[The Rule of Five](#) Aug 20 2021 "The gripping story of the most important environmental law case ever decided by the U.S. Supreme Court. Richard Lazarus's compelling narrative is enlivened by colorful characters, a canny dissection of courtroom strategy, and a case where the stakes are, literally, as big as the world." —Scott Turow, author of Presumed Innocent "There's no better book if you want to understand the past, present, and future of environmental litigation." —Elizabeth Kolbert, author of The Sixth Extinction The gripping inside story of how an unlikely team of lawyers and climate activists overcame conservative opposition—and their own divisions—to win the most important environmental case ever brought before the Supreme Court. When the Supreme Court announced its ruling in Massachusetts v. EPA, the decision was immediately hailed as a landmark. But this was the farthest thing from anyone's mind when Joe Mendelson, an idealistic lawyer working on a shoestring budget for an environmental organization no one had heard of, decided to press his quixotic case. In October 1999, Mendelson hand-

delivered a petition to the Environmental Protection Agency asking it to restrict greenhouse gas emissions from new cars. The Clean Air Act had authorized the EPA to regulate "any air pollutant" that could reasonably be anticipated to endanger public health. But could something as ordinary as carbon dioxide really be considered a harmful pollutant? And even if the EPA had the authority to regulate emissions, could it be forced to do so? Environmentalists urged Mendelson to stand down. Thinking of his young daughters and determined to fight climate change, he pressed on—and brought Sierra Club, Greenpeace, NRDC, and twelve state attorneys general led by Massachusetts to his side. This unlikely group—they called themselves the Carbon Dioxide Warriors—challenged the Bush administration and took the EPA to court. The Rule of Five tells the story of their unexpected triumph. We see how accidents, infighting, luck, superb lawyering, and the arcane practices of the Supreme Court collided to produce a legal miracle. An acclaimed advocate, Richard Lazarus reveals the personal dynamics of the justices and dramatizes the workings of the Court. The final ruling, by a razor-thin 5-4 margin, made possible important environmental safeguards which the Trump administration now seeks to unravel.

**The Rule of 5** May 05 2020 Leadership and the E5 Movement **CRACK THE CODE OF GAME-CHANGING LEADERSHIP** From a young backpacker sleeping on a park bench in Japan to becoming a senior leader of one of the biggest corporate giants in the world, Paul Dupuis has built a career through game-changing leadership—crafted through his own experiences as an athlete, volunteer and CEO. The E5 formula discussed in *The Rule of 5* is both familiar and fresh. It's a leadership model built in the spirit of 'standing on the shoulders of giants', learning from leaders like Konosuke Matsushita, the founder of Panasonic, who put 'empathy' and 'enable' at the core of his leadership approach; Jack Welch with his 3Es, who then inspired Bob McDonald at P&G to craft his own version of the 5Es; and Jim Collins, who shared his version of Level 5 Leadership in the book *Good to Great* with execution at the core. The E5 Movement is a call to action to all leaders worldwide to lead with impact. The five Es are: envision, express, excite, enable and execute. These five rules of leadership are both timeless and borderless. The real-life anecdotes, combined with the conversational tone of the book, make this an accessible and impactful read. Thought-provoking and practical, this book will inspire leaders to think about their own leadership, adopting the five Es on their mission to lead their teams to excellence—a true game changer. **Wine in Words** Jan 31 2020 Delectably brief essays that tell you only what you need to know to enjoy wine. There are wine encyclopedias, bibles, and guides—this is not one of those books. It doesn't contain everything, just the really important stuff: the truly key wines, grapes, regions; tips about wine buying, aging, and storage; and useful explanations about tasting notes and whether or not vintages really matter. In short, this book covers the real absolutes that you need to know about wine. With the pithy wit that readers of her columns have come to expect, Lettie Teague breaks down the stumbling blocks that often intimidate us and clears up the myths that cloud our understanding. A series of mini-essays cover the essentials in a fun, omnibus fashion. The tone is sometimes irreverent, sometimes opinionated, but always practical. For instance, there are entries such as "The Unbearable Oakiness of Being," "Can Wedding Wine Be Good," and "Why You Really Need Only One Glass." Other entries may provoke some lively debate, such as "Men Are from Cab, Women Are from Moscato" and "In Defense of Wine Snobs." The opposite of a didactic textbook, this volume is not meant to be read from start to finish. Instead, like wine itself, it encourages small contemplative sips. It is a companion for the modern taster, a concise and curated collection of tidbits to satisfy anyone with a lively curiosity and palate.

**Just Five Rules** Feb 23 2022 This book is for Information Technology (IT) professionals who are thinking about changing careers and want to apply self-coaching skills to the process. Readers planning a career transition within the world of IT may also find the self-coaching model of some benefit. A successful IT career change can be a planned process with some predictable outcomes along the way. However, for many people it often turns out to be a very stressful journey into an uncertain and bewildering future. This is especially so when the career change is involuntary, there is pressure to find a new role fast, and beliefs about what may be possible are too limiting. It doesn't have to be that way. I've been through two major career changes - one into the IT world in 1986 and another out of it in 2007 - and also coached a handful of IT people around various career obstacles. In my experience, self-coaching is a vital skill set in helping to navigate the uncertainties of an IT career path. This book describes that skill set and how to use it, in the form of a simple self-coaching model called "just five rules." Effective self-coaching is not an isolated approach and the book also recognizes the contributions that mentoring and career counseling services can give to IT professionals on a career transition path. **The UX Five-Second Rules** Jun 05 2020 The five-second test (also known as "timeout test" and "exposure

test") is one of the most convenient rapid UX testing methods available, although its value can be compromised by ignoring the restrictions of the method. This test involves displaying a visual or informational design for five seconds, removing it from view, then asking what aspects were recalled most easily or vividly. The goal is to understand what stands out most about a design or product, and the impact on the viewer's perception of it. This book uses detailed examples from a collection of more than 300 tests to describe the strengths and weaknesses of this rapid testing method. Readers will learn about the "five-second rules" for getting useful data, and will explore what types of design issues can be resolved by using the method. The book describes the origins of the method and its usefulness in modern UX design research and testing; conveys the need to structure tests carefully so that time, effort, and money are not wasted, and compiled data is not misleading; fosters an appreciation for the method's outcomes and how they can contribute to the success or failure of a proposed design. --

In the twenty-first century, the world has tilted eastwards in its orbit; China grows confident while the West seems mired in doubt. Having lived and worked in China for more than two decades, Tim Clissold explains the secrets that Westerners can use to navigate through its cultural and political maze. Picking up where he left off in the international bestseller *Mr. China*, *Chinese Rules* chronicles his most recent exploits, with assorted Chinese bureaucrats, factory owners, and local characters building a climate change business in China. Of course, all does not go as planned as he finds himself caught between the world's largest carbon emitter and the world's richest man. Clissold offers entertaining and enlightening anecdotes of the absurdities, gaffes, and mysteries he encountered along the way. Sprinkled amid surreal scenes of cultural confusion and near misses, are smart myth-busting insights and practical lessons Westerners can use to succeed in China. Exploring key episodes in that nation's long political, military, and cultural history, Clissold outlines five Chinese Rules, which anyone can deploy in on-the-ground situations with modern Chinese counterparts. These Chinese rules will enable foreigners not only to cooperate with China but also to compete with it on its own terms.

The Fifth Discipline: The art and practice of the learning organization Aug 27 2019 Peter Senge, founder and director of the Society for Organisational Learning and senior lecturer at MIT, has found the means of creating a 'learning organisation'. In *The Fifth Discipline*, he draws the blueprints for an organisation where people expand their capacity to create the results they truly desire, where new and expansive patterns of thinking are nurtured, where collective aspiration is set free, and where people are continually learning together. *The Fifth Discipline* fuses these features together into a coherent body of theory and practice, making the whole of an organisation more effective than the sum of its parts. Mastering the disciplines will: \*Reignite the spark of learning, driven by people focused on what truly matters to them. \*Bridge teamwork into macro-creativity. \*Free you from confining assumptions and mind-sets. \*Teach you to see the forest and the trees. \*End the struggle between work and family time. *The Fifth Discipline* is a remarkable book that draws on science, spiritual values, psychology, the cutting edge of management thought and Senge's work with leading companies which employ *Fifth Discipline* methods. Reading it provides a searching personal experience and a dramatic professional shift of mind. This edition contains more than 100 pages of new material about how companies are actually using and benefiting from *Fifth Discipline* practices, as well as a new foreword from Peter Senge about his work with the *Fifth Discipline* over the last 15 years.

"Insightful meditation on how changing the way we think can improve our daily lives. ... A deft exploration that urges us to think before speaking." —Kirkus, Starred Review

**The Code of Trust** Apr 03 2020 A counterintelligence expert shows readers how to use trust to achieve

anything in business and in life. Robin Dreeke is a 28-year veteran of federal service, including the United States Naval Academy, United States Marine Corps. He served most recently as a senior agent in the FBI, with 20 years of experience. He was, until recently, the head of the Counterintelligence Behavioral Analysis Program, where his primary mission was to thwart the efforts of foreign spies, and to recruit American spies. His core approach in this mission was to inspire reasonable, well-founded trust among people who could provide valuable information. The Code of Trust is based on the system Dreeke devised, tested, and implemented during years of field work at the highest levels of national security. Applying his system first to himself, he rose up through federal law enforcement, and then taught his system to law enforcement and military officials throughout the country, and later to private sector clients. The Code of Trust has since elevated executives to leadership, and changed the culture of entire companies, making them happier and more productive, as morale soared. Inspiring trust is not a trick, nor is it an arcane art. It's an important, character-building endeavor that requires only a sincere desire to be helpful and sensitive, and the ambition to be more successful at work and at home. The Code of Trust is based on 5 simple principles: 1) Suspend Your Ego 2) Be Nonjudgmental 3) Honor Reason 4) Validate Others 5) Be Generous To be successful with this system, a reader needs only the willingness to spend eight to ten hours learning a method of trust-building that took Robin Dreeke almost a lifetime to create.

**The Memo** Oct 22 2021 True power in this world comes from economic independence, but too many people have too much month left at the end of their money. John Hope Bryant, founder and CEO of Operation HOPE, illuminates the path toward liberation that is hiding in plain sight. His message is simple: the supermajority of people who live in poverty, whom Bryant calls the invisible class, as well as millions in the struggling middle class, haven't gotten "the memo"—until now. Building on his personal experience of rising up from economically disadvantaged circumstances and his work with Operation HOPE, Bryant teaches readers five rules that lay the foundation for achieving financial freedom. He emphasizes the inseparable connection between "inner capital" (mindset, relationships, knowledge, and spirit) and "outer capital" (financial wealth and property). "If you have inner capital," Bryant writes, "you can never be truly poor. If you lack inner capital, all the money in the world cannot set you free." Bryant gives readers tools for empowerment by covering everything from achieving basic financial literacy to investing in positive relationships and approaching wealth with a completely new attitude. He makes this bold and controversial claim: "Once you have satisfied your basic sustenance needs—food, water, health, and a roof over your head—poverty has more to do with your head than your wallet." Bryant wants to restore readers' "silver rights," giving them the ability to succeed and prosper no matter what very real roadblocks society puts in their way. We have more power than we realize, if only we can recognize and claim it. "We are our first capital," Bryant writes. "We are the CEOs of our own lives."

**The Five Elements and Other Essential Rules in Acupuncture Treatment** Dec 24 2021 Acupuncture practiced in China since time immemorial has in recent years become widely known the world over and acupuncture treatment is now obtainable outside China almost everywhere. The general experience gained from acupuncture treatment in recent years however, has often not been satisfactory, which has led to the widespread, but incorrect view that acupuncture sometimes works, but often not and the misguided idea has spread that acupuncture is suitable only for the treatment of physical pains. There are of course reasons for these mistaken views. It is ignorance of the acupuncture rules, which are indispensable for successful treatment that causes failure. These rules were laid down in the Huang-ti Nei ching of the legendary Yellow Emperor (about 2700 BC). The book explains the secrets of these rules for successful acupuncture treatment which the author has researched and practiced for more than 50 years and demonstrates how to apply them.

In Five Rules for Tomorrow's Cities, planning and design expert Patrick Condon offers five rules to help urban designers assimilate these interconnected changes into their work: (1) See the City as a System; (2) Recognize Patterns in the Urban Environment; (3) Apply Lighter, Greener, Smarter Infrastructure; (4) Strengthen Social and Economic Urban Resilience; and (5) Adapt to Shifts in Jobs, Retail, and Wages. *Parenting Matters* Mar 03 2020 Decades of research have demonstrated that the parent-child dyad and the environment of the family"which includes all primary caregivers"are at the foundation of children's well- being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich

and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
