Dear Mrs. Parks: A Dialogue with Today's Youth Dec 02 2019
Through her heartfelt correspondence with children, Rosa Parks, the Mother of the Modern Day Civil Rights Movement, answers their questions while challenging them to embrace life's possibilities.

Fourth Annual Education Conference on Problems of Segregation and Desegregation of Public Schools Sep 10 2020

Social-spatial segregation May 31 2022 This edited volume brings together leading researchers from the United States, the United Kingdom and Europe to look at the processes leading to segregation and its implications. With a methodological focus, the book explores new methods and data sources that can offer fresh perspectives on segregation in different contexts. It considers how the spatial patterning of segregation might be best understood and measured, outlines some of the mechanisms that drive it, and discusses its possible social outcomes. Ultimately, it demonstrates that measurements and concepts of segregation must keep pace with a changing world. This volume will be essential reading for academics and practitioners in human geography, sociology, planning and public policy.

Tax-exempt Status of Private Schools Jun 07 2020

New Methods for Measuring and Analyzing Segregation Jan 03 2020 This book is open access under a CC BY-NC 2.5 license. This book introduces new methods for measuring and analyzing residential segregation. It begins by placing all popular segregation indices in the “difference of group means” framework wherein index scores can be obtained as simple differences of group means on individual-level residential attainments scored from area racial composition. Drawing on the insight that in this framework index scores are additively determined by individual residential attainments, the book shows that the level of segregation in a given city can be equated to the effect of group membership (e.g., race) on individual residential attainments. This unifies separate research traditions in the field by joining the analysis of segregation at the aggregate level with the analysis of residential attainments for individuals. Next it shows how segregation analysis can be extended by using multivariate attainment models to assess the impact of group membership (i.e., the level of segregation for a city) while including controls for other relevant individual characteristics (e.g., income, education, language, nativity, etc.). It then illustrates how one can use these models to quantitatively assess the extent to which segregation traces to impacts of group membership on residential attainments versus other factors such as group differences in income. The book then shows how micro-level attainment models can be used to study macro-level variation in segregation; specifically, by estimating multi-level models of individual residential attainments to assess how the effect of group membership (i.e., segregation index scores) vary with city characteristics. Finally, the book introduces refined versions of popular indices that are free of the vexing problem of upward bias. This improves the quality of segregation measurement directly at the level of individual cases and

expanding the number of cases that can be safely included in empirical studies.

Segregation Sep 03 2022 When we think of segregation, what often comes to mind is apartheid South Africa, or the American South in the age of Jim Crow—two societies fundamentally premised on the concept of the separation of the races. But as Carl H. Nightingale shows us in this magisterial history, segregation is everywhere, deforming cities and societies worldwide. Starting with segregation’s ancient roots, and what the archaeological evidence reveals about humanity’s long-standing use of urban divisions to reinforce political and economic inequality, Nightingale then moves to the world of European colonialism. It was there, he shows, segregation based on color—and eventually on race—took hold; the British East India Company, for example, split Calcutta into “White Town” and “Black Town.” As we follow Nightingale’s story around the globe, we see that division replicated from Hong Kong to Nairobi, Baltimore to San Francisco, and more. The turn of the twentieth century saw the most aggressive segregation movements yet, as white communities almost everywhere set to rearranging whole cities along racial lines. Nightingale focuses closely on two striking examples: Johannesburg, with its state-sponsored separation, and Chicago, in which the goal of segregation was advanced by the more subtle methods of real estate markets and housing policy. For the first time ever, the majority of humans live in cities, and nearly all those cities bear the scars of segregation. This unprecedented, ambitious history lays bare our troubled past, and sets us on the path to imagining the better, more equal cities of the future.

Letter from the Birmingham Jail Nov 12 2020 In "Letter from Birmingham Jail," Martin Luther King Jr. explains why blacks can no longer be victims of inequality.

IUTAM Symposium on Segregation in Granular Flows Oct 04 2022 Segregation is a pervasive phenomenon whereby a flowing granular mass consisting of particles with diverse physical properties becomes spatially inhomogeneous. In the industrial sector that deals with the handling and processing of bulk solids, this non-uniformity is highly undesirable since blend homogeneity is generally a stringent requirement of most products. In the arena of geophysical flows, segregation can enhance the destructive capabilities of natural events such as avalanches and landslides. During the last 15 years, these issues have provided motivation and fostered collaborations between the communities of mathematicians, engineers, industrial researchers, and physicists to develop predictive models of segregation by integrating the perspectives and approaches of each. The collection of unique papers brings to light many of the perplexing scientific and technical issues in our current understanding of this complex phenomenon. It addresses advances in experiment, computational modeling and theory. This volume is one of the very few books devoted entirely to problems of segregation of particulate solids.

Studies in Segregation and Desegregation Mar 29 2022 This title was first published in 2002: Over the past fifty years, numerous geographical concepts and methodologies have been developed to study urban segregation. This volume brings together an international team of scholars, practitioners and policy makers to examine the latest of these. The first section of this fascinating book sees contributors proposing innovative ideas and new conceptual models for the study of segregation in cities that undergo globalization. They assess the idea that segregation should be studied for individuals in respect to different spatial resolutions, including the study of the formation of inter-ethnic spatial networks. This is followed by an examination of

questions concerning the associations among segregation, poverty and policies. The final section highlights patterns of segregation in four countries: South Africa, China, Canada and the Ruhr area, each of them representing different multicultural and transformational aspects. They also emphasize the socio-historical context in which patterns of segregation and desegregation appeared.

The Negro Motorist Green Book Aug 22 2021 The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

City of Segregation Nov 24 2021 A majestic one-hundred-year study of segregation in Los Angeles *City of Segregation* documents one hundred years of struggle against the enforced separation of racial groups through property markets, constructions of community, and the growth of neoliberalism. This movement history covers the decades of work to end legal support for segregation in 1948; the 1960s Civil Rights movement and CORE's efforts to integrate LA's white suburbs; and the 2006 victory preserving 10,000 downtown residential hotel units from gentrification enfolded within ongoing

resistance to the criminalization and displacement of the homeless. Andrea Gibbons reveals the shape and nature of the racist ideology that must be fought, in Los Angeles and across the United States, if we hope to found just cities.

The Intimate University Sep 30 2019 The majority of the 30,000-plus undergraduates at the University of Illinois, Urbana-Champaign—including the large population of Korean American students—come from nearby metropolitan Chicago. Among the campus's largest non-white ethnicities, Korean American students arrive at college hoping to realize the liberal ideals of the modern American university, in which individuals can exit their comfort zones to realize their full potential regardless of race, nation, or religion. However, these ideals are compromised by their experiences of racial segregation and stereotypes, including images of instrumental striving that set Asian Americans apart. In *The Intimate University*, Nancy Abelmann explores the tensions between liberal ideals and the particularities of race, family, and community in the contemporary university. Drawing on ten years of ethnographic research with Korean American students at the University of Illinois and closely following multiple generations of a single extended Korean American family in the Chicago metropolitan area, Abelmann investigates the complexity of racial politics at the American university today. Racially hyper-visible and invisible, Korean American students face particular challenges as they try to realize their college dreams against the subtle, day-to-day workings of race. They frequently encounter the accusation of racial self-segregation—a charge accentuated by the fact that many attend the same Evangelical Protestant church—even as they express the desire to distinguish themselves from their families and other Korean Americans. Abelmann concludes by examining the current state of the

university, reflecting on how better to achieve the university's liberal ideals despite its paradoxical celebration of diversity and relative silence on race.

The Montgomery Bus Boycott Jun 27 2019 Examines the Montgomery Bus Boycott, highlighting the history, controversy, and personal narratives.

The Color of Law: A Forgotten History of How Our Government Segregated America Feb 25 2022 New York Times Bestseller • Notable Book of the Year • Editors' Choice Selection One of Bill Gates' "Amazing Books" of the Year One of Publishers Weekly's 10 Best Books of the Year Longlisted for the National Book Award for Nonfiction An NPR Best Book of the Year Winner of the Hillman Prize for Nonfiction Gold Winner • California Book Award (Nonfiction) Finalist • Los Angeles Times Book Prize (History) Finalist • Brooklyn Public Library Literary Prize This "powerful and disturbing history" exposes how American governments deliberately imposed racial segregation on metropolitan areas nationwide (New York Times Book Review). Widely heralded as a "masterful" (Washington Post) and "essential" (Slate) history of the modern American metropolis, Richard Rothstein's *The Color of Law* offers "the most forceful argument ever published on how federal, state, and local governments gave rise to and reinforced neighborhood segregation" (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African

Americans in white neighborhoods. A groundbreaking, “virtually indispensable” study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), *The Color of Law* forces us to face the obligation to remedy our unconstitutional past.

Handbook of Urban Segregation Mar 05 2020 The Handbook of Urban Segregation scrutinises key debates on spatial inequality in cities across the globe. It engages with multiple domains, including residential places, public spaces and the field of education. In addition it tackles crucial group-dimensions across race, class and culture as well as age groups, the urban rich, middle class, and gentrified households. This timely Handbook provides a key contribution to understanding what urban segregation is about, why it has developed, what its consequences are and how it is measured, conceptualised and framed.

Sanctuaries of Segregation Oct 12 2020 Winner of the 2017 Eudora Welty Prize *Sanctuaries of Segregation* provides the first comprehensive analysis of the Jackson, Mississippi, church visit campaign of 1963-1964 and the efforts by segregationists to protect one of their last refuges. For ten months, integrated groups of ministers and laypeople attempted to attend Sunday worship services at all-white Protestant and Catholic churches in the state's capital city. While the church visit was a common tactic of activists in the early 1960s, Jackson remained the only city where groups mounted a sustained campaign targeting a wide variety of white churches. Carter Dalton Lyon situates the visits within the context of the Jackson Movement, compares the actions to church visits and kneel-ins in other cities, and places these encounters within controversies already underway over race inside churches and denominations. He then traces the campaign from its inception in early June 1963 through Easter

Sunday 1964. He highlights the motivations of the various people and organizations, the interracial dialogue that took place on the church steps, the divisions and turmoil the campaign generated within churches and denominations, the decisions by individual congregations to exclude black visitors, and the efforts by the state and the Citizens' Council to thwart the integration attempts. Sanctuaries of Segregation offers a unique perspective on those tumultuous years. Though most churches blocked African American visitors and police stepped in to make forty arrests during the course of the campaign, Lyon reveals many examples of white ministers and laypeople stepping forward to oppose segregation. Their leadership and the constant pressure from activists seeking entrance into worship services made the churches of Jackson one of the front lines in the national struggle over civil rights.

The Power of Nonviolent Resistance Apr 29 2022 In time for the one hundred and fiftieth anniversary of his birth, a specially curated collection of Mahatma Gandhi's writings on nonviolent resistance and activism. A Penguin Classic The year 2019 marks the 150th anniversary of Mohandas Karamchand (Mahatma) Gandhi's birth, and Penguin Classics presents a short but comprehensive selection of text by Gandhi that speaks to non-violent civil disobedience and activism. In excerpts drawn from his books, letters, and essays--including from *Hind Swaraj*, *Satyagraha in South Africa*, *Yeravda Mandir*, *Ashram Observances in Action*, his readings of Thoreau and Tolstoy, and his essays on the life of Socrates--the reader observes the power and eloquence in which Gandhi expressed his views on non-violent resistance, which have inspired activists from the U.S. Civil Rights movement and around the world. *The Power of Nonviolent Resistance* includes a new introduction and suggestions for further exploration by renowned Gandhi scholar

Tridip Suhrud, which gives context to the time of Gandhi's writings while placing them firmly into the present-day political climate, inspiring a new generation of activists to follow the civil rights hero's teachings and practices.

Inequality, Mobility, and Segregation Apr 17 2021 Contains 15 papers, which were presented at the Fourth Meeting of the Society for the Study of Economic Inequality, Catania, Sicily, July 2011. This title includes measuring segregation, welfare and liberty, the use of influence functions in distributional analysis, and the axiomatic approach to multidimensional inequality.

Black Inventors in the Age of Segregation Jan 15 2021 "In debunking some of the myths, including financial success and race pride, Fouché humanizes them and examines the greater significance of their work in the context of American sociological and commercial history." -- Booklist

The Americans, Grades 9-12 Workbook Oct 31 2019

Why We Can't Wait Nov 05 2022 'Lightning makes no sound until it strikes' This is the momentous story of the Civil Rights movement, told by one of its most powerful and eloquent voices. Here Martin Luther King, Jr. recounts the pivotal events in the city of Birmingham, Alabama in 1963 that propelled his non-violent campaign for racial justice from a movement of lunch counter sit-ins and prayer meetings to a phenomenon that 'rocked the richest, most powerful nation to its foundations'. As inspiring and resonant as it was upon publication, *Why We Can't Wait* is both a unique historical document, and an enduring testament to one man's wise, courageous and endlessly hopeful vision.

Segregation by Design Feb 13 2021 Local governments use their control over land use to generate race and class segregation, benefitting white property owners.

Cycle of Segregation Aug 02 2022 The Fair Housing Act of 1968 outlawed housing discrimination by race and provided an important tool for dismantling legal segregation. But almost fifty years later, residential segregation remains virtually unchanged in many metropolitan areas, particularly where large groups of racial and ethnic minorities live. Why does segregation persist at such high rates and what makes it so difficult to combat? In *Cycle of Segregation*, sociologists Maria Krysan and Kyle Crowder examine how everyday social processes shape residential stratification. Past neighborhood experiences, social networks, and daily activities all affect the mobility patterns of different racial groups in ways that have cemented segregation as a self-perpetuating cycle in the twenty-first century. Through original analyses of national-level surveys and in-depth interviews with residents of Chicago, Krysan and Crowder find that residential stratification is reinforced through the biases and blind spots that individuals exhibit in their searches for housing. People rely heavily on information from friends, family, and coworkers when choosing where to live. Because these social networks tend to be racially homogenous, people are likely to receive information primarily from members of their own racial group and move to neighborhoods that are also dominated by their group. Similarly, home-seekers who report wanting to stay close to family members can end up in segregated destinations because their relatives live in those neighborhoods. The authors suggest that even absent of family ties, people gravitate toward neighborhoods that are familiar to them through their past experiences, including where they have previously lived, and where they work, shop, and spend time. Because historical segregation has shaped so many of these experiences, even these seemingly race-neutral decisions help reinforce the cycle of residential stratification. As a result, segregation has declined

much more slowly than many social scientists have expected. To overcome this cycle, Krysan and Crowder advocate multi-level policy solutions that pair inclusionary zoning and affordable housing with education and public relations campaigns that emphasize neighborhood diversity and high-opportunity areas. They argue that together, such programs can expand the number of destinations available to low-income residents and help offset the negative images many people hold about certain neighborhoods or help introduce them to places they had never considered. Cycle of Segregation demonstrates why a nuanced understanding of everyday social processes is critical for interrupting entrenched patterns of residential segregation.

Understanding Racial and Ethnic Differences in Health in Late Life Jul 29 2019

As the population of older Americans grows, it is becoming more racially and ethnically diverse. Differences in health by racial and ethnic status could be increasingly consequential for health policy and programs. Such differences are not simply a matter of education or ability to pay for health care. For instance, Asian Americans and Hispanics appear to be in better health, on a number of indicators, than White Americans, despite, on average, lower socioeconomic status. The reasons are complex, including possible roles for such factors as selective migration, risk behaviors, exposure to various stressors, patient attitudes, and geographic variation in health care. This volume, produced by a multidisciplinary panel, considers such possible explanations for racial and ethnic health differentials within an integrated framework. It provides a concise summary of available research and lays out a research agenda to address the many uncertainties in current knowledge. It recommends, for instance, looking at health differentials across the life course and deciphering the links between factors presumably producing differentials and biopsychosocial

mechanisms that lead to impaired health.

Neo-segregation Narratives Feb 02 2020 Norman traces a neo-segregation narrative tradition--one that developed in tandem with neo-slave narratives--by which writers return to a moment of stark de jure segregation to address contemporary concerns about national identity and the persistence of racial divides.

Strategies of Segregation Aug 10 2020 "This book examines a century of segregation in the California town of Oxnard. It focuses on designs for education that reproduced inequity as a routine matter. For Oxnard's white elite there was never a question of whether to segregate Mexicans, and later Blacks, but how to do so effectively and permanently. David G. García explores what the author calls mundane racism--the systematic subordination of minorities enacted as a commonplace way of conducting business within and beyond schools."--Provided by publisher.

Accumulation by Segregation May 07 2020 This work explores the processes of creation and articulation of social identities of Muslims in Delhi. Mapping the landscape of discrimination in Delhi's neighbourhoods, Jamil tries to see how such fractured geographies are created. We come across people whose sense of belonging to each other is complex, and subject to forces such as regional and class identities instead of an ubiquitous 'Muslimness'. Segregation in an urban space is produced, as Jamil argues, not only by communal conflict and threat of violence but also maintained and strengthened by processes of capitalist globalization. Through case studies of five localities, which present a historical continuity in the narrative of Delhi's Muslims, the book presents compelling evidence of market and governance processes that aid accumulation by segregation. It offers an 'against the grain' reading of quotidian practices of residents within such boundaries such that a counternarrative of

resistance and hope may emerge—one that may allow for re-imagining alternatives.

Paradoxes of Segregation Oct 24 2021 Through an international comparative research, this unique book examines ethnic residential segregation patterns in relation to the wider society and mechanisms of social division of space in Western European regions. Focuses on eight Southern European cities, develops new metaphors and furthers the theorisation/conceptualisation of segregation in Europe Re-centres the segregation debate on the causes of marginalisation and inequality, and the role of the state in these processes A pioneering analysis of which and how systemic mechanisms, contextual conditions, processes and changes drive patterns of ethnic segregation and forms of socio-ethnic differentiation Develops an innovative inter-disciplinary approach which explores ethnic patterns in relation to European welfare regimes, housing systems, immigration waves, and labour systems

Closing the Opportunity Gap May 19 2021 While the achievement gap has dominated policy discussions over the past two decades, relatively little attention has been paid to a gap even more at odds with American ideals: the opportunity gap. Opportunity and achievement, while inextricably connected, are very different goals. Every American will not go to college, but every American should be given a fair chance to be prepared for college. In communities across the U.S., children lack the crucial resources and opportunities, inside and outside of schools that they need if they are to reach their potential. Closing the Opportunity Gap offers accessible, research-based essays written by top experts who highlight the discrepancies that exist in our public schools, focusing on how policy decisions and life circumstances conspire to create the "opportunity gap" that leads inexorably to stark achievement gaps. They also describe

sensible policies grounded in evidence that can restore and enhance opportunities. Moving beyond conventional academic discourse, *Closing the Opportunity Gap* will spark vital new conversations about what schools, parents, educators, and policymakers can and should do to give all children a fair chance to thrive.

The Age of Segregation Sep 22 2021

Continuous Casting of Steel Mar 17 2021

What It Was Like...short stories of childhood memories of segregation in America Jul 21 2021 A series of short stories describing childhood experiences in segregated Little Rock, Arkansas during the 1940's & 50's. Keywords: Short Stories, Segregation, Childhood Perception Of Race & Racism, Black Segregated Community, Segregation Revisionism, Segregation Aberrations, Juvenile Non Fiction

The Sword and the Shield Dec 26 2021 This dual biography of Malcolm X and Martin Luther King upends longstanding preconceptions to transform our understanding of the twentieth century's most iconic African American leaders. To most Americans, Malcolm X and Martin Luther King Jr. represent contrasting ideals: self-defense vs. nonviolence, black power vs. civil rights, the sword vs. the shield. The struggle for black freedom is wrought with the same contrasts. While nonviolent direct action is remembered as an unassailable part of American democracy, the movement's militancy is either vilified or erased outright. In *The Sword and the Shield*, Peniel E. Joseph upends these misconceptions and reveals a nuanced portrait of two men who, despite markedly different backgrounds, inspired and pushed each other throughout their adult lives. This is a strikingly revisionist biography, not only of Malcolm and Martin, but also of the movement and era they came to define.

Urban Socio-Economic Segregation and Income Inequality Jul

09 2020 This open access book investigates the link between income inequality and socio-economic residential segregation in 24 large urban regions in Africa, Asia, Australia, Europe, North America, and South America. It offers a unique global overview of segregation trends based on case studies by local author teams. The book shows important global trends in segregation, and proposes a Global Segregation Thesis. Rising inequalities lead to rising levels of socio-economic segregation almost everywhere in the world. Levels of inequality and segregation are higher in cities in lower income countries, but the growth in inequality and segregation is faster in cities in high-income countries. This is causing convergence of segregation trends. Professionalisation of the workforce is leading to changing residential patterns. High-income workers are moving to city centres or to attractive coastal areas and gated communities, while poverty is increasingly suburbanising. As a result, the urban geography of inequality changes faster and is more pronounced than changes in segregation levels. Rising levels of inequality and segregation pose huge challenges for the future social sustainability of cities, as cities are no longer places of opportunities for all.

Public Housing and the Legacy of Segregation Jun 19 2021

For the past two decades the United States has been transforming distressed public housing communities, with three ambitious goals: replace distressed developments with healthy mixed-income communities; help residents relocate to affordable housing, often in the private market; and empower former public housing families toward economic self-sufficiency. The transformation has focused on deconcentrating poverty, but not on the underlying role of racial segregation in creating these distressed communities. In *Public Housing and the Legacy of Segregation*, scholars and public housing officials

assess whether--and how--public housing policies can simultaneously address the problems of poverty and race.

Lloyd Gaines and the Fight to End Segregation Apr 05 2020

Winner, 2017 Missouri Conference on History Book Award In 1936, Lloyd Gaines's application to the University of Missouri law school was denied based on his race. Gaines and the NAACP challenged the university's decision. *Missouri ex rel. Gaines v. Canada* (1938) was the first in a long line of decisions by the U.S. Supreme Court regarding race, higher education, and equal opportunity. The court case drew national headlines, and the NAACP moved Gaines to Chicago after he received death threats. Before he could attend law school, he vanished. This is the first book to focus entirely on the Gaines case and the vital role played by the NAACP and its lawyers—including Charles Houston, known as “the man who killed Jim Crow”—who advanced a concerted strategy to produce political change. Horner and Endersby also discuss the African American newspaper journalists and editors who mobilized popular support for the NAACP's strategy. This book uncovers an important step toward the broad acceptance of racial segregation as inherently unequal. This is the inaugural volume in the series *Studies in Constitutional Democracy*, edited by Justin Dyer and Jeffrey Pasley of the Kinder Institute on Constitutional Democracy.

Annual Education Conference on Problems of Segregation and Desegregation of Public Schools Dec 14 2020

Strategies of Segregation Jul 01 2022 "This book examines a century of segregation in the California town of Oxnard. It focuses on designs for education that reproduced inequity as a routine matter. For Oxnard's white elite there was never a question of whether to segregate Mexicans, and later Blacks, but how to do so effectively and permanently. David G. García

explores what the author calls mundane racism--the systematic subordination of minorities enacted as a commonplace way of conducting business within and beyond schools."--Provided by publisher.

Lawyer : monthly legal journal Jan 27 2022

Communities in Action Aug 29 2019 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. **Communities in Action: Pathways to Health Equity** seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.
