*History and Economic Life* Jul 24 2019 *History and Economic Life* offers students a wide-ranging introduction to both quantitative and qualitative approaches to interpreting economic history sources from the Middle Ages to the Twentieth Century. Having identified an ever-widening gap between the use of qualitative sources by cultural historians and quantitative sources by economic historians, the book aims to bridge the divide by making economic history sources more accessible to students and the wider public, and highlighting the need for a complementary rather than exclusive approach. Divided into two parts, the book begins by equipping students with a toolbox to approach economic history sources, considering the range of sources that might be of use and introducing different ways of approaching them. The second part consists of case studies that examine how economic historians use such sources, helping readers to gain a sense of context and understanding of how these sources can be used. The book thereby sheds light on important debates both within and beyond the field, and highlights the benefits gained when combining qualitative and quantitative approaches to source analysis. Introducing sources often avoided in culturally-minded history or statistically-minded economic history courses respectively, and advocating a combined quantitative and qualitative approach, it is an essential resource for students undertaking source analysis within the field.

**The Bottle Book** Sep 25 2019 Originally printed in 1987, is designed for the cultural historian, archaeologist, the bottle collector, and those just interested in pharmacopoeia. This book is a guide to the identification of the embossed, patent and proprietary medicine bottles produced in an era of American history when anything could be bottled, advertised and sold - legally. A cornucopia of cures, bitters, tonics, and balms, many of them little more and slightly disguised alcohol, were available to the gullible but willing public. Not only are the embossed and shapely bottles of this era highly collectable today, they are also valuable to archaeologists who interpret and date historical sites. This book has been designed as a reference book. It provided detailed descriptions to

aid the researcher in identifying and evaluating whole or fragmented vessels. A discussion of the patent and proprietary medicine years, and the innovations applied to the production of glass, is followed by a brief interpretation of bottles by color, design and shape. Over 40 chapters detail nearly four thousand medicine bottles. Numerous line drawings, and color photographs will aid the researcher/collector/anthropologist in the identification process. Richard Fike, is a retired Bureau of Land Management Archaeologist. Rich is also an historian, writer, teacher and the developer of the Museum of the Mountain West of Montrose, Colorado. He continues to expand the Museum, which contains original and recreated historic buildings that house extensive collections of America's past. He has combined his professional knowledge and his personal interest in historic bottles to provide this authoritative, definitive, and entertaining guide.

**Anarchist's Guide to Historic House Museums** Oct 31 2022 In these days of an aging traditional audience, shrinking attendance, tightened budgets, increased competition, and exponential growth in new types of communication methods, America's house museums need to take bold steps and expand their overall purpose beyond those of the traditional museum. They need not only to engage the communities surrounding them, but also to collaborate with visitors on the type and quality of experience they provide. This book is a groundbreaking manifesto that calls for the establishment of a more inclusive, visitor-centered paradigm based on the shared experience of human habitation. It draws inspiration from film, theater, public art, and urban design to transform historic house museums while providing a how-to guide for making historic house museums sustainable, through five primary themes: communicating with the surrounding community, engaging the community, re-imagining the visitor experience, celebrating the detritus of human habitation, and acknowledging the illusion of the shelter's authenticity. Anarchist's Guide to Historic House Museums offers a wry, but informed, rule-breaking perspective from authors with years of experience and gives numerous vivid examples of both good and not-so-good practices from house museums in the U.S.
