Bringing together exemplary ethnographies of repair work around the world, it examines the politics of repair, its work settings and intricate networks, in and across a wide range of situations, lay and professional. The book evidences the topical relevance of situated inquiry into breakdown, repair, and maintenance for engaging with the contemporary world more broadly. Airplanes and artworks, bicycles and buildings, cars and computers, medical devices and mobile phones, as virtually any commodity, infrastructure or technical artifact, have in common their occasional breakdown, if not inbuilt obsolescence.
