[Ethnographies of Power](#) Dec 13 2020 Energy related infrastructures are crucial to political organization. They shape the contours of states and international bodies, as well as corporations and communities, framing their material existence and their fears and idealisations of the future. *Ethnographies of Power* brings together ethnographic studies of contemporary entanglements of energy and political power. Revisiting classic anthropological notions of power, it asks how changing energy related infrastructures are implicated in the consolidation, extension or subversion of contemporary political regimes and discovers what they tell us about politics today.

How to Read and Critique a Scientific Research Article

Aug 01 2022 Given the explosion of information and knowledge in the field of Life Sciences, adapting primary literature as materials in course work as part of active learning seems to be more effective in improving scientific literacy among science undergraduates than the pure transmission of content knowledge using traditional textbooks. In addition, students also read research articles as part of undertaking laboratory research projects useful for preparing them for graduate school. As such, a good grasp of reading and analytical skills is needed for students to understand how their research project contributes to the field that they are working in. Such skills are being taught at UK and USA universities. In Asia, this approach in teaching has not yet been as widespread,

although similar ideas are beginning to be used in education. Written as a quick guide for undergraduate students and faculty members dealing with scientific research articles as part of a module or research project, this book will be useful, especially in Asia, for students and faculty members as the universities look to incorporating the use of scientific research articles in their undergraduate teaching. For Life Science students, the first time they encounter a primary literature can be rather daunting, though with proper guidance, they can overcome the initial difficulties and become confident in dealing with scientific articles. This guidebook provides a structured approach to reading a research article, guiding the reader step-by-step through each section, with tips on how

to look out for key points and how to evaluate each section. Overall, by helping undergraduate students to overcome their anxieties in reading scientific literature, the book will enable the students to appreciate better the process of scientific investigations and how knowledge is derived in science.

On Critique Feb 12 2021 The relationship between sociology and social critique has haunted the discipline since its origins. Does critique divert sociology from its scientific project? Or is critique the ultimate goal of sociology, without which the latter would be a futile activity disconnected from the concerns of ordinary people? This issue has underpinned two divergent theoretical orientations that can be found in the discipline today: the critical sociology that was developed in its most elaborate form by Pierre Bourdieu, and the pragmatic sociology of critique developed by Luc Boltanski and his associates. In critical sociology, description in terms of power relations underscores the potency of mechanisms of oppression, the way the oppressed passively endure them, going so far in their alienation as to adopt the values that enslave them. Pragmatic sociology, by contrast, describes the actions of human beings who rebel but who are endowed with reason. It stresses their ability, in certain historical conditions, to rise up against their domination and construct new interpretations of reality in the service of critical activity. In

this major new book Boltanski develops a framework that makes it possible to reconcile these seemingly antagonistic approaches - the one determinist and assigning the leading role to the enlightening science of the sociologist, the other concerned to stick as closely as possible to what people say and do. This labour of unification leads him to rework central notions such as practice, institution, critique and, finally, 'social reality,' all with the aim of contributing to a contemporary renewal of practices of emancipation.

Critique as Social Practice

Dec 25 2021 This book provides an overview of recent debates about critical theory from Pierre Bourdieu via Luc Boltanski to the Frankfurt School. Robin Celikates investigates the relevance of the self-understanding of ordinary agents and of their practices of critique for the theoretical and emancipatory project of critical theory.

Islam as Critique May 06 2020 What would it mean to imagine Islam as an immanent critique of the West? Sayyid Ahmad Khan lived in a time of great tribulation for Muslim India under British rule. By examining Khan's work as a critical expression of modernity rooted in the Muslim experience of it, *Islam as Critique* argues that Khan is essential to understanding the problematics of modern Islam and its relationship to the West. The book re-imagines

Islam as an interpretive strategy for investigating the modern condition, and as an engaged alternative to mainstream Western thought. Using the life and work of nineteenth-century Indian Muslim polymath Khan (1817-1898), it identifies Muslims as a viable resource for both critical intervention in important ethical debates of our times and as legitimate participants in humanistic discourses that underpin a just global order. *Islam as Critique* locates Khan within a broader strain in modern Islamic thought that is neither a rejection of the West, nor a wholesale acceptance of it. The author calls this "Critical Islam". By bringing Khan's critical engagement with modernity into conversation with similar critical analyses of the modern by Reinhold Niebuhr, Hannah Arendt, and Alasdair MacIntyre, the author shows how Islam can be read as critique.

Comparative Law as Critique Apr 16 2021 Presenting a

critique of conventional methods in comparative law, this book argues that, for comparative law to qualify as a discipline, comparatists must reflect on how and why they make comparisons. Günter Frankenberg discusses not only methods and theories, but also the ethical implications and the politics of comparative law in bringing out the different dimensions of the discipline. *Comparative Law as Critique* offers various approaches that turn against the academic discourse of comparative law, including analysis of a widespread spirit of innocence in terms of method, and critique of human rights narratives. It also examines how courts negotiate differences between cases regarding Muslim veiling. The incisive critiques and comparisons in this book will be of essential reading for comparatists working in legal education and research, as well as students of comparative law and scholars in comparative anthropology and social sciences.

Critique of Black Reason Jan 02 2020 In Critique of Black Reason eminent critic Achille Mbembe offers a capacious genealogy of the category of Blackness—from the Atlantic slave trade to the present—to critically reevaluate history, racism, and the future of humanity. Mbembe teases out the intellectual consequences of the reality that Europe is no longer the world's center of gravity while mapping the relations among colonialism, slavery, and contemporary financial and extractive capital. Tracing the conjunction of Blackness with the biological fiction of race, he theorizes Black reason as the collection of discourses and practices that

equated Blackness with the nonhuman in order to uphold forms of oppression. Mbembe powerfully argues that this equation of Blackness with the nonhuman will serve as the template for all new forms of exclusion. With Critique of Black Reason, Mbembe offers nothing less than a map of the world as it has been constituted through colonialism and racial thinking while providing the first glimpses of a more just future.

Instrumental Reasoning and Systems Methodology Jan 14 2021 This book has been written primarily for the applied and social scientist and student who longs for an integrated picture of the foundations on which his research must ultimately rest; but hopefully the book may also serve philosophers interested in applied disciplines and in systems methodology. If integration was the major motto, the need for a methodology, appropriate to the teleological peculiarities of all applied sciences, was the main impetus behind the conception of the present work. This need I felt a long time ago in my own area of analytical and empirical research in accounting theory and management science; later I had the opportunity to teach, for almost a decade, graduate seminars in Methodology which offered particular insight into the methodological needs of students of such applied disciplines as business administration, education, engineering, informatics, etc. Out of this effort grew the present book which among other things tries, on one side,

to illuminate the difference and relationship between methods of cognition and methods of decision and on the other, to sketch a framework suitable for depicting means-end relationships in a holistic setting. I believe that a systems methodology which incorporates recent endeavours of deontic logic, decision theory, information economics and related areas would be eminently suited to break the ground for such a future framework. Yet systems theory has two major shortcomings which might prevent it from evolving into the desired methodology of applied science.

How to Critique Journal Articles in the Social Sciences Oct 03 2022 Journal articles form the bedrock of social science, but they can be unfamiliar and intimidating to students. This brief, introductory guide helps readers appreciate the rigor and pitfalls of research by comparing it to more ordinary ways of knowing. Each chapter focuses on a key aspect of articles, demystifying step-by-step the complexities of social research. Harris encourages readers to avoid naivete (accepting research findings as simple Truth) and cynicism (dismissing research as hopelessly flawed), and instead adopt a critical perspective that appreciates the strengths and weaknesses of any piece of scholarship. A new chapter on research design explores how scientists choose a broad approach to study a topic, which impacts subsequent research decisions. Exercises

throughout allow readers to practice the highlighted techniques in class discussion, short assignments, or a major writing project. Comprehensive yet succinct and accessible, the second edition of *How to Critique Journal Articles in the Social Sciences* equips students with the confidence to read and understand social research for use in their education, careers, and personal lives.

Transforming Education in the Gulf Region Nov 11 2020 Countries in the Arab Gulf are currently experiencing some of the fastest rates of growth and progress in the world. *Transforming Education in the Gulf Region* argues that education systems in these countries need to use innovative pedagogies and best practices in teaching and learning to educate all citizens so that they obtain the knowledge and skills to be productive members of society. This book will contribute to the transformation of education in the Gulf countries by suggesting best practices, research outcomes and case studies from experts in the Gulf region. It has become increasingly evident in recent years that Gulf countries need to use emerging learning technologies to cater for the needs of learners and to provide maximum flexibility in learning. There is also a growing practical need to use electronic technologies, since learning materials are more widely available in electronic formats than in paper-based formats. This book focuses on the role of emerging technologies and innovative

pedagogies in transforming education in six Gulf countries in the region (Saudi Arabia, United Arab Emirates, Kuwait, Qatar, Oman and Bahrain). With contributions from experts around the world, the book argues that the time is right for Arab Gulf countries to make the transition to electronic learning and that they need to implement the outcomes of research and adopt best practices to transform and revolutionize education to prepare learners in the Gulf region for the 21st Century. The book should be of interest to academics and students in the areas of higher education, learning technologies, education policy and education reform. It should also be of interest to educators and policymakers in the Gulf region.

Poverty in the Philippines Jul 08 2020 Against the backdrop of the global financial crisis and rising food, fuel, and commodity prices, addressing poverty and inequality in the Philippines remains a challenge. The proportion of households living below the official poverty line has declined slowly and unevenly in the past four decades, and poverty reduction has been much slower than in neighboring countries such as the People's Republic of China, Indonesia, Thailand, and Viet Nam. Economic growth has gone through boom and bust cycles, and recent episodes of moderate economic expansion have had limited impact on the poor. Great inequality across income brackets, regions, and sectors, as well as unmanaged

population growth, are considered some of the key factors constraining poverty reduction efforts. This publication analyzes the causes of poverty and recommends ways to accelerate poverty reduction and achieve more inclusive growth. It also provides an overview of current government responses, strategies, and achievements in the fight against poverty and identifies and prioritizes future needs and interventions. The analysis is based on current literature and the latest available data, including the 2006 Family Income and Expenditure Survey.

Reading At University Jul 20 2021 Reading as a student demands new skills and new disciplines. Students must read. Though most students can read fairly well, few can make as much or as efficient use as possible of the time they devote to reading for academic purposes. Many guides to study offer a pot pourri of techniques for improving reading skills. None gives as full a treatment of this essential and underpinning area of academic life as *Reading at University*. The authors believe that students must change both the ways in which they read and the ways in which they think

about reading. This book offers effective and efficient strategies for fulfilling students' reading and study potential.

Accessing Kant Sep 21 2021 Jay Rosenberg introduces Immanuel Kant's masterwork, the *Critique of Pure Reason*, from a 'relaxed' problem-oriented perspective which treats Kant as an especially insightful practising philosopher, from whom we still have much to learn, intelligently and creatively responding to significant questions that transcend his work's historical setting. Rosenberg's main project is to command a clear view of how Kant understands various perennial problems, how he attempts to resolve them, and to what extent he succeeds. The constructive portions of the *First Critique* - the *Aesthetic* and *Analytic* - are explored in detail; the *Paralogisms* and *Antinomies* more briefly. At the same time the book is an introduction to the challenges of reading the text of Kant's work and, to that end, selectively adopts a more rigorous historical and exegetical stance. *Accessing Kant* will be an invaluable

resource for advanced students and for any scholar seeking Rosenberg's own distinctive insights into Kant's work.

To Kill a Mockingbird Feb 24 2022 Voted America's Best-Loved Novel in PBS's The Great American Read Harper Lee's Pulitzer Prize-winning masterwork of honor and injustice in the deep South—and the heroism of one man in the face of blind and violent hatred One of the most cherished stories of all time, *To Kill a Mockingbird* has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime. *The Empire of Civil Society* Oct 23 2021 This text presents a series of case studies - including classical Greece, Renaissance Italy and the Portuguese and Spanish empires - to show how the historical-materialist analysis
