Sizing People Up Sep 21 2021 After two decades as a behavior analyst in the FBI, Robin Dreeke knows a thing or two about sizing people up. He's navigated complex situations that range from handling Russian spies to navigating the internal politics at the Bureau. Through that experience, he was forced to develop a knack for reading people - their intentions, their capabilities, their desires and their fears. Dreeke's first book, It's Not All About "Me," has become a cult favorite with readers seeking to build quick rapport with others. His last book, The Code of Trust, was about how to inspire trust in others as a leader. In Sizing People Up, Dreeke shares his simple, six-step system that helps you predict anyone's future behavior based on their words, goals, patterns of action, and the situation at hand. Predicting the behavior of others is an urgent need for anyone whose work involves relationships with others, whether it's leading an organization, collaborating with a teammate, or closing a sale. But predictability is not as simple as good and evil, or truth and fiction. Allies might make a promise with every intention of keeping it, not realizing that they will be unable to do so due to some personal shortcoming. And those seeking to thwart your endeavor may not realize how reliable their malevolent tells have become. Dreeke's system is simple, but powerful. For instance, a colleague might have a strong moral code, but do they apply the trust-building relationship will be long-term? Even the most upstanding person can betray your trust if they don't see themselves tied to you or your desired result in the long term. How can you determine whether someone has both the skill and will to do what they've said they're going to do? Behaviors as subtle as how they take notes will reveal their reliability. Using this book as their manual, readers will be able to quickly and easily determine who they can trust and who they can't; who is likely to deliver on promises and who will disappoint; and when a person is vested in your success vs when they are actively plotting your demise. With this knowledge they can confidently embark on anything from a business venture to a romantic relationship to a covert operation without the stress of the unknown.

Radar Days Aug 09 2020 It is now more than sixty years since radar began in Britain. In the intervening years, airborne radar has become one of the most important branches of civilian and military radar. In Radar Days, "the father of airborne radar," Dr. "Taffy" Bowen recounts his personal story of how the first airborne radars were built and brought into use in the Royal Air Force, and of the Tizard mission to the USA in 1940, of which he was a member. Written from the point of view of the individuals who worked at the laboratory bench, the story begins with the building of the first ground air-warning radar at Orfordness in June 1935. The book proceeds to describe how this equipment was miniaturized to make it suitable for use in aircraft and the lengthy, sometimes hazardous flight trials conducted before radar went into service with the RAF. The author also details the activities of the Tizard mission, which was instrumental in installing the first airborne radars in US aircraft. The greatest achievement of the mission was to pass on the secret of the resonant magnetron to the US only a few months after its invention at Birmingham University. This was the device that brought about a revolution in Allied radar, putting it far ahead of the corresponding German technology for the remainder of the war.

This little manual has something for everyone as it were. If you're just starting out, and are 300 lbs and looking to DROP weight quick, then this book is a great, great add on to the 0 Excuses Fitness System available through my website. If you're a seasoned trainee, and are looking to blast past personal best's in pull-ups - - or handstand pushups - - and assuming you've read the manuals I've put out on these, you'll find something that'll help you here as well! If you're a grip monster - - or core training fanatic - - I'll bet you anything you'll find some new and interesting reads in this book. And so forth. This book truly has something for EVERYONE when it comes to fitness, my friend. My name is Rahul Mookerjee, and I've been in the fitness biz for years now. My first book "Fast and Furious Fitness" (currently out of print, but I'm going to bring it back very soon indeed as a "collector's item both on my website and on Amazon etc) was published in 2011, and it became an instant hit thereafter. Folks were getting tired of spending big bucks at gyms, and getting nowhere. Folks were getting tired of all the hype promised by personal trainers and "booby builders" (most of whom were on the juice) in the gym - - and getting very little in the way of actual muscle or results for the hours they spent in the gym. Not to mention the nagging injuries just kept piling up. The "shoulders that hurt when you lift your arm up". The nagging lower back pain. Elbow trouble … and of course, wrist and neck pain galore. None of this improved to any great degree with the traditional training methods folks were being raised on, and Fast and Furious Fitness was a breath of fresh air in that regard. And now, I'm bringing you all these years of training and "wisdom" in an easy to digest "collated" format that you'll love - and want to read over and over and OVER again for motivation, inspiration, and information galore! What you'll learn from these tips -Finger tip pushups, and what you really need to know about them! -Why the way your muscles "look" aren't the most important – or even a little bit important. -The skinny on grip strength and building rock solid, coruscating levels of "kung fu" like grip strength. My manuals on grip training do a great job here … and these tips are but the icing on the cake - - but a much needing icing! -The truth about calluses that most people will NOT tell you. -The one exercise combo that will give you explosive gains all over your upper body. Once you go this route, you'll never go back … trust me! -Achieving the magic 500 in terms of pushups - - and more. -Getting to 500 UPHILL steps a day, and much, much more. -Why being on the heavy side isn't necessarily a disadvantage - and could even be considered an ADVANTAGE! This tip alone is worth it's weight in SPADES, my friend. -Facts on the handstand you likely never thought of, much less considered. -Why you aren't losing weight - despite seemingly doing all the right things. This one tip alone will boggle your mind - dive in, and you'll see what I mean! -How to work the legs with … get this … PUSHUPS! -How simple MOVEMENT done correctly can shed more fat than ever before -Can you save your own life if you had to? This little gem of a tip will get even the most seasoned of gym gorillas THINKING … that is for sho! -What is the ideal length of time to exercise (hint - it's NOT what you've been told). And much, much more, my friend … Dive in -- and be sure and write me back at info@0excusesfitness.com with your thoughts - we love hearing from YOU! Best, Rahul Mookerjee

FITNESS CENTRAL - The Reader Jan 26 2022 Back when I started www.rahulmookerjee.com - - I never, ever thought it would morph into a full time business like it is now. From Fast and Furious Fitness – to Gorilla Grip – to 0 Excuses Fitness – Gumption Galore, and everything else we've put out thus far, it's been a wild wild ride, and it promises to get even better! The comments and feedback we receive on a regular basis via social media and email etc is something that makes it ALL worth it. If there

is something that folks love about us, it's our direct, in your face, NO nonsense style - - not just with regard to fitness instruction, but the 0 Excuses Fitness philosophy as well – as well as our daily fitness tips that we put out on a regular basis that people wake up to every morning! It is THESE fits, and the "rambunctious" ovation to these tips that I put out the first Edition of Fitness Central – then the second – then the third – all in all, a mind boggling 153 fitness tips - - but now (and despite the feedback I've gotten), I'll go one BETTER. Instead of purchasing all three fitness manuals separately, you can now purchase them all as ONE reader - - one giant MOTIVATIONAL fitness package as it were - - with all the same tips as in the three books - - but at a reduced price. Truth be told, I could charge you upwards of $100 for EACH of the fitness books, and you'd still get your money's value and THEN SOME. Truth be told, even ONE of these tips by themselves is worth their worth in GOLD – spades – mucho dinero – what have you! And truth be told, the BENEFITS you'll get from following even one of these tips far, far outweighs what you'll get from following the "staid ole routines" at the gym for years! Now, if you're with me thus far, and if you've cracked open even one of the Fitness Central books, you KNOW the benefits you'll get from these books. Just in case you aren't though, and just in case you chance upon this package "first up", here are (at a glance) some of the benefits you'll get from this book - - -Finger tip pushups, and what you really need to know about them!-Why the way your muscles "look" aren't the most important – or even a little bit important. -The skinny on grip strength and building rock solid, coruscating levels of "kung fu" like grip strength. My manuals on grip training do a great job here ... and these tips are but the icing on the cake - - but a much needing icing! -The truth about calluses that most people will NOT tell you. -The one exercise combo that will give you explosive gains all over your upper body. Once you go this route, you'll never go back ... trust me! -How shorter workouts can be just as - - in fact, way more effective than the long, drawn out workouts you've been advised to do - - and how they benefit your HEALTH and MINDSET more than you could ever imagine! -How foreign devils in China workout - -and why these workouts are so brutally effective! Yet another one "for the books" as it were ... -Why your breath is literally the most important thing you should focus upon during your exercise routine - - and how you can burn fat off your frame almost instantly once you start applying the right breathing techniques. Believe me - - THIS tip alone is something most folks would be happy to drop more than a hundred smackers on to learn! -You'll learn about my much vaunted and much famous (all over the Internet) hill climb from China, and how it benefited me, and how similar workouts can benefit YOU! -You will learn how to get cardio workouts in like NEVER before – workouts that take less than 15 minutes, and leave you soaked in sweat, burning fat like never before and feeling on TOP of the world! -How to lose weight rapidly – and do it FAST. This is unconventional. You won't see this information anywhere else. And yet ... does it work? You bet your "betsy" it does! And much, much more, my friend. Grab it now - and write back and let me know how you do!!

Greyhound Scenicruiser Dec 01 2019 When we deem things iconic, they have naturally become part of history and have earned a permanent status of importance to us—one such object is a particular intercity coach, the Greyhound PD-4501 Scenicruiser bus, built by the GM Corporation during 1954-'56. After nearly 60 years, its popularity, even today, is almost cult-like. Throughout the history of intercity coaches in the U.S., there have not been more toys, advertising pieces, souvenirs, or memorabilia centered on any other bus. The Scenicruiser starred in several movies, was featured on record album covers, and appeared on endless TV shows through the years. Starting with prototypes, this book covers all the various models of the Scenicruiser's heritage, and even highlights many of the restored and still operating legends today.
