Too Big to Fall May 31 2022 A comprehensive overview of the shocking state of our nation's infrastructure and what must be done to fix it
Puerto Rico: Culture, Politics, and Identity Aug 10 2020 This book uses historical and interview data to trace the development of Puerto Rican identity in the 20th century. It analyzes how and why Puerto Ricans have maintained a clear sense of distinctiveness in the face of direct and indirect pressures on their identity. After gaining sovereignty over Puerto Rico from Spain in 1898, the United States undertook a sustained campaign to Americanize the island. Despite 50 years of active Americanization and another 40 years of continued United States sovereignty over the island, Puerto Ricans retain a sense of themselves as distinctly and proudly Puerto Rican. This study examines the symbols of Puerto Rican identity, and their use in the complex politics of the island. It shows that identity is dynamic, it is experienced differently by individuals across Puerto Rican society, and that the key symbols of Puerto Rican identity have not remained static over time. Through the study of Puerto Rico, the book investigates and challenges the widely-heard argument that the inevitable result of the export of U.S. mass media and consumer culture throughout the world is the weakening of cultural identities in receiving societies. The book develops the idea that external pressure on collective identity may strengthen that identity rather than, as is often assumed, diminish it.
Bulletin officiel des annonces civiles et commerciales Feb 25 2022
[Ace of Arts](#) Dec 26 2021 A collection of artworks containing the different aspects of asexual, aromantic and other a-spec identities within the LGBTQ+ community as a whole, shown in the form of abstract and aesthetic art pieces.
[Financial Access and Stability](#) Dec 02 2019 The countries of the Middle East and North Africa (MENA) have been recovering from the global financial crisis, but the recent political turmoil has interrupted the pace of credit and output recovery in many countries. The political turmoil in the MENA region reveals deep-seated frustrations and a sense of political, social, and economic exclusion, especially among the youth. The relatively weak growth performance reflects a combination of insufficient reforms and weak reform implementation, including financial sector reforms. The structural weaknesses of financial sectors imply that access to finance may remain restricted even with a full recovery of credit activity. Therefore, the region's countries face an ambitious reform agenda to revert two decades of relatively poor performance of output and employment growth. Financial development should be a central component of the region's growth agenda. This study reviews the region's financial systems, the severity of the limitations on access to finance, and the main factors behind such limitations. It goes on to provide a road map for expanding access and preserving financial stability.
Inclusion and Resilience Dec 14 2020 Inclusion and Resilience has two broad objectives. The study seeks first to enhance knowledge about the current state of existing social safety nets (SSNs) in the Middle East and North Africa, assessing their effectiveness by bringing together new evidence, data, and country-specific analysis. Second, it proposes an open and informed debate on feasible policy options for making SSNs more effective and responsive to the population's needs. In order to do this, the authors illustrate how the main goals for SSNs—promoting social inclusion, better livelihood, and resilience to shocks—have already been achieved in some parts of the region, notwithstanding huge challenges. They also identify the groups that regional SSNs should make a priority: children and people living in rural and lagging areas. The study relies on newly collected data on citizens' preferences concerning redistribution and SSN design, discussing how political economy considerations could be taken into account in designing better SSNs, and proposing an agenda for reform, using global experiences and the new evidence presented in the book itself.

[Making the Most of Scarcity](#) Jun 27 2019 "While water professionals have been advocating comprehensive water reforms for years and many countries have improved their water policies and institutions, some of the most politically sensitive elements of reform remain untouched. This report suggests that a series of factors are now emerging that represent a potential opportunity to break this impasse." "Making the Most of Scarcity will be of interest to readers working in the areas of agribusiness and markets, agriculture, urban and rural development, water supply, and water resources, as well as to those responsible for setting policies in the areas of environment, economics, and social protection."--BOOK JACKET.
Deyo (Deyoe) Family Oct 04 2022
Galatians, Ephesians, Philippians Nov 24 2021 Paul's letters to the Galatians, Ephesians, and Philippians have struck an indelible impression on Christian tradition and piety. In this ACCS volume, the expository voices of Jerome, Origen, Augustine, Chrysostom, Ambrosiaster, Theodoret, Marius Victorinus, and Theodore of Mopsuestia speak again with eloquence and intellectual acumen.

Unlocking the Employment Potential in the Middle East and North Africa Sep 30 2019
Poor Places, Thriving People Aug 29 2019 Geographical differences in living standards are a pressing concern for policymakers in the Middle East and North Africa (MENA). Economies of agglomeration mean that production is most efficient when concentrated in leading areas. So how can the region reduce spatial disparities in well-being without compromising growth? The solution to spatial disparities lies in matching the policy package to a lagging area's specific characteristics. Key questions include: is the lagging area problem really as serious as one thinks; is it a problem of low economic opportunity or of poor human development; are lagging area populations close enough to agglomerations to benefit from spillovers; and is there manifest private investor interest? Drawing on the World Bank's 2009 World Development Report, Reshaping Economic Geography, the book proposes 3 policy packages. First, all lagging areas can benefit from a level playing-field for development and investment in people. Geographic disparities in the policy environment are a legacy of MENA's history, and gaps in human development are a major component of spatial disparities. Smart policies for the investment environment, health, education, social transfers and urban development can therefore close spatial gaps in living standards. Second, lagging areas that are close to economic agglomeration can benefit from spillovers - provided that they are connected. MENA's expenditure priority is not necessarily long-distance primary connections, but infrastructure maintenance and short-distance connections such as rural roads and peri-urban networks. Public-private partnerships can also bring electronic connectivity to lagging areas. Third, shifting regional development policy away from spatial subsidies towards the facilitation of cluster-based growth will increase the chance of cost-effective impacts. The final chapter of the book examines the institutional prerequisites for effective spatial policy. It argues that MENA's centralized/sectoral structures are not always adapted to governments' spatial development agendas, and describes alternative institutional options.
Popular Voices in Latin American Catholicism Feb 13 2021 Throughout Latin America, observers and activists have found in religion a promise of deep and long-lasting democratization. But for religion to change culture and politics, religion itself must change. Such change is not only a matter of doctrine, ritual, or institutional arrangements but also arises out of the needs, values, and ideas of average believers. Combining rich interviews and community studies in Venezuela and Colombia with analysis of broad ideological and institutional transformations, Daniel Levine examines how religious and cultural change begins and what gives it substance and lasting impact. The author focuses on the creation of self-confident popular groups among hitherto isolated and dispirited individuals. Once silent voices come to light as peasants and urban barrio dwellers reflect on their upbringing and community, on poverty and opportunity, on faith, prayer, and the Bible, and on institutions like state, school, and church. Levine also interviews priests, sisters, and pastoral agents and explains how their efforts shape the links between popular groups and the larger society. The result is a clear understanding of how relations among social and cultural levels are maintained and transformed, how programs are implemented, why they succeed or fail, and how change appears both to elites and to ordinary people. Originally published in 1992. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
Disorderly Discourse Jun 07 2020 This volume contains eight essays that are at the intersection of two important areas within linguistics: conversational analysis, and the use of narrative in the creation, mediation and resolution of conflict. The contributors explore these issues in a variety of cultures and languages.
[The Sacred Self](#) Oct 31 2019 How does religious healing work, if indeed it does? In this study of the contemporary North American movement known as the Catholic Charismatic Renewal, Thomas Csordas investigates the healing practices of a modern religious movement to provide a rich cultural analysis of the healing experience. This is not only a book about healing, however, but also one about the nature of self and self-transformation. Blending ethnographic data and detailed case studies, Csordas examines processes of sensory imagery, performative utterance, orientation, and embodiment. His book forms the basis for a rapprochement between phenomenology and semiotics in culture theory that will interest anthropologists, philosophers, psychologists, physicians, and students of comparative religion and healing.
Building Back Better: How Big Are Green Spending Multipliers? Jul 21 2021 This paper provides estimates of output multipliers for spending in clean energy and biodiversity conservation, as well as for spending on non-ecofriendly energy and land use activities. Using a new international dataset, we find that every dollar spent on key carbon-neutral or carbon-sink activities can generate more than a dollar's worth of economic activity. Although not all green and non-ecofriendly expenditures in the dataset are strictly comparable due to data limitations, estimated multipliers associated with spending on renewable and fossil fuel energy investment are comparable, and the former (1.1-1.5) are larger than the latter (0.5-0.6) with over 90 percent probability. These findings survive several robustness checks and lend support to bottom-up analyses arguing that stabilizing climate and reversing biodiversity loss are not at odds with continuing economic advances.
Secretary Tissues in Plants Jun 19 2021

The Psychology of Health Jan 15 2021 The first edition of The Psychology of Health has become the standard recommended text for many courses. This completely revised and updated second edition contains new material in all chapters and has several additional chapters on such topics as cancer, nutrition and exercise, social drugs, and the impact of social inequalities upon health. The Psychology of Health will continue to be invaluable for students of health psychology and related fields, including nursing, social work, community care and health studies. The Psychology of Health, second edition, is: * comprehensive: its four parts cover the scope and ambition of health psychology, acute and chronic illness, hospitalisation and the management of disease, primary prevention and health promotion, the importance of the family and the wider social context for health * user-friendly: includes tables, figures and boxes with discussion ideas and questions in each chapter. Prefaces to each part, key point summaries and a glossary of terms give students a useful framework for revision * clearly written by an experienced team involved in undergraduate teaching * a source for further study: with annotated guides to reading and an extensive bibliography.

Arabic Spain Jan 03 2020 Soon after their arrival in Spain the authors realized that the early Muslim art of Seville was curiously different from that of Cordova. This fascinated them and they undertook eight years of study in Seville, making use of the resources available to them in the city's libraries to bring their audience this history of the Muslims in Spain. The study was first published in 1912. Concentrating on Seville, they provide a chronological narrative of Spain from the Muslim invasion of 711 until the Reconquista of the fifteenth century. The scene is set for the invasion by an evaluation of the situation under the Goths. Following this the many influences on the culture and civilization of Andalusia are discussed, and how the richness of Roman and Gothic art and architecture was augmented by the Yemenite Arabs and Coptic Egyptians. The book concludes with an examination of the events following the Reconquista in Spain, and of the Arabs' lasting visual impact on Spanish history.

Listening to Salsa Nov 12 2020 Winner of the MLA's Katherine Singer Kovacs Prize for an outstanding book published in English in the field of Latin American and Spanish literatures and culture (1999) For Anglos, the pulsing beats of salsa, merengue, and bolero are a compelling expression of Latino/a culture, but few outsiders comprehend the music's implications in larger social terms. Frances R. Aparicio places this music in context by combining the approaches of musicology and sociology with literary, cultural, Latino, and women's studies. She offers a detailed genealogy of Afro-Caribbean music in Puerto Rico, comparing it to selected Puerto Rican literary texts, then looks both at how Latinos/as in the US have used salsa to reaffirm their cultural identities and how Anglos have eroticized and depoliticized it in their adaptations. Aparicio's detailed examination of lyrics shows how these songs articulate issues of gender, desire, and conflict, and her interviews with Latinas/os reveal how they listen to salsa and the meanings they find in it. What results is a comprehensive view "that deploys both musical and literary texts as equally significant cultural voices in exploring larger questions about the power of discourse, gender relations, intercultural desire, race, ethnicity, and class." The Religious Dimension in Hispanic Los Angeles Jan 27 2022

Religion and Aging in the Indian Tradition Feb 02 2020 The manner of aging is a cultural construct and there is a specifically Indian way of aging. That way is shown in this book through the analyses of key concepts--aging (jara), stages of life (asarama), time (kala), determinate deeds (karma), desire (kama), change (parinama), and rejuvenative force (vaja). The author offers important transcultural insights into the realities of aging, disease, and inevitable death faced by all. The composite Indian religious tradition provides patterns for shaping the aging experience into a meaningful system of vital social values, ethical principles, and life goals. This analysis of the Indian approach provides significant clues for understanding aging in other cultures.

A Tribute to a Beloved Lady Aug 22 2021 I lost my dear mother to stomach cancer in 1994. Before she passed away she made a request to me that I some day take her poetry and my works of art and put them together for the world to see. This book has been created in her memory and honor. She was a remarkable lady and a wonderful mother. I hope her words touch and inspire all who read them.

The Reformation of Machismo Sep 10 2020 Protestant evangelicalism has spread rapidly in Latin America at the same time that foreign corporations have taken hold of economies there. These concurrent developments have led some observers to view this religious movement as a means of melding converts into a disciplined work force for foreign capitalists rather than as a reflection of conscious individual choices made for a variety of personal, as well as economic, reasons. In this pioneering study, Elizabeth Brusco challenges such assumptions and explores the intra-household motivations for evangelical conversion in Colombia. She shows how the asceticism required of evangelicals (no drinking, smoking, or extramarital sexual relations are allowed) redirects male income back into the household, thereby raising the living standard of women and children. This benefit helps explain the appeal of evangelicalism for women and questions the traditional assumption that organized religion always disadvantages women. Brusco also demonstrates how evangelicalism appeals to men by offering an alternative to the more dysfunctional aspects of machismo. Case studies add a fascinating human dimension to her findings. With the challenges this book poses to conventional wisdom about economic, gender, and religious behavior, it will be important reading for a wide audience in anthropology, women's studies, economics, and religion. For all students of Latin America, it offers thoughtful new perspectives on a major, grass-roots agent of social change.

Handbook of Marine Mineral Deposits Mar 29 2022 This handbook summarizes the main advances in our understanding of marine minerals and concentrates on the deposits of proven economic potential. In cases where our knowledge may be too limited to allow defining of their economic potential, those minerals are covered regionally or by deposit type. Handbook of Marine Mineral Deposits is divided into three sections: Marine placers, manganese nodules and crusts, and deep-sea hydrothermal mineralization. All of these mineral deposits have great potential importance to economic geologists and marine mines. Edited by an acknowledged expert in the field, this handbook includes work by internationally renowned contributors. The new United Nations Law of the Sea, ratified by over 100 countries within the past two years, provides a framework and guidelines for deep-sea mineral exploration that increases international interest in this book. The Handbook serves as a platform from which to launch the more detailed evaluation studies that will need to take place in the 21st century before recovery can continue or commence. Handbook of Marine Mineral Deposits is useful to mineralogists, economic geologists, marine geologists, marine miners, and conservationists. Features

Energy Law and Economics Sep 03 2022 This book offers an edited volume for all readers who wish to gain an in-depth grasp of the economic analysis of recent developments in energy law and policy in Europe and the United States. In response to waning resources and heightened environmental awareness, many countries are now seeking to redefine their energy mix. Several energy sources are available: coal and oil, natural gas, and a variety of renewables. Yet which of them are capable of addressing core energy-related concerns? Reliability, security, affordability, fairness, and sustainability all have to be taken into account. Further, once a target mix has been identified, two challenges remain for legal scholars: what role does the law play in achieving a specified energy mix, and, how can the law best fulfill that role? The essential energy concerns are just as important in defining the way we shape our energy mix as they are in defining the mix itself. An example of current challenges in energy law and policy can be seen in the pursuit by the German and Swiss governments of the so-called "Energiewende" (energy transition). These policies are intended to enable the transition from a non-sustainable use of fossil and nuclear energy to a more sustainable approach based on renewable energies. On the one hand, the goal is to achieve a decarbonization of the energy economy by reducing the use of fossil energy sources such as petroleum, carbon and natural gas. On the other, and in response to the Fukushima nuclear accident, a phase out is intended to eliminate the dangers of nuclear technologies. Achieving these goals poses tremendous challenges for the two countries' energy policies - partly because the energy transition will not only affect energy production, but also energy consumption. From a Law and Economics perspective, a number of questions arise: to what extent is it justifiable to rely on markets and continued technological innovation, especially with regard to the present exploitation of scarce resources? To what extent is it necessary for states to intervene in energy markets? Regulatory instruments are available to create and maintain more sustainable societies: command and control regulations, restraints, Pigovian taxes, emission certificates, nudging policies, and more. If regulation in a certain legal field is necessary, which policies and methods will most effectively spur the sustainable consumption and production of energy in order to protect the environment while mitigating any potential negative impacts on economic development? Do neoclassical and behavioural economics provide us with a suitable framework for predicting the market's complex reactions to a changing energy policy? This book provides theoretical insights as well as empirical findings in order to answer these vital questions.

Annual Plant Reviews, Biochemistry of Plant Secondary Metabolism Apr 17 2021 This brand new Annual Plant Reviews volume is the second edition of the highly successful and well-received Annual Plant Reviews, Volume 2. This exciting new volume provides an up-to-date survey of the biochemistry and physiology of plant secondary metabolism. The volume commences with an overview of the biochemistry, physiology and function of secondary metabolism, followed by detailed reviews of the major groups of secondary metabolites: alkaloids and betalains, cyanogenic glucosides, glucosinolates and nonprotein amino acids, phenyl propanoids and related phenolics, terpenoids, cardiac glycosides and saponins. A final chapter discusses the evolution of secondary metabolism. This carefully compiled new edition brings together chapters from some of the world's leading experts in plant secondary metabolism. Completely revised and brought right up to date with much new information, this volume is an essential purchase for advanced students, researchers and professionals in biochemistry, physiology, molecular biology, genetics, plant sciences, agriculture, medicine, pharmacology and pharmacy, working in the academic and industrial sectors, including those working in the pesticide and pharmaceutical industries. Libraries in all universities and research establishments where these subjects are studied and taught will need copies of this excellent volume on their shelves. A companion volume Annual Plant Reviews Volume 39, Functions and Biotechnology of Plant Secondary Metabolites, Second Edition, Edited by M. Wink, is also available.

The Freer Family Apr 29 2022

Language and Self-Transformation Jul 29 2019 Social scientists have long been fascinated by the Christian conversion, a form of religious experience that believers say both strengthens their faith and changes their lives. This study looks at the performance of conversion narratives and argues that the performance itself is central to the efficacy of the conversion. Through detailed analysis of a number of conversion narratives, Peter Stromberg shows how these narratives can be understood as a form of ritual, in which believers invoke central emotional conflicts and then attempt to resolve these conflicts by reframing them in terms of the language of Evangelical Christianity. Although the Christian conversion narrative is used as the primary example, the approach in this book also illuminates other practices - such as psychotherapy - in which people deal with emotional conflict through language.

The Marshmallow Test Aug 02 2022 'A brilliant book' Daniel Kahneman, author of Thinking, Fast and Slow 'A book that can show you how to change your behaviour' Evening Standard A child is presented with a marshmallow and given a choice: Eat this one now, or wait and enjoy two later. What will she choose? And what does her decision say about the person she'll become? Walter Mischel's now iconic 'marshmallow test,' one of the most famous experiments in the history of psychology, proved that the ability to delay gratification is critical to living a successful and fulfilling life: self-control not only predicts higher marks in school, better social and cognitive functioning, and a greater sense of self-worth; it also helps us manage stress, pursue goals more effectively, and cope with painful emotions. But is willpower prewired, or can it be taught? In his groundbreaking new book, Dr. Mischel draws on decades of compelling research and life examples to explore the nature of willpower, identifying the cognitive skills and mental mechanisms that enable it and showing how these can be applied to challenges in everyday life—from weight control to quitting smoking, overcoming heartbreak, making major decisions, and planning for retirement. With profound implications for the choices we make in parenting, education, public policy and self-care, The Marshmallow Test will change the way we think about who we are and what we can be. And since, as Mischel

argues, a life with too much self-control can be as unfulfilling as one with too little, this book will also teach you when it 's time to ring the bell and enjoy that marshmallow. What readers are saying: ***** ' Accessible read that is both fascinating and has the potential to help change the way we approach self-control. ' ***** ' Fascinating, empowering, a brilliant aid to taking ownership of your life. ' ***** ' Encourages the reader that they have the power to change... thought-provoking. '

The Dialogic Emergence of Culture May 07 2020 Major figures in contemporary anthropology present a dialogic critique of ethnography. Moving beyond sociolinguistics and performance theory, and inspired by Bakhtin and by their own field experiences, the contributors revise notions of where culture actually resides. This pioneering effort integrates a concern for linguistic processes with interpretive approaches to culture. Culture and ethnography are located in social interaction. The collection contains dialogues that trace the entire course of ethnographic interpretation, from field research to publication. The authors explore an anthropology that actively acknowledges the dialogical nature of its own production. Chapters strike a balance between theory and practice and will also be of interest in cultural studies, literary criticism, linguistics, and philosophy. CONTRIBUTORS: Deborah Tannen, John Attinasi, Paul Friedrich, Billie Jean Isbell, Allan F. Burns, Jane H. Hill, Ruth Behar, Jean DeBernardi, R. P. McDermott, Henry Tylbor, Alton L. Becker, Bruce Mannheim, Dennis Tedlock

Better Governance for Development in the Middle East and North Africa Mar 05 2020 This publication proposes an analytical framework for discussing and measuring good governance in the Middle East and North Africa (MENA) region, based on the values of inclusiveness and accountability. It draws on examples, both regionally and internationally, in order to highlight the importance of good governance for economic and social development. The book identifies positive trends in the region, despite the region's legacy of limited public disclosure and transparency, and considers key challenges remaining for countries in the region to further the governance agenda.

The Teleological Ethics of Fakhr al-Dīn al-Rāzī Nov 05 2022 Using hitherto unstudied sources, this monograph provides a comprehensive interdisciplinary study of the ethical theory of al-Rāzī, one of the most complex and influential medieval philosophers and theologians. It reveals remarkable and previously unidentified aspects of ethical thought in Islam.

Opening Doors Mar 17 2021 The report analyzes key challenges for improving gender equality in the MENA region and provides policy priorities that Governments could consider to address these challenges. By and large the critical areas are in improving economic and political participation of females.

Sponsored Identities Oct 12 2020 Examines the creation of an essentialist view of nationhood based on a peasant culture and a unifying Hispanic heritage, and the ways in which grassroots organizations challenge and reconfigure definitions of national identity through their own activities and representations.
