Finance & Development, June 2012 Sep 02 2022 Five years after the first stirrings of the crisis, some countries have recovered, but others are still struggling. F&D looks at the world today and sees a complex and mixed picture for the future of the world economy. In "Tracking the Global Recovery" we learn that the most emerging markets seem to have moved on from the effects of the crisis, but most advanced economies have not. "Fixing the System" looks at how the pace of reforms to strengthen financial regulation has slowed. World Bank trade economist Bernard Hoekman takes stock of incipient moves toward protectionism in "Trade Policy: So Far So Good?". "Bystanders at the Collapse" looks at how emerging markets and low-income countries weathered the global recession. Financier Mohamed El-Erian weighs in on the potential threat posed by large payment surpluses and deficits in "Stable Disequilibrium." Also in the magazine, we explore what's happening in commodities markets, assess the rise of green technology, take a look at the shifts in South Asia's labor force, and uncover the harm money laundering can inflict on national economies. F&D's People in Economics series profiles Laura Tyson, Minder of the Gaps, and the Back to Basics series explains how money markets provide a way for borrowers to meet short-term financial needs.

Jaane Bhee Do Yaaro Apr 04 2020 In the 1980s, an unheralded Hindi movie, made on a budget of less than Rs 7 lakh, went from a quiet showing at the box office to developing a reputation as India's definitive comedy. Some of the country's finest theatre and film talents - all at key stages in their careers - participated in its creation, but the journey was anything but smooth. Among other things, it involved bumping off disco killers and talking gorillas, finding air-conditioned rooms for dead rats, persuading a respected actor to stop sulking and eat his meals, and resisting the temptation to introduce logic into a madcap script. In the end, it was worth it. Kundan Shah's Jaane Bhi Do Yaaro is now a byword for the kind of absurdist, satirical humours that Hindi cinema just hasn't seen enough of. This is the story of how it came to be despite incredible odds - and what it might have been. Jai Arjun Singh's take on the making of the film and its cult following is as entertaining as the film itself.

Chittagong Summer Of 1930 Nov 23 2021 Relive the armed revolution led by Master-da Surya Sen In 1930, schoolmaster Surya Sen, affectionately known as Master-da, leads sixty-five boys to capture the armoury of Chittagong in erstwhile East Bengal and frees the town for three days. They hope to go down

fighting, die a glorious death and set an example for the rest of the country. But destiny has a different plan for them, and the raid is followed by a four-year-long insurgency. Surya Sen is eventually caught and hanged—even though the British admit they have no incriminating evidence against him. Chittagong: Summer of 1930, Part 1 brings to life the famous Chittagong Armoury Raid, led by Bengali revolutionary Surya Sen, through the memories of his young disciples and the British officers who were his contemporaries. Manoshi Bhattacharya draws upon historical records, government documents and personal reminiscences, tracing the life of the Bengalis and the British during the period. She creates a vivid picture of the armed revolution from 1900 to 1934, and brings to light one of the lesser-known episodes of India's struggle for independence.

Life & Times of Mr. Subramaniam Dec 25 2021 'Life and Times of Mr S' worked for me like magic. It unsettled my notion of what was real, what possible, and resettled that notion in a strange luminous way. Narayanan uses what he sees as singular illusions - class, caste, family, for example - to conjure a "pluriverse" of his own, crowded with multiple, often polymorphous identities that, by their very nature, could be illusions too. This recalls the work (and play) of magician-acrobats and Narayanan is one of the best. Questioning the very nature of reality and the possibility of finding true answers, he pushes at limits, walking a dangerous tightrope. I am dazzled by his dexterity.' -Adil Jussawalla 'This unique and captivating book takes the experiments of G.V. Desani as a starting point and composes a chronicle of living language enacted around the person of Mr S. Lyric and narrative, parodic and reflective, Vivek Narayanan gives us a work of "woof-confidence" rich with mini-disquisitions on desire, guilt, food, caste, malls, etc. It jiggles the hearticles, slugs back the memory jug, and palavers with a laptop. Often on the heels of a round of elaborate, ebullient passages, the reader is brought to a complete stop: "Only in momentary stillness shall the wood apple appear." 'Life and Times of Mr S is a brilliant homage to an ever-morphing language and land.' -C.D. Wright

Saints And Sinners Mar 04 2020 The golden path to the greatest good Some countries prosper while others are left far behind. There are countries which have tried to progress at the cost of great human suffering and those which have reduced or even removed poverty. There are democracies and dictatorships, rogues and nations and law-abiding ones. Ali Mahmood - politician, thinker, businessman - has been pondering over the question of why some nations remain poor and why others grow rich, and in Saints and Sinners he comes up with some surprising conclusions. Looking at the developing nations of Asia and Africa, he realizes that while peace, stability and good governance through the 'rule of law' are essential to growth and prosperity, democracy is not necessarily the best way to achieve 'the greatest good for the greatest number'. For, military leaders, from Mao to Lee Kuan Yew, have provided stability, scientific and technical excellence, economic growth and prosperity to their nations. There can be many reasons for spectacular success, but the factor that seems to override them all is that of leadership. No matter what system, how hard the challenges, it is leaders who can take a nation through. As Ali Mahmood avers in this immensely engaging book, it is these rare and exceptional men and women who changed the destiny of nations and achieved the impossible.

Feb 24 2022 In Highway 39: Journeys through a Fractured Land, Sudeep Chakravarti attempts to unravel the brutal history of Nagaland and Manipur, their violent and restive present, and their uncertain and yet desperately hopeful future, as he travels along Dimapur, Kohima, Senapati, Imphal Thoubal, and their hinterlands-all touch points of brutalized aspiration, identity, conflict and tragedy. These are the lands that nurture deadly acronyms-like AFSPA, an act of Parliament that with impunity hurts and kills citizens. Lands where militants not only battle the Indian government but also each other a frenzy of ego, politics and survival, and enforce 'parallel' administrations. Sudeep Chakravarti's journey introduces the reader to stories that chill, anger and offer uneasy reflection. A fourteen-year-old Nagaland girl who dies resisting a soldier's attempt to rape her-and is now an icon. An eleven-year-old girl abducted by police in Manipur because they want to trap her parents. A faked encounter in Imphal that kills a former rebel, and also an innocent lady and her unborn child. A family in Kohima still trying to come to terms with the death of their youngest child in a mortar attack. Chakravarti also interacts with security and military officials, senior bureaucrats, top rebel leaders, and human rights and social activists, to paint a terrifying picture of a society and a people brought repeatedly to breakdown through years of political conceit and deceit, and stress and conflict. In prose suffused with a rare understanding of the region and its people, and with remarkable insight into its convoluted politics, Highway 39 brings into focus a region neglected and often forgotten by Mainland India, a region surrounded by nations historically inimical to India-and yet, which offer a dream gateway to the markets of East Asia. A region India can continue to ignore only at the peril of the very idea of India.

Oct 11 2020 In 1968, the director of USAID coined the term "green revolution" to celebrate the new technological solutions that promised to ease hunger around the world—and forestall the spread of more "red," or socialist, revolutions. Yet in China, where modernization and scientific progress could not be divorced from politics, green and red revolutions proceeded side by side. In Red Revolution, Green Revolution, Sigrid Schmalzer explores the intersection of politics and agriculture in socialist China through the diverse experiences of scientists, peasants, state agents, and "educated youth." The environmental costs of chemical-intensive agriculture and the human costs of emphasizing increasing production over equitable distribution of food and labor have been felt as strongly in China as anywhere—and yet, as Schmalzer shows, Mao-era challenges to technocracy laid important groundwork for today's sustainability and food justice movements. This history of "scientific farming" in China offers us a unique opportunity not only to explore the consequences of modern agricultural technologies but also to engage in a necessary rethinking of fundamental assumptions about science and society.

The Girls Behind The Gunfire Feb 01 2020 "Pick up your books- Its time to kick some butt." Life can be hard when you're a dork. You're not pretty or popular - just intelligent and very bored with the world around you. And then you discover that one of your friends, dorkier than you and thrice as socially inept, has a major secret. One she could kill for. Literally. Abhishikta is thrilled by the revelation that the nerdy Rikita is actually a lethal super-soldier - her geekiness belying the fact that she can kill everyone in a room in any given situation, within five minutes, using a wooden table-leg. And Riki proceeds to induct Abhi into the Foundation, a secret organization that claims to exist only to serve human civilization. Not human just civilization. Abhi takes to martial arts and guns with a bloodthirstiness previously unsuspected by anyone - even herself. What she doesn't take to, however, is the fascist control exerted by the Foundation over its soldiers. She begins to ask questions ... and things start getting really messy. An action-packed book about an ordinary-girl-turned- reluctant-assassin, *The Girls Behind the Gunfire* is a book you do not want to miss.

Decision Sourcing Feb 12 2021 We are living in the post-information age, the era of so-called 'Big Data' which is a practical possibility for corporations to report, chart and analyse every action, transaction and click that happens inside and outside their business. In *Decision Sourcing* Roberts and Pakkiri examine what this means to organisational decision making. They explode the myth that good decisions need only be made by informed ones through an examination into how business really make choices. They lay bare the poverty of current decision making processes in today's corporate world and offer fresh and fascinating insight into how digital social tools are providing new sources of information, how they are challenging hierarchy and how they are providing opportunities for growth and agility through aligned and inclusive decision making. This book is for those organisations that want to get beyond the corporate Facebook account and are ready for the bold step. It is for those businesses that want to engage their workforce and their customers in collaborative relationships that are at the heart of the successful social enterprise.

My Days In Prison - Karagam Jan 26 2022 Mahatma Gandhi called Indians to Civil Disobedience, with his Dandi March and the plea to boycott British goods. Millions of Indians bought and publicly set British goods on fire, exhorting others to follow suit - Urmila Shastri among them. She joined the Satyagraha Movement as a volunteer for the Congress in Meerut. On 17 July 1930, twenty-one-year-old Urmila was arrested on charges of picketing and instigating university students against the government. The case went to trial and the British magistrate offered to acquit her if she apologized in court. Urmila chose to go to jail for six months. Once again, when Mahatma Gandhi announced the Quit India Movement in 1942, Urmila courted arrest. This time, though, she fell seriously ill in jail and was denied proper treatment. She witnessed the inhuman atrocities that the jail authorities heaped on freedom fighters and other prisoners. With no other outlet for her angst, she wrote about her days there. She died at thirty-three, with a smile on her face and Gandhi's dream in her heart. Disturbing yet inspiring, this bilingual edition of Urmila Shastri's prison diary is an intimate chronicle of an epoch-making era.

Strategic Cultures in Europe Jan 06 2020 European countries work together in crisis management, conflict prevention and many other aspects of security and defence policy. Closer cooperation in this policy area seems to be the only viable way forward to address contemporary security challenges. Yet, despite the repeated interaction, fundamental assumptions about security and defence remain remarkably distinct across European nations. This book offers a comparative analysis of the security and defence policies of 27 EU member states and Turkey, drawing on the concept of 'strategic culture', in order to examine the chances and obstacles for closer security and defence cooperation across the continent. Along the lines of a consistent analytical framework, international experts provide case studies of the current security and defence policies in Europe as well as their historical and cultural roots. ?

Assessing the Role of Mobile Technologies and Distance Learning in Higher Education 18 2021 In recent years, the use of information technologies, mobile devices, and social media, along with the evolving needs of students, professionals, and academics, has grown rapidly. New ways of bringing learning content to students, new learning environments, and new teaching practices are necessary to keep up with these changes. Assessing the Role of Mobile Technologies and Distance Learning in Higher Education provides a comprehensive understanding of m-learning processes by discussing challenges in higher education and the role of information technologies for effective learning. This reference book offers both real experience and theoretical input for academicians, professionals, students, practitioners, policymakers, and managers.

Multi-point Cooperative Communication Systems: Theory and Applications 25 2021 Multi-point Cooperative Communication Systems: Theory and Applications mainly discusses multi-point cooperative communication technologies which are used to overcome the long-standing problem of limited transmission rate caused by the inter-point interference. Instead of combating the interference, recent progress in academia and industrial standardizations has evolved to adopt the philosophy of "exploiting" the interference to improve the transmission rate by cooperating among multiple points. This book addresses the multi-point cooperative communication system systematically giving the readers a clear picture of the technology map and where the discussed schemes may fit. This book includes not only the theories of paradigm-shifting multi-point cooperative communication, but also the designs of sub-optimal cooperative communication schemes for practical systems. Ming Ding is a senior researcher at Sharp Laboratories of China; Hanwen Luo is a professor at Shanghai Jiao Tong University.

Love Story # 1 To 14 Mar 28 2022 'Curious villagers stopped to stare at this shameless man and woman whose fingers were wound in each others' hair, and whose lips were stretched with impossible smiles. Their faces were glowing like warm red wax in the late afternoon. But after a minute or two, they too walked away, because looking at the two any longer became unbearable.' A woman who won't let the shadow of death disrupt her love life, another who falls irrevocably in love with a dead police officer, a devoted woman who steps out twice a week for Narcotics Anonymous meetings, friends who should have been lovers, a woman who offers all her pent-up love to a railway announcer's voice ... Annie Zaidi's stories are at once

warm and distant, violent and gentle - and, above all, untroubled by cynicism. This is a look at love, straight in the eye, to understand the alluring nature of the beast.

Special 2 Dec 01 2019 A racy thriller based on the new action flick starring Akshay Kumar, Manoj Bajrath and Anupam Kher An edge-of-the-seat thriller, the novel pits a crack CBI team led by ace investigator Waseem Khan against India's brainiest conman, Ajay, whose gang is responsible for a series of outrageous robberies that have been carried out across the country. Khan knows it isn't going to be easy outsmarting Ajay, once a passionate aspirant to a police job, who is now vicious in his hatred of the force. He also knows he has no option but to chase the gang down before it can cause any further damage. Already, business tycoons and cinema stars and prominent politicians have been duped of lakhs of rupees, and the police are under fire from all quarters. As Khan prepares his final master plan, the action moves to a well-known jewellery store at the Opera House in South Mumbai. Khan is determined that things will turn out differently on his watch.

Algeria Revisited May 18 2021 On 5 July 1962, Algeria became an independent nation, bringing to an end 132 years of French colonial rule. Algeria Revisited provides an opportunity to critically re-examine the colonial period, the iconic war of decolonisation that brought it to an end and the enduring legacies of 132 years. Given the apparent centrality of violence in this history, this volume asks how we might re-imagine conflict so as to better understand its forms and functions in both the colonial and postcolonial eras. It also considers the constantly shifting balance of power between different groups in Algeria and how these have been used to re-fashion colonial relationships. Turning to the postcolonial period, the book explores the challenges Algerians have faced as they have sought to forge an identity as an independent postcolonial nation and how this process has been represented. The roles played by memory and forgetting are highlighted as part of the ongoing efforts by both Algeria and France to grapple with the complex legacy of their prolonged and tumultuous relationship. This interdisciplinary volume sheds light on these and other issues, offering new insights into the history, politics, society and culture of modern Algeria and

historical relationship with France.

Greece's Horizons Jan 14 2021 The Greek economic crisis has imperilled the stability of the eurozone, generating much global anxiety. Policymakers, analysts, and the media have daily debated the course of the Greek economy, prescribing ways to move forward. This collection of essays progressively moves from analysis of the causes of the crisis and the policy responses so far to a debate on some of the country's advantages and capabilities that should underpin its new development model and propel the return to growth. The book analytically chooses to view the glass as half-full and seeks to provide motivation and inspiration for change by indicating some of the economic sectors where Greece maintains a comparative advantage. Therefore, it challenges the emerging picture of Greece as a country doomed to failure, where everything falls apart.

Japan's Disaster Governance Jun 26 2019 Natural disasters are often multifaceted and cause severe damage. Disasters initiated locally can become national and even global crises. Today's world urgently needs a new body of knowledge and techniques for the mitigation of and response to disaster. Central to such a body of knowledge are disaster preparedness, emergency and crisis management systems of government, of which capacity building is becoming an increasingly important element in public administration, management and governance. Today, disasters are to be managed by sound local, national and global governance, through all the phases of preparedness, prevention, mitigation and then to relief, recovery and re-construction. During all these phases, government plays the most important role. This book provides a case of the disaster governance of Japan, by presenting information and analyses on what happened in the Magnitude 9 Great East Japan Earthquake that caused the huge tsunami and the INES Level 7 Fukushima nuclear power plants accidents on March 11, 2011. In examining this Japanese case study, this book illustrates the socio-economic damage of the stricken areas together with the overall picture of the disasters. It examines Japan's capacity for disaster governance and its crisis management system in response to the most devastating disaster that the country has ever encountered since the end of WWII. It also offers preliminary findings learned from this experience in the Japan's public administration and governance systems, challenged to be more accountable and transparent during the recovery and reconstruction efforts now in progress.

Global Governance, Human Rights and International Law Sep 29 2019 This book offers a stimulating introduction to the links between areas of global governance, human rights, global economy and international law. By drawing on a range of diverse subject areas, Errol P. Mendes argues that the foundations of global governance, human rights and international law are undermined by a conflict or 'tragic flaw', where insistence on absolute conceptions of state sovereignty are pitted against universal accepted principles of justice and human rights resulting in destructive self-interest for both the state and the global community. The book explores how human rights and international law are applied in some of the critical institutions of global governance and in the operations of the global private sector, and how States, institutions and global civil society struggle to fight this 'tragic flaw'. The book is brought up to date by considering developments in the role of the IMF, the World Bank, bilateral investment treaties, the likely failure of the Doha round of WTO negotiations; the legacy of the 2008 financial crisis; and the role of the International Criminal Court and the evolving Responsibility to Protect doctrine in international peace.

and security crises in the Middle East, Central and West Africa among other regions of the world. With an intensely interdisciplinary approach, this book motivates new thinking in the realm of global governance and international law, and promotes the development of new strategies for negotiating between conflict, leadership and organisational values within global institutions. The book will be of great interest and use to students and researchers of public international law, international relations and political science, business and human rights, global governance and international trade and economic law.

The BRICs and Emerging Economies in Comparative Perspective May 06 2020 In the past ten to twenty years the global political economy picture has dramatically changed with the emergence of the economies of Brazil, Russia, India and, notably, China (BRICs) as big players and competitors of the advanced economies in the West and Eastern Asia. The book comparatively analyses institutional change in the BRICs. This book examines the BRICs by analysing their institutional development, their main continuities and changes, and their differences. It provides a comparative analysis of the political economies of the BRICs, but also considers South Africa and Turkey. The contributors provide a systematic comparison of the state-economy and the capital-labour relationships and explore whether they liberalized or followed a specific trajectory. The book also addresses debates on the varieties of capitalism and explores whether emerging economies fit into the dichotomous construction of liberal and coordinated capitalism or whether they require a more differentiated typological approach. Moving away from rigid conceptions and the static classification of political economies as either liberal or coordinated and presenting a more open approach, The BRICs and Emerging Economies in Comparative Perspective will be vital reading for students and scholars of comparative political economy, international relations, capitalism, the BRICs, emerging markets and the role of the state in the economy.

Capital Punishment: New Perspectives Apr 16 2021 This collection asks questions about the received wisdom of the debate about capital punishment. Woven through the book, questions are asked of, and remedies proposed for, a raft of issues identified as having been overlooked in the traditional discourse. The book provides a long overdue review of the disparate groups and strategies that lay claim to abolitionism. The authors argue that capital litigators should use their skills challenging the abuses not just of process, but of the conditions in which the condemned await their fate, namely prison conditions, education, leisure, and medical services, etc. In the aftermath of successful constitutional challenges it is the beneficiaries (arguably those who are considered successes, having been 'saved' from the death penalty and now suffering living death penalties of one sort or another) who are suffering the cruel and inhumane alternative. Part I of the book offers a selection of diverse, nuanced examinations of death penalty phenomena, scrutinizing complexities frequently omitted from the narrative of academics and activists. It offers a challenging and comprehensive analysis of issues critical to the abolition debate. Part II offers examinations of countries usually absent from academic analysis to provide an understanding of the status of the debate locally and opportunities for wider application.
