Narrative and Numbers Mar 05 2020 How can a company that has never turned a profit have a multibillion dollar valuation? Why do some start-ups attract large investments while others do not? Aswath Damodaran, finance professor and experienced investor, argues that the power of story drives corporate value, adding substance to numbers and persuading even cautious investors to take risks. In business, there are the storytellers who spin compelling narratives and the number-crunchers who construct meaningful models and accounts. Both are essential to success, but only by combining the two, Damodaran argues, can a business deliver and sustain value. Through a range of case studies, Narrative and Numbers describes how storytellers can better incorporate and narrate numbers and how number-crunchers can calculate more imaginative models that withstand scrutiny. Damodaran considers Uber's debut and how narrative is key to understanding different valuations. He investigates why Twitter and Facebook were valued in the billions of dollars at their public offerings, and why one (Twitter) has stagnated while the other (Facebook) has grown. Damodaran also looks at more established business models such as Apple and Amazon to demonstrate how a company's history can both enrich and constrain its narrative. And through Vale, a global Brazil-based mining company, he shows the influence of external narrative, and how country, commodity, and currency can shape a company's story. Narrative and Numbers reveals the benefits, challenges, and pitfalls of weaving narratives around numbers and how one can best test a story's plausibility.

Narrative by Numbers Apr 29 2022 Shortlisted for the Business Book of the Year Awards in the Sales and Marketing category. As jobs become increasingly similar, there are two skills that everyone needs if they're going to thrive. These are the ability to interrogate and make sense of data, and the ability to use insights extracted from data to persuade others to act. Analytics + storytelling = influence. Humans are hardwired to respond to stories and story structure. Stories are how we make sense of and navigate the world. We respond best to stories that are based on evidence. But storytellers need to use data as the foundation of stories, not as the actual stories themselves. To be truly impactful, rational facts need to be presented with a veneer of emotion. The Big Data revolution means more data is available than ever. The trouble is, most people aren't very numerate or good at statistics. Many find it hard to look at data and extract insights. Meanwhile, those for whom numbers hold no fear don't always make the best storytellers. They mistakenly believe they need to prove their point by showing their workings. There are some simple and effective rules of data-driven storytelling that help everyone tell more

compelling, evidence-based stories, whoever they need to convince.

Narrative by Numbers shows you how.

The Classic Short Story, 1870-1925 Jun 27 2019
The ability to construct a nuanced narrative or complex character in the constrained form of the short story has sometimes been seen as the ultimate test of an author's creativity. Yet during the time when the short story was at its most popular - the late nineteenth and early twentieth centuries - even the greatest writers followed strict generic conventions that were far from subtle. This expanded and updated translation of Florence Goyet's influential *La Nouvelle, 1870-1925: Description d'un genre à son apogée* (Paris, 1993) is the only study to focus exclusively on this classic period across different continents. Ranging through French, English, Italian, Russian and Japanese writing - particularly the stories of Guy de Maupassant, Henry James, Giovanni Verga, Anton Chekhov and Akutagawa Ryunosuke - Goyet shows that these authors were able to create brilliant and successful short stories using the very simple 'tools of brevity' of that period. In this challenging and far-reaching study, Goyet looks at classic short stories in the context in which they were read at the time: cheap newspapers and higher-end periodicals. She demonstrates that, despite the apparent intention of these stories to question bourgeois ideals, they mostly affirmed the prejudices of their readers. In doing so, her book forces us to re-think our preconceptions about this 'forgotten' genre.

Reading Acquisition Oct 24 2021
Originally published in 1992. This book brings together the work of a number of distinguished international researchers engaged in basic research on beginning reading. Individual chapters address various processes and problems in learning to read - including how acquisition gets underway, the contribution of story listening experiences, what is involved in learning to read words, and how readers represent information about written words in memory. In addition, the chapter contributors consider how phonological, onset-rime, and syntactic awareness contribute to reading acquisition, how learning to spell is involved, how reading ability can be explained as a combination of decoding skill plus listening comprehension skill, and what causes reading difficulties and how to study these causes.

Stories of Your Life and Others May 31 2022
'A science fiction genius. . . Ted Chiang is a superstar.' GUARDIAN
With *Stories of Your Life and*

Others, his masterful first collection, multiple-award-winning author Ted Chiang deftly blends human emotion and scientific rationalism in eight remarkably diverse stories, all told in his trademark precise and evocative prose. From a soaring Babylonian tower that connects a flat Earth with the firmament above, to a world where angelic visitations are a wondrous and terrifying part of everyday life; from a neural modification that eliminates the appeal of physical beauty, to an alien language that challenges our very perception of time and reality, Chiang's rigorously imagined fantasias invite us to question our understanding of the universe and our place in it. 'United by a humane intelligence that speaks very directly to the reader, and makes us experience each story with immediacy and Chiang's calm passion.'

Korean Stories For Language Learners Oct 31 2019
The most enjoyable way to learn about an unfamiliar culture is through its stories—especially when they're told in two languages! *Korean Stories for Language Learners* introduces 42 traditional Korean folktales with bilingual Korean and English versions, presented on facing pages, together with detailed notes and exercises aimed at beginning learners of the language. The book can be used as a reader in first- and second-year Korean language courses or by anyone who wishes to learn about Korean folktales and traditional Korean culture. This elegantly illustrated volume is designed to help language learners expand their vocabulary and to develop a basic familiarity with Korean culture. The stories gradually increase in length and complexity throughout the book as the reader improves their vocabulary and understanding of the language. After the first few stories, the reader is asked to use the vocabulary in speaking and writing exercises. By reading these classic stories, they also are given a window into Korean culture and learn to appreciate the uniqueness of the country—which provides greater motivation to continue learning the difficult language. Cultural notes and discussion questions further reinforce one's understanding of the stories, and bolster one's language skills. Korean-English and English-Korean glossaries are included as well as an overview of the Korean Hangeul script. Audio recordings by native speakers help readers improve their pronunciation and inflection.

In this text a mother and baby look through a window at a wilderness. With each page the boy grows and the scene changes, by the time he is 20 the view is of a city. He gets married and has a child and moves to the country, where father and child look through the window at the wilderness outside.

[The Seven Basic Plots](#) Dec 02 2019
This remarkable and monumental book at last provides a comprehensive answer to the age-old riddle of whether there are only a small number of 'basic stories' in the world. Using a wealth of examples, from ancient myths and folk tales via the plays and novels of great literature to the popular movies and TV soap operas of today, it shows that there are seven archetypal themes which recur throughout every kind of storytelling. But this is only the prelude to an investigation into how and why we are 'programmed' to

imagine stories in these ways, and how they relate to the inmost patterns of human psychology. Drawing on a vast array of examples, from Proust to detective stories, from the Marquis de Sade to E.T., Christopher Booker then leads us through the extraordinary changes in the nature of storytelling over the past 200 years, and why so many stories have 'lost the plot' by losing touch with their underlying archetypal purpose. Booker analyses why evolution has given us the need to tell stories and illustrates how storytelling has provided a uniquely revealing mirror to mankind's psychological development over the past 5000 years. This seminal book opens up in an entirely new way our understanding of the real purpose storytelling plays in our lives, and will be a talking point for years to come.

[Who's Counting?](#) Jul 29 2019
Who's Counting features selected columns from Paulos' well-known ABC News series of the same name collected here in book form for the first time, along with updates and brand-new original essays from the author, to examine how better understanding data improves our thinking and decision-making. With examples from government, mass media, natural disasters, the COVID-19 pandemic, conspiracy theories, climate change, "fake news," and popular culture, Paulos shows how mathematics and logic are, along with a humble respect for truth, our most basic and reliable guides to reality.

Narrative Politics Jul 21 2021
Narrative Politics explores two puzzles. The first has long preoccupied social scientists: How do individuals come together to act collectively in their common interest? The second is one that has long been ignored by social scientists: Why is it that those who promote collective action so often turn to stories? Why is it that when activists call for action, candidates solicit votes, organizers seek new members, generals rally their troops, or coaches motivate their players, there is so much story-telling? Frederick W. Mayer argues that answering these questions requires recognizing the power of story to overcome the main obstacles to collective action: to surmount the temptation to free ride, to coordinate group behavior, and to arrive at a common understanding of the collective interest. In this book, Mayer shows that humans are, if nothing else, a story-telling, story-consuming animal. We use stories to make sense of our experience and to imbue it with meaning—our self-narratives define our sense of identity and script our actions. Because we are constituted by narrative, we can be moved by the stories told to us by others. That is why leaders who call a community to action seek to frame their invocations in a story in which tragedy and triumph hang in the balance, in which taking part in the collective action becomes a moral imperative rather than a matter of calculated self-interest. Drawing on insights from neuroscience and behavioral economics, political science and sociology, history and cultural studies, literature and narrative theory, *Narrative Politics* sheds light on a wide range of political phenomena from social movements to electoral politics to offer lessons for how the power of story fosters collective action.

Fifty Quick Ideas to Improve Your User Stories Mar 29 2022 This book will help you write better stories, spot and fix common issues, split stories so that they are smaller but still valuable, and deal with difficult stuff like crosscutting concerns, long-term effects and non-functional requirements. Above all, this book will help you achieve the promise of agile and iterative delivery: to ensure that the right stuff gets delivered through productive discussions between delivery team members and business stakeholders. Who is this book for? This is a book for anyone working in an iterative delivery environment, doing planning with user stories. The ideas in this book are useful both to people relatively new to user stories and those who have been working with them for years. People who work in software delivery, regardless of their role, will find plenty of tips for engaging stakeholders better and structuring iterative plans more effectively. Business stakeholders working with software teams will discover how to provide better information to their delivery groups, how to set better priorities and how to outrun the competition by achieving more with less software. What's inside? Unsurprisingly, the book contains exactly fifty ideas. They are grouped into five major parts: - Creating stories: This part deals with capturing information about stories before they get accepted into the delivery pipeline. You'll find ideas about what kind of information to note down on story cards and how to quickly spot potential problems. - Planning with stories: This part contains ideas that will help you manage the big-picture view, set milestones and organise long-term work. - Discussing stories: User stories are all about effective conversations, and this part contains ideas to improve discussions between delivery teams and business stakeholders. You'll find out how to discover hidden assumptions and how to facilitate effective conversations to ensure shared understanding. - Splitting stories: The ideas in this part will help you deal with large and difficult stories, offering several strategies for dividing them into smaller chunks that will help you learn fast and deliver value quickly. - Managing iterative delivery: This part contains ideas that will help you work with user stories in the short and mid term, manage capacity, prioritise and reduce scope to achieve the most with the least software. About the authors: Gojko Adzic is a strategic software delivery consultant who works with ambitious teams to improve the quality of their software products and processes. Gojko's book *Specification by Example* was awarded the #2 spot on the top 100 agile books for 2012 and won the Jolt Award for the best book of 2012. In 2011, he was voted by peers as the most influential agile testing professional, and his blog won the UK agile award for the best online publication in 2010. David Evans is a consultant, coach and trainer

specialising in the field of Agile Quality. David helps organisations with strategic process improvement and coaches teams on effective agile practice. He is regularly in demand as a conference speaker and has had several articles published in international journals.

Storytelling with Data Aug 02 2022 Don't simply show your data—tell a story with it! Storytelling with Data teaches you the fundamentals of data visualization and how to communicate effectively with data. You'll discover the power of storytelling and the way to make data a pivotal point in your story. The lessons in this illuminative text are grounded in theory, but made accessible through numerous real-world examples—ready for immediate application to your next graph or presentation. Storytelling is not an inherent skill, especially when it comes to data visualization, and the tools at our disposal don't make it any easier. This book demonstrates how to go beyond conventional tools to reach the root of your data, and how to use your data to create an engaging, informative, compelling story. Specifically, you'll learn how to: Understand the importance of context and audience Determine the appropriate type of graph for your situation Recognize and eliminate the clutter clouding your information Direct your audience's attention to the most important parts of your data Think like a designer and utilize concepts of design in data visualization Leverage the power of storytelling to help your message resonate with your audience Together, the lessons in this book will help you turn your data into high impact visual stories that stick with your audience. Rid your world of ineffective graphs, one exploding 3D pie chart at a time. There is a story in your data—Storytelling with Data will give you the skills and power to tell it!

The Schoolboy's Story Illustrated Aug 10 2020 The Schoolboy's Story is a short stories by Charles Dickens. Charles John Huffam Dickens (7 February 1812 - 9 June 1870) was an English writer and social critic. He created some of the world's most memorable fictional characters and is generally regarded as the greatest novelist of the Victorian period. During his life, his works enjoyed unprecedented fame, and by the twentieth century his literary genius was broadly acknowledged by critics and scholars. His novels and short stories continue to be widely popular. Born in Portsmouth, England, Dickens was forced to leave school to work in a factory when his father was thrown into debtors' prison. Although he had little formal education,

his early impoverishment drove him to succeed.

But the necklace takes a terrible toll on whoever wears it - a toll that Dana may not be prepared to face"--Publisher information. **The Forbidden Stories of Marta Veneranda** Nov 12 2020 Marta Veneranda, a Latina neoyorkina, finds that she inspires the confessional in people. In fact, when people come to her, they feel the need to reveal their most embarrassing and shameful stories. And through these reluctantly told tales, where characters enter and leave each other's narrations, Rivera-Valdes revisits and questions our most basic behavioral assumptions. In "Little Poisons," the narrator shares with Marta the minutiae of her self-help book-assisted liberation from her philandering husband, whom she will eventually poison to death, and whose mistress she will befriend: "In the fifteen years of marriage he would tell me everything, even about his sexual escapades-if he couldn't share them with me, who would he share them with? Besides, that way no one could come running to me spreading rumors." Beneath the humor is a dead-serious scrutiny of the commingling of Anglo and Latino cultures. At heart, the stories are an exposé of the comforts and discomforts of that cohabitation.

Three Korean Fairy Tales Aug 22 2021 This multicultural children's book presents a selection of traditional Korean folk tales that are instantly recognizable to Koreans of all ages. These treasured tales are retold by Kim So-un, an eminent storyteller who is a household name in Korea. The illustrations combine modern and traditional Korean art elements and techniques in telling these classic stories. In the Tuttle tradition of bringing beloved stories from other countries to new generations of readers, this book presents the following tales: "The Magic Gem" answers the question why do dogs and cats fight? When the house feline recovers the story's prized title jewel, the family dog bears a grudge that is passed down through the ages. "The Deer and the Woodcutter" follows a merciful man who saves a deer's life and is rewarded with love and luck. When he's turned into a rooster, he expresses his joy each dawn through his loud crowing. "The Tigers of the Kumgang Mountains" concludes the anthology with a cautionary tale about overcoming challenges. A hunter's son sets out for revenge but instead learns that things are not always as they appear, and that persistence and sacrifice hold richer rewards. With Three Korean Fairy Tales, kids and parents alike will learn about Korean culture by experiencing the country's rich storytelling tradition.
