A History of New York Oct 23 2021

New Insights in the History of Interpreting Mar 04 2020 Who mediated intercultural exchanges in 9th-century East Asia or in early voyages to the Americas? Did the Soviets or the Americans invent simultaneous interpreting equipment? How did the US government train its first Chinese interpreters? Why is it that Taiwanese interpreters were executed for Japanese war crimes? Bringing together papers from an international symposium held at Rikkyo University in 2014 along with two select pieces, this volume pursues such questions in an eclectic exploration of the practice of interpreting, the recruitment of interpreters, and the challenges interpreters have faced in diplomacy, colonization, religion, war, and occupation. It also introduces innovative use of photography, artifacts, personal journals, and fiction as tools for the historical study of interpreters and interpreting. Targeted at practitioners, scholars, and students of interpreting, translation, and history, the new insights presented in the ten original articles aim to spark discussion and research on the vital roles interpreters have played in intercultural communication through history. Now Open Access as part of the Knowledge Unlatched 2017 Backlist Collection.

The Pelican History of New Zealand Feb 12 2021

A History of New York in 27 Buildings Nov 04 2022 From the urban affairs correspondent of the New York Times--the story of a city through twenty-seven structures that define it. As New York is poised to celebrate its four hundredth anniversary, New York Times correspondent Sam Roberts tells the story of the city through bricks, glass, wood, and mortar, revealing why and how it evolved into the nation's biggest and most influential. From

the seven hundred thousand or so buildings in New York, Roberts selects twenty-seven that, in the past four centuries, have been the most emblematic of the city's economic, social, and political evolution. He describes not only the buildings and how they came to be, but also their enduring impact on the city and its people and how the consequences of the construction often reverberated around the world. A few structures, such as the Empire State Building, are architectural icons, but Roberts goes beyond the familiar with intriguing stories of the personalities and exploits behind the unrivaled skyscraper's construction. Some stretch the definition of buildings, to include the city's oldest bridge and the landmark Coney Island Boardwalk. Others offer surprises: where the United Nations General Assembly first met; a hidden hub of global internet traffic; a nondescript factory that produced billions of dollars of currency in the poorest neighborhood in the country; and the buildings that triggered the Depression and launched the New Deal. With his deep knowledge of the city and penchant for fascinating facts, Roberts brings to light the brilliant architecture, remarkable history, and bright future of the greatest city in the world.

The New York Times Book Review Jun 30 2022 A “delightful” (Vanity Fair) collection from the longest-running, most influential book review in America, featuring its best, funniest, strangest, and most memorable coverage over the past 125 years. Since its first issue on October 10, 1896, The New York Times Book Review has brought the world of ideas to the reading public. It is the publication where authors have been made, and where readers first encountered the classics that have enriched their lives. Now the editors have curated the Book Review’s dynamic 125-year history, which is essentially the story of modern American letters. Brimming with remarkable reportage and photography, this beautiful book collects interesting reviews, never-before-heard anecdotes about famous writers, and spicy letter exchanges. Here are the first takes on novels we now consider masterpieces, including a long-forgotten pan of Anne of Green Gables and a rave of Mrs. Dalloway, along with reviews and essays by Langston Hughes, Eudora Welty, James Baldwin, Nora Ephron, and more. With scores of stunning vintage photographs, many of them sourced from the Times’s own archive, readers will discover how literary tastes have shifted through the years—and how the Book Review’s coverage has shaped so much of what we read today.

History Has Begun May 06 2020 Popular consensus says that the US rose over two centuries to Cold War victory and world domination, and is now in slow decline. But is this right? History's great civilizations have always lasted much longer, and for all its colossal power, American culture was overshadowed by Europe until recently. What if this isn't the end? In *History Has Begun*, Bruno Maçães offers a compelling vision of America's future, both fascinating and unnerving. From the early American Republic, he takes us to the turbulent present, when, he argues, America is finally forging its own path. We can see the birth pangs of this new civilization in today's debates on guns, religion, foreign policy and the significance of Trump. Should the coronavirus pandemic be regarded as an opportunity to build a new kind of society? What will its values be, and what will this new America look like? Maçães traces the long arc of US history to argue that in contrast to those who see the US on the cusp of decline, it may well be simply shifting to a new model, one equally powerful but no longer liberal. Consequently, it is no longer enough to analyze America's current trajectory through the simple prism of decline vs. progress, which assumes a static model-America as liberal leviathan. Rather, Maçães argues that America may be casting off the liberalism that has defined the country since its founding for a new model, one more appropriate to succeeding in a transformed world.

A New History of Management Jul 28 2019 This book argues that if we are to think differently about management, we must first rewrite management history.

The Nature of New York Mar 16 2021 Presents an environmental history of New York State, from the first contact of the region's indigenous inhabitants with Europeans to the present day.

Central Park Feb 24 2022 *Includes pictures *Includes accounts of the park's construction and history written by newspapers and people who worked on it. *Includes a bibliography for further reading *Includes a table of contents "I just want to go through Central Park and watch folks passing by. Spend the whole day watching people. I miss that." - Barack Obama Of all the great cities in the world, few personify their country like New York City. As America's largest city and best known immigration gateway into the country, the Big Apple represents the beauty, diversity and sheer strength of the United States, a global financial center that has enticed people chasing the "American Dream" for centuries. Given that background, it's fitting that the city's most unique landmark, Central Park, sits at the heart of Manhattan and provides a stark contrast to the hustle and bustle surrounding it. As actor Haley Joel Osment once put it, "My favorite place is Central Park because you never know what you're going to find there. I also like that when I look out the windows of surrounding hotels, it's seems like I'm looking out over a forest." In 1811, an ambitious plan was laid out that would transform Manhattan's grid into 2,028 blocks, from Houston Street to 155th Street. Forests would be cut down, hills razed, ponds and streams filled. It took years to survey, and years to complete: at different points in time, one might have seen a long avenue laid out, unpaved, with a scattering of as-yet-unattached six-story buildings amid boulders yet to be cleared and soon-to-be-demolished shantytowns. Ironically, almost no parks were incorporated into the plan, and Central Park would not be built until the end of the 19th century. When Central Park was designed, however, it was an ambitious project on an almost unprecedented affair. As serene as Central Park is today, it's hard to imagine that its creation was an entirely manmade affair consisting of dynamite blasts, tons of imported topsoil, and the labor of thousands of workers. Before the area's transformation, the land was swampy terrain used by impoverished squatters and people who let their livestock roam the grounds, but after nearly 15 years of work, the metamorphosis was nearly complete. Of course, New Yorkers soon came to understand that such a large park required serious upkeep; as historian Robert Caro noted, "Lawns, unseeded, were expanses of bare earth, decorated with scraggly patches of grass and weeds, that became dust holes in dry weather and mud holes in wet...The once beautiful Mall looked like a scene of a wild party the morning after. Benches lay on their backs, their legs jabbing at the sky..." With city resources being pumped into maintaining Central Park, it has become the most visited urban park in the world, and it is a cultural touchstone that draws not only tourists but events. Locals commonly walk or run through the park, and others play sports or simply picnic, but Central Park is also home to monuments of all sorts, including statues dedicated to artists and playwrights, the Strawberry Fields tribute to John Lennon, and an Ancient Egyptian obelisk known colloquially as Cleopatra's Needle. On top of all that, Central Park has a diverse array of wildlife thanks to a sizable reservoir, over 1,000 different species of trees, a zoo, and more. Put simply, Central Park is the most unique place in one of America's most unique cities. *Central Park: The History of New York City's Most Unique Landmark* chronicles the construction and history of the Big Apple's most famous park. Along with pictures of important people, places, and events, you will learn about Central Park like never before, in no time at all.

Greater Gotham Jun 18 2021 In this utterly immersive volume, Mike Wallace captures the swings of prosperity and downturn, from the 1898 skyscraper-driven boom to the Bankers' Panic of 1907, the labor upheaval, and violent repression during and after the First World War. Here is New York on a whole new scale, moving from national to global prominence -- an urban dynamo driven by restless ambition, boundless energy, immigrant dreams, and Wall Street greed. Within the first two decades of the twentieth century, a newly consolidated New York grew exponentially. The city exploded into the air, with skyscrapers jostling for prominence, and dove deep into the bedrock where massive underground networks of subways, water pipes, and electrical conduits sprawled beneath the city to serve a surging population of New Yorkers from all walks of life. New York was transformed in these two decades as the world's second-largest city and now its financial capital, thriving and sustained by the city's seemingly

unlimited potential. Wallace's new book matches its predecessor in pure page-turning appeal and takes America's greatest city to new heights.

Gotham Oct 03 2022 To European explorers, it was Eden, a paradise of waist-high grasses, towering stands of walnut, maple, chestnut, and oak, and forests that teemed with bears, wolves, raccoons, beavers, otters, and foxes. Today, it is the site of Broadway and Wall Street, the Empire State Building and the Statue of Liberty, and the home of millions of people, who have come from every corner of the nation and the globe. In *Gotham*, Edwin G. Burrows and Mike Wallace have produced a monumental work of history, one that ranges from the Indian tribes that settled in and around the island of Manna-hata, to the consolidation of the five boroughs into Greater New York in 1898. It is an epic narrative, a story as vast and as varied as the city it chronicles, and it underscores that the history of New York is the story of our nation. Readers will relive the tumultuous early years of New Amsterdam under the Dutch West India Company, Peter Stuyvesant's despotic regime, Indian wars, slave resistance and revolt, the Revolutionary War and the defeat of Washington's army on Brooklyn Heights, the destructive seven years of British occupation, New York as the nation's first capital, the duel between Aaron Burr and Alexander Hamilton, the Erie Canal and the coming of the railroads, the growth of the city as a port and financial center, the infamous draft riots of the Civil War, the great flood of immigrants, the rise of mass entertainment such as vaudeville and Coney Island, the building of the Brooklyn Bridge and the birth of the skyscraper. Here too is a cast of thousands--the rebel Jacob Leisler and the reformer Joanna Bethune; Clement Moore, who saved Greenwich Village from the city's street-grid plan; Herman Melville, who painted disillusioned portraits of city life; and Walt Whitman, who happily celebrated that same life. We meet the rebel Jacob Leisler and the reformer Joanna Bethune; Boss Tweed and his nemesis, cartoonist Thomas Nast; Emma Goldman and Nellie Bly; Jacob Riis and Horace Greeley; police commissioner Theodore Roosevelt; Colonel Waring and his "white angels" (who revolutionized the sanitation department); millionaires John Jacob Astor, Cornelius Vanderbilt, August Belmont, and William Randolph Hearst; and hundreds more who left their mark on this great city. The events and people who crowd these pages guarantee that this is no mere local history. It is in fact a portrait of the heart and soul of America, and a book that will mesmerize everyone interested in the peaks and valleys of American life as found in the greatest city on earth. *Gotham* is a dazzling read, a fast-paced, brilliant narrative that carries the reader along as it threads hundreds of stories into one great blockbuster of a book.

A History Lover's Guide to New York City Aug 01 2022 New York is a city of superlatives. It has the largest population, greatest wealth, broadest diversity and most elegant museums in the nation. With that comes an amazing history. This tour of the Big Apple goes beyond the traditional guidebook to offer visitors and residents alike a chance to walk back in time along the streets of Manhattan. George Washington took his first oath of office on the steps of Federal Hall. Visitors can still dine at the famed Fraunces Tavern and worship at historic St. Paul's Chapel. From the Brooklyn Bridge to stunning skyscrapers, the city celebrates its own history and that of the nation. Join author Alison Fortier as she traces the history and heritage of America's largest metropolis.

Taiwan: A New History Aug 21 2021 This is a comprehensive portrait of Taiwan. It covers the major periods in the development of this small but powerful island province/nation. The work is designed in the style of the multi-volume "Cambridge History of China".

National History and New Nationalism in the Twenty-First Century Sep 21 2021 National history has once again become a battlefield. In internal political conflicts, which are fought on the terrain of popular culture, museums, schoolbooks, and memorial politics, it has taken on a newly important and contested role. Irrespective of national specifics, the narratives of new nationalism are quite similar everywhere. National history is said to stretch back many centuries, expressing the historical continuity of a homogeneous people and its timeless character. This people struggles for independence, guided by towering leaders and inspired by the sacrifice of martyrs. Unlike earlier forms of nationalism, the main enemies are no longer

neighbouring states, but international and supranational institutions. To use national history as an integrative tool, new nationalists claim that the media and school history curricula should not contest or question the nation and its great historical deeds, as doubts threaten to weaken and dishonour the nation. This book offers a broad international overview of the rhetoric, contents, and contexts of the rise of these renewed national historical narratives, and of how professional historians have reacted to these phenomena. The contributions focus on a wide range of representative nations from around all over the globe.

The History of New Zealand Sep 02 2022 Chronicles the history of this South Pacific island nation from its earliest Maori settlers to the present, covering its geography, key figures, intertribal relations, the effects of European contact, and its prospects for the future.

These Truths: A History of the United States Sep 29 2019 New York Times Bestseller In the most ambitious one-volume American history in decades, award-winning historian and New Yorker writer Jill Lepore offers a magisterial account of the origins and rise of a divided nation, an urgently needed reckoning with the beauty and tragedy of American history. Written in elegiac prose, Lepore's groundbreaking investigation places truth itself—a devotion to facts, proof, and evidence—at the center of the nation's history. The American experiment rests on three ideas—"these truths," Jefferson called them—political equality, natural rights, and the sovereignty of the people. And it rests, too, on a fearless dedication to inquiry, Lepore argues, because self-government depends on it. But has the nation, and democracy itself, delivered on that promise? *These Truths* tells this uniquely American story, beginning in 1492, asking whether the course of events over more than five centuries has proven the nation's truths, or belied them. To answer that question, Lepore traces the intertwined histories of American politics, law, journalism, and technology, from the colonial town meeting to the nineteenth-century party machine, from talk radio to twenty-first-century Internet polls, from Magna Carta to the Patriot Act, from the printing press to Facebook News. Along the way, Lepore's sovereign chronicle is filled with arresting sketches of both well-known and lesser-known Americans, from a parade of presidents and a rogues' gallery of political mischief makers to the intrepid leaders of protest movements, including Frederick Douglass, the famed abolitionist orator; William Jennings Bryan, the three-time presidential candidate and ultimately tragic populist; Pauli Murray, the visionary civil rights strategist; and Phyllis Schlafly, the uncredited architect of modern conservatism. Americans are descended from slaves and slave owners, from conquerors and the conquered, from immigrants and from people who have fought to end immigration. "A nation born in contradiction will fight forever over the meaning of its history," Lepore writes, but engaging in that struggle by studying the past is part of the work of citizenship. "The past is an inheritance, a gift and a burden," *These Truths* observes. "It can't be shirked. There's nothing for it but to get to know it."

Historical New Hampshire May 18 2021

Index, A History of the: A Bookish Adventure from Medieval Manuscripts to the Digital Age May 30 2022 A New York Times Editors' Choice Book Named a Most Anticipated Book of 2022 by Literary Hub and Goodreads A playful history of the humble index and its outsized effect on our reading lives. Most of us give little thought to the back of the book—it's just where you go to look things up. But as Dennis Duncan reveals in this delightful and witty history, hiding in plain sight is an unlikely realm of ambition and obsession, sparring and politicking, pleasure and play. In the pages of the index, we might find Butchers, to be avoided, or Cows that sh-te Fire, or even catch Calvin in his chamber with a Nonne. Here, for the first time, is the secret world of the index: an unsung but extraordinary everyday tool, with an illustrious but little-known past. Charting its curious path from the monasteries and universities of thirteenth-century Europe to Silicon Valley in the twenty-first, Duncan uncovers how it has saved heretics from the stake, kept politicians from high office, and made us all into the readers we are today. We follow it through German print shops and Enlightenment coffee houses, novelists' living rooms and university laboratories, encountering emperors and popes, philosophers and prime ministers,

poets, librarians and—of course—indexers along the way. Revealing its vast role in our evolving literary and intellectual culture, Duncan shows that, for all our anxieties about the Age of Search, we are all index-rakers at heart—and we have been for eight hundred years.

Refiguring History Nov 11 2020 In this engaging sequel to *Rethinking History*, Keith Jenkins argues for a re-figuration of historical study. At the core of his survey lies the realization that objective and disinterested histories as well as historical 'truth' are unachievable. The past and questions about the nature of history remain interminably open to new and disobedient approaches. Jenkins reassesses conventional history in a bold fashion. His committed and radical study presents new ways of 'thinking history', a new methodology and philosophy and their impact on historical practice. This volume is written for students and teachers of history, illuminating and changing the core of their discipline.

Activist New York Oct 11 2020 *Activist New York* surveys New York City's long history of social activism from the 1650's to the 2010's. Bringing these passionate histories alive, *Activist New York* is a visual exploration of these movements, serving as a companion book to the highly-praised Museum of the City of New York exhibition of the same name. New York's primacy as a metropolis of commerce, finance, industry, media, and ethnic diversity has given it a unique and powerfully influential role in the history of American and global activism. Steven H. Jaffe explores how New York's evolving identities as an incubator and battleground for activists have made it a "machine for change." In responding to the city as a site of slavery, immigrant entry, labor conflicts, and wealth disparity, New Yorkers have repeatedly challenged the status quo. *Activist New York* brings to life the characters who make up these vibrant histories, including David Ruggles, an African American shopkeeper who helped enslaved fugitives on the city's Underground Railroad during the 1830s; Clara Lemlich, a Ukrainian Jewish immigrant who helped spark the 1909 "Uprising of 20,000" that forever changed labor relations in the city's booming garment industry; and Craig Rodwell, Karla Jay, and others who forged a Gay Liberation movement both before and after the Stonewall Riot of June 1969. Permanent exhibition: Puffin Foundation Gallery, Museum of the City of New York, USA.

The Speaking Stone Sep 09 2020 *The Speaking Stone: Stories Cemeteries Tell* is a literary love letter to the joys of wandering graveyards and the discoveries such wanderings can yield. Here, Michael Griffith roams Spring Grove (founded 1844), the nation's third-largest cemetery, following curiosity and accident wherever they lead. The result is this fascinating collection, which narrates the lives of those he encountered on the way. Griffith lingers amidst the traces left behind--these are stories of race, feminism, art, and death, uncovered through obituaries, archival documents, and family legacies. Some essays focus on well-known figures like the feminist icon and freethinker Fanny Wright, but most chronicle the lives of lesser-known figures (a spiritual medium, a temperance advocate, the designers of caskets and hearses, the inventor of the glass-door oven) or of nearly unknown ones (a young heiress who died under mysterious circumstances, the daring sign-painters known as walldogs). *The Speaking Stone* examines what endures and what doesn't, reflecting on the vanity and poignancy of our attempts to leave monuments that last. Archival photos grace the pages of these thirteen essays that explore a larger, deeply tangled complex of ideas about place, history, self, and art.

Music Is History Jun 06 2020 New York Times bestselling *Music Is History* combines Questlove's deep musical expertise with his curiosity about history, examining America over the past fifty years—now in paperback Focusing on the years 1971 to the present, Questlove finds the hidden connections in the American tapes, whether investigating how the blaxploitation era reshaped Black identity or considering the way disco took an assembly-line approach to Black genius. And these critical inquiries are complemented by his own memories as a music fan and the way his appetite for pop culture taught him about America. A history of the last half-century and an intimate conversation with one of music's most influential and original voices, *Music Is History* is a singular look at contemporary America.

How to Write the History of the New World Dec 13 2020 *An Economist Book of the Year, 2001*. In the 18th century, a debate ensued over the

French naturalist Buffon's contention that the New World was in fact geologically new. Historians, naturalists, and philosophers clashed over Buffon's view. This book maintains that the "dispute" was also a debate over historical authority: upon whose sources and facts should naturalists and historians reconstruct the history of the New World and its people. In addressing this question, the author offers a strikingly novel interpretation of the Enlightenment.

Life After Gravity Aug 28 2019 The story of Isaac Newton's decades in London - as ambitious cosmopolitan gentleman, President of London's Royal Society, Master of the Mint, and investor in the slave trade. Isaac Newton is celebrated throughout the world as a great scientific genius who conceived the theory of gravity. But in his early fifties, he abandoned his life as a reclusive university scholar to spend three decades in London, a long period of metropolitan activity that is often overlooked. Enmeshed in Enlightenment politics and social affairs, Newton participated in the linked spheres of early science and imperialist capitalism. Instead of the quiet cloisters and dark libraries of Cambridge's all-male world, he now moved in fashionable London society, which was characterized by patronage relationships, sexual intrigues and ruthless ambition. Knighted by Queen Anne, and a close ally of influential Whig politicians, Newton occupied a powerful position as President of London's Royal Society. He also became Master of the Mint, responsible for the nation's money at a time of financial crisis, and himself making and losing small fortunes on the stock market. A major investor in the East India Company, Newton benefited from the global trading networks that relied on selling African captives to wealthy plantation owners in the Americas, and was responsible for monitoring the import of African gold to be melted down for English guineas. Patricia Fara reveals Newton's life as a cosmopolitan gentleman by focussing on a Hogarth painting of an elite Hanoverian drawing room. Gazing down from the mantelpiece, a bust of Newton looms over an aristocratic audience watching their children perform a play about European colonialism and the search for gold. Packed with Newtonian imagery, this conversation piece depicts the privileged, exploitative life in which this eminent Enlightenment figure engaged, an uncomfortable side of Newton's life with which we are much less familiar.

Mannahatta Nov 23 2021 On September 12, 1609, Henry Hudson first set foot on the land that would become Manhattan. Today, it's difficult to imagine what he saw, but for more than a decade, landscape ecologist Eric Sanderson has been working to do just that. *Mannahatta: A Natural History of New York City* is the astounding result of those efforts, reconstructing in words and images the wild island that millions now call home. By geographically matching an 18th-century map with one of the modern city, examining volumes of historic documents, and collecting and analyzing scientific data, Sanderson re-creates the forests of Times Square, the meadows of Harlem, and the wetlands of downtown. His lively text guides readers through this abundant landscape, while breathtaking illustrations transport them back in time. *Mannahatta* is a groundbreaking work that provides not only a window into the past, but also inspiration for the future.

New York History Jun 26 2019

A History of New Zealand Women Oct 30 2019 What would a history of New Zealand look like that rejected Thomas Carlyle's definition of history as 'the biography of great men', and focused instead on the experiences of women? One that shifted the angle of vision and examined the stages of this country's development from the points of view of wives, daughters, mothers, grandmothers, sisters, and aunts? That considered their lives as distinct from (though often unwillingly influenced by) those of history's 'great men'? In her ground-breaking *History of New Zealand Women*, Barbara Brookes provides just such a history. This is more than an account of women in New Zealand, from those who arrived on the first waka to the Grammy and Man Booker Prize-winning young women of the current decade. It is a comprehensive history of New Zealand seen through a female lens. Brookes argues that while European men erected the political scaffolding to create a small nation, women created the infrastructure necessary for

colonial society to succeed. Concepts of home, marriage and family brought by settler women, and integral to the developing state, transformed the lives of M?ori women. The small scale of New Zealand society facilitated rapid change so that, by the twenty-first century, women are no longer defined by family contexts. In her long-awaited book, Barbara Brookes traces the factors that drove that change. Her lively narrative draws on a wide variety of sources to map the importance in women's lives not just of legal and economic changes, but of smaller joys, such as the arrival of a piano from England, or the freedom of riding a bicycle.

A History of New York in 101 Objects Dec 25 2021 “Delightfully surprising...A portable virtual museum...an entertaining stroll through the history of one of the world's great cities” (Kirkus Reviews), told through 101 distinctive objects that span the history of New York, almost all reproduced in luscious, full color. Inspired by A History of the World in 100 Objects, Sam Roberts of The New York Times chose fifty objects that embody the narrative of New York for a feature article in the paper. Many more suggestions came from readers, and so Roberts has expanded the list to 101. Here are just a few of what this keepsake volume offers: -The Flushing Remonstrance, a 1657 petition for religious freedom that was a precursor to the First Amendment to the Constitution. -Beads from the African Burial Ground, 1700s. Slavery was legal in New York until 1827, although many free blacks lived in the city. The African Burial Ground closed in 1792 and was only recently rediscovered. -The bagel, early 1900s. The quintessential and undisputed New York food (excepting perhaps the pizza). -The Automat vending machine, 1912. Put a nickel in the slot and get a cup of coffee or a piece of pie. It was the early twentieth century version of fast food. -The “I Love NY” logo designed by Milton Glaser in 1977 for a campaign to increase tourism. Along with Saul Steinberg's famous New Yorker cover depicting a New Yorker's view of the world, it was perhaps the most famous and most frequently reproduced graphic symbol of the time. Unique, sometimes whimsical, always important, A History of New York in 101 Objects is a beautiful chronicle of the remarkable history of the Big Apple. “The story [Sam Roberts] is telling is that of New York, and he nails it” (Daily News, New York).

City Of Dreams Apr 28 2022 By an acclaimed historian, a sweeping history of the peoples who have come to New York for four centuries: a defining American story of millions of immigrants, hundreds of languages, and one great city. New York has been America's city of immigrants for nearly four centuries. Growing from Peter Minuit's tiny settlement of 1626 to a clamorous metropolis with more than three million immigrants today, the city has always been a magnet for transplants from all over the globe. City of Dreams is the long-overdue, inspiring, and defining account of New York's immigrants, both famous and forgotten: the young man from the Caribbean who relocated to New York and became a founding father; Russian-born Emma Goldman, who condoned the murder of American industrialists as a means of aiding downtrodden workers; Dominican immigrant Oscar de la Renta, who dressed first ladies from Jackie Kennedy to Michelle Obama. Over ten years in the making, Tyler Anbinder's story is one of innovators and artists, revolutionaries and rioters, staggering deprivation and soaring triumphs. In so many ways, today's immigrants are just like those who came to America in centuries past—and their stories have never before been told with such breadth of scope, lavish research, and resounding spirit. "Told brilliantly, even unforgettably...An American story, one that belongs to all of us."—Boston Globe “A richly textured guide to the history of our immigrant nation's pinnacle immigrant city has managed to enter the stage during an election season that has resurrected this historically fraught topic in all its fierceness.”—New York Times Book Review

First Manhattans Jul 20 2021 Profiles Manhattan Island's first residents, the Munsee Indians, from their first interactions with European settlers in 1524 to the group's relocation to reservations in the Midwest and Canada during the eighteenth century.

New Testament History and Literature Dec 01 2019 In this engaging introduction to the New Testament, Professor Dale B. Martin presents a historical

study of the origins of Christianity by analyzing the literature of the earliest Christian movements. Focusing mainly on the New Testament, he also considers nonbiblical Christian writings of the era. Martin begins by making a powerful case for the study of the New Testament. He next sets the Greco-Roman world in historical context and explains the place of Judaism within it. In the discussion of each New Testament book that follows, the author addresses theological themes, then emphasizes the significance of the writings as ancient literature and as sources for historical study. Throughout the volume, Martin introduces various early Christian groups and highlights the surprising variations among their versions of Christianity.

The Dawn of Everything Mar 28 2022 INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. *The Dawn of Everything* fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

The Historical Atlas of New York City, Second Edition Jan 26 2022 A richly illustrated reference chronicles the history of New York City, from early Native American culture to the present day, capturing the events, inhabitants, neighborhoods, ethnic diversity, and more in a collection of full-color maps, period photographs, drawings, charts, and concise essays. Original. 25,000 first printing.

A History of Modern Singapore, 1819-2005 Jul 08 2020 When C.M. Turnbull's *A History of Singapore, 1819-1975* appeared in 1977, it quickly achieved recognition as the definitive history of Singapore. A second edition published in 1989 brought the story up to the elections held in 1988. In this fully revised edition, rewritten to take into account recent scholarship on Singapore, the author has added a chapter on Goh Chok Tong's premiership (1990-2004) and the transition to a government headed by Lee Hsien Loong. The book now ends in 2005, when the Republic of Singapore celebrated its 40th anniversary as an independent nation. Major changes occurred in the 1990s as the generation of leaders that oversaw the transition from a colony to independence stepped aside in favour of a younger generation of leaders. Their task was to shape a course that sustained the economic growth and social stability achieved by their predecessors, and they would be tested towards the end of the decade when Southeast Asia experienced a severe financial crisis. Many modern studies on Singapore focus on current affairs or very recent events and pay a great deal of attention to Singapore's successful transition from the developing to the developed world. However, younger historians are increasingly interested in other aspects of the country's past, particularly social and cultural issues. *A History of Modern Singapore, 1819-2005* provides a solid foundation and an overarching

framework for this research, surveying Singapore's trajectory from a small British port to a major trading and financial hub within the British Empire and finally to the modern city state that Singapore became after gaining independence in 1965.

The New Suburban History Feb 01 2020 Introduction: The new suburban history / Kevin M. Kruse and Thomas J. Sugrue -- Marketing the free market : state intervention and the politics of prosperity in metropolitan America / David M.P. Freund -- Less than plessy : the inner city, suburbs, and state-sanctioned residential segregation in the age of Brown / Arnold R. Hirsch -- Uncovering the city in the suburb : Cold War politics, scientific elites, and high-tech spaces / Margaret Pugh O'Mara -- How hell moved from the city to the suburbs : urban scholars and changing perceptions of authentic community / Becky Nicolaides -- "The house I live in" : race, class, and African American suburban dreams in the postwar United States / Andrew Wiese -- "Socioeconomic integration" in the suburbs : from reactionary populism to class fairness in metropolitan Charlotte / Matthew D. Lassiter -- Prelude to the tax revolt : the politics of the "tax dollar" in postwar California / Robert O. Self -- Suburban growth and its discontents : the logic and limits of reform on the postwar Northeast corridor / Peter Siskind -- Reshaping the American dream : immigrants, ethnic minorities, and the politics of the new suburbs / Michael Jones-Correa -- The legal technology of exclusion in metropolitan America / Gerald Frug.

Broadway: A History of New York City in Thirteen Miles Apr 04 2020 “Part lively social history, part architectural survey, here is the story of Broadway—from 17th-century cow path to Great White Way.”—Geoff Wisner, Wall Street Journal From Bowling Green all the way to Marble Hill, Fran Leadon takes us on a mile-by-mile journey up America’s most vibrant and complex thoroughfare, through the history at the heart of Manhattan. Broadway traces the physical and social transformation of an avenue that has been both the “Path of Progress” and a “street of broken dreams,” home to both parades and riots, startling wealth and appalling destitution. Glamorous, complex, and sometimes troubling, the evolution of an oft-flooded dead end to a canyon of steel and glass is the story of American progress.

History of the New World Aug 09 2020

The Director's Report of the New York State Historical Association Apr 16 2021

The New History Jan 02 2020 The notion of 'history' has always been one strenuously debated by both academics and the wider population. This deeply provocative re-thinking of our engagement with the past by one of the world's leading post-modern historians takes that debate one step further. Alun Munslow re-assesses history in the light of post-modernism and other intellectual challenges which have questioned the primacy of the modernist epistemology of empiricism. In an original and stimulating vision of history that will intrigue all those seriously interested in the subject, Munslow argues that history is not only about the sources, but a literary construction. Munslow concludes that history, as a cultural narrative about the past can never tell us what the past really means. This far reaching conclusion is based on the radical idea that the content of history is defined as much by the nature of the language used to represent and interpret that content as it is by research into the sources. This suggests that history does not produce the most likely meaning of the past but rather can only generate alternative meanings. The lead volume in a major new series on historical thinking and practice, this is an accessible yet absorbing study that breaks new ground in discussing the stage history is at now, and perhaps most engagingly, the direction it will take in the future.
