[Studies in Stoicism](#) May 27 2022 This important volume fulfills one of Peter Brunt's (1917 - 2005) last wishes: a collection of his most important papers in the area of scholarship that had occupied him in his earliest years of research, and which largely absorbed his attention after his retirement from the Camden Chair of Roman History at Oxford University in 1982. Brunt was interested primarily in Stoicism in the Roman period, and his chief concern was the practical influence of its ethical teaching on political and social life. Although his investigations were historical, they required a complete mastery of the Stoic texts and doctrine. Basing his work almost entirely on the ancient sources, Brunt provides the most complete account and comparison available today not only of the ideas of the Roman Stoic moralists, but also of the political philosophy of the Greek founders of the Stoa. He believed that the ideas of the Stoics of the Roman period were essentially continuous with the thinking of the founders, and he did not accept that the concern with practical everyday morality in later Stoicism was a new development. *Studies in Stoicism* contains six unpublished and seven republished essays, the latter incorporating additions and changes which Brunt wished to be made. The papers have been integrated and arranged in roughly chronological order and by subject matter, with an accessible lecture to the Oxford Philological Society serving as Brunt's own introduction.

*I Can Run* Oct 27 2019 I CAN RUN is not a running book for 'runners' - it's the must-have running book for anyone who has ever experienced a moment of defeatism and had the little voice in their head make the excuse, 'I can't run'. In 12 chapters, you will discover that you can. You will dig deep to find your inner athlete. You'll learn how to train smart, recover well, sync your runs to your menstrual cycle and fuel right. I CAN RUN will ensure you never again wait until you're thin enough, fast enough, athletic enough, whatever-next enough to call yourself a runner, because if you put one foot in front of the other, repeatedly, you are a runner. Getting outside, surrounding yourself in nature and moving your body is more important than ever in these anxiety-inducing times, and Amy's debut will give you the encouragement and know-how that you need to do this. I CAN RUN recognises that this is hard and that committing to consistent training is often more of an accomplishment than the 10K, half marathon or marathon race itself. You will find comfort and encouragement in Amy's experience of cramps, chafing and the occasional little sick, while learning from leading experts about how to set yourself up for success and get the very best from your runs both physically and mentally. This book is real talk about the keys to going well far. We're all in it for the long run, together. We CAN do this!

**Addressing Sickle Cell Disease** Nov 08 2020 Sickle cell disease (SCD) is a genetic condition that affects approximately 100,000 people in the United States and millions more globally. Individuals with SCD endure the psychological and physiological toll of repetitive pain as well as side effects from the pain treatments they undergo. Some adults with SCD report reluctance to use health care services, unless as a last resort, due to the racism and discrimination they face in the health care system. Additionally, many aspects of SCD are inadequately studied, understood, and addressed. Addressing Sickle Cell Disease examines the epidemiology, health outcomes, genetic implications, and societal factors associated with SCD and sickle cell trait (SCT). This report explores the current guidelines and best practices for the care of patients with SCD and recommends priorities for programs, policies, and research. It also discusses limitations and opportunities for developing national SCD patient registries and surveillance systems, barriers in the healthcare sector associated with SCD and SCT, and the role of patient advocacy and community engagement groups.
