Voyages in World History, Volume I, Brief Jul 21 2021 VOYAGES IN WORLD HISTORY, BRIEF EDITION, masterfully uses the theme of movement—the journeys of peoples, ideas, and goods—to help students make sense of the huge range of people, places, and events throughout history. Each chapter is framed around the story of a person who traveled within the time period and region under discussion. Bankrupt in America Oct 24 2021 In 2005, more than two million Americans—six out of every 1,000 people—filed for bankruptcy. Though personal bankruptcy rates have since stabilized, bankruptcy remains an important tool for the relief of financially distressed households. In *Bankrupt in America*, Mary and Brad Hansen offer a vital perspective on the history of bankruptcy in America, beginning with the first lasting federal bankruptcy law enacted in 1898. Interweaving careful legal history and rigorous economic analysis, *Bankrupt in America* is the first work to trace how bankruptcy was transformed from an intermittently used constitutional provision, to an indispensable tool for business, to a central element of the social safety net for ordinary Americans. To do this, the authors track federal bankruptcy law, as well as related state and federal laws, examining the interaction between changes in the laws and changes in how people in each state used the bankruptcy law. In this thorough investigation, Hansen and Hansen reach novel conclusions about the causes and consequences of bankruptcy, adding nuance to the discussion of the relationship between

bankruptcy rates and economic performance.

The Silk Road Feb 25 2022 The Silk Road. We have a hazy mental image: a lone traveler carrying silk on a camel moves along a desert. Where exactly is he going and what goods is he carrying? This book offers concrete answers based on newly discovered documents preserved in the sands of the Taklamakan Desert. It is amazing what has been dug up, and how the new materials - both documents and artifacts - radically challenge our understanding of the Silk Road. Historians have only recently begun to piece together and make sense of these materials, which give a far clearer picture of actual Silk Road. Placing these documentary finds at the heart of the narrative, this book also tells the story of the different explorers who found these documents, and it teases out the implications of these documents for our understanding of the Silk Road. (We learn, for example, that the Silk "Road" was not really a road, and that no one used the term "Silk Road" in the past.) The book focuses on the seven most important Silk Road sites that have produced documents and objects from the Silk Road. Six (Niya, Kucha, Turfan, Dunhuang, Khotan, and Xi'an) are located in northwest China; the seventh, Samarkand, is in modern Uzbekistan. This college edition includes a selection of excerpted primary sources in each chapter. The range is enormous: memoirs of medieval Chinese monks and modern explorers, letters written by women, descriptions of towns, language-learning materials for traveling monks, and contracts, among others. Instructors can select the documents they find most interesting to discuss in class; students can use these materials to write papers. Many of these are difficult to find, and the author has checked all the translations to enhance their readability. The college edition also includes a new final chapter that examines the Silk Road during the period of Mongol rule (to c. 1400 CE).

Kalorama Triangle Jun 07 2020 Kalorama is Greek for fine view," and it was the vista that drew wealthy colonists to set their farms and manor homes on the verdant hills above the capital. With the start of the Civil War, the grand hilltop residences were turned over to the army to be used as barracks and hospitals. It was only after the war that the land was developed into city streets that saw everything from the excesses of the Gilded Age to the horrors of the 1922 Knickerbocker Theater Disaster. Historian and longtime resident Stephen A. Hansen charts the evolution of the neighborhood from its earliest history through the twentieth century as residents fought to preserve the historic character of Kalorama Triangle."

The Summits of Modern Man Mar 29 2022 Mountaineering has served as a metaphor for civilization triumphant. A fascinating study of the first ascents of the major Alpine peaks and Mt. Everest, *The Summits of Modern Man* reveals the significance of our encounters with the world's most forbidding heights and how difficult it is to imagine nature in terms other than conquest and domination.

Hannah Arendt Jul 29 2019 The new study provides a fresh and timely reassessment of the political philosophy of Hannah Arendt. While analysing the central themes of Arendt's work, Phillip Hansen also shows that her work makes a significant contribution to contemporary debates. Specifically, Hansen argues that Arendt provides a powerful account of what it means to think and act politically. This account can establish the grounds for a contemporary citizen rationality in the face of threat to a genuine politics. Among other issues, Hansen discusses Arendt's conception of history and historical action; her account of politics and of the distinction between public and private; her analysis of totalitarianism as the most ominous form of 'false' politics; and her treatment of revolution. The book is a balanced and opportune reappraisal of Arendt's contributions to social and political theory. It will be welcomed by students and scholars in politics, sociology and philosophy.

Changing Gods in Medieval China, 1127-1276 Apr 05 2020 In her study of medieval Chinese lay practices and beliefs, Valerie Hansen argues that social and economic developments underlay religious changes in the Southern Song. Unfamiliar with the contents of Buddhist and Daoist texts, the common people hired the practitioner or prayed to the god they thought could cure the ill or bring rain. As the economy rapidly developed, the gods, like the people who worshiped them, diversified: their realm of influence expanded as some gods began to deal on the national grain market and others advised their followers on business transactions. In order to trace this evolution, the author draws information from temple inscriptions, literary notes, the administrative law code, and local histories. By contrasting differing rates of religious change in the lowland and highland regions of the lower Yangzi valley, Hansen suggests that the commercial and social developments were far less uniform than previously thought. In 1100, nearly all people in South China worshiped gods who had been local residents prior to their deaths. The increasing mobility of cultivators in the lowland, rice-growing regions resulted in the adoption of gods from other places. Cults in the isolated mountain areas showed considerably less change. The Silk Roads Dec 02 2019 For more than 1500 years, across more than 4000 miles, the Silk Roads connected East and West. These overland trails and sea lanes carried not only silks, but also cotton textiles, dyes, horses, incense, spices, gems, glass, and ceramics along with religious ideas, governing customs, and technology. For this book, Xinru Liu has assembled primary sources from ancient China, India, Central Asia, Rome and the Mediterranean, and the Islamic world, many of them difficult to access and some translated into English for the first time. Court histories, geographies and philosophical treatises, letters, travelers' accounts, inventories, inscriptions, laws, religious texts, and more, introduce students to the complexities of cultural exchange. Liu's thoughtful introduction considers the many ways the peoples along the Silk Roads interacted and helps

students understand the implications for economies and societies, as well as political and religious institutions, over space and time. Maps, document headnotes and annotations, a chronology, questions for consideration, and a selected bibliography offer additional pedagogical support.

Al-Shabaab in Somalia Dec 26 2021 Hansen explores the history of the Somalia based Al Harakat Al Shabaab from 2005 to 2012, offering the first in-detail history of one of the most important Al-Qaeda affiliates today and the first to conquer large territories. He anchors the organisation in its local context, describing it as set in the nexus of global and local streams of influence, employing terror strategically, often in order to offset diplomatic and military defeats. He then follows it as an early network into the post-2010 phase where it struggles against a superior enemy but still remains an actor to be reckoned with.

The Year 1000 Apr 29 2022 "Typically wide-ranging, informative, and illuminating . . . a lovely book" Peter Frankopan "A brilliant communicator . . . a wonderful [book]" Dan Snow _____ When did globalization begin? Most observers have settled on 1492, the year Columbus discovered America. But as celebrated Yale professor Valerie Hansen shows, it was the year 1000, when for the first time new trade routes linked the entire globe, so an object could in theory circumnavigate the world. This was the 'big bang' of globalization, which ushered in a new era of exploration and trade, and which paved the way for Europeans to dominate after Columbus reached America. Drawing on a wide range of new historical sources and cutting-edge archaeology, Hansen shows, for example, that the Maya began to trade with the native peoples of modern New Mexico from traces of theobromine - the chemical signature of chocolate - and that frozen textiles found in Greenland contain hairs from animals that could only have come from North America. Moreover, Hansen turns accepted wisdom on its head, revealing not only that globalization began much earlier than previously thought, but also that the world's first anti-globalization riots did too, in cities such as Cairo, Constantinople, and Guangzhou. Introducing players from Europe, the Islamic world, Asia, the Indian Ocean maritime world, the Pacific and the Mayan world who were connecting the major landmasses for the first time, this compelling revisionist argument shows how these encounters set the stage for the globalization that would dominate the world for centuries to come. _____ "A lively and engrossing book that describes in fascinating detail how trade enriched the world" Gerard deGroot, *The Times* "A tour-de-force . . . offers many new ways of thinking about the past" Katrina Gulliver, *Spectator* "Provocative . . . a smart, broad-ranging survey of the global Middle Ages that is learned, thought-provoking - and perfectly tuned to our times" Dan Jones, *Sunday Times*

Eurafrica May 07 2020 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. In order to think theoretically about our global age it is important to understand how the global has been conceived historically. 'Eurafrica' was an intellectual endeavor and political project that from the 1920s saw Europe's future survival - its continued role in history - as completely bound up with Europe's successful merger with Africa. In its time the concept of Eurafrica was tremendously influential in the process of European integration. Today the project is largely forgotten, yet the idea continues to influence EU policy towards its African 'partner'. The book will recover a critical conception of the nexus between Europe and Africa - a relationship of significance across the humanities and social sciences. In assessing this historical concept the authors shed light on the process of European integration, African decolonization and the current conflictual relationship between Europe and Africa.

Face and Mask Nov 12 2020 A cultural history of the face in Western art, ranging from portraiture in painting and photography to film, theater, and mass media This fascinating book presents the first cultural history and anthropology of the face across centuries, continents, and media. Ranging from funerary masks and masks in drama to the figural work of contemporary artists including Cindy Sherman and Nam June Paik, renowned art historian Hans Belting emphasizes that while the face plays a critical role in human communication, it defies attempts at visual representation. Belting divides his book into three parts: faces as masks of the self, portraiture as a constantly evolving mask in Western culture, and the fate of the face in the age of mass media. Referencing a vast array of sources, Belting's insights draw on art history, philosophy, theories of visual culture, and cognitive science. He demonstrates that Western efforts to portray the face have repeatedly failed, even with the developments of new media such as photography and film, which promise ever-greater degrees of verisimilitude. In spite of sitting at the heart of human expression, the face resists possession, and creative endeavors to capture it inevitably result in masks—hollow signifiers of the humanity they're meant to embody. From creations by Van Eyck and August Sander to works by Francis Bacon, Ingmar Bergman, and Chuck Close, Face and Mask takes a remarkable look at how, through the centuries, the physical visage has inspired and evaded artistic interpretation.

The Year 1000 Nov 24 2021 From celebrated Yale professor Valerie Hansen, a groundbreaking work of history showing that bold explorations and daring trade missions connected all of the world's great societies for the first time at the end of the first millennium. People often believe that the years immediately prior to AD 1000 were, with just a few exceptions, lacking in any major cultural developments or geopolitical encounters, that the Europeans hadn't yet reached North America, and that the farthest feat of sea travel was the Vikings' invasion of Britain. But how, then, to explain

the presence of blonde-haired people in Maya temple murals at Chichén Itzá, Mexico? Could it be possible that the Vikings had found their way to the Americas during the height of the Maya empire? Valerie Hansen, an award-winning historian, argues that the year 1000 was the world's first point of major cultural exchange and exploration. Drawing on nearly thirty years of research, she presents a compelling account of first encounters between disparate societies, which sparked conflict and collaboration eerily reminiscent of our contemporary moment. For readers of Jared Diamond's *Guns, Germs, and Steel* and Yuval Noah Harari's *Sapiens*, *The Year 1000* is an intellectually daring, provocative account that will make you rethink everything you thought you knew about how the modern world came to be. It will also hold up a mirror to the hopes and fears we experience today.

Theoderic and the Roman Imperial Restoration Aug 10 2020 *Theoderic and the Roman Imperial Restoration* offers a new interpretation of the fall of Rome and the "barbarian" successor state known as Ostrogothic Italy. Relying primarily on Italian textual and material evidence, Jonathan J. Arnold demonstrates that the subjects of the Ostrogothic kingdom viewed it as a revived Roman Empire and its king, Theoderic, as its emperor. Most accounts of Roman history end with the fall of Rome in 476 or see the Ostrogothic kingdom as a barbarous imitator. This book, however, challenges such views, placing the Theoderican epoch firmly within the continuum of Roman history.

The Alamo Reader Sep 10 2020 If everyone was killed inside the Alamo, how do we know what happened? This surprisingly simple question was the genesis for Todd Hansen's compendium of source material on the subject, "The Alamo Reader". Utilising obscure and rare sources along with key documents never before published, Hansen carefully balances the accounts against one another, culminating in the definitive resource for Alamo history.

History Revisited Aug 22 2021 Study of historical narratives of 20th-century Danish writer Thorkild Hansen.

The Silk Road Nov 05 2022 The Silk Road is as iconic in world history as the Colossus of Rhodes or the Suez Canal. But what was it, exactly? It conjures up a hazy image of a caravan of camels laden with silk on a dusty desert track, reaching from China to Rome. The reality was different--and far more interesting--as revealed in this new history. In *The Silk Road*, Valerie Hansen describes the remarkable archeological finds that revolutionize our understanding of these trade routes. For centuries, key records remained hidden--sometimes deliberately buried by bureaucrats for safe keeping. But the sands of the Taklamakan Desert have revealed fascinating material, sometimes preserved by illiterate locals who recycled official documents to make insoles for shoes or garments for the dead. Hansen explores seven oases along the road, from Xi'an to Samarkand, where merchants, envoys, pilgrims, and travelers mixed in cosmopolitan communities, tolerant of religions from Buddhism to Zoroastrianism. There was no single, continuous road, but a chain of markets that traded between east and west. China and the Roman Empire had very little direct trade. China's main partners were the peoples of modern-day Iran, whose tombs in China reveal much about their Zoroastrian beliefs. Silk was not the most important good on the road; paper, invented in China before Julius Caesar was born, had a bigger impact in Europe, while metals, spices, and glass were just as important as silk. Perhaps most significant of all was the road's transmission of ideas, technologies, and artistic motifs. *The Silk Road* is a fascinating story of archeological discovery, cultural transmission, and the intricate chains across Central Asia and China.

The Triumph of Seeds Oct 31 2019 "The genius of Hanson's fascinating, inspiring, and entertaining book stems from the fact that it is not about how all kinds of things grow from seeds; it is about the seeds themselves." --Mark Kurlansky, New York Times Book Review We live in a world of seeds. From our morning toast to the cotton in our clothes, they are quite literally the stuff and staff of life: supporting diets, economies, and civilizations around the globe. Just as the search for nutmeg and pepper drove the Age of Discovery, coffee beans fueled the Enlightenment and cottonseed sparked the Industrial Revolution. Seeds are fundamental objects of beauty, evolutionary wonders, and simple fascinations. Yet, despite their importance, seeds are often seen as commonplace, their extraordinary natural and human histories overlooked. Thanks to this stunning new book, they can be overlooked no more. This is a book of knowledge, adventure, and wonder, spun by an award-winning writer with both the charm of a fireside story-teller and the hard-won expertise of a field biologist. A fascinating scientific adventure, it is essential reading for anyone who loves to see a plant grow.

Future-Proofing the News Aug 02 2022 News coverage is often described as the "first draft of history." From the publication in 1690 of the first American newspaper, Publick Occurrences, to the latest tweet, news has been disseminated to inform its audience about what is going on in the world. But the preservation of news content has had its technological, legal, and organizational challenges. Over the centuries, as new means of finding, producing, and distributing news were developed, the methods used to ensure future generations' access changed, and new challenges for news content preservation arose. This book covers the history of news preservation (or lack thereof), the decisions that helped ensure (or doom) its preservation, and the unique preservation issues that each new form of media brought. All but one copy of Publick Occurrences were destroyed by decree. The wood-pulp based newsprint used for later newspapers crumbled to dust. Early microfilm disintegrates to acid and decades of microfilmed newspapers have already dissolved in their storage drawers. Early radio and television newscasts were rarely captured and when they were, the technological formats for accessing the tapes are long superseded. Sounds and images stored on audio and videotapes fade and become unreadable. The early years of web publication by news organizations were lost by changes in publishing platforms and a false security that everything on the Internet lives forever. In 50 or 100 years, what will we be able to retrieve from today's news output? How will we tell the story of this time and place? Will we have better access to news produced in 1816 than news produced in 2016? These are some of the questions Future-Proofing the News aims to answer.

A History of Dupont Circle Sep 22 2021 During the Gilded Age, Dupont Circle was Washington's undisputed center of wealth, power and status. Over twenty years, it evolved from small farms and an overrun city cemetery to a community of grand homes for society's elite. Residents included future president William Taft, inventor Alexander Graham Bell, newspaper publisher Cissy Patterson and many more. From the intimate dinners and receptions of the Cave Dwellers to the lavish balls of Mary Townsend and others in the "smart set," Dupont Circle marked each social season in the capital. Satirized in Mark Twain's novel "The Gilded Age," the nouveau riche lifestyle of Dupont Circle was fodder for newspaper celebrity gossip. Author Stephen Hansen brings to life the intriguing history of Washington's famed Dupont Circle.

The Open Empire Sep 03 2022 An innovative approach to early Chinese history, now updated and expanded up to 1800. The Open Empire takes an integrative, thematic approach to early Chinese history, using the concept of the "open empire" to highlight the dynamic, porous nature of China's past. Hansen builds her chronological narrative on a rich variety of archeological and literary sources to flesh out the details of daily life, family relations, and social hierarchies. In the Second Edition, the narrative has been updated with findings from recent scholarship and streamlined throughout to highlight the main themes. A new chapter on the Qing Empire, 1600-1800, carries the story of the "open empire" up to the birth of modern China.

The Routledge History of Disability Jun 19 2021 The Routledge History of Disability explores the shifting attitudes towards and representations of disabled people from the age of antiquity to the twenty-first century. Taking an international view of the subject, this wide-ranging collection shows that the history of disability cuts across racial, ethnic, religious, cultural, gender and class divides, highlighting the commonalities and differences between the experiences of disabled persons in global historical context. The book is arranged in four parts, covering histories of disabilities across various time periods and cultures, histories of national disability policies, programs and services, histories of education and training and the ways in which disabled people have been seen and treated in the last few decades. Within this, the twenty-eight chapters discuss topics such as developments in disability issues during the late Ottoman period, the history of disability in Belgian Congo in the early twentieth century, blind asylums in nineteenth-century Scotland and the systematic killing of disabled children in Nazi Germany. Illustrated with images and tables and providing an overview of how various countries, cultures and societies have addressed disability over time, this comprehensive volume offers a global perspective on this rapidly growing field and is a valuable resource for scholars of disability studies and histories of disabilities.
