, Faces We Love Shanghai takes you on a journey through the city's narrow alleyways and secluded backstreets. Each photograph reveals an untold story, showcasing the beauty and joy behind the everyday moments and people that are often overlooked. Also featured in the book

are photographs of a community working together as a team, supporting one another in a time of tremendous stress and anxiety, as COVID-19 swept the globe and the world pointed its finger at China. In a world divided, this stunning photography book cuts through the language barriers and cultural divide to bring you a work of pure craftsmanship—a collection that shows the true beauty of capturing people as they really are. Highlighting the raw and honest moments of life in Shanghai that are at times heartbreaking and hopeful, serendipitous and authentic, *Faces We Love Shanghai* is a love letter to a city visited by many but truly seen by few.

The Hero with a Thousand Faces Dec 21 2021 Examines myths and folk tales from around the world in an attempt to understand the symbolism of the hero as it appears in the mythologies and religions of mankind.

Invisible Faces and Hidden Stories Aug 24 2019 Dealing with narratives of vulnerable populations, this book looks at how they deal with dimensions of their social life, especially in regard to health. It reflects the socio-political ecologies like public hostility and stereotyping, neglect of their unique health needs, their courage to overcome adversity, and the love of family and healthcare providers in mitigating their problems. The narratives inform us about the dissimilarity between the way we speak, what we hear and how we act. American society likes to give the impression that it is listening to the plight of vulnerable populations, but the stories in this volume prove otherwise.

How to Draw Faces Step by Step Apr 12 2021 When you are learning to draw, you don't need a picture or two showing you what to do. You need tons of pictures to guide you gently through each of the many steps. Too many art books make enormous leaps with little explanation, forcing you out of the zone to waste time trying to figure out what the "Teacher" did. With this drawing book, each lesson will include tons of pictures and instructions to help you draw the best faces that you can and I explain all the details so you are never left staring at the picture thinking - How did she do that?. "Learning by Example" is the best way to learn how to draw faces. Instead of reading about drawing faces, learn how to draw faces by drawing alongside actual tutorials. Drawing people's faces is one of the most challenging things that you can learn how to do, and there is no better way to learn than to jump on in and start drawing. This drawing book teaches you how to draw all of the specific facial features of the head, including step by step tutorials for drawing ears, noses, eyes, hair, and mouths. You will learn how to draw proportional faces and heads of babies, children, women, men, adults, and the elderly. You will learn all about drawing a proportional face, as well as correctly placing features on the face. You will learn how to shade and add tone to the face, using graphite artists pencils and a few other inexpensive art tools. When you are done with this book, you will feel very comfortable drawing people's faces. Soon you will be drawing people's portraits and feeling proud of yourself. These tutorials are meant for later stage beginners and intermediate artists. Learning how to draw portraits and drawing people's faces has never been so easy. These step by step drawing lessons will guide you through the process of drawing people's faces with ease. Portrait drawing is the art of drawing people's faces and their facial features. Learn all about drawing portraits / drawing people's faces in this drawing book.

Art for Baby Jul 24 2019 This highly anticipated follow-up to *Art for Baby* (supporting the NSPCC) showcases the contemporary art world's best-known artists. Scientifically proven to be one of the first images a baby can understand, each page features a different face, with the added surprise of the baby's own face reflected in the mylar mirror on the final spread. The multicultural selection of artists is sure to have international appeal.

Food Faces Sep 05 2020 Food has never been more fun for little ones! In this delightful board book, children encounter friendly animal faces, all made out of favorite foods, including an owl (with kiwi eyes), a monkey (banana bread muffin), a butterfly (with fruit wings), and more.

Baby's Very First Book: Faces Jun 14 2021

Recognising Faces Aug 29 2022 Each of us is able to recognise the faces of many hundreds if not thousands of people known to us. We recognise faces despite seeing them in different views and with changing expressions. From these varying patterns we somehow extract the invariant characteristics of an individual's face, and usually remember why a face seems familiar, recalling where we know the person from and what they are called. In this book, originally published in 1988, the author describes the progress which has been made by psychologists towards understanding these perceptual and cognitive processes, and points to theoretical directions which may prove important in the future. Though emphasising theory, the book also addresses practical problems of eyewitness testimony, and discusses the relationship between recognising faces, and other aspects of face processing such as perceiving expressions and lipreading. The book was aimed primarily at a research audience, but would also interest advanced undergraduate students in vision and cognition.

Ed Emberley's Drawing Book of Animals Nov 07 2020 Explains how to use a few simple shapes, letters, numbers, and symbols to draw almost any animal.

Face Reading Essentials Jan 10 2021 The ancient practice of Mian Xiang is now condensed into easy-to-digest nuggets of information. If you've ever wanted to know more about people in general, and why we have such vastly different personalities, perceptions, and reactions, Face Reading is the first captivating step in a journey that will reveal plenty of interesting insights.
