It presents the cost of each waste, its effect on the process, and how it can be eliminated to increase profitability. Waste removal increases the profitability of any business. Processes are classified into value added and waste. The seven deadly wastes that could exist in any manufacturing process originated in Japan and are defined in the Toyota production system (TPS). The main goal became removing them. For each waste, there is a strategy to remove or eliminate it. What is less likely is that managers will know how any of these issues are affecting them and increasing costs. To remove each waste, you have to understand where it comes from, why it exists, and how it affects your business. In the economic recession, many companies are taking abstinence procedures to reduce costs. This might include layoff labors and reducing some wages. Actually, those actions might work for only a short period. Afterwards, the situation may return and in worse shape unless the company changes its way of doing things, including enacting a culture of continuous improvement. This puts us back to why the Toyota production system has been created.

**How to Remove Plastic from the Oceans** Jun 22 2022 A man who appears to have survived an air crash, wakes up in a hospital, with no memory of who he is, on a mystery island populated by a race of people of advanced consciousness. He is shown mankind's waste is washing up on their beaches. The man is given ideas for inventions to remove plastics from the ocean and taught about how our plastic waste is slowly killing life in the seas. This book presents practical solutions to removing plastic from the ocean and from preventing it getting there in the first place. The book is the first in a series on a new way of life for mankind, A New Ethic, in how we must change in order to thrive on this planet rather than merely survive. Much of this is to do with reversing the damage we are causing to the natural world, which only damages us. The purpose of this book is to provide practical solutions, inventions, for removing the plastic from the oceans. The goal is that someone takes these ideas to heart and builds them or is inspired to do something to remove the plastic and to stop it getting to the oceans.

The reality is, many times in life, our minds get caught up in the matrix of what the world wants. As a result, we tend to lose focus on our dreams, visions, missions, and overall purpose in life. Believe it or not, even some of the most successful people and influencers of our time have hit the ceiling and have lost their path. This pattern has happened on many different life levels: faith, Marriage, Parenting, Family, Relationships, Business, Career Building, and health. The main reason we lose who we are is that we allow our accolades to define who we are. When in reality, that is only the outer layer. We fall in love with what people see on the outside and disregard the engine that got us there on the inside. In this book, Kenneth Allen Thomas teaches us the value of discovering the greatness from within for Ultimate success in life.
