Frequently Asked Questions in Islamic Finance Jul 09 2020 In Frequently Asked Questions in Islamic Finance, industry expert Brian Kettell answers some of the most frequently asked questions from his many years experience in working and teaching in Islamic finance and banking. From knowledge of the Qu'ran and Sharia'a Law, to new and old Islamic financial concepts, Islamic terms, and Islamic financial instruments and services, this book covers all the key areas that practitioners need to Islamic finance. The book addresses individual questions such as "what is Takaful?", and provide answers with a clear overview of the product or service, and an example, or illustration where appropriate, of how they work in practice. The book also features a question and answer section for readers to test and build their knowledge of the area. Light, entertaining and varied in its approach, Frequently Asked Questions in Islamic Finance will prove popular for experienced practioners and novices alike.

Islamic Finance Nov 12 2020 This book provides an overview of the practice of Islamic finance and the historical roots that define its modes of operation. The focus of the book is analytical and forward-looking. It shows that Islamic finance exists mainly as a form of rent-seeking legal-arbitrage. In every aspect of finance - from personal loans to investment banking, and from market structure to corporate governance - Islamic finance aims to replicate in Islamic forms the substantive functions of contemporary financial instruments, markets, and institutions. By attempting to replicate the substance of contemporary financial practice using pre-modern contract forms, Islamic finance has arguably failed to serve the objectives of Islamic law. This book proposes refocusing Islamic finance on substance rather than form. This approach would entail abandoning the paradigm of 'Islamization' of every financial practice. It would also entail reorienting the brand-name of Islamic finance to emphasize issues of community banking, micro-finance, and socially responsible investment.

Artificial Intelligence and Islamic Finance Aug 10 2020 This book provides a systematic overview of the current trends in research relating to the use of artificial intelligence in Islamic financial institutions (IFIs), across all organization of Islamic cooperation (OIC) countries. Artificial Intelligence and Islamic Finance discusses current and potential applications of artificial intelligence (AI) for risk management in Islamic finance. It covers various techniques of risk management, encompassing asset and liability management risk, credit, market, operational, liquidity risk, as well as regulatory and Shariah risk compliance within the financial industry. The authors highlight AI's ability to combat financial crime such as monitoring trader recklessness, anti-fraud and anti-money laundering, and assert that the capacity of machine learning (ML) to examine large amounts of data allows for greater granular and profound analyses across a variety of Islamic financial products and services. The book concludes with practical limitations around data management policies, transparency, and lack of necessary skill sets within financial institutions. By adopting new methodological approaches steeped in an Islamic economic framework (e.g., analysing FinTech in the context of Shariah principles and Islamic values), it devises practical solutions and generates insightful knowledge, helping readers to understand and explore the role of technological enablers in the Islamic finance industry, such as RegTech and artificial intelligence, in providing better and Shariah-compliant services to customers through digital platforms. The book will attract a wide readership spanning Shariah scholars, academicians, and researchers as well as Islamic financial practitioners and policy makers.

Islamic Finance: a Practical Introduction Nov 05 2022 Packed with practical information, in bite-sized chunks, this book is the ideal introduction to Islamic finance.

Intermediate Islamic Finance Sep 22 2021 "The principal objective of this intermediate book on Islamic finance is to address selected issues in the theory and practice of Islamic finance that typical fall beyond the contents of classic introductory text books on the subject matter. These topics are often discussed at very basic level. The list of special topics includes the stability of Islamic finance, the role of ethics, the scope of financial engineering and derivatives, the function of Islamic capital markets, as well as perspectives on Islamic structured finance, corporate finance, and financial inclusion. The book can serve as a guide to hitherto unexplored avenues of research in Islamic finance for graduate and post-graduate students. This book includes: - some reference to case studies and specific problems in the practice of Islamic finance as well as conventional finance - a list of suggested further readings per chapter - appendices that include details of advanced analysis for the purpose of simplifying the level of discussion for advanced undergraduate students - graphs, figures, tables on financial and economic data"--

An Introduction to Islamic Finance Jan 27 2022 The first book to offer comprehensive coverage of Islamic finance and banking and its applications to the rest of the world, now fully revised and updated. The ongoing international financial crisis has reignited debate over the development of a risk-sharing financial system, such as that required in Shariah Law. An Introduction to Islamic Finance: Theory and Practice, Second Edition highlights the core principles of risk sharing in Islam, arguing that a risk-sharing financial system is exactly what we need to promote greater financial stability. Providing comprehensive coverage of the fundamental theory behind Islamic finance and banking, according to the core concepts of Shariah law, authors Zamir Iqbal and Abbas Mirakhor clearly explain the distinct features of an Islamic financial system and how it compares with traditional financial models. Addressing the myriad important developments that have taken place in recent years, this second edition looks to the future, addressing emerging issues sure to influence future developments in Islamic finance. Explores the unique features of an Islamic financial system, how they compare to more traditional financial systems, and how they could improve them. Discusses all the most recent developments and emerging issues in Islamic finance. Updated with the latest developments, trends, innovations, and statistics, this new edition features additional chapters on the financial crisis, globalization, non-bank financial institutions, and recent developments in Takaful (Islamic insurance). The first edition of An Introduction to Islamic Finance established the book as the market leader, and this newly revised and updated second edition incorporates the most recent developments in this booming financial sector, including financial stability, globalization, and non-banking financial institutions.

Contracts and Deals in Islamic Finance Feb 13 2021 A very accessible and concise guide to Islamic finance Contracts and Deals in Islamic Finance provides a clearbreakdown of Islamic financial contracts and deal structures for beginners. The embedded requirements within selected Islamicfinancial contracts, such as risk weightage, capital structures, creations of cash flows, and balance sheets, are explained fully to provide a solid understanding of the backbone of the industry. Aimed primarily at beginners and those with a background in conventional banking, this book guides readers through the majorcontracts, how they're applied, and how to discern a contract'slegitimacy. Case studies and interviews with bankers and globalregulators provide real-life examples of contract application, andthe author's own experiences provide deep insight into the everydayissues that arise. Ancillary instructor's materials includePowerPoint slides and lecture notes that facilitate use in theclassroom. Literature describing the application of Islamic financialcontracts is few and far between, and those providing a basicbreakdown of these contracts and questioning their validity arerarer still. This book is the first of its kind, offering a basicapproach to understanding Islamic contracts, designed for the truebeginner. Understand the current contracts applied in Islamicbanking. Learn how contracts are applied across differentjurisdictions. Identify illegitimate contracts and those not in the spirit ofShariah law. Examine the current economic realities surrounding Islamicfinance. By highlighting the underlying themes in Islamic finance andassessing the current practices, this book gives readers the solidunderstanding and up-to-date perspective that form a solidfoundation upon which successful Islamic finance is practiced. For a solid introduction to the Islamic finance industry, Contracts and Deals in Islamic Finance is an accessible, practical guide.

The Islamic Finance Dec 02 2019 Doctoral Thesis / Dissertation from the year 2014 in the subject Economics - Finance, grade: Successful Defense, Mendel University (Economics), course: International Management, language: English, abstract: This work analyzes whether in recent years Islamic financial developments apply globally, for example to Germany. The author is interested in the reality of Islamic finance and its potential existence in non-Muslim environments. In much of the extant literature, studies consider a theoretical model such as: "The stability of Islamic finance". The authors in these studies tend to focus on global Islamic banks. In the present study, the Author wants to examine the situation for a specific non-Muslim country like Germany. The second focus is to find out whether there is a relationship between the number of Muslims in Germany and the need for Islamic financial products. A detailed view of market entry and critical key indicators are analysed. The current laws and their handling by Islamic banks will additionally be examined. To complete this research, a comparison with a country with more real market experiences in the field of Islamic finance, such as Turkey, will be undertaken. Are there certain Islamic, Jewish, Christian Practices and Aims for Business? With this background, starting from the year 2000, the author observed and investigated economics sources. Here, the concrete issue of Islamic finance became more and more compelling. The development of Islamic finance in recent decades is characterized by increasing, worldwide market share. With the most recent crisis of 2008, Islamic finance strengthened its global attention. This was due to profit increases throughout the period of crisis.

Contemporary Islamic Finance Jan 03 2020 A comprehensive look at the innovations, applications, and best practices of Islamic finance Islamic-compliant finance is transacted in every major world financial center, and the need for information on the topic in light of its global reach has grown exponentially. As an expert in this field, author Karen Hunt-Ahmed understands the intricacies of this area of the capital markets. Now, along with the help of a number of experienced contributors, she skillfully addresses Islamic finance from the perspective of practitioners, examining issues in wealth management, contract law, private equity, asset management, and much more. Engaging and accessible, Contemporary Islamic Finance skillfully explains the practices and innovations of Islamic finance in everything from banking and real estate to private equity, asset management, and many other areas. It is intended to be the go-to resource for both Muslims as well as non-Muslims with an interest in the subject. Divided into three comprehensive parts, it will put you in a better position to understand, and excel at, this important endeavor. Introduces you to the history, legal structures, and basic financial contracts in the industry. Highlights the various issues facing contemporary Islamic finance practitioners, and details their significance in the contemporary financial and cultural environment. Includes case studies of United States-based transactions and related challenges and successes. Filled with in-depth insights and expert advice, this detailed analysis of Contemporary Islamic Finance will help you gain a firm understanding of how effective this proven approach can be.

Modern Islamic Banking Jul 29 2019 A complete, detailed guide to modern Islamic banking fundamentals Modern Islamic Banking provides a comprehensive, up-to-the-minute guide to the products, processes and legal doctrines underlying Islamic banking. Written by a pioneering practitioner in the field, this book provides thorough guidance and expert-level perspective on the principles and applications of this alternative-banking model. You'll begin by learning the fundamentals, vocabulary and key concepts of Islamic banking, then explore key products including istisna'a, murabaha, musharaka, ijara, sukuk, and salam. Coverage then moves into practical applications of Islamic products to a variety of contexts including asset management, treasury, risk management, venture capital, SME finance, micro-finance and taxation. Regulatory frameworks are discussed in detail, including extensive coverage of post-financial crisis Islamic bank

valuation. Islamic banking has experienced rapid growth over the past decade, a trend that is set to continue given the sector's successful weathering of the financial crisis. This book brings you up to speed on this alternative way of banking, and shows you how it applies within your own current practices. Understand the principles of Islamic banking and finance. Learn the products, vocabulary and key concepts of the field. Consider the applications in a variety of financial contexts. Explore the regulatory frameworks and valuation of Islamic banks. Islamic banking practices differ from Western banking in fundamental ways — it's these differences that shielded the sector during the global crisis, but they also require practitioners to understand a whole new set of rules, products and practices. Modern Islamic Banking gives you a solid understanding of the fundamentals and expert insight into modern practical applications.

Global Report on Islamic Finance 2016 Feb 02 2020 Income inequality has increased considerably in the aftermath of the financial crisis of 2007-08 to the extent that one percent of global population possess almost half of the global assets. Whereas the development community is unanimous to tackle growing inequality and imbalance in the distribution of wealth, there is a difference of opinion as to the approaches to achieve this goal. This report presents a perspective from Islamic finance on how shared prosperity can be enhanced. The theoretical framework for economic development by Islamic economics and finance is based on four fundamental pillars: (i) an institutional framework and public policy oriented to the development objectives of Islam; (ii) prudent governance and accountable leadership; (iii) promotion of the economic and financial system based on risk sharing; and (iv) financial and social inclusion for all, promoting development, growth, and shared prosperity. There is evidence that Islamic finance is experiencing high growth with the banking sector leading the way. Several countries are working seriously towards developing standards, regulation and legal frameworks for the development of Islamic finance. However, there are a number of aspects where policy interventions or improvements in policy effectiveness are needed to develop Islamic finance to promote shared prosperity. Without the enabling environment, Islamic finance may not be able to attain the potential expected of it. With adequate policy interventions and enabling financial infrastructure, Islamic finance could become a catalyst for alleviating poverty and inclusive prosperity.

Fintech in Islamic Finance Aug 02 2022 Featuring high-level analysis of Islamic law, this book examines fintech in Islamic finance from both theoretical and empirical perspectives. Whilst building on existing approaches, it also discusses the current application of fintech in promoting financial inclusion through innovative solutions in Muslim-majority countries, identifying future directions for policy-makers. With original chapters written by prominent academics, senior lawyers and practitioners in the global Islamic finance industry, this book serves as the first standalone pioneering reference work on fintech in Islamic finance. It also, for the first time, examines the position of Islamic law on cryptocurrencies, such as bitcoin. Besides the conceptual analysis of the Shariah and legal aspects of fintech in Islamic finance, this book provides relevant case studies showing current and potential developments in the application of fintech in various sectors ranging from crowdfunding and smart contracts, to Online Dispute Resolution, Investment Account Platform and identity verification in the KYC process. Setting the agenda for researchers in the field, Fintech in Islamic Finance will be useful to students and scholars of Islamic finance and financial technology.

Islamic Finance in the Light of Modern Economic Theory Jun 07 2020 This book provides researchers and students with an understanding of the basic legal tenets of the Islamic finance industry, studying the real economic effects of those tenets using the tools of the modern economic theory. Split into four parts, the book begins with an introduction to the history and a legal framework for Islamic banking, covering typical Islamic financial products such as Sukuk and Takaful and examining the structure of Islamic financial institutions. It then analyzes and discusses the Miller-Modigliani Theorem, which is of direct relevance to Islamic banks which are prohibited to charge interest and often have to rely of profit-loss sharing agreements. Part III of the book introduces the reader to modern mechanism design theory, paying particular attention to optimal contracting under hidden action and hidden information, and final part of the book applies the tools of economic theory to understand performance of Islamic financial institutions such as Islamic banks and Takaful operators. Islamic Finance in Light of Modern Economic Theory brings together all the necessary technical tools for analyzing the economic effects of Islamic frameworks and can be used as an advanced textbook for graduate students who wish to specialize in the area, as a reference for researchers and as a tool to help economists improve the design of Islamic financial institutions.

Islamic Banking Dec 26 2021 A detailed look at the fast-growing field of Islamic finance and banking. The guiding principle of Islamic finance has existed throughout Islamic history, yet modern Islamic banking has been around for a relatively short period of time. Author Amr Mohamed El Tiby is an expert in this field, and with this new book, he reveals how you can benefit from the use of Islamic banking strategies in your financial endeavors. Engaging and accessible, Islamic Banking shows the impact this approach has made on conventional banking since the 1950s, and why it's such a big player in the current market. It offers a unique look at various aspects of this field, including the salient features of Islamic banking that distinguishes it from non-Islamic banking, the development of the regulatory bodies and supervisory agencies that support the Islamic banking system, and much more. It also explores the nature of risk in Islamic banking and the issues of capital adequacy, corporate governance, transparency, and risk associated with Islamic banking. Discusses the history and development of Islamic finance. Offers straightforward strategies for implementing Islamic finance into your business activities. Sheds light on the effect of the global economic crisis on Islamic banks versus conventional banks. Filled with in-depth insights and expert advice, this detailed analysis of Islamic finance will help you gain a firm understanding of how effective this proven approach can be.

The Growth of Islamic Finance and Banking Sep 03 2022 This book covers the recent literature concerning Islamic banking and finance (IBF), focuses on the history of IBF since its inception and introduces the latest innovative concepts and practices in the field. The authors cover important topics such as the role of ownership, Shariah compliance and governance structures in raising debt capital using IBF practices, including Fatwa issues and the use of benchmarking practices. The book also addresses topics like archival data, the influence of leverage on ownership structure, and sukuk structures, as well as misconceptions, threats, challenges and opportunities in IBF. Finally, the book deals with prominent issues such as business score-carding, Takful (Islamic Insurance), IBF implications for block-chain-based fintech and finance hub concepts in Islamic microfinance models. This edited volume is an important contribution to the IBF literature as it provides a much-needed in-depth look into industry practices through the perspective of corporate finance and governance. With its interdisciplinary approach covering legal and financial issues along with a wide variety of notable contributors, this book will be a valuable reference guide to both teachers and students of Islamic banking and economics.

Fintech and Islamic Finance May 07 2020 Financial Technology (Fintech) has revolutionized the financial world as one of the fastest-growing segments in both the technology and financial sectors. With the usage of underlying principles of Blockchain technology, Fintech is bringing the financial community together and making financial services accessible to everyone. Fintech has far-reaching implications for Islamic finance such as banking, investment, insurance (takaful) and wealth management, which are benefiting from this usage. This book provides a comprehensive review of how Fintech is shaping the Islamic finance industry through three key aspects: Digitalization, Development and Disruption. The book will provide insight on the Shari'ah (Fintech in line with Shari'ah principle) and its application in the Islamic finance industry. The book also gives an overview of Blockchain and Fintech evolution and how they act as the building blocks of the digital financial landscape. Readers of the book will also get a detailed discernment on the Islamic viewpoint on cryptocurrency as well as the application of the smart contract in different Islamic financial services. The book provides students, academics and researchers with a detailed description of the Blockchain and Fintech application in Islamic finance.

The Stability of Islamic Finance Mar 05 2020 This new book by a group of four Western-trained Islamic economists is greatly welcomed. It builds on and extends their earlier work on the topic and will become essential reading for all those with an interest in the economic implications of Islamic finance. The Stability of Islamic Finance develops themes that link Islamic finance to existing traditions in economics; that assess the stability properties of Islamic financial instruments, and that explain some of the key Islamic concepts in economists terms. It will be an invaluable source for those who want to know more about the nature of the financial instruments that go to make up an Islamic financial system, and to understand how an Islamic financial system might work in a twenty-first century context. It is a provocative and insightful assessment of the economic properties of Islamic finance that deserves to be read and reflected on by Islamic and non-Islamic economists alike. Sir Andrew Crockett President, JPMorgan Chase International Former General Manager, The Bank for International Settlements (BIS) In recent years, Islamic finance has evolved from a tiny cottage industry to an increasingly important and respected component of global finance. The industry has developed common standards and practices, and has attracted the interest of issuers and investors outside the Muslim community. Yet, its economics and implications for financial stability are generally not well understood. The authors make an important contribution to our understanding of the industry by linking its foundations not only to the teachings of Islam, but also to classical Western economic thought. The authors also provide a convincing analysis of the structural weaknesses of conventional finance, and of the role of monetary policy in causing misallocation of resources and boom-and-bust cycles. In the process, they make a case for the inherent stability and efficiency of Islamic finance. The book is scholarly, insightful, original in scope and highly readable. Cesare Calari Managing Director, Wolfensohn Capital Partners Former Vice President, Finance, The World Bank The authors have written numerous books and articles on Islamic finance between them, and they bring a wealth of knowledge and experience to the topic. The Stability of Islamic Finance is an important contribution to the discussion of the Islamic finance industry as a whole and its place in broader efforts to reduce the volatility of global financial markets. Ms. Dr. Shamsah Akhtar Vice President, Middle East and North Africa, The World Bank The authors, whose academic credentials and practical experience are enviable, need to be heartily complimented for making another worthwhile contribution to the literature on Islamic economics and finance. They have convincingly shown in this valuable book how Islamic finance can help the international community avoid the severe financial crises of the kind in which it is currently embroiled. The timing of the book is perfect and those who read the book will not fail to realize that they have used their precious time in a highly productive manner. Dr. Umer Chapra Formerly Senior Economic Adviser, Saudi Arabian Monetary Agency Research Adviser, Islamic Research and Training Institute, Islamic Development Bank The Stability of Islamic Finance is not only timely but extremely relevant. At a time the world is asking questions on how we can avoid the next crisis and whether there are alternatives to the current system, which promotes increasingly damaging boom-bust cycles, the book provides answers to these and more. It gives us hope in that things can be better and we need not be held hostage to the present system which promotes greed, inequality, excessive consumption and the rapid deterioration of the environment. If policy makers are serious about addressing these issues and seek a change for the better, they should read The Stability of Islamic Finance. Sani Hamid Director, Wealth Management, Financial Alliance (Singapore) Former Director, Sovereign & International Public Finance Ratings, Standard & Poor's

Islamic Finance and the New Financial System Mar 29 2022 Can Islamic finance save the global system? Islamic Finance and the New Financial System describes how the adoption of Islamic finance principles in future regulatory decisions could help prevent future shocks in the global financial system. Using illustrations and examples to highlight key points in recent history, this book discusses the causes of financial crises, why they are becoming more frequent and increasingly severe, and how the new financial system will incorporate elements of Islamic finance — whether deliberately or not. With an introspective look at the system and an examination of the misconceptions and deficiencies in theory vs. practice, readers will learn why Islamic finance has not been as influential as it should be on the larger global system. Solutions to these crises are thoroughly detailed, and the author puts forth a compelling argument about what can be expected in the future. Despite international intervention and global policy changes, the financial system remains in a fragile state. There is an argument to be made about integrating Islamic finance into the new system to facilitate stronger resilience, and this book explains the nuts and bolts of the idea while providing the reader with a general understanding of Islamic finance. Understand the key principles of Islamic finance Examine the history of the current financial system Discover how Islamic finance can help build a new debt-free economy Learn how Islamic finance theory doesn't always dictate practice Although Islamic finance is a growing market, it is still a foreign concept to many. Those within the Islamic finance circles wonder why the system has yet to gain broader appeal despite its ability to create a strong and well-balanced economy. Islamic Finance and the New Financial System provides a clear analysis and historical background to put the issues into perspective.

A Comparative Study of Islamic Finance in Australia and the UK Feb 25 2022 This book provides valuable insights into the practical challenges faced by the nascent Islamic finance industry and compares the Australian experience to developments in the UK. It contributes to a greater understanding of how Muslims living as a minority in Australia and the UK negotiate Islamic doctrine in secular societies by focusing on one aspect of this negotiation, namely the prohibition of riba. There is little debate in the Islamic tradition on the prohibition of riba. The differences, however, lie in the interpretation of riba and the question of how Muslims live in a society that is heavily reliant on interest and conventional banking, yet at the same time adhere to Islamic guidelines. Through the words of religious leaders, Muslim professionals and university students, Imran Lum provides real accounts of how Muslims in Australia and the UK practically deal

with conventional banking and finance products such as home loans, savings accounts and credit cards. He also explores Muslim attitudes towards Islamic finance and queries whether religion is the sole determining factor when it comes to its uptake. Drawing on his own unique experience as a practitioner responsible for growing an Islamic business in a conventional bank, Lum provides a firsthand account of the complexities associated with structuring Islamic finance products that are not only sharia compliant but also competitive in a non-Muslim jurisdiction. Using sukuk bonds as a case study, he highlights the tangible and non-tangible barriers to product development, such as tax and regulatory requirements and the rise of Islamophobia. Combining academic and industry experience, Lum unpacks the relationship of Islamic finance with Muslim identity construction in the West and how certain modalities of religiosity can lead to an uptake of Islamic finance, while others can lead to its rejection.

An Introduction to Islamic Finance Sep 30 2019

Understanding Islamic Finance Oct 24 2021 In *Understanding Islamic Finance* Muhammad Ayub introduces all the essential elements of this growing market by providing an in-depth background to the subject and clear descriptions of all the major products and processes associated with Islamic finance. Key features include: Discussion of the principles of Islamic finance; Introduction to the key products and procedures that International Financial Institutions are using or may adopt to fund a variety of clients ensuring Shariah compliance; Discussion of the role Islamic finance can play in the development of the financial system and of economies; Practical and operational examples that cover deposit and fund management by banks involving financing of various sectors of the economy, risk management, accounting treatment, and working of Islamic financial markets and instruments. This book is not only an important text for all banks and financial institutions entering this particular market with a commitment to building Islamic financial solutions, but is also essential reading for undergraduate and postgraduate students of Islamic finance.

Globalization and Islamic Finance Apr 05 2020 This is an extremely valuable book written by three highly qualified scholars whose credentials for writing such a book are difficult to match. The timing of the book is also perfect, having come at a time when the worst financial crisis in living memory has intensified the quest for reform of the international architecture. The proposals made by the authors should go a long way in not only reforming the system but also in accelerating the move towards financial globalization and convergence of the conventional and Islamic financial systems. Dr. Umer Chapra Prominent Scholar of Islamic Economics and currently Research Advisor Islamic Research and Training Institute (IRTI), Islamic Development Bank (IDB) Globalization and Islamic Finance, by three well-respected authors in Islamic finance, provides a thought-provoking analysis of an important and topical issue, particularly given the global impact of the current financial and economic crises. The book is the first attempt to make a compelling case of convergence between globalization and Islamic finance. Askari, Iqbal and Mirakhor should be praised for this serious effort, which is a must-read for academics and practitioners interested in Islamic finance. Professor Rifaat Ahmed Abdel Karim Secretary General Islamic Financial Services Board (IFSB) This book has a robust discussion of the growth and spread of Islamic finance within the umbrella of globalization. The book provides a unique view of Islamic finance, not only from the perspective of how Islamic finance fits within globalization in general, but globalization of finance in particular. This is a must read for anyone interested in the complex and complicated world of Islamic finance. Scheherazade S. Rehman, Ph.D. Director, European Union Research Center Professor of International Finance, School of Business The George Washington University I have not come across any literature that has delved so intensely in financial globalization, in particular Islamic finance. Due to this reason, I would encourage all interested in this area to read this book. Hajah Salma Latiff Managing Director, Crescent Sdn. Bhd. Former Director, Centre for Islamic Banking, Finance and Management (CIBFM), Universiti Brunei Darussalam The recent crisis has evoked wide interest in Islamic finance publications. Globalization and Islamic Finance is both timely and needed. Sani Hamid Director, Wealth Management Financial Alliance (Singapore)

Introduction to Islamic Banking and Finance Jun 19 2021 Introduction to Islamic Banking and Finance is a succinct guide to the key characteristics of Islamic banking highlighting how these differ from conventional banking. This detailed book illustrates how Islamic banking is consistent with the Shariah, a key element of which is the prohibition on collecting and paying interest. This central religious precept appears to rule out most aspects of modern finance but it does allow money to be used for trading tangible assets and business, which can then generate a profit. Brian Kettell's book looks at all aspects of Islamic banking, including chapters on its creation and evolution through to detailed discussions of the issues involved in the Shariah contracts of Murabahah, Mudarabah, Musharakah, Ijara, Istisna'a, and Salam. Islamic insurance (Takaful) is also covered. Finally the book takes a look at Shariah law and Shariah boards, indicating the roles and responsibilities that come with membership. Islamic banks have been operating in places such as Bahrain, Saudi Arabia, Malaysia and Dubai for some time. Conventional bankers have traditionally viewed the sector as a small, exotic niche but recent years have seen a dramatic surge in popularity. A number of Western investment banks have started working with Muslim clerics to create new ranges of financial products designed for devout Muslims, a large and growing market. Although estimates of the size of the Islamic finance industry vary greatly, everyone agrees that it is expanding rapidly and this is the perfect book for anyone looking to understand the industry.

Fundamentals of Islamic Finance and Banking May 31 2022 A comprehensive and fully up-to-date introductory textbook to Islamic finance and banking Islamic finance and banking is being used increasingly globally — especially in the regions of Middle East and North Africa, South East and South Asia. To cater to the need of trained Islamic finance staff, a large number of Educational institutions are beginning to offer courses, majors and minors in Islamic finance and banking. The major challenge faced by these institutions are suitable textbooks for both undergrad and post-grad levels and especially with the relevant instructor resources (PPTs, test bank, practice activities and answer keys). Luckily, *Fundamentals of Islamic Finance and Banking* is here to cover the most important topics related to Islamic finance and banking (IF&B) that are relevant for students of business, finance and banking. Offers an historical background of Islamic finance Covers the principles of Sharia Law as pertinent to finance and banking Provides in-depth discussion of the six key Islamic banking products: Murabahah, Mudarabah, Musharakah, Ijara, Salam and Istisna Discusses the Islamic insurance (Takaful) Gives an overview of Islamic investment, especially Sukuks Concludes with the global standing of the Islamic Finance and Banking industry Would-be colleges and universities offering this subject as a course within their finance and/or banking program can't be without this invaluable guide.

Islamic Finance Practices Dec 14 2020 This book discusses carefully selected topics in Islamic banking and finance (IBF) in South Eastern Europe (SEE) as one of the fastest growing areas in global finance. IBF originated within various Islamic banks, Islamic windows, investment funds, Takaful companies, and other financial institutions and has resulted in various global products. Although it is still in an early phase in SEE, IBF has developed rapidly in the last decade and has created a need for research on related topics, from the fundamental principles of IBF to the SCR, endowments and investment instruments to Islamic banking practices. This is our second book published as a result of the Sarajevo Islamic and Finance conferences (SIFEC). This conference traditionally gathers Islamic banking, economics, and finance academicians, experts, and students all over the world who discuss a wide range of topics in this field, focusing on the SEE. Consisting of seven chapters presenting original research, this book is a valuable resource for researchers as well as for practitioners and potential investors in IBF, especially in SEE.

Blockchain, Fintech, and Islamic Finance Jan 15 2021 While creating new forms (Shari'ah-compliant standards) to operationalize Islamic values and ethics into the current conventional economic system and banking products is crucial to sustain the Islamic economy as it is today, we also need to develop new strategies to cope with the next economic evolution. The digital revolution in financial services is under way, and digital disruption has the potential to shrink the role and relevance of today's banks, while simultaneously creating better, faster, cheaper services that will be an essential part of everyday life. This forward-looking book discusses the crucial innovation, structural and institutional development for financial technologies (fintech) in Islamic finance. The authors explain concepts in fintech and blockchain technology and follow through with their applications, challenges and evolving nature. The book provides insights into technology which will enable and enhance actual prescribed Islamic behaviors in modern economic transactions. Case studies highlight how to cope with modern transactional behavior with the advent of global online/mobile markets, shorter attention spans, and impersonal trade exchange.

Islamic Finance in a Nutshell Nov 24 2021 The recent turbulence in the global financial markets has drawn attention to an alternative system of financial intermediation: Islamic banking and finance, which has so far remained on the sidelines of the unrest. *Islamic Finance in a Nutshell* is a quick and easy guide to understanding the fundamentals of Islamic Finance and how the Islamic Financial markets work. Designed as a quick read for practitioners needing to pick up the basics of the industry, it will enable readers to understand the differences Islamic and Western finance. Starting with the rise of Islamic finance, the book highlights the key areas which practitioners need to grasp to understand the marketplace including financial statement analysis, Shariah law, making money in the absence of interest and regulation. The book also provides readers with a basic guide to Arab terminology and a guide to the top financial institutions within the Islamic markets. This is an ideal guide for anyone with an interest in how these financial markets work, but who do not want to be bogged down in complex and unnecessary terminology.

Politics of Islamic Finance Oct 12 2020 Can the contemporary Islamic finance movement be shown to meet the requirements of modern commerce? In the wake of the terrorist attacks on America the UN Security Council passed a resolution targeting transnational sources of terrorist funds. The United States and the International Monetary Fund are encouraging the governments of the Middle East to adopt policies of economic liberalism and a new type of capitalism, based on Islamic values and beliefs, is emerging. The aims of the book are: to explore the political implications of the slow but steady accumulation of Islamic capital* to analyse the connections between Islamic finance and Islamic political movements in Middle Eastern and North African countries* to show that the commonly-perceived connection between Islamic finance and money laundering and terrorism is by no means the complete picture. Readers will learn to appreciate the various political contexts in which Islamic finance operates in the Middle East and North Africa and will acquire some understanding of its political as well as economic constraints. Hopefully possible misunderstandings about Islamic banking and finance will be corrected. The book is divided into two parts - part one is thematic and lays the ground for the country-specific case studies in part two (covering the Sudan, Kuwait, Jordan, Turkey, Tunisia and Egypt). The contributors include political scientists, economists and historians. Key Features: * A major topical issue * Written by the world's leading experts on Islamic Political Economy * Explores the connections between Islamic finance and Islamic political movements * Includes country-specific case studies

Islamic Finance Jul 01 2022 Islamic Finance is a compilation of selected writings of Dr Venkataraman Sundararajan (1945–2010), an international policy maker who played a significant role in the development of the regulatory and supervisory frameworks and policy for Islamic finance. Spanning more than a decade of his thoughts on Islamic finance, this book provides both basic and advanced knowledge on the field. The papers in this collection define Islamic finance, outline its many complexities, and provide practical recommendations that can help it in becoming an important global financial intermediary. The book demonstrates not only Dr Sundararajan's long-standing commitment to helping develop Islamic banking, but also how Islamic finance itself has evolved rapidly between 1998 and 2010. The chapters in this book are a blend that would benefit lay readers as well as experts and policy makers at regional and international levels.

Rethinking Islamic Finance Apr 17 2021 Islamic finance's phenomenal growth owes to the Shariah compliant nature of its financial instruments. Shariah forbids the charging of interest (Riba) and instead promulgates risk-sharing and trade-based modes of financing. The Islamic financial industry has been subject to both critique and admiration. Critics argue that Islamic instruments (bearing debt-based structures) differ from their conventional counterparts only in legal lexicon and not in economic impact. The admirers argue that such instruments, irrespective of wider economic implications, rigorously comply with 'juristically sound' Islamic principles. This book aims to reconcile the above dispute. It argues that the financial impact of instruments is a consequence of the way they are priced and structured. The similarity in pricing and structures is an outcome not of the underlying Islamic financial modes but of the competitive environment in which Islamic instruments compete. Even risk-sharing and trade-based Islamic structures, if implemented in such an environment, would have a financial impact similar to that of conventional instruments. This book has a wider appeal for both academic and non-academic audiences. It can complement undergraduate and graduate courses as an additional reading on the intricacies of Islamic financial instruments and markets. For PhD students, it would help identify future research areas. To non-academics, it offers a deeper understanding regarding the working of the Islamic finance industry.

The Islamic Finance Handbook Apr 29 2022 Get up to speed quickly on the world's fastest growing financial sector The Islamic Finance Handbook: A Practitioner's Guide to the Global Markets is the definitive report for the Islamic finance industry. Written by the industry's leading practitioners, the book provides a country-by-country breakdown of the current state of the Islamic market, including league tables by region and by country. Relevant case studies are used throughout to illustrate the practical aspect of the information presented. Organized for easy navigation, each chapter features sub-sections that allow instant comparison between countries in a specific area of interest. The Islamic finance industry is the world's fastest growing sector, valued at over U.S. \$1.3 trillion by the UK Islamic Finance secretariat, with an annual growth of 24% for the past five years. To compete globally, practitioners need a true understanding of key markets within the industry. The Islamic Finance Handbook paints a clear picture of where each country stands in its development and role within the market, and provides a straightforward comparison between markets. Features include: Current macroeconomic and microeconomic conditions Regulatory and political situations Recent transactions, key participants, and the investor climate Real-world cases, as opposed to speculative scenarios The book places a clear focus on current conditions versus past performance, and on practical applications versus theoretical speculation. Each chapter is authored by a leading practitioner from within each country, allowing a true glimpse inside the day-to-day workings of the Islamic markets. For finance professionals who need to get up to speed on this rapidly growing sector, The Islamic Finance Handbook: A Practitioner's Guide to the Global Markets is a clear, comprehensive guide.

Islamic Banking & Finance in South-East Asia Mar 17 2021 To truly understand the current interest in the development of Islamic banking and finance in South-East Asia and how it is different from the conventional banking system, one must first understand the religious relationship originating from the Qur'an, and then trace the historical geographic and political developments of Islam over recent centuries. Only on this basis can the reader, without prejudice or cynicism, begin to appreciate Shari'ah law and Islamic jurisprudence. With this platform established in the first part of the book, readers are invited to learn about the financial products and services offered, understand the challenges in their development, and ultimately recognize the significant opportunities that Islamic banking and finance can provide both Muslims and non-Muslims. This second edition contains updates of statistics and dates with regards to the development of Islamic banking in Malaysia, Singapore, Indonesia and Brunei. In particular, the chapter on Singapore details significant developments such as the direction which major banks are taking towards Islamic banking and the increase in Islamic banking products being offered. Although written by a non-Muslim author, this highly-regarded book is being translated into Arabic by a leading Islamic university in the Middle East.

Theory and Practice of Modern Islamic Finance May 19 2021 Theory and Practice of Modern Islamic Finance seeks to contribute to the existing body of work in the area of Islamic finance through examining the extent of divergence in practice of Islamic financing from the traditional Shari'ah in the Australian context. The author makes a discursive analysis of the regulation of Islamic finance in Australia in terms of (a) the financing instruments used, (b) certainty of transactions between participants in the system, and (c) institutional risk management of Islamic financial institutions. The work's objectives are two-fold: (a) to analytically study the extent to which Islamic Financial Services Providers (IFSPs) of Australia differ from the traditional Shari'ah in their current practices of Islamic legal financial system by their use of different financial products and techniques, and (b) to create awareness and transparency about the various products and instruments used by IFSPs of Australia. REVIEWS "It is indeed a most comprehensive, methodologically sound, well organised, lucid, comprehensively documented and analysed, and convincingly argued and concluded research. It systematically addressed all the research questions raised and very convincingly and successfully resolved them to logical conclusions. The study can convincingly claim to have made a breakthrough in the frontier of knowledge in the field of Islamic finance" Professor R. I. Molla, Multimedia University, Malaysia "Discussions of the topics throughout the book are logically coherent and presented in plain language. It is an insightful, well researched, logically organised and lucidly presented research work having overwhelming strengths and very limited weaknesses. I have no hesitation to say that this book may provide useful guidelines for dealing with the emerging issue of Islamic finance around the world." Dr. S. M. Solaiman, The University of Wollongong, Australia "I have gone through for the most part of author's present work and found that it was excellent. I must congratulate him for preparing a research work of such standard. It was due to his extreme commitment, sense of professionalism, and perseverance." Professor A. B. Rafique Ahmad, Pro-VC, International Islamic University Chittagong, Bangladesh "I read this book on Islamic finance with lots of interest. It is one of the finest pieces of writing, in terms of content, eyes to detail, referencing and scholarly analysis. It is often a challenge to simplify such a complex subject without losing the necessary details. There are very few Islamic books that introduce all dimensions. This book filled in this gap through making an unbiased objective reading. The book has covered very valid governance issues such as the conflict of interest of the regulators (Shari'ah Board), the products resembling conventional loans and the reluctance of sharing the full risk. While Islamic Institutions may shy away from the author, his talent will be highly sought in academia and research circles." Dr. Shahadat Chowdhury, School of Civil and Environmental Engineering, University of New South Wales, Sydney, Australia This book appears to be the only major research monograph on Islamic finance in Australia. The historical, rational and critical methodology of this book follows the scientific research methodology of the great twentieth century philosopher of science Karl Popper. The clarity and logical rigour resulting from this approach is one of the major strengths of this work. Chapters 1-3 and 5 are of excellent quality and reflect Dr Ahmad's authoritative knowledge in the field of Islamic law. Chapters 6-11 reflect not only Dr Ahmad's expertise in Islamic financial law, evident in previous chapters but also his extensive practical experience in his advisory and consultancy work. The book raises many questions for future research, including, how to resolve the perceived divergence of financial practice from Islamic law and the development of a fully satifa

Islamic Finance and Economic Development Aug 29 2019 A comprehensive guide to mitigating risk and fostering growth in the Islamic financial sector Islamic finance, like conventional finance is a business of financial intermediation. Its distinctive features relate to the requirement that it abides by Shari'a rules that promote fairness of contracts and prevention of exploitation, sharing of risks and rewards, prohibition of interests, and tangible economic purpose. Islamic finance should not fund activities considered "haram" or sinful. In Islamic Finance and Economic Development: Risk, Regulation, and Corporate Governance, authors Amr Mohamed El Tiby and Wafik M. Grais expound how these distinctive features bear on the opportunities and challenges facing the Islamic finance industry's development, risk management, regulation and corporate governance. An experienced banker with various Middle East banking institutions, notably as former Vice President at UAE Union National Bank and Mashreq bank, Dr. El Tiby offers an informed perspective on corporate finance from within the Islamic finance industry. With a long experience in international development and finance, notably as former Director at the World Bank and Founder and Chairman of a Cairo-based Financial Advisors company, Dr. Grais brings global financial experience on the topics of financial systems assessments, corporate governance, Islamic finance, and public policy. Covers the history and basics of Islamic finance, and provides insight into current conditions and future landscape Explores regulatory framework, including opportunities and challenges for the industry's development and mainstreaming Presents an approach to developing a systemic Shari'ah governance framework to govern operations in the Islamic finance industry

Economic Development and Islamic Finance Jul 21 2021 Although Islamic finance is one of the fastest growing segments of emerging global financial markets, its concepts are not fully exploited especially in the areas of economic development, inclusion, access to finance, and public policy. This volume is to improve understanding of the perspective of Islamic finance on economic development, social and economic justice, human welfare, and economic growth.

The Foundations of Islamic Banking Jun 27 2019 After barely half a century of experience, Islamic banking has become established as a new niche industry across the world offering new and sophisticated financial products designed to be compliant with the principles of Islamic legal principles and common law. This comprehensive book explores the theory, principles and practices underpinning this rapidly expanding sector of banking. Expert contributors including eminent scholars and senior practitioners in the field examine the roots of the principles of ethical Islamic financial transactions, which have evolved over several millennia, on issues including usury, interest rates, financial contracting for funding enterprises, for mortgages, for leasing and other financial transactions. Regulatory and governance issues are discussed, and the practice and operation of Islamic financial institutions are explained via three distinct case studies. Importantly, the final chapter looks at what steps are being taken to provide professional accreditation to Islamic banking professional personnel, and prescribes requirements for training in this growing industry.

Dilemmas and Challenges in Islamic Finance Aug 22 2021 The phenomenal growth of Islamic finance in the last few decades has been accompanied by a host of interesting questions and challenges. One of the critical challenges is how Islamic financial institutions can be motivated to participate in the 'equity-like' profit-and-loss sharing (PLS) contracts. It is observed that Islamic banks are reluctant to participate in the pure PLS scheme which is manifested by the rising concentration of investment on murabaha or mark-up financing. This phenomenon has been the hotbed of academic criticism on the contemporary practice of Islamic banking. This book explains the 'murabaha syndrome' in light of the incentive provided by the current institutional framework and what are the changes required in the governance structure to mend this anomaly.

Islamic Finance For Dummies Oct 04 2022 A detailed look at the fast-growing field of Islamic banking and finance The global Islamic finance market is now worth about \$700 billion worldwide. Islamic Finance For Dummies helps experienced investors and new entrants into Islamic finance quickly get up to speed on this growing financial sector. Islamic Finance Sep 10 2020 This book provides a comprehensive and practical guide to Islamic finance. It covers a broad range of important topics including Islamic banking, capital markets, Takaful, wealth management, Fintech in Islamic finance, compliance and governance issues. It begins by introducing Islamic banking, covering its objectives, principles and evolution, before moving on to discuss the religious foundations of Islamic finance. The prohibition of Riba and Gharar and Islamic contracts are explored, before Islamic deposits, and financing are discussed in practice. A comparative analysis is provided between Islamic banking products and services in a range of countries throughout the world. Information technology including fintech, payment and settlement networks, opportunities and challenges are also addressed. Corporate governance, Islamic capital markets, and Islamic insurance (Takaful) are all explored, before concluding with a chapter on wealth management and Islamic investment funds. It features case studies based on the authors' own experiences consulting with Islamic financial institutions. Ideal for those looking to improve their understanding of practical Islamic financing models, contracts, product structures and product features, this book will appeal to both students and practitioners in Islamic finance and banking, those based in Islamic financial institutions, and those based in conventional financial institutions who may be looking to enter the Islamic financial market.

The Art of Islamic Banking and Finance Oct 31 2019 A detailed look at the fast-growing field of Islamic banking and finance The Art of Islamic Banking and Finance is a modern American take on what it means to incorporate Islamic finance principles into everyday banking and investment techniques by introducing a new brand of banking for all people of all faiths: The Riba-Free (RF) banking. The author is considered the father of RF (Islamic) banking in America. He has been a banker and an Imam/scholar for over 40 years in America since 1968. He started the tedious process with a finance company, LARIBA, in Pasadena, California in 1987. This is the first book ever in the field to trace the origins of prohibiting the renting of money at a price called interest rate and over-indulging in debt. The book reviews in great details the theological foundations of prohibiting interest in the Jewish Bible, the Christian Bible, and the Qur'aan. The author then discusses money and how fiat money is created, the role of the Federal Reserve, and the banking system in America. The book also discusses for the first time ever how to include an important aspect of RF (Islamic) finance using commodity indexation and marking the items to be financed to market in order to avoid participating in economic "bubbles." The author discusses how these rules work, how they affect consumer behavior, and how they change the role of the banker/financier. Covers a new pioneering model that is based on the Law (Shari'aa) and how it is applied in every transaction from joint ventures and portfolio management to home mortgages and personal financing Shows how to incorporate the Law (Shari'aa) into American financing and banking systems Points to RF (Islamic) finance and banking as a way to emphasize socially responsible investing The Art of Islamic Banking and Finance also

includes a discussion on the emergence of a culture of RF (Islamic) banking and finance today, which is based on the real Judeo-Christian-Islamic spirit and very effective when compared to twentieth-century models that use financial engineering and structuring techniques to circumvent the Law (Shari'aa). The book also includes case studies based on the actual experience of the author and detailed analysis of the superior results realized by applying this new brand of banking to financing.
