Complex Cases of Personality Disorders Nov 24 2019 This book proposes an integrated model of treatment for Personality Disorders (PDs) that goes beyond outdated categorical diagnoses, aiming to treat the general factors underlying the pathology of personality. The authors emphasize the development of metacognitive functions and the integration of procedures and techniques of different psychotherapies. The book addresses the treatment of complex cases that present

with multiform psychopathological features, outlining clinical interventions that focus on structures of personal meaning, metacognition and interpersonal processes. In addition, this book: Provides an overview of pre-treatment phase procedures such as assessment interviews Explains the Metacognitive Interpersonal Therapy (MIT) approach and summarizes MIT clinical guidelines Outlines pharmacological treatment for patients with PDs Includes checklists and other useful resources for therapists evaluating their adherence to the treatment method Complex Cases of Personality Disorders: Metacognitive and Interpersonal Therapy is both an insightful reexamining of the theoretical underpinnings of personality disorder treatment and a practical resource for clinicians.

Treating Dissociative and Personality Disorders Jun 12 2021 Treating Dissociative and Personality Disorders draws on major theorists and the very latest research to help formulate and introduce the Relational/Multi-Motivational Therapeutic Approach (REMOTA), a new model for treating such patients within a clinical psychoanalytic setting. Supported by her fellow contributors, Antonella Ivaldi provides an overview of existing theories and evidence for their effectiveness in practice, sets out her own theory in detail and provides rich clinical detail to demonstrate the advantages of the REMOTA model as applied in a clinical setting. The narratives in this book show how it is possible to integrate different contributions within a multidimensional aetiopathogenic treatment model, which considers the mind as a manifestation of the relationship between body and world. From a conceptual perspective, according to which consciousness emerges and develops in the interpersonal dimension, this book shows how it becomes possible to understand, in the therapeutic space, what stands in the way of sound personal functioning, and how to create the conditions for improving this. Treating Dissociative and Personality Disorders will be highly useful in addressing the particular clusters of symptoms presented by patients, stimulating therapists of different backgrounds to explore the complexity of human nature. On reading this book, it will become clear that theories can truly become useful instruments, if approached with a critical mind and with humbleness, in order to venture into what we do not know and will never know completely: the relationship with the other, unique and irreplaceable. Treating Dissociative and Personality Disorders provides an integrative and comparative new approach that will be indispensable for combining relational clinical knowing and motivational theories. It will appeal to psychoanalysts and psychotherapists, especially those in training, clinicians of different backgrounds interested in comparative psychotherapy, as well as social workers and graduate and postgraduate students.

The Hepatobiliary System Mar 09 2021 A volume on the biliary system appeared in 1965, based on a symposium of the NATO Advanced Institute held in

September, 1963, in Newcastle upon Tyne in England. It soon became an authoritative text on the problems of the biliary tract and, for instance, the discussion on the biliary secretion of organic anions, organic cations and inorganic ions were classic references. The worn pages of the volume in many libraries, including my own, bespeak its usefulness over ten long years. The initiative and energy of the Director of the first Institute have to be admired, even more so since he was able to assemble a Second Institute in Aalborg, Denmark, in 1975. His wisdom is reflected in the selection of the subjects discussed. The comparison between the two volumes tells something about the advancement in the time interval in knowledge about liver and biliary tract diseases, about the turnover of researchers interested in the liver and its diseases, and also about the present philosophy in biologic science. For this comparison, this volume is particularly suited because, in contrast to many other recent conferences, the more leisurely pace of the NATO Institutes permits more comprehensive but still scholarly reviews of the problems. The foreword of the first volume, written by my colleague, the late Harry Sobotka, expresses his, now dated, astonishment about the progress of knowledge of biology of the bile, so much less accessible to study than urine.

Bioceramics and the Human Body Sep 15 2021 Proceedings of the International Congress on Bioceramics and the Human Body held in Faenza, Italy, 2-5 April 1991, organized by the IRTEC-CNR Institute in collaboration with Agenzia Polo Ceramico.

Talking with Couples Mar 21 2022 'In this compact and illuminating study of the evolving theoretical framework informing psychoanalytic work with couples, the authors highlight concepts that have been most drawn upon in developing dynamic couple therapy. They chart the shifting emphasis away from interpreting and reconstructing the past towards approaches that engage partners and therapists in constructing and reflecting on their encounters with each other in the present. The triangular space that is created through this process contains therapists as well as the couples with whom they talk, and invites us to revisit the essential nature of the therapeutic conversation in this light. A thoughtful and fascinating book that will interest everyone who is keen to understand the interior world of couple psychotherapy.'-Christopher Clulow, PhD, Senior Fellow, the Tavistock Centre for Couple Relationships, London

Learning and Collaboration Technologies: Technology-Rich Environments

for Learning and Collaboration. Jan 07 2021 The two-volume set LNCS 8523-8524 constitutes the refereed proceedings of the First International Conference on Learning and Collaboration Technologies, LCT 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCII 2014, in Heraklion, Crete, Greece in June 2014, jointly with 13 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences were carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 93 contributions included in the LCT proceedings were carefully reviewed and selected for inclusion in this two-volume set. The 45 papers included in this volume are organized in the following topical sections: virtual and augmented learning environments; mobile and ubiquitous learning; technology@school; collaboration, learning and training.

Manuale di Pediatria. La Pratica Clinica May 31 2020 Il Manuale di Pediatria – La Pratica Clinica, giunto alla sua Seconda Edizione, e' destinato a Studenti del Corso di Laurea in Medicina e Chirurgia, Specializzandi in Pediatria e Neuropsichiatria Infantile, Pediatri ed e' strutturato per essere un testo maneggevole e di facile consultazione ma al tempo stesso completo e aggiornato, basato sui principi della Evidence Based Medicine. Il testo tratta tutti gli argomenti principali della Pediatria Generale e Specialistica ed e' organizzato sia in capitoli con impostazione tradizionale, sia in inquadramenti sotto forma di tabelle, in cui vengono riportati i principi clinici/diagnostici/terapeutici e le diagnosi differenziali. Il testo contiene inoltre flow-chart e algoritmi decisionali, con lo scopo di fornire al lettore strumenti di facile e rapida consultazione. I presupposti che hanno guidato la stesura del Manuale trovano realizzazione in una veste grafica che intende guidare il lettore in una consultazione "su misura": i capitoli contengono infatti sia informazioni di base, fondamentali e irrinunciabili per lo studente di Medicina in fase di studio, sia informazioni dettagliate destinate invece a coloro che intendono approfondire e aggiornare le proprie conoscenze. Questo testo ha inoltre l'obiettivo di approfondire argomenti, di carattere socio-culturale, meno tradizionalmente affrontati nei Manuali per lo studio della Pediatria, ma di grande attualita? e che rappresentano un bagaglio culturale indispensabile per le figure professionali impegnate nel difficile compito di assistere e curare i bambini e gli adolescenti di oggi, inseriti in contesti familiari, sociali e culturali molto diversi dal passato e

costantemente in evoluzione

Learning to Read across Languages and Writing Systems Nov 17 2021 This book examines how children learn to read across seventeen languages and their orthographies. Each chapter discusses a different language in terms of its writing system, reading development, and implications for education. The editors' comprehensive introduction frames the key issues and the final chapter draws conclusions across the seventeen languages.

Mediterranean Contaminations Apr 22 2022 The series Studies on Modern Orient provides an overview of religious, political and social phenomena in modern and contemporary Muslim societies. The volumes do not only take into account Near and Middle Eastern countries, but also explore Islam and Muslim culture in other regions of the world, for example, in Europe and the US. The series Studies on Modern Orient was founded in 2010 by Klaus Schwarz Verlag.

Ventilazione meccanica non invasiva Jul 25 2022 La crescita esponenziale dell'interesse per la ventilazione non invasiva (NIV) verificatasi negli ultimi 10-15 anni, non solo dal punto di vista clinico e applicativo, ma anche speculativo, ha pochi eguali nella recente storia della medicina. In Italia e in Europa in generale tale metodica è applicata su larga scala, prevalentemente nei reparti di Pneumologia e nelle Unità di Cure Intermedie Respiratorie, mentre per quanto riguarda la sua applicazione nei reparti di Terapia Intensiva Generale (UTI) i dati emersi da uno studio multicentrico condotto nei paesi francofoni vedono la NIV impiegata in una quantità di casi che rappresenta fino al 50% dei pazienti che richiedono assistenza ventilatoria. Il recente studio EUROVENT ha inoltre dimostrato come la NIV non si limiti alla sua applicazione "acuta", dal momento che circa 25.000 pazienti sono attualmente ventilati "in cronico" a domicilio. Inoltre, si calcola che milioni di cittadini europei soffrano attualmente di disturbi respiratori durante il sonno, e per molti di essi il trattamento medico di prima scelta è rappresentato dalla NIV. Questo libro si propone lo scopo di richiamare l'attenzione sulle più recenti acquisizioni in questo campo, con la speranza di fornire uno strumento valido e maneggevole per la scelta e l'impostazione della migliore modalità di ventilazione.

Evaluating Investments in Health Care Systems Feb 20 2022 This book focuses on the innovative and more critical management approach adopted in the PA (Public Administration) in order to identify and describe the main models and instruments to economically evaluate the decision making process in accordance to the specific conditions such as efficiency, effectiveness, cost and equity. The manuscript pays special attention to this sector by identifying, investigating and

applying the main evaluation models (logic and methods) of the decision making process, in particular in terms of investment decisions. In the recent decades, with reference to PA, several managerial approaches have been developed from a business management perspective. These managerial approaches differ in terms of variables analyzed, such as the role of governance or the specific logics and mechanisms applied, but all of them have a common goal, which is the improvement of efficiency, effectiveness, economic and equitable decision making and operations in the PA. This book investigates the different mentioned frameworks adopting a wider and integrated analysis perspective on the evaluation of investments in the health care system.

Side Effects of Drugs Annual Apr 10 2021 The Side Effects of Drugs Annual was first published in 1977. It has been continually published since then, as a yearly update to the voluminous encyclopedia Meyler's Side Effects of Drugs. Each new Annual continues to provide clinicians and medical investigators with a reliable and critical yearly survey of new data and trends in the area of Adverse Drug Reactions and Interactions. An international team of specialists has contributed to the informative, by critically interpreting it, and by pointing to whatever is misleading. Provides a critical yearly survey of new data and trends Special reviews in this Annual include, among other topics, Epidemiology of the use of ecstasy, Paracetamol and the risk of asthma, Combination vaccines/multiple immunizations, Interactions of herbal medicines with warfarin, and Tyrosine kinase inhibitors

Mindfulness and Eating Disorders across the Lifespan Sep 03 2020 This important and well researched volume examines the clinical phenomenon of eating disorders, exploring their longitudinal risk trajectory and introducing the Mindful Emotion Regulation – Approach (MER-A) as a starting point for intervention. The book reviews various eating problems that can originate from the earliest perinatal phase to early adolescence, and through the MER-A framework focuses on how the principles of mindfulness and the related theoretical and clinical bases underlying the construct of emotional regulation can guide the clinician to a deeper understanding of a patient's disordered eating. Featuring reflections on clinical cases, it includes coverage of patients' difficulties in regulating emotions, their relationships with various eating behaviours and their associated interpersonal features. Mindfulness and Eating Disorders across the Lifespan represents an attempt to provide a complete appreciation of this complex and multifaceted topic, making it of great importance to psychotherapists and related mental health professionals working with eating disorders.

Current List of Medical Literature Aug 02 2020 Includes section, "Recent book acquisitions" (varies: Recent United States publications) formerly published separately by the U.S. Army Medical Library.

Clinical Bioethics Dec 06 2020 A theory of Clinical Bioethics based on the integration of the moral logic of health care practice ("internal morality") and the larger social concerns and processes ("external morality") Clinical Bioethics. A Search for the Foundations compares major theoretical models in the foundation of clinical bioethics and explains medicine as a normative practice. The goals of medicine are discussed with particular reference to the subjectivisation of health and the rationalisation of health care institutions. This volume provides a consistent reconstruction of bioethical judgment both at the level of epistemological statute and institutional context, i.e. clinical ethics committees and clinical ethics consultation.

Psoriasis Aug 14 2021

Imaging diagnostico Oct 24 2019 Il ruolo che la diagnostica per immagini riveste nella pratica clinica quotidiana è di giorno in giorno sempre più rilevante: il moderno radiologo deve possedere un'approfondita conoscenza della clinica e dell'anatomia patologica e la capacità di correlazione con i reperti radiologici, al fine di poter cogliere anche i minimi segni e reperti rilevabili. Inoltre, la vastità delle attuali conoscenze richiede non solo una preparazione radiologica generica, ma anche e sempre più approfondimenti sub-specialistici: ciò conduce alla formazione di radiologi d'apparato e in alcuni casi d'organo, in grado di utilizzare al meglio tutte le tecniche attualmente disponibili, così da percorrere correttamente l'iter diagnostico, insieme ai colleghi specialisti di altre branche mediche. Nel presente manuale, che raccoglie 100 casi ben selezionati e significativi, gli Autori dimostrano come, partendo dalla storia clinica del paziente e sfruttando al meglio le tecniche di imaging, sia possibile giungere alla diagnosi: in tal modo, si riduce il ricorso a procedure invasive e a indagini inutili e/o superflue. Grazie al taglio pratico e alla concisa trattazione del testo, i giovani radiologi e gli specializzandi hanno a disposizione un valido e rapido strumento di conoscenza del corretto approccio, approfondimento e aggiornamento della disciplina.

Miller Anestesia. Ediz. illustrata Jun 24 2022

Developments in Qualitative Psychotherapy Research Jul 13 2021 This book examines developments in qualitative psychotherapeutic research. It focuses on different methods and aspects of clinical practice. These range from the experiences of service users and clinicians, examining in detail different aspects of how therapy gets done in practice, to critiquing the politics and ideologies of psychotherapy practice. It aims to reflect the diversity that characterises this developing field and to represent practice-based research carried out in different clinical settings, from different perspectives and in different sociocultural contexts. The wide range of research projects presented arise from a network of clinicians and psychotherapy researchers who have established an international transdisciplinary forum for dedicated qualitative research on a range of topics in the field of mental health, using a variety of methodologies and theoretical approaches. In the spirit of dialogue, this book further provides chapters written by key practitioners in the field of qualitative research in mental health discussing these contributions. This book was originally published as a special issue of the European Journal of Psychotherapy & Counselling.
