New Zealand, grade: A , course: Bachelor degree, language: English, abstract: Globally, the process of migration is a complicated phenomenon involving huge numbers of people moving from one country to another to escape from unstable conditions and to seek better living conditions and opportunities. Recent political upheavals have increased the number of those people who are seeking asylum in far off areas from their land 2. Since last two centuries, Australia has been shaped by immigrants. Immigration plays a key role in Australian population growth and economic development. The

political trends have also impacted the country's immigration policy, especially in the last decade. This paper discusses these political trends and the fluctuations the Australian immigration policy has witnessed in the last ten years due to domestic political trends, multiculturalism policy, two-step immigration policies, the recent asylum seekers issue and globally increased security threats.

Ten Years to Midnight Mar 07 2021 “Shows how humans have brought us to the brink and how humanity can find solutions. I urge people to read with humility and the daring to act.” —Harpal Singh, former Chair, Save the Children, India, and former Vice Chair, Save the Children International In conversations with people all over the world, from government officials and business leaders to taxi drivers and schoolteachers, Blair Sheppard, global leader for strategy and leadership at

PwC, discovered they all had surprisingly similar concerns. In this prescient and pragmatic book, he and his team sum up these concerns in what they call the ADAPT framework: Asymmetry of wealth; Disruption wrought by the unexpected and often problematic consequences of technology; Age disparities--stresses caused by very young or very old populations in developed and emerging countries; Polarization as a symptom of the breakdown in global and national consensus; and loss of Trust in the institutions that underpin and stabilize society. These concerns are in turn precipitating four crises: a

crisis of prosperity, a crisis of technology, a crisis of institutional legitimacy, and a crisis of leadership. Sheppard and his team analyze the complex roots of these crises--but they also offer solutions, albeit often seemingly counterintuitive ones. For example, in an era of globalization, we need to place a much greater emphasis on developing self-sustaining local economies. And as technology permeates our lives, we need computer scientists and engineers conversant with sociology and psychology and poets who can code. The authors argue persuasively that we have only a decade to make headway on these problems.
