International Initiatives in Biotechnology for Developing Country Agriculture Oct 20 2021 A growing number of international initiatives are being undertaken to stimulate the development of agricultural biotechnology applications in developing countries. These initiatives, which include a wide range of biotechnology research, information and advisory activities, are supported by bilateral and multilateral agencies, private foundations and, to some extent, by commercial firms. This study, based on the results of a survey conducted by the Intermediary Biotechnology Service (IBS) at The Hague, attempts to analyse the nature and scope of these initiatives and their potential impact. The

study concludes by outlining a number of planning, execution and policy conditions which need to be met, both by donor agencies and by developing countries, if the potential impact of these international initiatives is to be fully realised ...

Consumer Spending Patterns in the European Community May 03 2020 **Organization and Performance of Cotton Sectors in Africa** Aug 18 2021 This book provides an empirically based, analytical assessment of the experience of reform in nine countries across Sub Saharan Africa representing a range of cotton sector structures, a must-read for all persons with a serious interest in an empirical evaluation of the performance of cotton industry structures in Africa.

CEE Countries in EU Companies' Strategies of Industrial Restructuring and Relocation Jun 27 2022 Describes trends in foreign direct investment and their impact on labor markets in ten CEE countries: Poland, Czech Republic, Hungary, Slovenia, Slovakia, Estonia, Lithuania, Latvia, Bulgaria, and Romania.

A Bend in the River of Life Aug 06 2020 Sabrina and her sister, Samara, are Anglo-Indian girls raised by strong-minded and free-spirited parents. Their father proudly represented Mysore State as a passionate young athlete and their mother, already a successful teacher, chose to pursue her Masters degree in Literature at the age of 50. They were the ideal parents who brought their daughters up to be strong, independent women but at the same time, took care of their needs and were present whenever they needed the support. Who could have guessed that these two solid individuals, who never had the word "can't" in their vocabulary, would be reduced to mere vegetative states, as the dreaded Parkinson's disease hit them one after the other? Heartbroken, Sabrina and Samara watch their parents degenerate slowly, with no hope for recovery or an end to their misery. As they go through the trials of life, their growing family struggles to come to terms with Parkinsonism, a disease that presently has no cure. Through all the highs and lows, Sabrina recognizes the value of living in the moment and treasuring the beautiful memories one makes with family—even with a bend in the river of life.

The Future of Productivity May 27 2022 This book addresses the rising productivity gap between the global frontier and other firms, and identifies a number of structural impediments constraining business start-ups, knowledge diffusion and resource allocation (such as barriers to up-scaling and relatively high rates of skill mismatch).

The State of World Rural Poverty Apr 13 2021 Despite almost four decades and billions of dollars in development activities, we are barely in a position to track the changing dynamics of poverty or to define with conviction the processes that entrap the poor in their misery. Accounting for about 90% of global poverty, rural poverty, through transmigration, is also a main contributor to urban poverty. It is in the rural areas of the world where poverty is most severe in human terms, where the hunger, hopelessness, hardship, and despair commonly associated with entrenched poverty are most pronounced, where basic health services, sanitation, educational opportunities, and other common amenities are most lacking. The alleviation of rural poverty is therefore tantamount to the alleviation of global poverty in its entirety. The State of World Rural Poverty offers the first comprehensive look at the economic conditions and prospects of the world's rural poor.

International Assessment Of Research And Development In Catalysis By Nanostructured Materials Sep 26 2019 Catalyst technologies account for over \$1 trillion of revenue in the U.S. economy alone. The applications range from medicines and alternative energy fuel cell technologies to the development of new and innovative clothing fibers. In this book, a World Technology Evaluation Center (WTEC) panel of eight experts in the field assesses the current state of research and development in catalysis by nanostructured materials, its sources of funding, and discusses the state of the field with respect to productivity and leadership in various nations around the world. In addition to showing the numerous and highly advantageous practical applications of the field, the panel concludes that Western Europe is currently the most productive region, followed closely by the United States. Still, the research and development output of the

People's Republic of China has recently surpassed that of Japan and is now poised to surpass that of the U.S. as well. As such, this assessment is a timely review of the field's progress, taking into account the increasing contributions from Asia, and will be essential reading for professionals, whether they are seeking an in-depth summary of the state of the art or a broad view of trends affecting the discipline. /a

Impact evaluation of research by the International Food Policy Research Institute on agricultural trade liberalization, developing countries, and WTO's Doha negotiations Jan 11 2021 "This report assesses the impact of IFPRI's work on the agriculture negotiations in the WTO's Doha Round. It is set against the context of IFPRI's mission which emphasizes food security and the interests of poor people in low-income countries and underlines the importance of active engagement in policy communications to link research work to policy action. The report also traces briefly the evolution of IFPRI's work on international agricultural trade more generally, noting its broad disposition to market-oriented policy prescriptions while illuminating the very different impacts of agricultural trade liberalization on individual developing countries through detailed research at the national and household level." -- from Author's Abstract

Women's Status and Fertility in Developing Countries Mar 13 2021
The relationship between women's status, which is defined in terms of the degree to which they are economically dependent on men, and fertility in developing countries is examined. The paper adopts a particular theoretical perspective regarding fertility determinants and explores the implications of women's status within that context. This perspective gives special attention to the value of children as security assets in settings where public welfare assistance is minimal or non-existent and financial and insurance markets are poorly developed. In this context, women's economic status, and the institutional factors that

create a degree of dependence, determine the relevance of sex of children in defining security goals. High dependence results in defining security goals in terms of surviving sons. Given similar security needs, and other things being equal, fertility will be considerably higher in settings where there is a strong preference for sons than in settings where son preference is weak. A cross-national empirical analysis is presented that supports this argument.

Newly Industrializing Countries After Asian Crisis Sep 06 2020
Communications: Wireless in Developing Countries and Networks of the Future Aug 25 2019
Communications: Wireless in Developing Countries and Networks of the Future The present book contains the proceedings of two conferences held at the World Computer Congress 2010 in Brisbane, Australia (September 20-23) organized by the International Federation for Information Processing (IFIP): the Third IFIP TC 6 International Conference on Wireless Communications and Information Technology for Developing Countries (WCITD 2010) and the IFIP TC 6 International Network of the Future Conference (NF 2010). The main objective of these two IFIP conferences on communications is to provide a platform for the exchange of recent and original contributions in wireless networks in developing countries and networks of the future. There are many exciting trends and developments in the communications industry, several of which are related to advances in wireless networks, and next-generation Internet. It is commonly believed in the communications industry that a new generation should appear in the next ten years. Yet there are a number of issues that are being worked on in various industry research and development labs and universities towards enabling wireless high-speed networks, virtualization techniques, smart networks, high-level security schemes, etc. We would like to thank the members of the Program Committees and the external reviewers and we hope these proceedings will be very useful to all researchers interested in the fields of wireless networks and future network technologies.

IMF Research Bulletin, March 2016 Dec 10 2020 The IMF Research Bulletin includes listings of recent IMF Working Papers and Staff Discussion Notes. The research summaries in this issue are “Explaining the Recent Slump in Investment” (Mathieu Bussiere, Laurent Ferrara, and Juliana Milovich) and “The Quest for Stability in the Housing Markets” (Hites Ahir). The Q&A column reviews “Seven Questions on Estimating Monetary Transmission Mechanism in Low-Income Countries” (Bin Grace Li, Christopher Adam, and Andrew Berg). Also included in this issue are updates on the IMF’s official journal, the IMF Economic Review, and recommended readings from IMF Publications. IRRI Research Paper Series May 15 2021

Globalization and Poverty Nov 08 2020 Over the past two decades, the percentage of the world’s population living on less than a dollar a day has been cut in half. How much of that improvement is because of—or in spite of—globalization? While anti-globalization activists mount loud critiques and the media report breathlessly on globalization’s perils and promises, economists have largely remained silent, in part because of an entrenched institutional divide between those who study poverty and those who study trade and finance. *Globalization and Poverty* bridges that gap, bringing together experts on both international trade and poverty to provide a detailed view of the effects of globalization on the poor in developing nations, answering such questions as: Do lower import tariffs improve the lives of the poor? Has increased financial integration led to more or less poverty? How have the poor fared during various currency crises? Does food aid hurt or help the poor? Poverty, the contributors show here, has been used as a popular and convenient catchphrase by parties on both sides of the globalization debate to further their respective arguments. *Globalization and Poverty* provides the more nuanced understanding necessary to move that debate beyond the slogans.

Reading in the mobile era Sep 18 2021 Millions of people do not read for one reason: they do not have access to text. But mobile phones and

cellular networks are transforming a scarce resource into an abundant one. Drawing on the analysis of over 4,000 surveys collected in seven developing countries and corresponding qualitative interviews, this report paints a detailed picture of who reads books and stories on mobile devices and why. The findings illuminate, for the first time, the habits, beliefs and profiles of mobile readers in developing countries. This information points to strategies to expand mobile reading and, by extension, the educational and socio-economic benefits associated with increased reading. Mobile technology can advance literacy and learning in underserved communities around the world. This report shows how.

IFPRI country programs: Lessons from case study successes Dec 22 2021 This study was undertaken as part of a larger learning exercise to assess the outcomes and impacts of the International Food Policy Research Institute’s country programs. It reports on in-depth probing of selected successful research contributions to policy outcomes in order to determine if there are any common approaches and actions taken by country program leaders that helped to foster the successes. The selection of case studies was not comprehensive— there were many more identified by country program leaders—nor random, because we desired to have samples from all the countries with country programs. A semi-structured interview approach was followed by the authors and guided by a list of questions (found in Appendix B). The results showed that important factors making successful contributions to policy were building high credibility with local policy makers and donors, having direct access to senior policy makers, partnering with the right people, conducting research on issues over the longer term and not just responding to crises, organizing conferences and meetings around research evidence, and strengthening national capacity for policy research.

Economic Growth in Developing Countries Apr 01 2020 Economic growth across countries during the last 30 years or so has displayed 'dual' divergence between developed and developing countries, and among developing countries. The structural transformation has been either slow or of an anomalous nature. The study addresses these and suggests how they can catch-up with developed world.

Handbook of Research on In-Country Determinants and Implications of Foreign Land Acquisitions Mar 25 2022 Several studies have investigated the impetus and implications behind large-scale land acquisitions/deals at the global level; however, intranational factors within communities and societies have not received much attention from researchers. The Handbook of Research on In-Country Determinants and Implications of Foreign Land Acquisitions examines the economic, sociological, and environmental issues surrounding land transactions and the impact these deals may have on local households and communities. Focusing on international issues as well as domestic concerns, this publication is a useful reference for policymakers, academics, researchers, and advanced-level students in various disciplines.
