Methods For Monitoring Tiger And Prey Populations Aug 20 2019 This book addresses issues of monitoring populations of tigers, ungulate prey species and habitat occupancy, with relevance to similar assessments of large mammal species and general biodiversity. It covers issues of rigorous sampling, modeling, estimation and adaptive management of animal populations using cutting-edge tools, such as camera-traps, genetic identification and Geographic Information Systems (GIS), applied under the modern statistical approach of Bayesian and likelihood-based inference. Of special focus here are animal survey data derived for use under spatial capture-recapture, occupancy, distance sampling, mixture-modeling and connectivity analyses. Because tigers are an icons of global conservation, in last five decades, enormous amounts of commitment and resources have been invested by tiger range countries and the conservation community for saving wild tigers. However, status of the big cat remains precarious. Rigorous monitoring of surviving wild tiger populations continues to be essential for both understanding and recovering wild tigers. However, many tiger monitoring programs lack the necessary rigor to generate the reliable results. While the deployment of technologies, analyses, computing power and human-resource investments in tiger monitoring have greatly progressed in the last couple of decades, a full comprehension of their correct deployment has not kept pace in practice. In this volume, Dr. Ullas Karanth and Dr. James Nichols, world leaders in tiger biology and quantitative ecology, respectively, address this key challenge. They have collaborated with an extraordinary array of 30 scientists with expertise in a range of necessary disciplines - biology and ecology of tigers, prey and habitats; advanced statistical theory and practice; computation and programming; practical field-sampling methods that employ technologies as varied as camera traps, genetic analyses and geographic information systems. The book is a 'tour de force' of cutting-edge methodologies for assessing not just tigers but also other predators and their prey. The 14 chapters here are lucidly presented in a coherent sequence to provide tiger-specific answers to fundamental questions in animal population assessment: why monitor, what to monitor and how to monitor. While highlighting robust methods, the authors also clearly point out those that are in use, but unreliable. The managerial dimension of tiger conservation described here, the task of matching monitoring objectives with skills and resources to integrate tiger conservation under an adaptive framework, also renders this volume useful to wildlife scientists as well as conservationists.

If These Walls Could Talk: Detroit Tigers Jan 25 2020 Providing a behind-the-scenes look at the personalities and events that have shaped the Detroit Tigers' recent resurgence, readers will meet the players, coaches, and management and share in their moments of greatness, grief, and quirkiness. Beginning in 2002, when author Mario Impemba arrived in the Tigers' broadcast booth and when the team had consecutive 100-loss seasons, the book details how, in just three short years, team president Dave Dombrowski and manager Jim Leyland led the Tigers to the American League pennant—a feat the Tigers repeated in 2012. Impemba takes readers into the Comerica Park broadcast booth alongside the legendary Ernie Harwell, onto the team plane during the team's two runs to the World Series, and into the clubhouse as Miguel Cabrera closed in on the 2012 Triple Crown. He shares personal stories about several

Tigers stars, including Cabrera, Justin Verlander, Prince Fielder, Curtis Granderson, Ivan Rodriguez, Kenny Rogers, Magglio Ordonez, and more. If These Walls Could Talk: Detroit Tigers gives fans a taste of what it's like to be a part of the Tigers storied history from a perspective unlike any other.

Yawning at Tigers Apr 27 2020 "A needed corrective to self-indulgent Christianity." Philip Yancey "A stirring challenge." Lee Strobel "A strong antidote against a domesticated God." Matthew Lee Anderson When was the last time you were overawed by God's majesty? Have you ever stood in stunned silence at his holiness and power? In our shallow, self-centered age, things like truth and reverence might seem outdated, lost. Yet we're restless. And our failed attempts to ease our unrest point to an ancient ache for an experience of the holy. Drew Dyck makes a compelling case that what we seek awaits us in the untamed God of Scripture—a God who is dangerous yet accessible, mysterious yet powerfully present. He is a God who beckons us to see him with a fresh, unfiltered gaze. Yawning at Tigers takes us past domesticated Christianity, into the wilds where God's raw majesty, love, and power become more real and transformative than we could ever imagine.

Looking for Tigers Dec 24 2019

A Day for Tigers Jul 19 2019 ...it's 1955 and you've just moved house. You go to the local newspaper shop for your 'Beano' and find they have a rack filled with 'Astounding Science Fiction', 'Weird Fantasy', 'Wonder Stories', 'Mandrake the Magician', and 'Green Lantern'. To top it all, they have 'The Eagle', with its sensational Frank Hampson illustrations of 'Dan Dare, Pilot of the Future'. These comics showed me that Life Has No Boundaries, and set my imagination free and on fire. To mention only the magazines is to deny the influence that 'Flash Gordon' had when, for the princely sum of three pence, my mother took me to the Church Hall film show across the road and left me for an hour to soak up the spectacle of flashing, smoking, sparkling spaceships dodging Emperor Ming's Death Beams to rescue Dale Arden, with the help of strange men in tights. Sci-Fi, I Love You. There. I've said it. And now there's no going back. In this book I have tried to recreate the sense of discovery that I felt when I first encountered it so if, like me, you are still seven at heart and also, like me, still in love with the Golden Age of Sci-Fi and Fantasy, I hope you find that heart again within these pages. Bill Allerton

Life in the Valley of Death Feb 18 2022 Dubbed the Indiana Jones of wildlife science by The New York Times, Alan Rabinowitz has devoted—and risked—his life to protect nature's great endangered mammals. He has journeyed to the remote corners of the earth in search of wild things, weathering treacherous terrain, plane crashes, and hostile governments. Life in the Valley of Death recounts his most ambitious and dangerous adventure yet: the creation of the

world's largest tiger preserve. The tale is set in the lush Hukaung Valley of Myanmar, formerly known as Burma. An escape route for refugees fleeing the Japanese army during World War II, this rugged stretch of land claimed the lives of thousands of children, women, and soldiers. Today it is home to one of the largest tiger populations outside of India—a population threatened by rampant poaching and the recent encroachment of gold prospectors. To save the remaining tigers, Rabinowitz must navigate not only an unforgiving landscape, but the tangled web of politics in Myanmar. Faced with a military dictatorship, an insurgent army, tribes once infamous for taking the heads of their enemies, and villagers living on less than one U.S. dollar per day, the scientist and adventurer most comfortable with animals is thrust into a diplomatic minefield. As he works to balance the interests of disparate factions and endangered wildlife, his own life is threatened by an incurable disease. The resulting story is one of destruction and loss, but also renewal. In forests reviled as the valley of death, Rabinowitz finds new life for himself, for communities haunted by poverty and violence, and for the tigers he vowed to protect.

All the Way to the Tigers Oct 22 2019 One of NPR's Best Books of the Year From the author of *Nothing to Declare*, a moving travel narrative examining healing, redemption, and what it means to be a solo woman on the road. In February 2008, a casual afternoon of ice skating derailed the trip of a lifetime. Mary Morris was on the verge of a well-earned sabbatical, but instead she endured three months in a wheelchair, two surgeries, and extensive rehabilitation. One morning, when she was supposed to be in Morocco, Morris was lying on the sofa reading *Death in Venice*, casting her eyes over these words again and again: "He would go on a journey. Not far. Not all the way to the tigers." Disaster shifted to possibility and Morris made a decision. When she was well enough to walk again, she would go "all the way to the tigers." So begins a three-year odyssey that takes Morris to India on a tiger safari in search of the world's most elusive apex predator. Written in over a hundred short chapters accompanied by the author's photographs, this travel memoir offers an elegiac, wry, and wise look at a woman on the road and the glorious, elusive creature she seeks.

Tigers of the World Oct 26 2022 The second edition of *Tigers of the World* explores tiger biology, ecology, conservation, management, and the science and technology that make this possible. In 1988, when the first edition was published, tiger conservation was still in its infancy, and two decades later there has been a revolution not only in what is known, but how information about tigers is obtained and disseminated. In the fast changing world of conservation, there is a great need to summarize the vast and current state-of-the-art, to put this into historical perspective, and to speculate in what yet remains to be done. *Tigers of the World, 2e* fulfills this need by bringing together in a unique way the world's leading tiger experts into one volume. Despite the challenges ahead, there are bright spots in this story and lessons aplenty not only for tiger specialists but large carnivore specialists, conservation biologists, wildlife managers, natural resource policymakers, and most importantly the caring public. *Examines the past twenty years of research from the world's

leading tiger experts on biology, politics, and conservation. *Describes latest methods used to disseminate and obtain information needed for conservation and care of this species. *Includes coverage on genetics and ecology, policy, poaching and trade, captive breeding and farming, and the status of Asia's last wild tigers. *Excellent resource for grad courses in conservation biology, wildlife management, and veterinary programs. *New volume continues the classic Noyes Series in Animal Behavior, Ecology, Conservation and Management.

A Tiger Remembers Mar 07 2021 Born in the Year of the Fire Tiger, Ann Wee moved to Singapore in 1950 to marry into a Singaporean Chinese family. One of Singapore's pioneering social work educators, Ann shares her experiences frankly and with great humour. She remembers the things that history books leave out: questions of hygiene, the emotional nuance in social relations, stories of ghost wives and changeling babies, rural clan settlements and migrant dormitories, what was lost and gained when families moved into HDB estates. Affectionately observed and wittily narrated, with a deep appreciation of how far Singapore has changed, this book brings to life the country's social transformation by talking about the family, "in its 101 different shapes and sizes, with its capacity to cope which ranges from truly marvellous to distinctly tatty: still, in one form or another, the best place for most of us to be".

Blood of the Tiger Apr 08 2021 Blood of the Tiger takes readers on a wild ride to save one of the world's rarest animals from a band of Chinese billionaires. Many people think wild tigers are on the road to recovery, but they are in greater danger than ever—from a menace few experts saw coming. There may be only three thousand wild tigers left in the entire world. More shocking is the fact that twice that many—some six thousand—have been bred on farms, not for traditional medicine but to supply a luxury-goods industry that secretly sells tiger-bone wine, tiger-skin décor, and exotic cuisine enjoyed by China's elite. Two decades ago, international wildlife investigator J. A. Mills went undercover to expose bear farming in China and discovered the plot to turn tigers into nothing more than livestock. Thus begins the story of a personal crusade in which Mills mobilizes international forces to awaken the world to a conspiracy so pervasive that it threatens every last tiger in the wild. In this memoir of triumph, heartbreak, and geopolitical intrigue, Mills and a host of heroic comrades try to thwart a Chinese cadre's plan to launch billion-dollar industries banking on the extinction of not just wild tigers but also elephants and rhinos. Her journey takes her across Asia, into the jungles of India and Nepal, to Russia and Africa, traveling by means from elephant back to presidential motorcade, in the company of man-eaters, movie stars, and

world leaders. She finds reason for hope in the increasing number of Chinese who do not want the blood of the last wild tigers to stain their beloved culture and motherland. Set against the backdrop of China's ascendance to world dominance, *Blood of the Tiger* tells of a global fight to rein in the forces of greed on behalf of one of the world's most treasured and endangered animals. From the Hardcover edition.

Forest of Tigers Jun 22 2022 Acclaimed for its unique ecosystem and Royal Bengal tigers, the mangrove islands that comprise the Sundarbans area of the Bengal delta are the setting for this pioneering anthropological work. The key question that the author explores is: what do tigers mean for the islanders of the Sundarbans? The diverse origins and current occupations of the local population produce different answers to this question - but for all, 'the tiger question' is a significant social marker. Far more than through caste, tribe or religion, the Sundarbans islanders articulate their social locations and interactions by reference to the non-human world - the forest and its terrifying protagonist, the man-eating tiger. The book combines rich ethnography on a little-known region with contemporary theoretical insights to provide a new frame of reference to understand social relations in the Indian subcontinent. It will be of interest to scholars and students of anthropology, sociology, development studies, religion and cultural studies, as well as those working on environment, conservation, the state and issues relating to discrimination and marginality.

In the company of Aslambhai (a retired forest guard) and his mischievous grandson Ali, the children enter a new world; that of the sights and sounds of the jungle. Encouraged by Field Director Mr Rana's daughter, Dipti, and watched over by her family, the children begin to enjoy their forays into the reserve and get inexorably drawn into the lives of the reserve's magnificent tigers; macho 'doofus' shahenshah, ferocious Sheba and even terrifying Shaitan. But then, Veena aunty, a.k.a. 'Snail Snot', turns up, a 'social worker' who is set to inveigle herself into Binoy chacha's life and who wants to discredit the reserve in whatever way she can as part of her 'Good Work'. Accompanied by her unpleasant cousin, the slimeball Randhir, and his equally dubious friends, she is determined to send the children to separate boarding schools by whatever means possible. As the two hatch their diabolical plans, the children's lives seem ready to fall apart, again. But will the doughty Shikha allow that to happen? Will Sunny, struck dumb by the shock of the car crash, stop clinging to his sister and speak again? Will the two children, who run away into the reserve pursued by Veena, Randhir and his cronies, survive the perils of the forest? Can 'the small tigers of Shergarh' turn the tables on the villains and live up to their name?

When he entered the forest, which would go on to become one of the last strongholds of wild tigers, it had a profound effect on him, changing his life forever. For the next forty years, he studied nearly 200 Ranthambhore tigers, spending every waking moment in close proximity to these magnificent animals. Of the various tigers he observed a handful became extra special and it is these which come to glorious life in this book. They include Padmini, the Queen Mother, the first tiger the author got to know well; Genghis, the master predator, who invented a way of killing prey in water, the first time this had been observed anywhere in the world; Noon, one of his all-time favourites, who received her name because she was most active in the middle of the day; Broken Tooth, an exceptionally gentle male; Laxmi, a devoted mother, whose methods of raising her cubs revolutionized tiger studies; Machli, the most famous tigress in Ranthambhore and several more.

Frontiers of Fear Jul 31 2020 For centuries, reports of man-eating tigers in Indonesia, Malaysia, and Singapore have circulated, shrouded in myth and anecdote. This fascinating book documents the "big cat"-human relationship in this area during its 350-year colonial period, re-creating a world in which people feared tigers but often came into contact with them, because these fierce predators prefer habitats created by human interference. Peter Boomgaard shows how people and tigers adapted to each other's behavior, each transmitting this learning

from one generation to the next. He discusses the origins of stories and rituals about tigers and explains how cultural biases of Europeans and class differences among indigenous populations affected attitudes toward the tigers. He provides figures on their populations in different eras and analyzes the factors contributing to their present status as an endangered species. Interweaving stories about Malay kings, colonial rulers, tiger charmers, and bounty hunters with facts about tigers and their way of life, the book is an engrossing combination of environmental and micro history.
