Ethical Maturity in the Helping Professions Jun 29 2022 Most practitioners head for codes of ethics and ethical frameworks to help them resolve ethical issues and dilemmas. They go 'outside' rather than 'inside'. Ethical Maturity in the Helping Professions suggests a different approach that views ethical codes and frameworks as the first stepping stone to a higher ethic - an ethic of fidelity, relationships, and trust. Building on Rest's four components of ethical practice, Michael Carroll and Elisabeth Shaw propose six components that together make up what they call 'ethical maturity' or practical ethical wisdom. Born from who we are, and fashioned on the anvil of experience and knowledge, the book challenges helping professionals to review what they mean by ethics and suggests they step up to a higher ethic of relational accountability.

[The Working Life](#) Oct 10 2020 Over the past few decades, the economic prospects for workers possessing relatively few skills have worsened as the demand for skills in the labor market has increased. Even in jobs that might be categorized as low-skilled, workers require a diverse set of skills to succeed. Many of these skills can only be obtained through schooling or job training. This is why workers lacking skills find it difficult to attain a foothold in the labor market and why employers have difficulty filling low-skilled jobs. While it was previously assumed that the supply of workers able to fill low-skilled jobs exceeded the demand, this book reveals that the labor market for low-skilled workers actually operates quite differently. Maxwell presents the results of her groundbreaking survey of 405 employers, which queried them about jobs requiring no more than a high school education and no more than one year of work experience. These data allow her to establish the link between skills and low-skilled jobs and to reveal the current state of the labor market facing low-skilled workers. The data also highlights the knowledge and skills that employers require in low-skilled jobs and the abilities that individuals who apply for those jobs bring to the table. Overall, the employers' responses allow Maxwell to make the following five key points: (1) Low-skilled jobs require skills. Low-skilled jobs are not no-skilled jobs. While individuals do not have to have a high level of credentials to apply for low-skilled jobs, once they are hired, employers emphasize that they must possess the requisite skills to succeed in their jobs. Among them are the so-called new basic skills: English, math, problem-solving, and communication skills. In addition, appropriate workplace behavior and the ability to follow instructions are important, and physical abilities and mechanical skills are also required, often at levels more intense than at other jobs; (2) Shortages of appropriately skilled workers in low-skilled jobs exist, even when labor markets are slack. Close to 60 percent of firms in this study report great difficulty--one-fourth of them had extreme difficulty--finding qualified workers for low-skilled jobs even when unemployment rates exceed 7.0 percent; (3) Skills are rewarded in the labor market for workers in low-skilled jobs. Low-skilled jobs requiring skills with a high relative demand in the local labor market (I.E., skills in short supply) carry increased occupational wages; (4) Low skilled jobs offer promotional opportunities. Firms report that over 90 percent of entry-level low-skilled jobs have promotional opportunities, as long as workers are willing and able to expand their skill sets. Firms also construct pipelines of appropriately skilled workers by hiring entry-level workers with skills needed in the position above entry level; and (5) Hiring requirements in low-skilled jobs are relaxed in tight labor markets. Firms match recruiting and screening methods to the skills needed in the low-skilled jobs. As labor markets loosen, these firms use less extensive recruiting methods but adopt more intensive screening methods. This suggests that, during loose labor markets, firms sort through a greater number of applicants in order to uncover workers with the skill sets needed in the job. Maxwell also defines low-skilled jobs, identifies the populations who fill these jobs and the economic realities facing them, and offers policy solutions aimed at facilitating the career development of low-skilled individuals. These solutions include building skills while attending public schools and while attending publicly-funded employment and training programs. They also include increasing the demand for low-skilled workers and refining the nation's workforce development programs to better steer individuals into jobs providing economic self-sufficiency. The following chapters are contained in this book: (1) Low Skilled Jobs: The Reality behind the Popular Perceptions; (2) Local Labor Markets and Low-Skilled Jobs: Theory and Data; (3) How Skills Matter; (4) Recruiting and Screening Workers in Low-Skilled Positions; (5) Skills, Promotions, and Low-Skilled Positions; (6) Labor Markets for Workers in Low-Skilled Positions: How Can Policies Help Workers?

Mental resilience is our most important tool for surviving a rupture. This book can give you some hope and comfort that you're not alone in whatever you're facing.

Only by accepting them can we become free. This book is an attempt to help you confront these realities of life. It catalogues some of the most universally known but universally resisted Hard Truths in a fun and non-threatening format. Like a pre-flight checklist, it will help you review these truths whenever you need to. Accepting them fully? That's entirely up to you.

Asylum Jun 17 2021 Alexis' s long-awaited second novel follows his award-winning [Childhood](#). Set in Ottawa during the Mulroney years, [Asylum](#) is Andr é Alexis' s sweeping, edged-in-satire, yet deeply serious tale of intertwined lives and fortunes, of politics and vain ambition, of the building of a magnificent prison, of human fallibility, of the search for refuge, of the impossibility of love, and of finding home. Whether he is taking us into the machinations of a government office or into the mysterious workings of the human heart, Alexis is always alert to the humour and the profound truth of any situation. His cast of characters is eccentric and unforgettable, all recognizable in one way or another as aspects of ourselves or people we know well. At the centre of the story, which covers almost a decade, is a visionary project to build an ideal prison, a perfect metaphor for the purest aspects of artistic ambition and for all that is great and flawed in the world. Andr é Alexis is a true original, one of the most talented and astute writers writing in Canada today. This dazzling novel is filled with tragedy, dry wit, intellectual grit. It is playful, linguistically accomplished, and psychologically profound. Its yearnings constitute the highest level of human concerns and pursuits. Alexis has written [The Great Canadian Novel](#), with a twist.

90 Seconds to a Life You Love May 29 2022 Learn how to manage your most difficult feelings and build the emotional strength you need to create the life of your dreams. Sadness, shame, helplessness, anger, embarrassment, disappointment, frustration, and vulnerability. In 30 years as a practicing psychologist, Dr. Joan Rosenberg has found that what most often blocks people from success and feeling capable in life is the inability to experience, move through, and handle these 8 unpleasant feelings. Knowing how to deal with intense, overwhelming, or uncomfortable feelings is essential to building confidence, emotional strength, and resilience. Yet when we distract or disconnect from these feelings, we move away from confidence, health, and our desired pursuits, ultimately undermining our ability to fully realize our ambitions. Neuroscientists suggest that the biological lifespan of a feeling, often known first through bodily sensations, lasts approximately 90 seconds. Dr. Rosenberg teaches readers to be aware, consciously lean into, and balance these unpleasant emotions by riding one or more 90-second waves of the bodily sensations. By staying present to these 8 feelings, we cultivate the confidence that we can handle life's challenges and the deep sense we can pursue whatever we want. Combining more than three decades of clinical experience with aspects of clinical psychology, mindfulness, and neuroscience research, 90 Seconds to a Life You Love is a strategic and practical guide on building core emotional strength, reducing anxiety, and developing the confidence you need to create a life of your design -- a life you love.

Hard at Work Nov 22 2021 For most of us, work is a basic daily fact of life. But that simple fact encompasses an incredibly wide range of experiences. Hard at Work takes readers into the day-to-day work experiences of more than fifty working people in Singapore who hold jobs that run from the ordinary to the unusual: from ice cream vendors, baristas, police officers and funeral directors to academic ghostwriters, temple flower sellers, and Thai disco girl agents. Through first-person narratives based on detailed interviews, vividly augmented with color photographs, Hard at Work reminds us of the everyday labor that continually goes on around us, and that every job can reveal something interesting if we just look closely enough. It shows us too the ways inequalities of status and income are felt and internalized in this highly globalized society.

Leonie Martin Apr 27 2022 A sister of Saint Th é r è se of Lisieux, L é onie Martin (1863-1941) was one of the five daughters of Z é lie and Louis Martin, who were canonized by Pope Francis. She was the least gifted of the five Martin sisters, an emotionally disturbed child who suffered much and caused much anguish in her family. Marie Baudouin-Croix has carefully researched L é onie's life, including her mother's voluminous correspondence about her family life. In letters to her daughters, sister, brother, and sister-in-law, Z é lie confided the challenges she faced in raising L é onie. Yet L é onie was the first one in the Martin family to understand and to follow Th é r è se's Little Way. After three valiant but unsuccessful attempts to enter consecrated religious life, L é onie was finally accepted by the Visitation Order in Caen. As a Visitation nun she succeeded in conquering a difficult temperament and other personal challenges, so that by the time of her death at seventy-eight years old she was regarded by many as a saint. Her convent at Caen has been inundated with letters testifying to her posthumous intercessory aid. How did this troubled child turn into the nun remembered by many as so kind, serene, and happy that they could not believe she had such a difficult childhood? She discovered God within herself, in her weakness and suffering, and she became a great disciple of Th é r è se's "way of confidence and love". L é onie practiced the Little Way so deeply that in 2015 the cause for her sainthood was officially opened by the Church.

Recently discovered in South Africa, they show him to be one of the most sensitive and sympathetic travellers, his observations untainted by any sense of moral superiority. Hugh Clapperton has a sharp eye for detail, be it wind-stiller magicians, the effect of the evil eye or slave skeletons clustered around well heads. He hears musicians in jackal-headed masks and bagpipes in a wedding procession. He has a gift for friendship, feasting locals, offering himself to women and delighting in the company of both dignified tribal sheikhs and fearsome renegades like Mustapha the Red.
